As a Yankee fan, New York's Senator D'Amato has no trouble seeing why a bat with too much pine tar cost George Brett a home run and the Kansas City Royals a ninth-inning victory Sunday. Baseball rules 1.10(b) and 6.06(d) forbid any foreign substance more than 18 inches above the handle. "Sure, it was fine print," says the Republican Senator, "but a rule's a rule."

It certainly is, in every American's congenital sense of law and fair play. So what about the rules—Congress's rules—against undeclared war in foreign countries like Nicaragua? Respect for the rules, and for the Constitution, is not an empty ritual. It's as American as baseball, whose thick rulebook is the first Constitution of most American youngsters. The book binds Yankees as well as Royals. Slugger Reagan may not like the fine print, but who exempted him?

Congress has been willing, with misgivings, to vote for open aid to Honduras, if that can be shown as necessary to stop Nicaragua from slipping arms to rebels in El Salvador. But Congress has expressly forbidden a secret war to overthrow Nicaragua's leftist regime. The President denies any such intention, but the telltale grease is all over his bat.

The small bands of Nicaraguan exiles hitherto used to "harass" the alleged weapon routes are said to be failing. So now the C.I.A. wants a 10,000-man invasion force. Cuba's training and aid missions inside Nicaragua are to become targets for its sabotage and destruction. American ships

and planes are to fly in support of these operations. And Mr. Reagan, defining his objectives, says peace is incompatible with Sandinista rule in Nicaragua.

These plans were not supposed to be revealed until after the House of Representatives had voted this week on the new aid request for the anti-Sandinista army of Nicaraguan "contras." The plans were in any case to be misrepresented as something other than what they are: acts of war.

Since President Reagan feels uninhibited by the law so far, it is important that Congress now make its meaning unmistakably clear.

Representatives Boland and Zablocki two mainstream Democrats, propose that $80 million be allocated for curbing any arms traffic—provided, however, that the plans are public and can be shown to have no more devious purpose. If any of the money turned out to be financing a secret war to overthrow the Nicaraguan junta, the money authorization would be terminated forthwith.

This is not a case of writing rules in midgame; the proposed limitation only takes President Reagan at his word. As freshly restated by his Ambassador to Managua, Anthony Quainton, the word is that American policy aims not to topple the Sandinista regime but rather "to modify its behavior in some substantial ways." Congress has already said that the only justifiable "behavior modification" by force has to be confined to external behavior—the kind that clearly threatens other nations.

Yet Administration officials already plan to use the money for the biggest covert operation since Vietnam, for also doubling the number of American soldier-advisers in El Salvador, for permitting them to operate "in the field" though not "in combat" (whatever that distinction means) and of an all-American naval blockade against Nicaragua.

The United States is being taken to war not only without a declaration from Congress but against its expressed desire. Americans, including Congress, are being asked to let the President and his C.I.A. be the only judges of the national interest, irrespective of either international or domestic law.

We don't know what George Brett thinks about that, but we feel certain that a young Illinois Congressman in 1848 would have voted for Zablocki-Boland as the best way to affirm his sense of the nation's values.

"Allow a President to invade a neighboring nation whenever he deems it necessary," he said, ". . . and you allow him to make war at pleasure. Study to see if you can fix any limit to his power in this respect after you give him so much as you propose."

That Congressman was Abraham Lincoln, whom you might call a home-run hitter.●

TRIBUTE TO DR. JAMES S. SPENCER

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. SIMON. Mr. Speaker, Dr. James S. Spencer, chancellor of Illinois Eastern Community Colleges, will retire this year. I would like to bring to the attention of my colleagues the enormous contributions to the cause of public higher education that Dr. Spencer has made during his career.

He began as a high school social science teacher and went on to become a principal, a superintendent, a professor, a college president, and, finally, a chancellor. In each of these capacities and in his numerous positions on State-level committees, Dr. Spencer has worked tirelessly as an advocate of public education for all citizens. He believed that free higher education should be accessible to all, that Illinois should have a system of tuition free community colleges, and that the government should provide equalization funding for community colleges in Illinois that do not have a substantial tax base.

While chancellor of Illinois Eastern Community Colleges he developed college transfer, vocational-technical, adult, and continuing education programs at his colleges. He also advocated funding for tribally controlled community colleges and chaired the north central accreditation visits to two Indian schools.

But Dr. Spencer was not satisfied with just increasing the availability of higher education, he was also devoted to increasing the quality of education. He saw the need for foreign language training and high standards for athletes, and increased the quality of specialized, high-cost programs by developing the collegiate common market.

At a time when our Nation's public education system is receiving sudden and some unfavorable publicity, Dr. Spencer serves as a testimonial to the many men and women who have dedicated their lives to improving the system. Dr. Spencer opened the door for many, from high schoolers who thought they could not afford to go to college to working parents who never got a chance to finish high school. It is my privilege to pay tribute to James Spencer. I hope his retirement is as rewarding to him as his years of service have been to the people of the State of Illinois.●

SENATE—*Friday, July 29, 1983*

(Legislative day of Monday, July 25, 1983)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Almighty God, great forests in our land—thousands of acres of valuable timber—have been destroyed by fire started by a little spark. Central America is like a tinder box of confusion and conflict. Dear God, guide our Government in its involvement. Remembering the words of St. James, "* * * the tongue is a fire, a world of iniquity * * * that setteth on fire the course of nature * * *" (James 3: 6), help the administration, the Congress, and all responsible individuals not to say or do anything which will ignite a conflagration. Dear God, guide the leaders of our Nation and the nations in Central America that we may have peace. We pray this in the name of the Prince of Peace. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

IN MEMORY OF MR. GELINDO DURANTE

Mr. BAKER. Mr. President, those who waited patiently until today for this week's poem will, I trust, not be disappointed by the selection. It is a poem written in memory of Mr. Gelindo Durante, who died of Lou Gehrig's disease. The author is Kent Frederickson, a resident of the U.S. Veterans' Administration Medical Center in Leeds, Mass. Kent describes himself as completely quadriplegic, but that obviously does not deter from his excellent prose and uncommon compassion. I ask unanimous consent that his poem be printed in the RECORD, and that an article about Kent which appeared in the Daily Hampshire Gazette also be printed.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A VETERANS PROJECT TEACHES MORE THAN WRITING: ONE OF THE POETS: KENT FREDERICKSON

It takes less than an hour for Kent Frederickson to remind you that there is much about learning, and about life, that you do not know.

He lives in a room at the U.S. Veterans Administration Medical Center in Leeds. Twenty-one years ago, when he was teaching at Greenfield Community College, he was diagnosed as having multiple sclerosis. Today, he describes himself as "completely quadriplegic."

He sits in a wheelchair, a white blanket spread over his legs, motionless hands folded in his lap. On the ledge above his bed are photographs of his parents.

"I got the glad news in 1962 about what my trouble was," he says. It got worse with time. "Like a rat, I was hugging the walls, so I wouldn't fall over."

By 1967 he could only teach parttime. "Three years later, I went on sabbatical, and I never went off." By 1972, "I was trapped in my bedroom." The only place to go was to the hospital, and he has been in and out of several ever since. He has been at Leeds, he says quietly, "too long."

Frederickson met Douglas Whynott and Domenic Stansberry last fall.

"He was excited," recalls Whynott, about their first meetings. "It meant he would have a chance to talk with someone about literature. I think he was somewhat of an outsider up there, and this became his major social outlet."

And talk they did—or Frederickson did, as the student-teacher role quickly reversed itself. "He's articulate, brilliant," says Stansberry. "We more or less just listened." As the weeks went by, the sessions in Frederickson's room grew less formal. "I'd sit in the wheelchair, and spin around, Domenic would put his feet up on the bed, and we'd talk," Whynott recalls.

Some days, Frederickson would recite favorite poems by Frost and Pope, or talk about his recent readings or thoughts about the Greek influence on Christian civilization, or ruminate about what he calls those "curious links in history." What does it mean that Thomas Jefferson and John Adams both died on the same day, and both on July 4?, he wonders.

And the former teacher wasn't shy about handing out a gentle reprimand now and then. "You'd walk into his room," Stansberry remembers, "and he'd say, 'last week, you remarked on a line I'd written—and I don't think you were correct.' "

But Frederickson, of course, realizes he should know more than the two students. "I have a Ph.D.," he says with a smile. "They're only working on theirs." He enjoyed them both. The tall, sandy-haired Whynott was the "good New Englander," he says, but Frederickson can't resist a barb at Stansberry's let-it-all-hang-out California. The right eyebrow arches ever so slightly. "Well, I think you ought to keep something back."

Together, the three of them rediscovered Frederickson's writings. "I'd forgotten some of them completely," says Frederickson. For the two younger writers, seeing Frederickson's work in print was deeply satisfying. "He had all that work sitting in a drawer somewhere, and we came along and helped him bring it back to life," Whynott says. They chose eight to be printed in "Voices from the Hill."

Frederickson began writing during his graduate years at Harvard University in the 1950s, when he wrote the first of what is now a collection of 50 sonnets.

There are, he says with a smile, those "persnickety types" who insist that the only perfect sonnets are those written in the 8/6 rhyme scheme used in the Italian sonnet. But, he says, English has so few rhyming words that it is "poverty-stricken" compared to Italian. "So I invented what I call the American sonnet" to remedy that. In it, he adapts a more flexible rhyme scheme to the 14 lines.

Some of his sonnets are about people he has shared time and experiences with during his hospital stays. In others, inspiration came from the material world, and imagination.

He finds much contemporary poetry "badly written, illogically chopped up prose." That leaves him, he says, securely outside the mainsteam—at least "I hope so," he says.

These days, he "reads" politics, science, and economics by listening to books recorded on tape. "I've been turned off fiction ever since I've been here," he says, except for novels by P. G. Wodehouse. When he listens to those tapes, "I'm lying there laughing so hard the tears run down my face." Another recent favorite was Henry Fairlie's "The Two Parties,"—"I think I've listened to that one three times."

Finding the books he wants to read on tape can be frustrating. Many books are not on tape at all, and those that are are not always what he wants to read. "You wouldn't believe the junk," he says. He looks to other outlets, too.

The radio next to his bed is often tuned to classical music stations. Sometimes in the morning, he watches the early news on television. But "when a commercial comes on, I turn away and think. On weekends, I listen to music and daydream."

He does not elaborate. "So . . . we go back to the verse."

In memory of Mr. Gelindo Durante, who died of Lou Gehrig's disease.

A bony little old Italian man
Wasting incurably, he never spoke
Of dread to me. He'd rather crack a joke
About the nurse or omnipresent pan.
He called his wheelchair his deluxe sedan.
I'd light his cigarette. He still could smoke
Despite his useless arms.
Against his yoke
He'd lean to drop his ashes in a can.
Once dolce far niente crossed my mind
To make sport of this sweet man's bitter case.
His life-enhancing manner was enshrined
In that mortal hall of fame we're all assigned
Called death, the dull and final commonplace.
Spirit prevails. I've seen it face to face.

—KENT FREDERICKSON.

SENATE SCHEDULE

Mr. BAKER. Mr. President, this morning, after the two leaders are recognized, there will be special orders in favor of three Senators. However, the time allocated to the distinguished minority leader on a special order has been assigned, at his request, to the distinguished Senator from Michigan (Mr. RIEGLE). All together, the leader time and the three special orders will take about an hour.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. President, I ask unanimous consent that after the execution of the special orders, there be a period for the transaction of routine morning business, not to extend past 12 noon, in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RADIO MARTI

Mr. BAKER. Mr. President, at 12 noon, the Senate will resume the consideration of the unfinished business, which is a motion to proceed to the consideration of S. 602, the Radio Marti bill.

SUPPLEMENTAL APPROPRIATIONS—CONFERENCE REPORT

If possible and available, I should like to ask the Senate to take up the supplemental appropriations conference report this afternoon.

The House of Representatives did not pass that measure last evening. I understand that it is not likely that we will have it here before midafternoon—after 3 p.m. Based on that, it appears that we will have a late Friday afternoon.

I urge and caution Senators not to expect to be able to leave early. I indicated to some Senators yesterday that I hoped we could be out by 2 or 3 p.m. today, and I especially invite their attention to this announcement, because I do not want them to be taken unaware. That estimate was based on the assumption that the House would deal with that conference last evening, as first indicated to me. That did not occur. Therefore, we will be in later, in all likelihood, than I anticipated.

Let me repeat: The predictions I made yesterday about midafternoon are off. I think it will be later in the day; and if pressed to make an estimate, I would say it probably will be 6 p.m. before we finish.

I still do not expect a Saturday session. It is not impossible, but as of this moment, I do not see it. The Senate will be in Monday, of course.

REQUEST FOR ADJOURNMENT UNTIL 11 A.M. ON MONDAY NEXT

Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 11 a.m. on Monday next.

Mr. BYRD. Mr. President, I object for the moment. I know that the leader can do whatever he wants on this matter because the motion to adjournment is not debatable, but I wish he would withhold that request for the moment, until we talk about it.

Mr. BAKER. Mr. President, I do withhold that request.

That is all I have at the moment. I reserve 1 minute of my time, if I may.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

Mr. BAKER. I yield the floor.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The minority leader is recognized.

EMERGENCY HEARINGS ON CENTRAL AMERICA

Mr. BYRD. Madam President, on a daily basis the Congress and the American people are informed through the news media of our ever-escalating military involvement in the turmoil in Central America. There is no issue of greater importance to the American people than the commitment of our national honor and possibly our men and women in the armed services in foreign military activities.

To date, not only has there been little or no consultation from the administration on the maneuvers in Honduras and in the Caribbean and Pacific Oceans, but also the Senate itself has not exerted its institutional responsibilities, through its committee system, to apprise itself thoroughly of the nature, scope, and risk inherent in our growing involvement.

For that reason I have written a letter today to Senator CLAIBORNE PELL, ranking member of the Committee on Foreign Relations, to urge him, in cooperation with Chairman PERCY, to conduct thorough and intensive hearings on our military maneuvers in that region. Specifically, I have recommended that the committee study the extent to which our military forces are being put at risk with these maneuvers, and the impact of the maneuvers on the war powers resolution.

I have pointed out that if it is necessary to have a closed session, the committee has the authority to do that. But whether the hearings are closed or open, I strongly believe the Senate has over-riding institutional reasons to be fully informed about our escalating military involvement in Central America.

Madam President, I ask unanimous consent that a copy of my letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF THE DEMOCRATIC LEADER,
Washington, D.C. July 29, 1983.

Hon. CLAIBORNE PELL,
Committee on Foreign Relations
Washington, D.C.

DEAR CLAIBORNE. I write you in your capacity as Ranking Minority Member of the Committee on Foreign Relations to urge you, in the strongest terms, to make every effort, in cooperation with Chairman Percy, to convene emergency hearings to review the role of U.S. military forces in Central America.

According to press reports, the military presence of the United States is being significantly increased in this volatile region of the world. At his press conference Tuesday night, the President assured the American people that Americans are not going to be put "in any reasonable proximity to the border." However, today's Washington Post, citing senior United States and Honduran military officials, reports that:

"A major aim of the rapidly escalating U.S. military presence in and around Honduras is to provide a protective shield for this country as U.S.-backed rebel forces operating along the border with neighboring Nicaragua expand their efforts to overthrow the Sandinista government there."

The Post further reports that the first operations of the maneuvers ". . . according to U.S. military officials, will take place in the province of Choluteca which borders on Nicaragua."

As you well know, the Congress of the United States has been kept completely in the dark as to the purpose, scope, and danger to American forces of this significant projection of American military forces. Therefore, I belive it is essential that your Committee, which has jurisdiction over the War Powers Resolution, ascertain as quickly as possible the extent to which American forces will be put at risk by these maneuvers. It is also essential that your Committee determine whether or not these maneuvers, especially those of our ground forces in Honduras, would trigger Section 1543(a) of the War Powers Resolution requiring Congressional approval for deployment of these forces beyond 60 days.

I strongly urge that these hearings be held prior to the August recess, that they be thorough and intensive, and that the Committee issue a report on these hearings as soon as possible.

Committee members may determine that certain elements in the testimony need to be reviewed in closed session. Whether the hearings are closed or open, I strongly believe that the Senate has the most powerful institutional reasons to be fully informed about our excalating military involvement in Central America.

Thank you for your attention to this critical matter.

Sincerely yours,

ROBERT C. BYRD.

Mr. BYRD. Madam President, I understand that the distinguished Senator from Wisconsin wishes to have a little of my time. I yield to the Senator.

Mr. PROXMIRE. I thank the distinguished minority leader.

CAN WE STOP THE NUCLEAR ARMS RACE? VERY DOUBTFUL

Mr. PROXMIRE. Madam President, what has happened to nuclear arms

control negotiations? Not much news from that source lately and here the answer, unfortunately, is that no news is bad news. Both this country and the Soviet Union race ahead in the nuclear arms race. The Russians continue the massive buildup that has moved them sharply ahead of this country in stationary land-based missiles, in hard target kill capacity, in megatonnage, and lift capacity. If there has ever been any doubt about the Russian ability to destroy this country in a surprising first strike, or in retaliation after they have been hit with a first-strike attack, the Russians certainly have erased that doubt. But do they stop? No, they go on and on.

On our side, we have a wide lead in survivable, virtually invulnerable nuclear power. We have far more warheads on our submarines than the Soviets have. Our Secretary of the Navy and the Chief of U.S. Naval Command have both testified that not only is our submarine deterrent invulnerable; they say it will become even more invulnerable as the years go by. At this very moment, our submarines carry 3,000 nuclear warheads at sea at all times, compared to an estimated 300 carried by Russian submarines. Similarly, we have far more nuclear warheads borne by our bombers and we carry many times more nuclear bombs in the air at all times than the Soviets.

So there can be no doubt that we, like Russia, also have an absolutely certain survivable deterrent—a capability of striking back with an utterly and totally destructive retaliation against the Soviet Union in the event they would institute an attack against us.

Both superpowers have ample, complete deterrents. And additions of more nuclear arms now are redundant. Even the most bloodthirsty hawks—American or Russian—can or should be satisfied with a freeze on nuclear weapons, because both sides have all the nuclear military power they can use.

The two arsenals differ. The Russians' arsenal is heavier in megatonnage and throw-weight. We have more warheads and have a more survivable arsenal. But the comparisons mean nothing, because the real message is that right now with no additional nuclear testing or deployment, both sides can destroy the other, utterly and completely, as organized societies.

Yes, we go on and on. Why? We are insisting on deploying intermediate nuclear weapons in Europe. And the best evidence now tells us that we almost surely will. The intermediate range missile negotiations seem to have ground to a virtual halt. With every day that passes without progress, the likelihood of succesful negotiations dims. But if we go ahead and deploy, as very likely we will, the Russians have assured us that they will increase their nuclear missiles trained on Europe. And they will.

Meanwhile, we go ahead with our 10-warheads per missile, 100 missiles MX program. The Russians have indicated they will match that. Also, we are going to build more Trident submarines and equip them with by far the most devastating, hard target kill nuclear missile ever deployed at sea—the D-5. And there is no sign we will slow down, let alone abort, our construction of B-1B bombers, to be followed shortly by Stealth bombers.

The Russians undoubtedly will do their best to match these U.S. advances one way or another. On and on the nuclear arms race rolls. And that is not all. A few weeks ago, the President announced his intentions to move ahead with a new antiballistic missile initiative. President Reagan said that we have the potential scientific know-how and we would move to exploit that know-how to develop missiles that will intercept Russian missiles in space and shoot them down. Of course, this would be a true disaster for arms control, because it would kill one of the few successful arms control agreements—the Antiballistic Missile Treaty of 10 years ago. It would surely destabilize the nuclear balance between the United States and the Soviet Union. It would force the Soviets into the same kind of rush to be first in a new space war, and it would put whoever seemed to be losing ground in such a race in the posture of striking before the other nation developed the facility that would destroy its deterrant.

And even that is not all. The Russians have developed a crude, partially effective satellite killer. So what follows? That is right: this country is in the process of developing a more effective and assured satellite killer. This constitutes the most serious threat of all to nuclear peace, because satellites provide the prime prerequisite for any kind of arms control.

So on many fronts, Madam President, the two superpowers are rushing ahead to the edge of the cliff. Then what hope is there? "In Living With Nuclear Weapons," the Harvard study group sets forth in a brief passage the role of public opinion to stop the arms race. Unfortunately, public opinion plays its role only in this country. It plays no role in the Soviet Union.

But there is another force that may be at work in the Soviet Union about which I shall say more in the future. It is the limiting effect of a ponderous and inefficient economic system that seems to be slowing more and more with each passing year and that limits not only the Soviet living standards but also their military potential and offers the Soviets the tough choice of continuing to race ahead militarily while starving their industrial base, or to slow down their pace of military buildup to give their industrial base a chance to move ahead and give them a stronger long-run position.

The Harvard study's analysis of the role of public opinion in arms control in our country is perceptive and realistic, and I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE ROLE OF PUBLIC OPINION

Arms control has tended to succeed in the United States in periods of significant public involvement and concern. The 1963 Test-Ban Treaty and the 1972 ABM Treaty both were achieved during such periods. One of the most interesting developments of the early 1980s was the remarkable rise of public interest and public protest in the area of nuclear policy. Failure of the U.S. to ratify SALT II, after a similar failure to ratify two treaties negotiated in 1976 to further limit nuclear tests, suggested to the public that arms control was not working, and that the principal diplomatic lever for controlling the arms competition was stuck. The 1980 election was filled with rhetoric about rearmament. Concern in Europe about these events and the plans to deploy new nuclear weapons helped to stimulate mass movements. A year-long series of pronouncements by the U.S. president and his secretaries of state and defense which reflected a preoccupation with improving U.S. nuclear war-fighting capability and a new level of hostility toward the Soviet Union followed. This was accompanied by rapidly increasing military budgets.

As budgets and rhetoric escalated, so did the memberships and the influence of public and professional groups opposed to nuclear war. Physicians' groups, some dating from the campaign against nuclear testing two decades earlier, were particularly effective in reminding Americans of the horrible human suffering and death that would accompany nuclear war. Because of this revival of public interest in arms control, the current nuclear freeze movement, the careful examination of the moral basis of nuclear policy by the U.S. Catholic bishops, and intensified support for arms control in the scientific and professional community came into being.

The nuclear freeze movement began in the spring of 1980 with a call for bilateral, verifiable freeze on the production, testing, and deployment of all nuclear weapons systems in the U.S. and the USSR. Its aim is to prevent further development or deployment of counterforce and other destabilizing weapons, and to stabilize the current balance so that reductions can go forward. Various freeze resolutions were supported by the electorates in eight (of nine) states where it appeared on the ballot in November 1982. Public opinion polls at the end of 1982 showed the freeze idea appealed to some three-quarters of the public if it is verifiable and would grant no significant advantage to the Soviet Union. The same polls showed overwhelming opposition to unilateral disarmament and considerable mistrust of the Soviet Union.

Earlier freezes suggested by Presidents Johnson and Carter did not have any obvious drawing power, nor have the various moratoria proposed by the Soviet Union. But with the combination of the seemingly

bellicose pronouncements of the early Reagan administration and the belief that arms control was not being seriously pursued, the freeze movement took hold with the public. Considering the difficulty of any treaty of substance gaining the two-thirds Senate vote needed for ratification, this degree of public arousal may turn out to be an essential requirement for any future arms control agreement.

In Europe, the anti-nuclear opposition has focused on deployment of new NATO missiles and is strongest in northern Europe and among the Protestant churches. By contrast, in the U.S. the initiative from the religious sector has come from the Catholic bishops. This has taken the form of a well-planned, deliberate debate.

A further indication of the spread of concern is seen in the mobilization of support for arms control in the scientific community. Not only are activist scientists busy refining freeze proposals, but the establishment itself is involved. For the first time the National Academy of Sciences passed virtually unanimously a resolution urging intensified efforts at the negotiating table and adherence to the still unratified treaties. A carefully crafted statement by the presidents of scientific academies and other leading scientists on these matters was presented to Pope John Paul II in September 1982. It urged curbing "the development, production, testing and deployment of nuclear weapons systems and their reduction to substantially lower levels," claiming that "the sole purpose of nuclear weapons, as long as they exist, must be to deter nuclear war," and calling upon all nations "never to be the first to use nuclear weapons."

This brief overview cannot convey the full extent of the diversity and vigor of the new public engagement in nuclear policy. Like public involvements in the past, this one may be changed or move in new directions. But it seems likely that this new force will prove durable enough to affect government policies.

DOCUMENTED GENOCIDE

Mr. PROXMIRE. Madam President, on June 28 of this year, I alerted this body to the unknown war and forgotten victims of the Indonesian aggression against East Timor. I was encouraged by an article which appeared that same day in the Christian Science Monitor indicating that Indonesia and the Timorese rebels had finally started talking after 8 years of warfare.

I was, therefore, deeply troubled to read Ken Pottinger's article in the July 22 issue of the Christian Science Monitor reporting new revelations about systematic torture and Government-sanctioned violence by the Indonesians against the Timorese. Mr. Pottinger, a correspondent who has been following the Timor story closely, recounts charges leveled at Indonesia by Amnesty International, the London-based human rights organization. Amnesty International drew attention to "the details of torture techniques in the 82-page document . . ." which it received after the document was smuggled out of Indonesia. The document Amnesty International referred to was an Indonesian military handbook.

Madam President, this Indonesian military handbook confirms two facts. First, the anti-Indonesian struggle is by no means over. Previous reports from Indonesian President Suharto's government would have us believe the contrary. Second, and most important, the handbook is documentary evidence of a systematic program which inflicts, in the words of the Genocide Convention, "serious bodily harm to members" of a racial, ethnical, national, or religious group.

The applicability of the Genocide Convention to the case of East Timor is overwhelmingly evident. The absence of the United States from the roster of adherents to the Convention is disgraceful. It places us in the company of states like Indonesia which have also failed to ratify the Convention.

Madam President, Mr. Pottinger's article is distressing in light of earlier hopeful signs of a solution to this terrible situation. The charges which Amnesty International has made against the Indonesian forces are serious. The fact that documentary evidence exists to back up these charges is significant.

Unfortunately, the United States is currently in no position to act on this problem. Our failure to ratify the Genocide Convention not only besmirches our moral position within the family of nations, it also ties our hands in dealing with this problem.

I hope that my colleagues will join me in the effort to secure Senate approval of the Genocide Convention. Perhaps if Senators could read about the blatant sanctioning of genocidal acts by President Suharto, they would be convinced of the immediacy and relevance of the issue which I have discussed here on so many occasions. Madam President, I ask unanimous consent that Mr. Pottinger's article from the Christian Science Monitor be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, July 22, 1983]

AMNESTY INTERNATIONAL CHARGES INDONESIA PERMITS TORTURE IN EAST TIMOR

(By Ken Pottinger)

LISBON.—Repeated Indonesian efforts to deny claims of ongoing guerrilla resistance to the annexation of the former Portuguese colony of East Timor appear seriously discredited by the release of an alleged Indonesian military handbook.

The gravest disclosure of the handbook, supposedly captured by Timorese guerrillas last December, is that torture is used against Timorese dissidents.

In a section on the use of force and violence, the released manual says: "It is hoped that interrogation with the use of violence will not be undertaken except in certain situations where the person interrogated finds it difficult to tell the truth. If you are forced to use violence, no witnesses should be present. . . . Avoid the taking of photographs which show torture. . . ."

The chapter, however, acknowledges that torture is wrong and says: "Too much coercion has been used in the past often resulting in the person admitting his guilt through fear and subsequently following the wishes of the interrogator." This, says the manual, is an obstacle to obtaining accurate information for use in the field.

The London-based Amnesty International organization, which has drawn attention to the details of torture techniques in the 82-page document, claims that the handbook, written in Indonesian, has been verified as authentic by experts on Indonesia.

[In Jakarta Wednesday, a spokesman for the Indonesian Defense and Security Ministry denied the existence of a special military manual for troops serving in East Timor, according to Reuters. Ministry spokesman Rear Adm. Erwin Mangaweang said, "No, it does not exist. We have never issued such a manual for East Timor."]

Information contained in the handbook implies that the guerrilla movement, known as Fretilin, is by no means a spent force despite repeated Indonesian claims to the contrary. Fretilin is the Marxist group displaced from power in East Timor when the Indonesian Army invaded in 1976. It has been resisting the occupation since that time.

The military manual is mainly classified "secret" and is supposedly written by two Indonesian military officers, Maj. Williem Da Costa and infantry Col. A. Sahala Rajagukguk. It was smuggled to Lisbon last month along with other materials for distribution by Fretilin's overseas representatives.

The release of the handbook follows reports last month that Indonesia has negotiated a ceasefire with guerrillas on the island in preparation for bringing an end to the eight year-old conflict.

Tha manual outlines the highly developed Fretilin network in the island's towns and villages and gives advice on how to combat the guerrillas and their sympathizers. The detailed nature of the chapters, which describe the guerrilla network as it existed at the time of writing of the manual (September 1982), underlines the generalized extent of opposition to the Indonesian takeover of the island.

The document concedes that the greatest problems for the Indonesian forces are in the eastern zone of the island—long recognized as a guerrilla stronghold—where it says there are places suffering from food shortages. The authors say the military has successfully dismantled "communist cells" in five regions of the eastern zone south of Bakau, site of the Indonesian military headquarters on the island, but that other areas remain linked to the guerrilla network.

Amnesty International Wednesday disclosed the content of a letter to Indonesian President Suharto, condemning the possibilities for torture contained in the document and stating that "all governments are bound by international human rights standards prohibiting torture in all circumstances."

Amnesty said it had asked President Suharto to issue instructions prohibiting torture by all forces under his command.

ORDER OF PROCEDURE

Mr. BAKER addressed the Chair.

Mr. BYRD. I believe I have the floor.

The PRESIDING OFFICER. The Democratic leader does have the floor.

Mr. BYRD. I yield to the majority leader.

Mr. BAKER. I was going to yield back the time, and it dawned on me that the minority leader had the floor.

Mr. BYRD. If the majority leader or the assistant majority leader have no further use for time, I yield back my time.

RECOGNITION OF SENATOR RIEGLE

The PRESIDING OFFICER. Under the previous order, the distinguished Senator from Michigan (Mr. RIEGLE) is recognized for not to exceed 15 minutes.

Mr. RIEGLE. Madam President, if I may have the attention of the minority leader, it is my understanding he yielded his time under the special order to me.

The PRESIDING OFFICER. The Senator from Michigan is correct. The Senator from West Virginia has yielded 15 minutes of his time.

Mr. RIEGLE. I thank the Chair.

CENTRAL AMERICA

Mr. RIEGLE. Mr. President, only rarely do I seek Senate floor time under a special order to deliver a major statement. I do so today because of the gravity of the situation in Central America and my deep concern that administration policy is leading toward major U.S. military involvement in that region.

It is my belief that an Americanized military conflict in Central America must be avoided. Our top military officers have openly expressed this view publicly and I believe they are right.

Despite President Reagan's statement that we do not seek a war in Central America—or direct armed U.S. military intervention there—the pattern of events appear to be heading in that direction.

Within the past 4 days, two significant U.S. military initiatives in Central America have been announced. One involves the dispatch of naval warships to the area, the second involves the planned movement of some 4,000 American combat forces into Honduras for a period of several months.

Whether intended or not, these are war-like acts when taken in the context of the events now taking place in El Salvador and Nicaragua and the openly acknowledged and growing covert activities of our Government in the region.

The situation is fraught with dangers of the highest significance—and direct U.S. military participation now appears likely if events continue to move in the same direction we have seen in recent days and weeks.

These dangers must be illuminated for the American people and for the Congress. If American military personnel are to be put at risk in Central America—and if the policy of our Government is leading toward the possibility of open military conflict, then the time to assess these policies and their possible justification is now.

The Congress should not adjourn for the month of August with these major questions unanswered—and with the pattern of U.S. military activities suddenly escalating in Central America.

I am deeply concerned about possible future events in Central America and the lack of any clearly stated U.S. policy in this regard.

Let me indicate why I am so concerned.

First, the two U.S. military initiatives announced this week came as a complete surprise to those of us here in Congress.

Contrary to past practice, neither the majority nor minority leaders of the Senate were consulted or advised of these military initiatives prior to their public announcement. This also appears to be true for the House leadership on both sides of the aisle.

This lack of consultation with the congressional leadership is a sharp break from past practice extending back through many administrations of both parties. There is no explanation for this change.

With Congress alone having the power to declare war and appropriate all moneys for military and other purposes—lack of consultation of matters of this gravity shows a fundamental misunderstanding of the constitutional process and the institutional requirements of a governmental system of shared powers.

Here in the Senate, when major U.S. military initiatives are being undertaken in a region where hostilities are already taking place, it is imperative that the majority and minority leaders be consulted and advised.

Second, it is not clear how U.S. foreign policy is presently being developed and, in turn, carried out. Here there are two problems. There is great confusion about the policy process itself and there is a lack of a comprehensive understanding of exactly what our policy is and how it is being carried out.

As to the policy process itself we see a bewildering number of participants and activities with nothing to indicate overall coordination and a centralized control point. For example, at present we appear to have the following administration participants: First, a newly established Presidential Commission on Central America, headed by Henry Kissinger, that has been hurriedly assembled; second, a Special Presidential Ambassador to the region, Richard Stone who is busy traveling between Central American countries; third, a recent wholesale shifting of key U.S. diplomats stationed in Central American countries; fourth, Judge Clark, the President's National Security Adviser, who appears to be directly involved in the details of Central America decisionmaking; fifth, George Shultz, Secretary of State, the official normally thought to be in charge of U.S. foreign policy; sixth, Caspar Weinberger, who appears to be in charge of the naval flotilla and the combat forces going into Honduras; seventh, William Casey, who appears to be in charge of covert activities in Central America, and finally; eighth, President Reagan, who as President and Commander in Chief, did little in this week's news conference to provide any clear overall sense of our policy in Central America and where it is leading.

It is not clear to this Senator who in the administration is in charge—or if anyone is in charge. The appearance is one of confusion and overlapping initiatives and jurisdiction—with the clear lack of a well-coordinated unified direction to our Central American policy.

On Tuesday of this week, one of the administration's foreign policy advisers I just named who serves at the very highest level, was unable to answer a very important question from Senator GLENN. That question was whether the U.S. combat forces going into Honduras were being equipped with live ammunition—and orders to fire if fired upon. This official did not know the answer, and further did not seem to be knowledgeable of the critical need for such a determination prior to the authorized deployment of U.S. Armed Forces in turbulent settings.

Next I must express my strong apprehension about the recent named Presidential Commission on Central America.

I do not understand the need for such a group, and how its judgments can properly be substituted for the normal foreign policy decision process and judgments produced by a duly elected administration in consultation with the Congress.

The President of the United States is directly responsible for setting the direction of U.S. foreign policy in consultation with the Congress. The President cannot farm this job out to an ad hoc commission—it is both inappropriate and improper. This is so obvious that it gives rise to the suspicion that the Central America Commission may actually be a public relations ploy to obscure U.S. policy for the next several months and diffuse its public dissemination through a presumed arms-length and balanced public commission. While this Commission has a carefully crafted appearance of supposed bipartisanship and, according to

the President, is balanced equally with supporters and opponents of current U.S. Central American policy, it is, in fact, a stacked Commission, with persons generally supportive of current administration policies in Central America.

By contrast, when the Social Security Commission was earlier established by the Reagan administration, the Democratic leaders in the House and Senate were given a free hand in selecting the Democratic participants. In the Central American Commission, the Reagan administration selected the Democratic participants and informed the congressional Democratic leadership.

Moreover, the composition of the Central American Commission does not contain a single member who has an established record of opposition to administration Central American policy. These factors seriously impair this Commission before it even holds its first meeting.

The selection of Henry Kissinger to head the Commission is particularly unfortunate—and is a choice that I oppose and would strongly challenge if the avenue of Senate confirmation were open to me. The Commission appointment of Mr. Kissinger bypasses the Senate confirmation process, although I understand that Senator HELMS intends to convene hearings in an attempt to challenge Mr. Kissinger's suitability for this assignment. I hope Senator HELMS will persist with this effort.

Those of us who served in Congress during the Vietnam war period, remember it vividly, and Mr. Kissinger's role as the principal architect of the disastrous U.S. policy in Vietnam and Southeast Asia. A host of mistaken actions were taken at that time, and Mr. Kissinger was central to the development of these flawed policies, and actions and the widespread deception of the Congress and the American people. The secret bombing of Cambodia is one prominent example, which Mr. Kissinger and the Nixon administration deliberately concealed from the Congress and the American people. Certainly our enemies in Southeast Asia knew the bombing was occurring—so the secrecy at the time was to mislead the American people.

Mr. Kissinger's role in the wiretapping of American journalists during that period is another unacceptable part of his governmental activities in the past. I could add to this list, but books are readily available on this subject.

Putting Mr. Kissinger in charge of any portion of U.S. policymaking in Central America is a dangerous mistake.

The next cause for serious misgiving is the very nature of the turbulence and rising revolutionary pressures in South and Central America.

Repressive military oligarchies trying to preserve the wealth and power for themselves and a small privileged class are no answer to the massive poverty and social injustice that plagues that region.

People want constructive change and not a continuation of the status quo. Any ideology that plausibly identifies with this desire for fundamental change will attract support.

Our challenge, as Americans who represent a vastly different culture, and who speak a different language, is to relate ourselves and our values to the aspirations of the broad masses of Latin American people. It is a difficult task.

It means supporting new initiatives that directly challenge the status quo in Central and South America. This is inherently unattractive to ruling oligarchies who are our longstanding clients and nominal allies.

Such a condition is ripe for exploitation by other ideologies—including communism—who can ally with the masses against the status quo. If the United States can do no more than dig in on the side of the status quo, then we are surely facing the "big headache" down the road President Reagan referred to this week.

But the headache, if we stay on the present track, will be the need to inject more and more American force and money to prop up ruling oligarchies who cannot win the broad active public support of their own people.

American combat troops are not the answer in Central or South America anymore than they were in Southeast Asia. In fact, the presence of large numbers of uniformed U.S. military personnel on the ground in Central America will provide the greatest rallying cry that our ideological adversaries could ever dare hope for. We "Yankees" are not loved to start with in this region—and if we make the mistake of plunging in with military force—we will make every American soldier a target for those who can be motivated to fight to drive out the "outsiders" and topple the existing power structures we seek to maintain there. If we Americanize this conflict, we are certain long-term losers as I see it. And yet that appears to be the road we are on.

I do not believe the administration sees these risks, and seems to be moving to Americanize the conflict by design or inadvertence.

The logical course and the wisest course is to support the initiatives of other regional governments who are seeking to contain the conflict and settle it by some process of negotiation. If combat forces are needed, they should be regional forces, composed of personnel from the region itself. If the threat is not seen as serious enough to warrant such a mobilized regional effort by other nations in the area—then I question our own diagnosis of the problem and any possible notion that our national will and military force can adequately substitute for what may be lacking in the governments within the region.

This Central American problem must be solved by the parties in Central America, with the United States in a supporting role which deemphasizes U.S. military involvement.

It is also necessary to acknowledge another concern and that is the growing risk of an incident arising which could quickly escalate military events in Central America far beyond any prudent limit.

While the Tonkin Gulf incident may be up in the attic of the public memory, I remember how this alleged attack of a U.S. naval vessel became the basis for a massive U.S. military response in Southeast Asia.

We should be striving at this point to make such an incident in Central America as unlikely as possible. Unfortunately, the administration's actions are moving us in the opposite direction.

One can see how rival forces, or even our own allies who may feel their power slipping, would welcome a chance to help pull the United States more deeply into this quagmire for their own quite separate purposes.

Let me conclude this somber assessment by noting that the faith of the American people in our National Government has been deeply shaken by events in recent years. Vietnam, Watergate, Abscam, improper conduct by elected and appointed Federal officials, failure to deal effectively with epic economic change—have all taken their toll of public faith in our Government.

Today among the American people there is great apprehension about events in Central America and the degree to which the Reagan administration is prepared to involve the United States militarily in the region. We cannot afford to make a grievous national error on this issue.

We have enormous domestic challenges to deal with—and major international obligations as well. In that context, our Nation can and should play a constructive part in helping Central America and South America build a better future for its people.

As one who holds the Senate seat once held by Arthur Vandenberg, I, like him, am an internationalist and feel that our own long run strategic interests and our human values compel us to play an active and constructive role in world events, and particularly so in this hemisphere.

The message I believe our Government should send to the rank and file citizens of the Central American countries is that we deeply share their longing for a better life. We wish to

assist that basic human impulse in every constructive way we can. We are not defenders of the status quo or hostage to narrowly based oligarchies in the region. Neither are we imperialists nor do we seek to impose an American vision upon the people of Central America. We believe in genuine self determination and believe the people of Central America must determine their own future.

We are a Nation born out of revolution. We understand the aspirations of those who seek their own vision of justice for themselves and their children. Life is short and precious—and the yearning of the dispossessed and oppressed was the very heartbeat that brought the United States of America into being.

The tide of history is on the side of human rights and social justice.

Our entry into World War II, the Peace Corps, and the Alliance for Progress were national commitments that moved with that tide and were initiatives we can recall with pride.

Our neighbors to the south should know that here in America is an understanding and a deep respect of their aspirations.

If we here in positions of responsibility in our national government can discern the right steps and avoid the wrong ones, we can play a constructive role in Central America consistent with our heritage, our values, and our interests.

I believe we must change the course the administration appears to be taking in Central America, and we must call upon the American people to also speak out on this vital issue.

An aroused citizenry eventually changed American policy in Vietnam. If we draw upon that painful experience we can act now to change U.S. policy in Central America.

Mr. BYRD. I thank Mr. RIEGLE and I compliment him on his statement. Although I was by necessity called out of the Chamber I will read his statement with great interest.

Mr. RIEGLE. I thank the Senator.

I yield back the remainder of my time.

RECOGNITION OF SENATOR WILSON

The PRESIDING OFFICER. Under the previous order, the Senator from California (Mr. WILSON) is recognized for not to exceed 15 minutes.

S. 1707—COMPETITION IN TELEVISION PRODUCTION ACT

Mr. WILSON. Madam President, I am today introducing the Competition in Television Production Act, S. 1707. This bill will allow for continued vitality and diversity in the television production industry.

It is not startling news that the television industry is under great marketplace control of the three major commercial television networks. They have what some term oligopsony power—that is, the power that is exerted when there are only a limited number of large buyers in the marketplace.

The result of this situation, if left unchecked, is that the sellers of television programs would be subject to undue and unfair pressures by these networks.

There presently exist three rules, promulgated by the Federal Communications Commission in 1970, which have kept this situation in proper balance. They are known as the syndication rule, the financial interest rule, and the prime time access rule.

Together, they serve to insure that the networks act in a responsible, procompetitive fashion in arranging for the production and acquisition of television shows to be aired over their facilities out to their affiliates across the United States.

Prior to establishment of these rules, the networks were pretty much free to dictate the rules of television—free to produce their own programs, free to discourage competition in programming by refusing access to independent producers, free to provide daytime reruns only when and to whom they saw fit.

If the networks wanted to contract for the production of a new show with an independent producer, they did so holding all the cards. For if a producer balked at the terms of a deal offered, he had, effectively, nowhere else to turn. Yes, there are two other networks, but, by custom and for all practical purposes, if a producer were rejected by one network, the others would also bypass him.

With this power of an oligopsony, the networks were able to negotiate favorable deals which allowed for little profit to flow to the independent producers, keeping them small and few in number.

Without the rules, the networks were also able to freely choose when and to whom they would provide the rights for rerunning successful prime time shows. Not surprisingly, the networks tended to wait until the show had run during prime time for a very long time before doling out the most popular shows and tended to favor their own affiliates.

Should there be any doubt about what I have been telling you today, an assessment of what has happened since the enactment of the rules is instructive.

In the 1971-72 television season, when the FCC rules first went into effect, there were only 48 independent producers supplying programming for network prime-time exhibition.

By the 1981-82 season, the number had grown to 81.

In 1970, there were only 65 independent television stations in the United States. By 1982, the number had grown to 179.

Madam President, the networks have claimed before the FCC that they are losing their market power as buyers because of advancements in technology. They suggest that cable television, nonnetwork organizations, and the independent television stations today provide a large enough market to supply a serious alternative to the networks as buyers of television programming.

But the fact is that while change is definitely occurring in the marketplace, the time of equal bargaining power has by no means yet arrived.

The networks today draw over 80 percent of the prime-time audience. By their own projections, the networks will still be drawing 70 percent in 1990, 7 years from now.

Even if the networks are right about their market share in 1990, only 30 percent of the market will be outside their control—a badly fragmented 30 percent made up of small broadcasters fighting for the leftovers. The oligopsony would still be very much in control if these three rules were not retained by the FCC.

Madam President, I do not support Government regulation of the marketplace as a general rule because it tends to discourage free and open competition. In this case, however, without these FCC rules, competition will be strongly discouraged.

As in many other areas of our economy, in television, more is better. The rules have brought us more of everything. Today we have more programs created by more producers that can be sold to more stations than ever before. Television viewers are enjoying more choice because there is an ever-growing pool of competition and diversity.

While the rules have brought new life to television, the networks are now trying to snuff it out. They have joined their resources to convince the FCC to repeal the rules and, unfortunately, the FCC seems to be siding with the networks. An early decision on behalf of the networks is reportedly imminent.

Madam President, my bill would simply bar the FCC from repealing or modifying the existing rules prior to July 1, 1988.

Identical legislation has been introduced in the other body by my colleague from California, Congressman HENRY WAXMAN. That bill, H.R. 2250, enjoys bipartisan support and cosponsorship of 115 Members of the House. It is scheduled for hearings in the near future.

In 5 years, Madam President, we will be in a position to better assess net-

work dominance in the television industry. If the industry is then truly competitive, the rules can then be repealed.

I do not contend for one moment that these rules should be cast in stone or that they should last forever. I do strongly contend that they are needed today and for these next few years not only for healthy competition but also to assure a ready flow of information and entertainment to the public from diverse sources.

Repeal would restore the encompassing commercial power of the networks, a control that has been only slightly diminished in the last decade. Frankly, it would drive a lot of small, fledgling, independent companies right out of business.

Madam President, I ask for the support of my colleagues for this important legislation and its early consideration by the Commerce Committee.

Madam President, I ask unanimous consent that the bill and a description of the issues underlying this matter, in question-and-answer form, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1707

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Competition in Television Production Act".

SEC. 2. In order to maximize competition in the television broadcasting marketplace and to promote diversity of programming sources for the public, the Federal Communications Commission shall not have authority to take any action before July 1, 1988, to repeal, amend, or otherwise modify the provisions or applicability of any of the following:

(a) section 73.658(j)(i) of title 47, Code of Federal Regulations (commonly known as the "Syndication Rule"; 23 F.C.C. 2d 382);

(b) section 73.658(j)(ii) of title 47, Code of Federal Regulations (commonly known as the "Financial Interest Rule"; 23 F.C.C. 2d 382); and

(c) section 73.658(k) of title 47, Code of Federal Regulations (commonly known as the "Prime Time Access Rule"; 23 F.C.C. 2d 382).

QUESTIONS AND ANSWERS

Q. What are the "financial interest and syndication rules"?

The financial interest rule prohibits the three major commercial TV networks (ABC, CBS and NBC) from acquiring a stake in the revenues generated by a program produced by a non-network producer.

The syndication rule prohibits the networks from controlling the syndication rights to any TV programming.

Together, these rules prevent the networks from controlling the sale or licensing of TV programs after the shows have completed their network run.

Q. Why did the FCC adopt these rules?

In the late Sixties, the FCC took a long, hard look at the relationship between the three major TV networks and program producers, as part of an overview of network practices.

The FCC found that a number of factors had conspired to limit American television to three networks. Moreover, these three networks had taken almost complete control of the programs they aired. The networks' power over the program production industry also restricted what shows were available to their competitors, independent (non-affiliated) TV stations.

Unless producers could sell their shows to one of the three networks, the FCC discovered, access to the prime-time TV audience was all but impossible. And when producers negotiated with the networks to sell their programs, producers were placed in a very unequal bargaining position.

The networks represented an oligopsony (i.e., a small number of buyers confronting a large number of potential sellers). Various demands placed on producers by the networks, and the conflict of interest inherent in network ownership of the programs they aired, harmed competition and reduced the choices available to the viewing public, the FCC concluded.

To remedy the situation, the FCC passed the financial interest and syndication rules in 1970. Several years later, the Justice Department pursued antitrust suits against the three networks, charging them with predatory practices which included the very abuses the FCC's rules are intended to curb. The Justice Department reached consent decrees with each of the three networks between 1978 and 1980 which incorporated these rules.

Q. Have the rules really improved diversity and competition in TV programming?

Let's look at the numbers.

One of the most important effects of the rules has been the creation of additional non-affiliated TV stations known as "independents". By reducing the networks' ability to restrict programming available to independents, the rules have allowed independents to acquire more attractive programming and to build larger audiences. Healthy independent TV stations mean more outlets for original programming, popular reruns, and community service programs.

In 1972, just after the rules were passed, there were only 73 independent TV stations in 38 markets nationwide. Since the rules have been in effect, independent TV has boomed . . . today there are some 179 independent stations serving 86 markets coast to coast.

The rules have also brought new faces into program production. More and different program producers are now creating programs both for the networks and for syndication. In 1970–71, only 48 different producers were represented in network prime time. By 1982, 81 producers were creating prime-time programs. In 1971, only 122 program distributors were active. By 1981, 184 distributors were providing programming to local network affiliates and independents alike . . . a 51-percent increase.

And, there are changes that can't be measured by numbers alone. The rules have placed those who create and produce shows for the networks in an improved bargaining position. They can place their programs on the networks without giving up their just rewards from future sales. They can build the financial independence which allows them to produce innovative programming for all parts of the broadcast day. They can try more new ideas with less creative interference. And they can turn to independent stations and other alternative outlets to run shows which might not interest the networks, including a variety of mini-series and special audience programs.

All this means more competition, more diversity, and more choice for the viewer.

Q. But the networks are saying that unless these rules are lifted, there'll be no more "free TV". . .

That's not quite right. If the rules are repealed, there may be no more competition in advertiser-supported TV. But the networks will clearly remain the dominant outlets for video programing for a long, long time.

First, it's important to realize that the financial interest and syndication rules have *no* practical effect on the networks' ability to acquire broadcast rights in any programming other than entertainment series and specials. Thus, the networks' suggestion that the rules somehow prohibit them from bidding for the rights to major sports events or feature films is disingenuous.

Second, the networks remain dominant in every sense of the word. Today, the networks continue to draw over 80 percent of the total prime-time audience. That's down several points from 1970, and that loss is largely attributable to new-found competition from independent TV stations. But reduction in the networks' total prime-time audience will remain very gradual . . . CBS estimates the networks will still have 70 percent of the prime-time audience in 1990, an audience that will have grown in real numbers.

The rules certainly are causing no measurable financial harm to the networks. As CBS said in a recent study, "For the foreseeable future, at least, network television will continue to be the predominant national advertising medium." Indeed, the networks are looking at a "six billion dollar year" for 1982. And network profits have climbed precipitously during the years the rules have been in effect . . . a 550 percent rise between 1970 ($50 million) and 1980 ($375 million). In that same period, the networks' share of all television profits has increased from 11 to 20 percent.

Q. The networks also say all those "new media", such as cable and pay TV, are going to destroy them. Is this true?

The "new media" are coming, but for most Americans, advertiser-supported broadcast TV is still the sole or primary source of video programming.

Only 34 percent of American households have access to cable. Less than 10 percent currently subscribe to any form of pay TV. Only five percent of TV households have videocassette players. And most of the other "new media", such as direct broadcast satellites and low-power TV, won't be with us for several years.

How competitive will these new media be? ABC projects that even by 1990, broadcast revenues will still greatly outstrip all other media. Basic cable revenues will equal about seven percent of broadcast revenues, and pay cable 14 percent.

And there's one other thing the networks haven't been very open about . . . they are among the heaviest investors in pay television. Consider: All three networks have major interests in cable programming networks. CBS has applied for direct broadcast satellite authorization, as has NBC's parent corporation, RCA. ABC will soon enter the subscription TV market. If anything, this indicates the networks are very healthy financially, and intend to retain their dominance in the media market of the future.

Q. If the rules were eliminated, what could the networks do that they can't do now?

The networks could use their dominant bargaining position against program producers to demand an inordinate share of program revenues, even when the networks themselves haven't put any money at risk in producing the programs. Producers, who must often deficit-finance their productions, could be deprived of any chance at a fair return on their investment. They would again he reduced to little more than employees of the networks, with all the creative inhibitions that entails.

By taking over syndication rights to off-network programs, the networks could constrict the flow of such programs. This would hurt independent TV stations, which often use these programs to build large audiences. Moreover, the network could be expected to favor their affiliates over their competitors in deciding who would get the rights to a syndicated program in a given market. This, too, would make independent stations less competitive.

If the networks can take a financial interest in programming they produce, will they suddenly begin to serve special audiences? Not likely. The networks have been allowed to produce a substantial number of hours per week of entertainment and information programming, and then sell off the syndication rights to the highest bidder. NBC has done this with "Little House on the Prairie" and "Father Murphy" for example. But even with this freedom to produce, the networks have done little or nothing to serve minority, handicapped, children's, and other special audiences. There is nothing to indicate the networks would be any more inclined to serve these audiences even if the rules were lifted.

Q. What are other concerned groups saying to the FCC on this issue?

Action for Children's Television, a national organization of concerned parents, told the FCC the rules have encouraged the development of independent TV stations and of multiple programming services. ACT criticized network "indifference" and "backsliding" on children's television, and noted that limited public access to new media requires retention of the rules to encourage competion.

The National Institute for Low-Power Television, representing new would-be competitors in the video marketplace, told the FCC that repeal was premature, and that the rule was needed to maintain "an economic environment in which LPTV and other emerging technologies can compete and survive".

The United Church of Christ and the National Council of Churches, through their counsel, Media Access Project, termed the rules "a modest, self-enforcing, structural approach" to problems inherent in the network system. The rules "protect the public's right to receive diverse and competing ideas in its television programming" by "insulat(ing) creative competition from the possible effects of (network) power".

People for the American Way and Black Citizens for Fair Media, joined by various church groups, observed that "there is no evidence whatsoever that the financial interest and syndication rules have undermined the programming abilities of the networks or the nation's television stations."

The National Association of Black Owned Broadcasters, a trade association representing the interests and concerns of black broadcasters throughout the United States, said "(T)here is nothing in the record of programming production by the networks which would suggest that repeal of the rules will create any new diversity of programming, particularly for minority audiences. The networks have consistenly adopted a policy of programming designed for attracting the largest number of total viewers without regard to the tastes and interests of minority audiences. Repeal . . . would only permit the networks to continue this manner of programming on a larger scale".

Women in Film, a non-profit organization comprised of qualified professional women in the entertainment industry, said, "Elimination of the rules will mean that the profits and program ownership (which WIF's producer members can only acquire from putting their personal or business finances at risk) will now have to be shared with the networks who don't assume such risks." WIF said current levels of network interference with casting and the creative process would only worsen with repeal. "(T)he . . . rules serve the purpose for which they were intended. (I)ndependent producers have become stronger and their numbers have increased over the years that the rules have been in force. As a result the quality and variety of progrmming has also increased both in terms of its creation for network telecast and its subsequent availability for independent syndication."

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business that will not last past 12 noon, during which time Senators may speak for 5 minutes each.

AMENDMENT NO. 2106 TO THE CONFERENCE REPORT ON H.R. 3069

Mr. MATHIAS. Madam President, I send to the desk an amendment to an amendment of the House to an amendment of the Senate accompanying the conference report on H.R. 3069, a bill making supplemental appropriations for the fiscal year ending September 30, 1983, knowing that that conference report is not yet in the Senate but hoping that this amendment could be held at the desk so that other Members could be familiar with it at the time the conference report does arrive here.

Madam President, this is an extraordinary amendment for an extraordinary situation. I recognize that this amendment could delay final passage of the supplemental appropriations conference report, but I only offer it because there seems to be no other alternative.

On March 30, 1983, the Office of Personnel Management proposed a series of regulations affecting dramatic changes in the civil service, including implementing a pay-for-performance plan through the Federal work force, diminishing the importance of seniority in a reduction in force, and providing guidelines for what is negotiable in a collective bargaining setting.

The Governmental Affairs Subcommittee on Civil Service has held four hearings on these proposals and on related legislative alternatives. The hearings surfaced very serious problems with the regulations. In the first place, the proposals were to be applied to the entire work force, without any prior testing or experimentation as to their efficacy. In fact, the currently operating governmental system, the one system which incorporates some of features of these regulations, which is the merit pay system, I think has to be characterized as a dismal failure. So if that is the testing ground for these regulations, it is not a very hopeful outlook.

Second, the proposals constitute the most far-reaching changes to the civil service since the enactment of the Civil Reform Act of 1978, and yet they are being accomplished through regulation and not legislation.

Third, the proposals have been categorized by almost every party as being unfair and extreme.

As a result of the hearings, Senator STEVENS, chairman of the subcommittee, has drafted legislation which authorizes a portion of the regulations to be tested on 10 percent of the work force for 3½ years. That is a reasonable approach, it is a rational approach, and it is fair approach. Make a test. See how they work. Do it over a long enough time to make sure that we understand just exactly what is happening.

The Stevens legislation has the support of virtually all the Federal employee groups plus the General Accounting Office, the agency of the Congress which is supposed to look closely at matters such as this.

During the same period, the House added a provision to the supplemental bill which the Senate adopted prohibiting the March 30 regulations from going into effect. However, 2 weeks ago the Office of Personnel Management scrapped their earlier set of regulations and proposed a new set with a 30-day comment period. While the new regulations alleviate some of the more onerous problems of the first set, they are still fatally flawed for the same reasons I mentioned previously.

The problem we now face and the reason for my amendment is that the prohibition in this bill does not cover the new, second set of regulations, and it is very likely they will be issued in final form and implemented prior to our return from the recess. That is what creates the urgency. This bill is the last opportunity to even delay these proposals from becoming effective.

It is not to repeal them, not to block them permanently, but just to delay them from becoming effective.

We are currently working on legislation incorporating the concepts of the proposals and will probably have it

before the full Senate sometime in September.

I think it far wiser to consider these massive changes legislatively than through an almost unchecked, unrestrained regulatory process, the very embodiment of big Government at its worst. This amendment simply delays the carrying out of the proposals until after September 30, 1983. That is not a great deal to ask. It seems to me it is the minimum that is prudent.

Madam President, this is a concept which has been considered and thought about by a number of Members of the Senate besides myself. I have already mentioned the hearings which have been conducted by the Senator from Alaska (Mr. STEVENS), and the great concern this subject has given him. I am joined in this amendment by the Senator from Maryland (Mr. SARBANES), the Senator from Tennessee (Mr. SASSER), the Senator from New Mexico (Mr. BINGAMAN), the Senator from Missouri (Mr. EAGLETON), the Senator from Virginia (Mr. TRIBLE), the Senator from Ohio (Mr. GLENN), the Senator from North Dakota (Mr. BURDICK), and the Senator from Virginia (Mr. WARNER).

Look at the spread—Senators from every part of the country from both parties expressing through this amendment their concern over what can be done to the Federal work force as a result of regulations arbitrarily issued without the kind of testing which is normal in personnel practice in every kind of large organization in this country.

I wanted to offer this amendment early before the conference report is before the Senate so that all Senators would be on notice of the problem and of the proposed solution. I hope that Senators will pay close attention to this issue, which is a primary responsibility of the Senate, and will approve the amendment. In the alternative, of course, the President could himself voluntarily delay the implementation of these regulations which would be, I think, much appreciated by Members of the Congress. The House has already spoken on this issue, though their efforts have been blocked by the new set of regulations.

I think it would be an act of restraint on the part of the Executive that would be appreciated in the Congress, I am sure, and by every member of the civil service whose lives can be so much affected.

Madam President, I make the point of order that a quorum is not present. I withhold that point of order.

● Mr. BINGAMAN. Mr. President, I strongly support the amendment offered by Senator MATHIAS. The amendment will prohibit the implementation of the revised regulations proposed by the Office of Personnel Management (OMB) and published in the Federal Register on July 14, 1983. I am a cosponsor of the amendment and I urge my colleagues to join me in support of this necessary action.

The amendment is a technical correction. The conference agreement on H.R. 3069, the supplemental appropriations bill for fiscal year 1983, already contains a provision which prohibits the implementation of the earlier set of regulations which OPM issued on March 30, 1983. The earlier regulations were superseded by the new July 14 proposals. This amendment is needed in order to change the already agreed to language to reflect the fact that the old regulations have been withdrawn and new regulations issued.

The revised July 14 regulations, although slightly revised, are very similar in substance and purpose to the previously issued and subsequently withdrawn March 30 regulations. I opposed the March 30 regulations for a number of reasons. I also sponsored legislation, S. 1385, a bill to prohibit the implementation of the March 30 regulations. I must also oppose the July 14 proposals.

The revised regulations, like the old proposals, would: First, extend yet-to-be-perfected merit pay principles, now only applicable to mid-level managers, to the entire Federal work force; second, revise reductions in rules making it easier to dismiss older employees and veterans; and third, greatly limit the scope of collective bargaining rights to Federal employees.

I believe the proposed regulations amount to drastic and uncalled-for cutbacks in Federal employee benefits and protections. They have not been carefully analyzed and are not supported by up-to-date empirical data and documentation. Clearly, proposed changes of this magnitude, which are extremely controversial and will literally impact upon each of the more than 2 million Federal workers, should not be hastily considered in the context of regulatory changes. Instead, such major changes should be considered in the scope of legislative changes by the proper committees of Congress.

The Civil Service, Post Office, and General Services Subcommittee, of which I am the ranking minority member, has held several days of hearings on these regulatory changes. The testimony received has raised very serious questions regarding the purpose, impact, and even the legality of these changes. The General Accounting Office (GAO) has determined that the proposed "Performance Based Incentive System" proposed by OPM in both the old and new regulations is illegal and could not be implemented without appropriate legislation. Although OPM has chosen to ignore these findings, the GAO opinion is binding upon the executive branch since it involves the expenditure of Government funds.

OPM argues that the new regulations are extensions of the Civil Service Reform Act. However, the changes made CSRA were accomplished by legislation and were experimental in nature. The changes were to be carefully analyzed and evaluated. According to the evidence compiled, the impact of many of the Reform Act personnel changes have produced questionable results.

According to GAO, the merit pay system now in effect for managers and supervisors, GS-13 through 15, has been met with great employee opposition, inconsistent results from agency to agency without any improvement in productivity, and a variety of administrative problems.

In an effort to address these and other concerns, the Civil Service Subcommittee, chaired by Senator STEVENS, is actively considering a legislative solution to this issue which will produce positive changes.

I am confident that with the cooperation of the administration and others involved, a legislative solution can be achieved. In order to allow time for the completion of the subcommittee action, however, it is necessary to block implementation of these regulations.

I urge my colleagues to join me in support of the amendment.●

THE IMPACT OF DRUGS ON AMERICA'S PRODUCTIVITY

Mrs. HAWKINS. Madam President, drug abuse is now so widespread among children and adults that a May 17, 1983, special report of U.S. News & World Report found that it threatens to sap the Nation's strength at a critical juncture in its history.

The special report revealed that millions of Americans—from children in schoolyards to computer analysts in California's Silicon Valley, and stockbrokers on Wall Street—are turning on to all kinds of pot, pills, and powders, giving the United States the highest rate of drug abuse of any developed country on the globe.

The United States is carrying this burden as it struggles to hold its own against unprecedented scientific, technological, and economic challenges not only from the Soviet Union, but also from Japan and American allies in Western Europe.

Industry is losing as much as $25 billion a year as a result of employees who snort, swallow, inhale, or inject illicit substances. The toll takes the form of slowed productivity, absenteeism, lateness, and irrational decisions.

In 1962, only 4 percent of adults age 18 to 25 had ever smoked marihuana, or pot. By last year, that figure had risen to 64 percent. Among the 182.5 million Americans age 12 or older, more than 57 million—31.3 percent—

had tried marihuana. With cocaine, the picture is similar. Two decades ago, only a small fraction of the populace had encountered it, let alone used it. By last year, some 22 million people had done so.

Among adults 26 and older, about 8.4 million have smoked pot and 1.5 million have taken cocaine in the last month, according to the latest Government figures.

The growth of U.S. productivity has been lagging behind that of other major industrial nations, none of which has a drug problem as serious. Between 1967 and 1981, America's manufacturing output advanced 39 percent. In the same period, Japan's leaped 209 percent, France's climbed 98 percent, West Germany's 90 percent, and Britain's, 57 percent.

Though drug abuse is far from the only problem afflicting U.S. industry, it plainly is throwing sand in the Nation's industrial engine. Marvin Leonard, vice president of the New Orleans-based Pendleton Detectives, Inc., estimates that 30 percent of the U.S. work force uses drugs. "Almost any field we go into, we can find a problem," he reports.

An official of the U.S. Health and Human Services Department says HHS's $25 billion estimate of annual industrial losses is conservative.

Dale Masi, head of HHS's employee-counseling services, explains: "The estimate does not include hidden costs such as disability pay, workers' compensation, and loss of coworkers' and supervisors' time."

In Houston, a division of the National Supply Co. was hit a year ago with a decline in output and a rise in absenteeism, stealing, and discipline problems. Drugs were the cause. After a 6-month probe, police and company officials raided a drug deal in progress on the company parking lot with sirens blaring and lights flashing. Twenty-one employees were fired. Drug use plummeted. Within a week, minor injuries were cut in half, and efficiency rates jumped 20 points. Pilferage and absenteeism also declined.

The bigger the company, the bigger the potential problem. Roger Smith, chairman of General Motors, has said that absenteeism, much of it due to drug and alcohol abuse, costs the corporation a billion dollars a year. Among other problems GM has found: a hoist operator admitted being so stoned that he dropped cars he was lifting from one point on the production line to another. The cars had to be scrapped, and thousands of dollars were lost.

Even the nuclear industry has been affected. In California, a group of former workers disclosed 2 years ago that after smoking pot, they and others did shoddy repairs on the steam generator of a San Onofre nuclear reactor. A Nuclear Regulatory Commission spokesman said their work was corrected and no permanent damage done. Even so, he admitted that "no doubt there is a cost."

In many fields where creativity is at a premium—from the high-tech computer world to the Hollywood film-and-music realm—cocaine is the drug of choice. People get the feeling that "I can do anything better on coke."

Tests show just the opposite. Cocaine produces real impairment—rapid heart rate, raised blood pressure and, if used regularly, symptoms similar to schizophrenia.

In Hollywood, a press agent for several well-known entertainers discounts stories about films being ruined because stars are spaced out on drugs. But he says: "Sometimes actors come to work coked out, and that halts production. They are sent home. The film is shot around them, and they do their part later."

Surely, Madam President, this Nation is in a crisis. We hear about it daily. We are in a crisis for the present and in a crisis for the future. Surely, this body should stop all that it is doing and examine the impact of drugs on America's present and future.

I thank the Chair.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

LT. COL. GLENN C. PECK

Mr. QUAYLE. Mr. President, on July 31, 1983, Lt. Col. Glenn C. Peck will culminate a distinguished career in the U.S. Air Force when he retires at Wright-Patterson AFB, Ohio after over 20 years of dedicated service. Lieutenant Colonel Peck was ordained as a Southern Baptist Minister in 1981 and upon his retirement, will redirect his life to the service of his fellow man with his full time entry in the Baptist ministry.

Lieutenant Colonel Peck was born October 18, 1941, in Liberty, Ky. He was raised in Indiana and graduated from Paris Crossing High School, Paris Crossing, Ind. on April 22 1959. He attended Purdue University and received his commission as a distinguished Air Force Reserve Officer Training Corps (AFROTC) graduate, as well as a bachelor of science degree in industrial education in 1963. He is married to the former Connie J. David of Columbus, Ind. and has three children, Carmen, Karen, and David.

Following his commission, he served in the Ballistic Systems Division at Norton AFB, Calif. and then was assigned as the Chief of Maintenance for the 6980th and 6984th Security Squadrons in Alaska. In 1968, he was assigned to Kelly AFB, Tex., where he served as Chief, Plan and Programs Division in the Telecommunications Directorate. In 1973 he completed graduate school at Western Kentucky with a master as assistant professor of aerospace studies at the University of Kentucky. Following this assignment, he attended Air Command and Staff College, in residence, and was assigned to the 1931 Communications Group, Elmendorf, Ala., as Chief of Maintenance. Lieutenant Colonel Peck assumed his present duties as Chief of the Advanced Communications Electronics Requirements Division at Wright-Patterson AFB in August 1980.

I want to congratulate this fine officer on his retirement and wish him Godspeed in his new endeavors in the ministry.

ATLANTIC COUNCIL POLICY PAPERS

Mr. WARNER. Mr. President, I ask unanimous consent to have printed in the RECORD a recent publication by the Atlantic Council on Arms Control. This document is entitled "Policy Papers." It has been prepared by a working group of some 40 noted experts under the chairmanship of Gen. George M. Seignious.

Although I do not profess to agree with all of the conclusions reached therein in my own private study, I have found it to be a very helpful document relating to the arms control debate now ongoing across our Nation and, indeed, throughout the world.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE ATLANTIC COUNCIL OF THE UNITED STATES POLICY PAPERS

FOREWORD

During the past year, members of the Board of Directors of the Atlantic Council have expressed concern about deteriorating relationships within the Atlantic Alliance, including U.S.-European differences over policies toward the Soviet Union, especially on arms control, and on trade and credit, as illustrated by the gas pipeline controversy. Strong public pressures in this country and abroad with regard to the nuclear arms race and various freeze proposals have tended to polarize views and obscure the need to maintain NATO's cohesion and the effectiveness of its military deterrent.

Although formal negotiations with the Soviet Union are in progress in several arms control fora, differences remain within as well as among various members of the Alliance—most of whom are undergoing political change or turmoil in a bad economic environment.

Accordingly, the Council developed this study on the relationship of arms control and economic policy to the cohesion and security of the NATO Alliance jointly with the International Economic Studies Insti-

tute. Its president, Dr. Timothy W. Stanley, served as rapporteur of an expert Council Working Group under the chairmanship of Lt. General (Ret.) U.S. Army George Seignious, a former Director of ACDA. The membership is listed on page 7.

Although agreement on all points is hardly to be expected in a group of diverse experience and viewpoints, this policy paper does reflect a consensus in its main lines of reasoning and in its broad conclusions.[1] But no member necessarily concurs with every formulation or argument it contains. The group agrees that the polarization which has accompanied recent developments calls for a "centrist" approach, combining both security and arms control considerations; and they have collaborated to that end by their willingness to negotiate or submerge differences of opinion. Some specific points of emphasis or dissent are reflected in comments by Working Group members at the end of this report.

The Council is thus pleased to publish this Policy Paper on behalf of the Working Group as a valuable contribution to public understanding of critical current issues. It gratefully acknowledges the contributions of Chairman Seignious, the individual members, and Dr. Stanley as rapporteur. I also wish to thank Christopher Manning, assistant for international affairs at the Institute, and especially Colonel James Motley (USA), senior fellow at the Council, for valuable substantive contributions to the research that went into this effort, including the appendices.[2] Special appreciation is due to the officers and staffs of both the Council and the Institute for their hard work in producing this Policy Paper under the pressure of deadlines. Finally, we are all deeply grateful to the Carthage Foundation, the Rockefeller Foundation, the Dreyfus Corporation, and the NATO Information Service for their support which made this project possible. Those institutions, of course, bear no responsibility for the final product.

KENNETH RUSH,
Chairman,
The Atlantic Council of the United States.

MEMBERS OF THE COUNCIL WORKING GROUP ON ARMS CONTROL

Chairman: George M. Seignious II, Lt. General (Ret.) U.S. Army, former Director, Arms Control and Disarmament Agency, and President, The Citadel.

Project Director: Francis O. Wilcox, Director General, Atlantic Council; former Assistant Secretary of State and Dean, SAIS, Johns Hopkins University.

Rapporteur: Timothy W. Stanley, President, International Economic Studies Institute; former Minister, U.S. Mission to NATO and ACDA Representative at MBFR negotiations.

Assistant Rapporteurs: Christopher Manning, Assistant to the President, IESI, for international affairs, and James B. Motley, Senior Fellow, Atlantic Council.

Members

Donald G. Agger, President, DGA International Inc.

Madeleine Albright, William H. Donner Professor of International Affairs, Georgetown University, former Staff Member, National Security Council.

Jacob D. Beam, U.S. Ambassador, retired.

George S. Blanchard, former Commander-in-Chief, U.S. Army Europe, and Commander, NATO Central Army Group.

Barry M. Blechman, Vice President, Roosevelt Center for American Policy Studies.

Robert R. Bowie, Professor of Government, Harvard University.

L. Dean Brown, President, Middle East Institute; former U.S. Ambassador.

Anne H. Cahn, Executive Director, Committee for National Security, former Chief, Social Impact Staff, Arms Control and Disarmament Agency.

Arthur Macy Cox, Writer specializing in Soviet affairs; former CIA official.

Robert F. Ellsworth, Consultant; former U.S. Ambassador to NATO and Under Secretary of Defense.

Henry H. Fowler, Partner, Goldman Sachs & Co.; former Secretary of the Treasury.

Curt Gasteyger, Professor, Graduate Institute for International Studies, Geneva.

Andrew J. Goodpaster, former Superintendent, U.S. Military Academy and former Supreme Allied Commander, Europe.

John P. Hardt, Senior Specialist, Congressional Research Service, Library of Congress.

Townsend Hoopes, former Under Secretary of the Air Force.

William G. Hyland, Senior Associate, Carnegie Endowment for International Peace, former NSC Staff.

U. Alexis Johnson, U.S. Ambassador Retired, former Under Secretary of State and Chairman, U.S. SALT Delegation.

Richard F. Kaufman, Assistant Director, Joint Economic Committee, U.S. Congress.

Eugenia Kemble, former Atlantic Council Senior Fellow.

Robert Komer, former Under Secretary of Defense and U.S. Ambassador.

Lyman L. Lemnitzer, former Supreme Allied Commander, Europe; Chairman of the Joint Chiefs of Staff.

George C. McGhee, former Ambassador to Turkey and Germany, and Under Secretary of State for Political Affairs.

David E. McGiffert, Partner, Covington & Burling, former Asst. Secretary of Defense.

R. Daniel McMichael, Secretary, The Carthage Foundation.

Robert S. McNamara, former Secretary of Defense, and President, World Bank.

John Newhouse, author.

Robert E. Osgood, Christian Herter Professor of American Foreign Policy and former Dean, Johns Hopkins School of Advanced International Studies.

Donald A. Petrie, Partner, Lazard Freres & Co.

Robert Pfaltzgraff, Jr., Professor, Fletcher School, and President, Institute for Foreign Policy Analysis.

Myer Rashish, President, Rashish Associates, Inc., former Under Secretary of State for Economic Affairs.

Jeffrey Record, Senior Fellow, Insitute for Foreign Policy Analysis.

Stanley R. Resor, Attorney; former Secretary of the Army and former head of U.S. MBFR Delegation.

Nathaniel Samuels, Chairman, Advisory Directors Board, Lehman Bros Kuhn Loeb Inc.; former Under Secretary of State.

Brent Scowcroft, former Assistant to the President of the U.S. for National Security Affairs.

Joyce Lasky Shub, Director European Studies Program, The American Enterprise Institute, former Professional Staff Member, Senate Foreign Relations Committee.

Dimitri Simes, Director, Soviet and East European Research Program, SAIS, Johns Hopkins University.

Stanley Sloan, Senior Specialist, Congressional Research Service.

Frank A. Southard, Jr., former U.S. Executive Director and Deputy Managing Director, International Monetary Fund.

Ralph I. Straus, Director, Atlantic Council; former State Department adviser.

Darnell M. Whitt II, former Executive Director, Committee of Nine; former Member of the U.S. Mission to NATO.

Joseph J. Wolf, former U.S. Minister to NATO.

Ex Officio Members: Theodore C. Achilles, Vice Chairman, Atlantic Council, Martha C. Finley, Assistant Director General, Atlantic Council, Joseph W. Harned, Deputy Director General, Atlantic Council, Kenneth Rush, Chairman, Atlantic Council.

Senior Fellows: James B. Motley, Colonel, U.S. Army and Alfred D. Wilhelm, Lt. Colonel, U.S. Army.

Project Assistants: Kathryn M. Coulter, Assistant to the Director General, Atlantic Council, Lois Lynch, Executive Secretary to the President, IESI, and Albert P. Toner, Editorial Consultant, IESI.

PREFACE

Since this project was started in the spring of 1982, there has been substantial movement in the subject matter, much of it in a desirable direction, for example the lifting of pipeline sanctions and some greater flexibility on the part of both sides with respect to arms control negotiations. We have tried to reflect such developments in the paper. But even subsequent to the final meeting of the Working Group on January 11, 1983, there have been major flurries of publicity and propaganda on the intermediate-range nuclear force (INF) negotiations. The group recommended, although not unanimously, maintaining NATO's commitment to deploy INF missiles unless a satisfactory alternative solution can be negotiated but not treating the "zero" option as an all-or-nothing proposition. One of our main concerns was not to undercut the agreed Western negotiating position. In the State of the Union message, President Reagan himself stated that the United States is "prepared to carefully explore serious Soviet proposals," while U.S. chief negotiator Paul Nitze said that the U.S. "is certainly not locked into zero option."

Meanwhile the Soviets have mounted a major propaganda effort focusing on Germany with an eye to the March 6, 1983 elections. Various European leaders have suggested an interim accord and the Soviets have returned to a posture of mixing implied threats (e.g., to withdraw from the START negotiations) with promises, e.g., to reduce the number of their SS-20s. One clear lesson that emerges is the difficulty of negotiating in the full glare of public opinion. One must hope that at least after the German elections, if not before, both sides will settle down to serious negotiations looking to realistic results during 1983.

Despite all the furor, the basic facts remain: the Soviets have and continue to add to an overwhelming advantage in medium-range theater missiles which NATO has unanimously agreed should be countered by some American missiles, either the plan approved by NATO in December 1979 following requests by the Europeans themselves, or a satisfactory negotiated alternative. This may well have to occur over a period of time and in stages as a part of a dynamic process.

The Reagan Administration has recently anticipated two of our recommendations: to give greater weight to allied opinion, which was one of the purposes of Vice President

[1] Footnotes at end of paper.

Bush's European trip in January, and to strengthen U.S. information programs, now to be undertaken by a special task force appointed by the President.

I hope that our study will contribute to the forward-looking approach to arms control which we believe is needed, and highlight the need to "close the gaps" described in the paper.

GEORGE SEIGNIOUS,
Chairman,
Arms Control Working Group.

March 1, 1983.

CONCLUSIONS AND RECOMMENDATIONS

The Alliance

The security threat to NATO remains real and it is increasing by virtue of the Russian military buildup in both strategic and theater nuclear power and in conventional forces, which clearly surpasses reasonable Warsaw Pact security needs. It is not reassuring that this buildup has been accompanied by a major Soviet propaganda effort against all Western countermeasures.

The Russians have long sought to divide Europe from the United States and de-link America's strategic deterrent from applicability to Europe, whether by their military strength, compartmentalized arms control negotiations, or campaigns to confuse and manipulate public opinion and exploit Western divisions. If those efforts should succeed, the long-term correlation of forces would indeed shift in the Soviets' favor—perhaps decisively in the case of Europe. Finlandization—or worse—would then become a real possibility there. Although perhaps less immediately affected, the United States would also find itself badly weakened in the global contest with the Soviet Union: on many issues we would lack the support of the only large powers, other than Japan, that carry real political, economic, and military weight, and represent moral force as well, in the legitimacy of their democratic systems.

In such circumstances, European lack of confidence in America's commitment to its defense would feed on itself, leading to neutralism and to lagging defense efforts there which would stimulate American impatience and neoisolationism, and perhaps end the Alliance as an effective and credible factor in international security. The prospects for a viable peace, and for European independence from Soviet influence, would then rest on the fragile hope that the Soviet Union, reassured by the devaluation of the "threat" it perceives from NATO, would moderate its own behavior toward the West. Nothing in the history of the Soviet Union offers much support for such a hope. But there is ample evidence that the Soviet Union will back away from undue risks and negotiate seriously with a strong opponent. It clearly repects the power of the alliance between Europe and North America which is has long sought to divide.

Maintaining the Alliance is a clear prerequisite for continued independence and a secure peace. This requires continued major deployments of U.S. ground, air, and naval forces in Europe, a solution to the theater missile imbalance, continued modernization and improvement of NATO's conventional forces, with respectable but politically manageable levels of efforts by the Europeans themselves. Above all, it calls for the political framework of Alliance cohesion necessary to support the economic sacrifices involved in this defense effort.

There is, in other words, a "core" to the Alliance which is essential to all parties but which disputes over other issues have eroded somewhat. Some of those issues are directly related to security, such as strategic trade controls and, in the view of some, the Siberian gas pipeline because of the greater European dependence of Soviet energy sources. Others are more on the periphery, including assorted East-West Trade issues which are exacerbated by the current economic malaise, and conflicting approaches to Third World problems.

It is too much to expect that an alliance so subject to conflicting economic interests, and to the personalities and prejudices of sixteen heads of government, can ever concert policies over the entire area of constituent interests. Its member nations are engaged in industrial competition for markets and pursue varying interests and responsibilities in diverse regions of the world. They respond to the mandates of varied political constituencies, each complex and often contradictory in its own right, and work from different geographical, historical, and psychological perspectives.

This suggests that the Alliance members as a whole should seek to lower their expectations of what the fact of alliance portends for harmony in policies toward less essential issues and to raise those expectations on matters pertaining to the core: the necessity for and indivisibility of the common defense.

If this concept can be accepted, then useful tradeoffs can be found which can satisfy the political and bureaucratic imperatives of the countries concerned on the peripheral and parochial issues. As a minimum, the Alliance should relearn former U.S. NATO Ambassador Harlan Cleveland's golden rule of consultation: Consult others as you would like them to consult you.

Collectively, NATO members should take appropriate steps to improve the image of the Western Alliance as an association of free nations sharing common values and bound together by the principles of democracy, individual liberty and the rule of law.

Arms control

Just as there are defense requirements for the Alliance, there are also arms control imperatives to assure stable security for the future. The European allies have, for the most part, been concerned by the anti-Soviet tone of the Reagan Administration's policies and they have different geographical, historical, and political-economic perspectives on relations with the East. These differences have created gaps and frictions in what should be a common approach.

We believe that the accession to Brezhnev's mantle of a younger, more dynamic Soviet leader makes it all the more important to develop a new forward-looking arms control environment for the eighties and beyond, including the possible reestablishment of a summit-level dialogue.

Specifically, the Working Group urges:

A new Harmel-type review in NATO, along the lines of the special study conducted in the mid-sixties, to reinforce both the defense and arms control strands of Alliance policy in public opinion.

Integrating our approach in the three major arms control negotiations underway, and meshing that approach more clearly with allied defense policies and programs. Heads of government would have to be actively involved on both sides.

Increasing our efforts to maintain and modernize NATO's conventional capabilities so that we may eventually be able to place less emphasis on nuclear force for deterrence.

Developing mechanisms to look forward, past current negotiating impasses, to a longer range solution to the arms control problem, perhaps in the form of a joint U.S.-Soviet commission with appropriate allied participation or coordination. It would examine prospects for, and approaches to, stable security in the nineteen nineties, with particular attention to maintaining the mutual invulnerability of reduced strategic deterrent forces. Such an "end game" approach could enhance confidence and constructive feedback into the current negotiations.

Accepting and building on the SALT II accords in START and then seeking to reduce the ratio of warheads to aiming points in order to lower first-strike vulnerability, by limiting multiple warheads and including cruise missiles in the negotiations before they have further proliferated.

Demonstrating our willingness to move ahead in the arms control field by proceeding to ratify the test ban treaties now pending before the U.S. Senate.

Reaffirming our commitment to the existing limitations on anti-ballistic missiles.

Maintaining NATO's commitment to deploy the intermediate nuclear force (INF) missiles,[3] which were requested by our allies, unless a satisfactory alternative solution can be negotiated, but developing greater flexibility in the INF talks and not treating the "zero" option as an all or nothing proposition.

Insuring that, whatever the outcome on INF or any specific security issue which is controversial, it does not lead to agonizing reappraisals of even more essential Western interests; for the Alliance is basically about solidarity, not about specific actions or pieces of military hardware.

Devoting the necessary political capital at a high level to breaking the impasse in the Mutual and Balanced Force Reductions (MBFR) negotiations, which requires resolving the data problem relating to the number of Warsaw Pact forces now in the reductions area. The few remaining problems holding up an MBFR accord should then become negotiable.

Recognizing the asymmetries confronting arms control such as Soviet secrecy, but pursuing realistically other arms control subjects, including exploring the possibility of military expenditure limitations at some time in the future and, in particular, putting more emphasis on various confidence-building measures such as those relating to troop deployment and movement, new ideas relating to inspection techniques, including the possibility of multilateral inspection, and the use of the hot line.

In all of the above, recognizing that arms and arms races result from underlying tensions, rather than the other way around, but that both can be approached in parallel if the Soviets are willing to pursue serious negotiations rather than to merely engage in propaganda exercises.

Defense economics

There is a triangular relationship between defense, arms control, and the economy. The current economic malaise makes allocation of increased resources for defense difficult, especially in the case of what is required to strengthen conventional capabilities in Europe. It also offers incentives to both East and West for arms control progress which would result in decreased defense expenditures, particularly in the context of the negotiations for mutual and bal-

anced force reductions (MBFR) in Central Europe.

What is needed are measured, sustained, and cost-effective defense improvements, not wasteful crash programs, which can contribute to, rather than perhaps hinder, economic recovery. And the Alliance should move forward in concert, avoiding so far as possible major differences in levels of effort which will rekindle burden-sharing frictions and stimulate congressional efforts to force American troop withdrawals.

East-West economic relations

The type of intra-Western frictions exemplified in the natural gas pipeline case should be avoided in the future by new mechanisms which draw on the capabilities of NATO, plus the Organization for Economic Cooperation and Development (OECD), the International Energy Agency (IEA), and Coordinating Committee (COCOM) to try to reach common assessments, for example on European energy vulnerability or the export to the East of "critical technologies." Above all, the several channels of interallied consultation should be actively used, rather than abused by press-release diplomacy. Awareness of the distinction between core security issues and peripheral ones should be heightened on the part of all concerned, and from the U.S. point of view, the "half loaf" of concerted Alliance policy may be perferable to no agreement at all.

Integrating policies

We need to improve the integrative capacity of our policy-making machinery within the Alliance and especially in Washington—to the end that conflicting views may be more readily resolved. It is essential that a coherent long-range policy integrating defense and arms control policy be maintained in Washington. Presidential discipline is also essential to assure that this government speaks with one voice and consistently, wherever possible. Making the Director of ACDA also an Under Secretary of State might help in this regard and with respect to improved Executive-Congressional relations. More frequent Cabinet and NSC-level consideration of the defense-arms control-economic interactions should focus more clearly on objectives, means and strategies, and less on the technical nuts and bolts.

Within the Alliance, a new Harmel-type exercise could lead to a more common approach and better understanding of the Alliance's role in international cooperation. Its elements could then be better coordinated by NATO's continuing analytical and consultative machinery.

The U.S. should strengthen its information programs so that our arms control policies will be more clearly understood and supported by allies and neutrals—and by the U.S. public. This would greatly help our negotiating position and offset the renewed Soviet propaganda efforts. By the same token, however, the policies themselves should reflect a greater input by our major allies, especially where they are directly affected by them.

If measures such as these are taken, they should improve comity, coordination and consultation within the Alliance and ease friction over policy conflicts. But all concerned must recognize the need to agree on the essentials and to agree to disagree on more marginal questions—assuming their leaders have the wisdom and statesmanship to tell one from the other. By thus closing the gaps and facing together the prospect of a continuing long-term contest with the Soviet Union, Nations can assure its members of a more prosperous future and a less dangerous world. The problems of Alliance security and their potential solutions ultimately involve both sides of the Atlantic. There is much that either side cannot do alone, but relatively little they cannot do together.

I. INTRODUCTION AND BACKGROUND

Nineteen eighty-two has been a year of crisis in several overlapping dimensions: in the depressed, debt-burdened world economy, in East-West relations, and in the NATO Alliance itself.

There are dangers of further unraveling in 1983 in all three categories; but there are significant opportunities for progress. This policy paper proceeds from the premise that the Alliance must overcome forces that threaten to tear it apart, close the gaps between the United States and Western Europe on East-West relations and arms control, and integrate Alliance defense and arms control approaches so as to promote stable security in ways that will not overburden strained economies. If it does so, NATO will not only avoid losses but achieve positive gains.

After reviewing the divisive and cohesive elements in the Alliance and the challenges to Atlantic security in the eighties, the paper examines three sets of interactions: arms control and defense; economics and defense; and the political-economic dimensions of East-West relations, as a basis for its conclusions and recommendations.

It should be noted that none of the issues is new. Debates over NATO strategy and nuclear deterrence go back to the fifties; "detente," by whatever name, recalls NATO's 1967 study of "The Future Tasks of the Alliance"; and the need to counter Soviet missiles targeted on Western Europe has a provenance of over two decades, as does the question of East-West trade controls. Because only a minority of those now engaged in the public debates on three subjects can even remember the circumstances that gave birth to NATO, and since few take time to recall the relevant developments in its subsequent history, this paper includes a capsulated "Background of the Alliance" as Annex I. We call it to the reader's attention because the paper's analysis and conclusions draw upon the Working Group's experience with those important elements.

The past few years have featured stagnant economic performance at home and abroad. The supply side approach tried in Washington has thus far failed to produce a meaningful response while budget deficits has shot up. Inflation has been sharply curtailed—a significant accomplishment, but at the price of continuing severe unemployment. As the malaise spread through the world, protectionist pressures and trade conflicts proliferated, adding an economic dimension to other threats to the cohesion of the Western Alliance of North America, Western Europe and Japan.

These are the only three non-Communist power centers with the political, economic, and military strength—and moral legitimacy as democracies—to shape world events and constrain Communist imperialism. Yet even as they are partners in security, they are also industrial competitors, making it difficult in hard times to strike the necessary balance between the two roles.

The Reagan Administration set out to correct the disrepair of the U.S. military establishment that had been worsening since Vietnam; to regain a strategic balance which had been upset by the Russian military buildup; to postpone meaningful arms control negotiations and, in effect, to arm in order to parley later; and to practice strategies of economic denial to weaken the Soviet military machine. All of this was to be done within the context of a sharply articulated set of anti-Soviet policies [4] which have, however, involved a more moderate tone in recent months.

These elements, excepting the military repair task, proved controversial in the U.S. and they sent profound shocks throughout NATO Europe, where only Britain's Margaret Thatcher seemed fully in tune with the Reagan approach. Some believe that they have also alarmed the Russians, who seem to fear that Reagan is out to reestablish a first-strike strategic superiority for the United States.

What matters most, however, is the likely Soviet response to the fears which U.S. actions and rhetoric are instilling in them and the counter-programs they may develop. For those interactions could insure a continuing arms race for the rest of the century. It must be emphasized that the Soviets, for their part, have not shown much arms control sensitivity or self-restraint. Indeed their own strategic and naval buildup achieved during a time of level or declining U.S. forces was a major factor in the successful electoral campaign of Ronald Reagan and his Administration's subsequent programs.

To that Administration's credit, it responded effectively to the public concern and protest about nuclear weapons in Europe and the United States. The President put forward the "zero-option" in the Intermediate Range Nuclear Force (INF) talks (whereby NATO would forgo its planned deployment of Pershing and cruise missiles if the Soviets eliminated their medium-range missiles aimed at Europe); and he made a proposal for fairly deep cuts in intercontinental ballistic missiles and warheads. The long-delayed strategic arms reduction ("START") talks got underway in June 1982 and are continuing.

But much more is involved in NATO's current crisis than one Administration's policies. For perceptions and interests vary widely between Europe and the United States. Canada, as a North American member of NATO, occupies a frustrating place between the U.S. and the Europeans, which contributes to its own identity crisis.[5]

In the early eighties Europeans found it difficult to agree on what to do about security problems collectively or individually, or what they wanted the United States to do. The substantive problems involved have deep roots.

For example, a dimension of "European" security that is all too often ignored in the United States persists at least subconsciously in the minds of all Europeans: For two generations, German expansionism and aggression were the problem of European security. Virtually no European over fifty can forget the Hitler era. World War II, which some have characterized as America's last "romantic" war, was in no sense viewed that way by its European survivors. To them, the Western European Union and NATO with American involvement provide the framework for maintaining West Germany's place in the West and the viability of Berlin without reviving German nationalism.

Attitudes toward the Soviet Union differ widely in every country on both sides of the Atlantic. The Europeans stress the need to coexist with a superpower that is their immediate neighbor. Thus, while recognizing

the essential contribution that the Western Alliance makes to stability and security, they have tried to avoid unduly provoking the Soviet bear.

Europeans have a different sense of the Eastern "threat" from what is usual in Washington. They have interacted with Russians and Eastern Europeans for centuries and think of Western Russia as European rather than an alien force. Italy, France, and other countries live with sizable Communist minorities in their electorates and do not view them as the devils they sometimes appear through American prisms. Moreover, "Marxism" is not perceived as the mortal foe of capitalism and democracy it is often depicted to be across the Atlantic. (Most European Socialist parties, while strongly anti-Communist, have Marxist roots, although the French, German, Italian and Spanish versions moved toward the center and a more social democratic orientation, often earning the hostility of the Communists who claim to speak for the working classes.)

International trade looms larger in Europe than in the United States. The average European country's world trade is two and half times larger in relation to GNP than is the case for the U.S. Trade with the East has been particularly important, creating economic interests on the Continent which tend to be particularly powerful during high unemployment.[6]

Germany is a special case because of the key role of interzonal trade in the economies of East and West Germany. It has generally continued to grow regardless of cold war and detente, even during major crises over Berlin, and it is sanctified by treaty. The Federal Republic also needs the environment of detente to permit a tolerable relationship with its countrymen to the East and mitigate the human effects of the country's division. Historic pulls to the East also affect West Germany's political psyche.

More subtle factors are also at work, such as disparities of scale which are a fundamental fact of life in the Alliance. The United States, along with Canada, is continental in scope and it has Pacific as well as Atlantic interests and responsibilities. The European nations, in their own images at least, are small and comparatively weak. Former colonial countries like Britain and France do retain some global perspective; but increasingly they focus on ex-colonies, the Commonwealth, and other areas with which they have special ties. The European Community, although active as a diplomatic entity, is only gradually changing the modest self-perception of the European public.

Americans often fail to disaggregate "Europe" into its political components. They consider it unrealistically as an entity, think it should do more to meet the Soviet challenge on a global basis, and fail to allow for the regional orientation that has emerged on the Continent. At the same time, some Europeans are cynical about the efficacy of almost any solution to the problems of deterrence and defense proposed by the Americans. That mood also reflects apathy and an unwillingness to make sacrifices in a recession, and it is encouraged by the political changes that have swept over Europe. Recent years have seen France, Greece, and Spain elect Socialist governments, while Germany and Norway have moved toward the right, the former only provisionally, pending a closely contested election in March 1983 which some fear may mark the beginnings of reduced political stability. Italy faces a continuing political impasse, and the Benelux nations depend on fragile coalitions.

The growing economic and political constraints on the widening of the European Community intensify the basic security dilemma: While Europeans are ever more reliant on American power and the nuclear deterrent, they are increasingly aware of Henry Kissinger's 1979 warning that "Our European allies should not keep asking us to multiply strategic assurances that we cannot possibly mean, or if we do mean, we should not want to execute. . . ." We will return to this critical issue that General de Gaulle raised in the early sixties.

Such disparities of outlook periodically give rise to frustration in the United States and to proposals there for overhauling the Atlantic relationship. Sometimes American isolationists (and even "globalists")[7] make strange bedfellows with those Atlanticists who believe that Europe is vital to the United States but that the relationship can only be saved if far greater responsibility for its own security devolves on Europe, on the sink-or-swim theory. Hence, we have had a variety of proposals including a dumbbell configuration of linked but equal partners; a multilateral force (MLF) to share nuclear military power with the allies; the withdrawal of American troops to force the Europeans to do more; the decoupling of American strategic power from Europe in the context of a U.S.-European theater deterrent; and a strengthened conventional defense which would reduce NATO's dependence on nuclear weapons for Europe's defense. For their part, some Europeans have talked about a "Euro-deterrent" and a third force in the shape of a revived European Defense Community; but advances in Soviet military power have made this an impossible dream to all but a few.

Despite periodic outbursts of anti-Americanism, pacifism, and neutralism, a broad European consensus in support of American involvement in European defense remains after three decades. This is to ensure that American forces would be involved in hostilities from the outset and to give an aggressor incalculable risks of nuclear escalation. The maintenance of European security, so clearly in the fundamental interest of the Europeans, is also vital to the United States in its effort to check Soviet expansionism. For it provides a framework for the forward deployment of U.S. ground, sea, and air forces, and it is the essential insurance against neutralization, "Finlandization," or still worse, a form of Soviet domination which could make Europe a liability instead of an asset. Moreover, a U.S. alliance with Western Europe facilitates joint approaches to other security problems and provides a framework for political-economic cooperation which is especially valuable during a time of depressed economies.

Both Europeans and Americans share an interest in arms control and disarmament measures to lower the risks of nuclear war, above all, and to forestall other conflicts and permit some reduction in the arms burden on all concerned.

Opinion is far from monolithic in either Europe or the United States, and the recent addition of major church groups, such as the American Catholic Bishops, to the debate has added moral elements to the nuclear freeze and anti-nuclear issues. There are numerous differences of opinion about other armament and arms control issues. But there is a broad consensus on the need for a continuing European-American partnership which has endured the test of over three decades. That edifice must still rest on an American commitment—with a substantial continuing presence of conventional and nuclear forces—to Europe's security in exchange for a realistic level of European effort. But each side needs to be more sensitive to the special concerns of the other and to divisive influences, lest Europeans conclude that they might be safer without an alliance with the United States than with it. We may not be able to "eliminate the negative," but we can accentuate the positive—and build on it.

The Soviet challenge to Atlantic security in the eighties

Although indirect threats to Alliance security arise in the Third World, especially where Middle East oil is concerned, the only direct challenge is posed by the Soviet Union. It is inconceivable that any of Russia's East European allies would seriously threaten Western interests unless fully backed by the Soviet Union. Thus a new look is needed at the Soviet Union in the light of the leadership transition in Moscow.

The fact of massive Soviet military power represents an impressive achievement for a basically underdeveloped economy. The key question, however, is the intended uses of that power vis-à-vis the West and the Third World.

Some interests of the Soviet Union can be considered as inherent in the status of a major world power, and not open to effective challenge. They might therefore be a basis for peaceful coexistence with the West: Other "interests," however, derive from the Communist vision of history and Russia's imperial pretensions which the West cannot accept.

The former category might include maintaining the basic security of the Eastern bloc and deterring Western intervention during unrest in Poland; preventing German revanchism—especially by a reunited nation—which would stir painful Soviet memories; protecting the frontier with China, and preserving a sufficient balance of power to preclude a two-front conflict; and maintaining the Soviet political system against external disruption and internal stresses, such as the nationality and other problems inevitably engendered by a suppressive totalitarian system.

At the great power level, the Soviet Union—not unlike other countries—pursues political, economic, and military advantage while seeking to weaken and divide its opponents and influence their people by massive propaganda efforts. As of January 1983, Yuri Andropov, doubtless drawing on his KGB background in propaganda, has taken a major role in mobilizing a Warsaw Pact peace offensive, including a proposed nonaggression agreement with NATO. This campaign draws upon Warsaw Pact statements, appeals, and declarations going back to the sixties in some cases. While such "agitprop" must be countered by more effective Western information programs, few people would argue that the moral failings of the Soviet system, however grave, are such that the West must try to change it by direct pressure. For one thing, the risks of thermonuclear conflict that would be involved by doing so—or in effectively challenging Russian hegemony in Eastern Europe—would be enormous. But such realism should not prevent the West from calling attention to the massive failure of the Communist system, or working for a gradual easing of the rigid constraints imposed by Russia on its

Warsaw Pact allies. Their internal "disarray" may be as great as that so often publicized about NATO.

For the Soviets, real arms control would both reduce the threat they perceive and provide relief from the strains their enormous military-industrial complex imposes on the economy. Then there are Soviet interests in gaining access to Western products and capital, particularly technology and the foreign currency to pay for it. To the extent that such goods and services are nonmilitary in nature, these objectives are legitimate from the Western point of view.

The Soviet Communist set of interests needs to be examined through their own looking glass. As the Soviet journal, *International Affairs*, noted a decade ago:

"Throughout the existence of the Soviet state, all of its foreign policy acts have adhered to two main principles, originally elaborated by Lenin. First, there is the principle of internationalism, which is a starting premise in relations between the Soviet Union and the Socialist countries, and the countries fighting for the national liberation. Second, there is the principle of peaceful coexistence, for the establishment of which in relations with the capitalist states, the Soviet Union and the other fraternal countries have always stood:[8]

"Peaceful coexistence" is defined in Soviet literature as "the basic principle of the foreign policy of the USSR and other Socialist countries in their relations with states with different social systems . . . for stable peace, for the lessening and eventual elimination of the danger of the occurrence of a new world war.[9]

This doctrine emerged under Malenkov and Khrushchev, who were the first Soviet leaders to acknowledge publicly that the advent of nuclear weapons meant that the Soviet Union, as well as the capitalist countries, would face unacceptable levels of destruction in a third world war. But as confirmed at the XXV Communist Party Congress, "Peaceful coexistence does not extend to the class struggle and consequently to the ideological struggle of the two systems."

Detente goes beyond mere coexistence when it is defined in the Soviet handbook as "the process of reorganizing the modern system of international relations on the basis of peaceful coexistence," and leading toward a "gradual shift from the confrontation of states of the two systems to a mutually advantageous working relationship." But detente "in no way abolishes and cannot abolish or change the laws of the class struggle. On the contrary, it creates better conditions for the growth of the struggle of the working class. . . ."[10]

Thus we find the Soviet Union caught between its narrower interests as a state and its proclaimed Marxist-Leninist ideology, which sometimes appears to be a disguise for classifical imperial ambitions. The West often fails to understand that the Soviet Union cannot abandon the latter for the former and simply live and let live, because the legitimacy of the Soviet system depends upon the Marxist-Leninist view of the class struggle and its distinction between the capitalist world on one hand and "Socialist countries and the countries fighting for the national liberation." That claim to legitimacy is essential to justify the sacrifices imposed on the Soviet and East European peoples.

This explains why the twelve "basic principles of relations between the Union of Soviet Socialist Republics and the United States of America" agreed to by Nixon and Brezhnev in 1972 were never accepted by the Soviets as applicable to the Third World, or to areas affected by the Brezhnev doctrine, such as Eastern Europe or Afghanistan. This is the area, apart from the arms race itself, where most East-West disagreements arise, now that the issues of Germany and Berlin have been pretty well stabilized.

From a Western perspective, much has been yielded to assuage "legitimate" security concerns of the Soviets. Their goals for West German and Japanese ratification of the nuclear nonproliferation treaty were met. The Western powers have formally recognized the Communist regime in East Berlin, another major Soviet goal, while the Helsinki accords confirmed the legitimacy of the current boundaries in Eastern Europe. The West has also accepted the Soviet claim to strategic parity with the United States and has exercised self-restraint to try to curb the arms race throughout most of the seventies.

It is therefore troubling to mark the military buildup by the Soviets well beyond what is necessary for their own security, and the continuation of their efforts to divide the United States from Europe. If their goal is global hegemony and some form of dominance of Western Europe, then it cannot be accepted by the West, which must persevere in its efforts to insure that the correlation of forces does not further shift in Soviet favor.

There are other explanations for Soviet behavior including the Russian tradition of a large peacetime army—although this is disputed by some, the paranoia stemming from repeated humiliations and invasions by foreigners, and the bureaucratic rigidities that make curbing the dominant military-industrial complex difficult, especially during a transition in leadership.

The explanations might include the growing internal weakness of the Soviet system: economic growth has slowed substantially; manpower shortages have developed; and the endemic nationality problems have intensified. Whole sectors such as agriculture and energy are in difficulty. It has been suggested that the Soviet military and propaganda posture directed at the West is a facade—constructed to prevent the West from exploiting the destructive forces working from within. Others point to the differences between the Soviets' rhetoric for internal consumption and their more conservative conduct in the real world.

It is hard to weigh these factors, for all may be operating to some degree. But the Soviet Union continues an aggressive strategy accompanied by peace offensives designed to prevent the West not only from recapturing any military lead but even from redressing the military imbalance in Europe.

The policy of the Soviets appears as an amalgam of legitimate security concerns, peaceful coexistence coupled with ideological competition and an aggressive push to enhance the correlation of forces in their favor while they pursue "internationalism" with the Third World.

The challenge for the West is to search for positive elements, especially under the new Soviet leadership, while discouraging the negative. This involves the judicious use of deterrence and the offering of economic and arms control incentives that advance, or at least do not harm, Western interests. The search for answers to this challenge has given rise to many differences within the NATO Alliance.

We need to devote a word to the rapid consolidation of power by Andropov. A convergence of interest by the military and the KGB seemed to enable them to override the Communist Party—the leading power factor in the Soviet triad—which has prevailed in all prior successions. This could be because the KGB had the best candidate and all factions were tired of the immobilism of the Party gerontocracy. We harbor no illusions that anyone reaching the apogee of the KGB hierarchy, like Andropov, could merit the label of "closet liberal," and cannot overlook the information and disinformation activities of the KGB. But we also know that in the compartmented Soviet hierarchy, only a handful of people are allowed to perceive accurately the "real" world outside.

There seems reason to believe that Andropov is intelligent, tough, well-informed and pragmatic and that he faces severe internal problems of a structural nature. His ascension suggests a more dynamic and imaginative approach to arms control and other East-West negotiations, at least in their public relations aspects and possibly in substance. But it should also be recalled that Andropov's "constituency" in the Kremlin includes both the military and the KGB. It behooves the U.S. to be alert for surprises, whether pitfalls or opportunities, and strive to get its foreign policy house in order. That something needs to be done here is suggested by the reports of dissension within the Administration and changes in the Arms Control and Disarmament Agency (ACDA).[11] The President has to be and be seen to be in charge, although the Vice President's mission to Western Europe as a special emissary is appropriate. The roles of the National Security Council and the Secretary of State should be enhanced; and giving the Director of ACDA another hat as an Under Secretary of State might help coordination.

II. ARMS CONTROL AND DEFENSE INTERACTIONS

With the advent of the eighties, new questions have been raised about old issues: What is the nature of deterrence in an era of U.S.-Soviet nuclear parity, assuming it still exists? Is NATO's flexible response strategy still viable? Can the West significantly improve its conventional defenses (without unrealistic increases in levels of effort) by adopting new tactics, such as airmobile forces, "assault breaker" barrages, "high-tech" battlefields featuring precision-guided munitions (PGM) and electronic measures, or new structures for defense cooperation which can capitalize on economies of scale? Above all, does arms control—as we believe—have a role to play in advancing Western security in any meaningful sense, as opposed to propaganda value? If so, how can it be integrated with NATO's strategy and force structure, especially at a time of accelerating advances in military technology?

Detailed answers to such questions would go beyond the scope of this report. But we will attempt some summary judgments on the key arms control aspects, drawing on the combined experience of the working group.

Despite the President's May 9, 1982 Eureka College speech, where he mentioned the goal of "dismantling" the nuclear menace, some Administration officials apparently feel that arms control contains more dangers than opportunities for the West and should be given only the attention necessary for public relations. Even within the American arms control community, there are questions about the sixties' dogma that arms control and defense are two sides

of the same coin which can be integrated to enhance our net security.[12] This disillusionment with arms control (which the current Secretary of Defense once described as a "melancholy chapter"[13]) appears to stem from several causes; unrealistic expectations during the detente era; the overselling and subsequent withdrawal of the SALT II accords; the momentum of the Soviet military buildup; the more conservative political tide in the country; and complications introduced by new technology.

In Europe, however, professional thinking about arms control appears to retain some of the enthusiasm manifested in the United States a decade ago, while public opinion there has been particularly aroused by Western rearmament plans and the absence of arms control progress.

Even in the United States, the frustrations of the arms control community have spilled over onto the general public which has responded to various proposals to "stop the overkill" and "freeze" now—with relatively little thought to what would be frozen, how it would be verified, or what the effects might be on strategic stability.[14] In the November 1982 elections, freeze resolutions carried by wide margins in eight of nine states and in several large cities, insuring that the issue will be raised in the new Congress with better chances for success. It was defeated by only two House votes in 1982. The position of the U.S. Catholic bishops in questioning the morality of deterrence based on nuclear weapons will certainly intensify the debates.

With similar controversies also simmering in European politics, it is difficult to find a common denominator for Alliance discussions except on highly technical issues. Indeed, it may be because the public feels that if war is too important to be left to the generals, so arms control is too important to be left to the specialists, that the issue has stimulated so much political interest.

We believe that neither a defense position that is built around the "winnability" of strategic nuclear war,[15] nor the extreme alternatives of unilateral disarmament or freeze can withstand analysis or the test of politics, even apart from the considerable moral considerations involved. Rather, we believe that an East-West dialogue—without the unrealistic expectations of detente—and an intensified arms control process can establish a framework for stable security. By generating mutual deterrence to war, that would be in the common interest of both East and West. The concept of a nuclear freeze is good only if it is treated as one goal of a negotiating process, in other words as an end rather than a means to initiate such a process.

With the rapid advance of military technology on both sides—although the United States has sometimes enjoyed a lead of several years in such systems as multiple independently targeted re-entry vehicles (MIRVs) or precision-guided cruise missiles—an arms control dialogue is a necessity rather than a luxury in any long-term perspective. For in the absence of trust, an absence likely to endure, neither side will let the other achieve a meaningful superiority. Misperceptions of the other side's intentions, which can easily be magnified without such a dialogue, heighten the risks of thermonuclear miscalculation. They also add substantially to the heavy defense burdens now shouldered in both NATO and the Warsaw Pact, generally, at the expense of other important needs.

This means that both sides must integrate their defense programs and arms control objectives so as to be mutually reinforcing. They must discuss them, not only in the technical terminology of throwweights and MIRVs, but taking into account broader concepts, such as a stable security environment for the long term. If based upon rough parity, this approach should reduce temptations of preemptive attack in times of crisis. Those temptations could be encouraged as the ratio of warheads to vulnerable aiming points increases on both sides. This seems to us to support the arguments that multiple warhead missiles (MIRVs) are potentially destabilizing and that President Reagan's START proposals may leave too high a warhead-to-target ratio. This danger suggests a need for a new and broader look at strategic arms control—which would aim for a START goal of fewer multiple warhead missiles and seek to exchange an emerging regime of "mutual vulnerability" for one of mutually assured invulnerability of basic nuclear deterrence systems.

It is in the nature of both the U.S. and Soviet governmental systems that such a revived dialogue must have continued attention at the top, which means reestablishing if not "summitry" then at least more high-level discussions which do not become major media events. Meetings, whether of heads of government, foreign ministers, military chiefs, or special emissaries, need not aim at reaching specific accords. It is enough if they can generate an understanding of each side's true interests which can be reflected in guidance to lower level negotiators.

If such a U.S.-Soviet process gets underway—and a somewhat unorthodox suggestion is made later in this paper—then there will be opportunities for closing some of the the U.S.-European gaps through the interallied consultation process that should precede and follow such meetings. Equally important is the public perception, both in Europe and in the United States, that their leaders are at least trying to bring about stable rather than confrontational security relationships, and that arms control is being pursued for serious rather than propaganda purposes. The latter impression is heightened to the extent the dialogue is carried on through the public media as opposed to private forums, although a certain amount of internal political jousting and position-staking is bound to occur in both Pravda editorials and in the Western press.

Any recommendation in this area has to take account of the Soviet approach to arms control as an integral part of foreign and military policies, as outlined earlier. They have initiated proposals for nuclear-free zones, freezes, etc., to influence public opinion in the West while they maintain iron-handed dominance of Eastern Europe. But they are capable of negotiating seriously when confronted with firmness about weapons systems or forces which they perceive as a threat to their homeland, as the SALT and other accords of the past two decades demonstrate.

Even though the Russians, not unlike ourselves, often go into negotiations with positions designed to satisfy various bureaucratic or political constituencies rather than to be negotiable, the comment of one experienced Western negotiator is worth noting: "The dispassionate, structured dialogue on security issues which has been taking place in Vienna has already made a worthwhile contribution to dispelling the misconceptions and distorted perceptions of the military posture of the two sides."[16]

Let us look, then, at the East-West defense competition in Europe and the related arms control fora.

Strategic Forces

The strategic buildup by the Soviets, undertaken when the United States had leveled off its own strategic force posture quantitatively, has now achieved for them what the Carter Administration termed "essential equivalence"; and in the Reagan Adminstration's view, they may have gone beyond it, with the SS-18 and SS-19 ICBMs posing a threat to America's land-based Minuteman force in the future.

Comparing the two sides is extremely complex, for numbers and yield of warheads, throw-weight, accuracy, vulnerability and reliability factors must all be taken into account. The Soviet force structure still reflects an early decision to go for large payloads, and yields (partly to offset their initial low accuracy), and most operational Soviet ICBMs are still liquid-fueled, posing reliability problems. In contrast, the United States, with an early lead in warhead miniaturization and in solid fuels and better guidance, had no comparable need for large boosters. It also led in MIRV technology and still has superiority in cruise missiles and bomber force penetration capabilities.

Moreover, the Soviets have stressed land-based ICBMs while the U.S. has emphasized submarine launched missiles (SLBMs) and strategic bombers as shown in Chart I.

It is therefore little wonder that the two sides disagree in their respective assessments or that individual and institutional estimates within the West are at variance on what to count and how to weigh them in the balance.

Some rough comparisons of nuclear delivery vehicles of the U.S. and the U.S.S.R. and NATO and the Warsaw Pact are summarized in Chart II below. Like the more detailed Tables I and II in the Appendices, they are based upon International Institute for Strategic Studies publications.[17]

CHART II.—NUCLEAR DELIVERY VEHICLES [1]

[Missiles, bombers and artillery]

	United States	Soviet Union
Strategic missiles	1,572	2,387
Long-range bombers	316	[1] 330
Subtotal	1,888	2,717
Intermediate	39	606
Tactical	144	1,222
Total	2,071	4,545
British and French land-based and submarine missiles	162	
Total NATO	2,233	

[1] Includes all Backfire bombers. For strike aircraft figures, in addition to NATO and Warsaw Pact figures, see appendix tables I and II.

Total intercontinental missiles (both land- and sea-based) are listed as approximately 2,387 for the Soviets to 1,572 for the United States, with each side also having over 300 intercontinental range bombers. (The U.S. Government figure is 1,944 U.S. missiles and bombers to 2,704 for the U.S.S.R.)

The U.S. accordingly plans to add new Trident C4 (later D5, Trident II) submarine-launched missiles, 100 MX missiles—if a basing mode can be agreed upon and if Congress funds production—plus 100 B-1 bombers and, further down the road, "stealth" bombers designed to penetrate radar defenses along with new air- and sea-launched cruise missiles.[18] On the other hand, the U.S. is phasing out some older systems. The

Russians plan to develop at least one new large (probably mobile) solid-fueled ICBM, described as "in no way inferior to" the MX (if the U.S. deploys it) as well as other modernizations.

SALT I, was signed in 1972, and elaborated in SALT II which was signed in June 1979 (but withdrawn from Senate ratification that December following the Russian invasion of Afghanistan). These agreements set an initial limit for land-based and sea-based strategic missile launchers and heavy bombers of 2,400 (later to become 2,250) and provide for various other limitations, e.g., on "MIRVed" missile launchers and on cruise missile launchers per bomber. Though ratification of SALT II has been opposed by the Reagan Administration, each side has indicated that it would do nothing to jeopardize the treaty long as the other abided by it.[19]

We believe that more formal acceptance of SALT III, as an interim step in the context of the ongoing START talks, would make sense—forcing the Soviets to reduce, while the U.S. could increase up to the limit—without in any way removing incentives for agreement on deeper eventual cuts, which is the President's stated objective.[20] Any ultimate accord, of course, should be subject to Senate ratification.

The U.S. position for START was outlined in President Reagan's Eureka College speech on May 9, 1982. The negotiations opened in Geneva on June 20, and after two recesses are continuing early in 1983. The President proposed a first phase in which both sides would agree to reduce ballistic missile warheads by one-third or to a ceiling of 5,000, no more than 2,500 of which could be on land-based missiles. Both sides would be required to reduce ballistic missiles to a ceiling of 850. The focus of the proposal is on land-based missiles, where the Soviets have made their heaviest investment, so that the Soviets would be required to dismantle more missiles than the U.S., as well as more warheads. The U.S. with only 2,100-plus long-range ICBM missile warheads could presumably increase up to the ceiling of 2,500. Bombers and cruise missiles, where the U.S. has the lead, would not be further limited in the first phase but are open to discussion in the second, in which both sides would make further reductions, including reductions in ballistic missile throw-weight to below the current U.S. level.

The Soviet Union has subsequently proposed a combined ceiling of 1,800 missiles and bombers.[21] This would represent a 25-percent cutback in Moscow's existing arsenal and approximately a 10-percent reduction for the U.S., but there are some complicated strings attached, such as limitations on Trident II and MX missiles, as well as ambiguities; and a number of U.S. concerns are left unaddressed, such as specific warhead reductions. Chart IV compares the proposals.

CHART IV.—STRATEGIC ARMS REDUCTION PROPOSALS

	Proposed ceiling		Approximate current levels	
	United States	U.S.S.R.	United States	U.S.S.R.
Ballistic missile warheads (land/sea-based)	5,000	(1)	7,200	7,500
Land-based ballistic missile warheads	2,500	.....	2,150	5,900
Ballistic missiles (land/sea-based)	850	.....	1,600	2,350
Missiles and bombers	.....	1,800	1,900	2,700
Total strategic arms	(2)	(2)	(2)	(2)

[1] Lower ceiling.

[2] 25 percent reduction to equal numbers.

The January 1983 round of negotiations began against a background of cautious optimism on the American side, while confusing signals emanated from Moscow. An Andropov expression of hope for compromise and interest in a summit meeting was followed two days later by a *Pravda* editorial blaming the U.S. for the START impasse and stressing the familiar Soviet theme that the U.S. is seeking to gain "unilateral military advantages."[22]

Although the Working Group does not want to offer specific recommendations at such a delicate stage in these negotiations, we do think that the approach of initially capping the present arms race, using the SALT II benchmarks, would consolidate what has already been achieved and perhaps facilitate progress toward further reductions, even if no breakthrough is at hand. We also urge a maximum effort to make progress in 1983, perhaps by initiating the approach discussed later, so as to avoid a possible paralysis as the 1984 Presidential election nears.

Although there are differences in the Working Group about elements of the U.S. defense buildup, such as the MX and its basing, we do believe that in an era of relative parity, the U.S. must not be perceived by either its potential enemies or its NATO allies to be at a strategic disadvantage. For the former might be tempted into a rash bluff, with catastrophic consequences, or the latter might lose confidence in the Alliance itself. Thus, to the extent that any emerging gaps in the U.S. strategic deterrent cannot be rectified through the SALT-START process, there is little choice but to take the necessary steps to close them. But such steps should be designed to improve stability in times of international crisis and to be as cost-effective as possible, given the economic strains which the Pentagon budget adds to the U.S. budget deficit. Even more important, they should be consistent with the long-range goal of stable security for both East and West.

That goal, as noted earlier, should include a reduction for both sides in the ratio of warheads to aiming points, with particular reference to MIRVs, an emphasis on achieving invulnerability of basic strategic systems through mobility or sea-basing, and particular attention to verifiability. For example, the cruise missile—essentially a "buzz bomb" with modern, highly accurate guidance systems—meets the criteria of cost-effectiveness and relative invulnerability because of its mobility (in land- sea- and air-launched modes). But if extensively proliferated, cruise missiles could so complicate verification as to frustrate further progress on strategic arms control. We believe that the lessons of multiple warheads (where the early U.S. advantage proved to have a short half-life as the Soviets followed suit) should be applied to cruise missiles by including them in near-term arms control efforts. The applicable SALT II provisions might serve as a point of departure.

Finally, the Anti-Ballistic Missile Treaty of 1972 and its 1974 Protocol are important elements in the strategic stability equation. Although an argument can be made that modifications to permit greater protection of central deterrence systems could enhance stability, the Working Group believes that a defense arms race would also be potentially destabilizing and agrees that we should not depart from present ABM limitations. In similar vein, we would like to see the Threshold Test Ban Treaty (with a limit of 150 KT) and the Comprehensive Test Ban go forward as quickly as technical questions about seismic signals can be resolved.

Intermediate Range Forces

Since the Soviet acquisition of substantial nuclear capabilities, NATO has faced a basic question: To what extent can Europe be sheltered by the American strategic nuclear deterrent based largely in the United States? As nuclear parity between the U.S. and the Soviet Union approached, this became a sharper issue of confidence within the Alliance.

The opposing positions are that as long as the Alliance is perceived to be intact, a missile in Wyoming deters an attack in Europe as effectively as one based there; or, alternatively, that political geography is so important that a "theater deterrent" linked to but separate from the U.S. and sea-based forces and capable of striking the U.S.S.R. is needed.

The Alliance has never embraced either extreme. Doubts about the threat of strategic nuclear retaliation as a deterrent to conventional aggression led to NATO's "flexible response" strategy in the sixties, calling for a spectrum of deterrence based on sound conventional defense. (See Annex I for details.) Much earlier, Soviet missile deployments threatening Europe had led to the stationing on the Continent of U.S. medium-range Thor and Jupiter missiles. These obsolescent systems were replaced by the assignment of U.S. Polaris submarines to theater targets following the failure of the multilateral force (MLF) proposal. That scheme, involving missiles on internationally operated surface ships, was another effort to deal with the basic question, with particular attention to sensitivities of Germany as a non-nuclear power. The British retained and modernized, and the French developed, their own nationally controlled strategic nuclear forces at least in part because of negative leanings on the basic issue as well as for reasons of national prestige.

In the meantime, the Soviets deployed a substantial number of land-based intermediate missiles targeted on Western Europe during the sixties. With the Thors and Jupiters withdrawn, NATO had no comparable forces. This "gap" was tolerable as long as the U.S. was perceived to have strategic nuclear superiority. The Soviet deployment of SS-20 missiles, starting in the late seventies, widened that gap at a time when this strategic superiority was also disappearing.

The reactions of the U.S. and many Europeans to this situation have been ambivalent. On the one hand, they feared that a theater approach lead to "decoupling" Europe from the main deterrent and perhaps to a "limited," i.e., theater nuclear conflict and, on the other, that the absence of comparable theater forces put too much reliance for deterrence on increasingly less credible strategic systems. From a military standpoint, additional U.S. nuclear deployments in Europe now add only marginally to target coverage (which was not the case in the early years of the Alliance when range was a major limiting factor). But such deployments might ease the European's sense of political vulnerability and overdependence on the U.S. and sea-based strategic deterrent. To a degree, then, this concept revives earlier notions of "proportional" deterrence.

This was the provenance of NATO's dual-track decision in December 1979. It followed nearly two years of interallied discussion over the problem of disparities of military

power in Europe as the strategic parity of the superpowers became codified in SALT and in effect "neutralized" their strategic forces, as Chancellor Schmidt observed in a major speech.[23] It was designed to prevent the Soviets' use of military superiority to their political advantage, while also giving the West some leverage against the seemingly endless buildup of Soviet INF capabilities.

The package of 572 missile deployments—108 Pershing II and 464 ground-launched cruise missiles (chosen as large enough to be significant but too small to risk decoupling) was to go forward only in the context of "the pursuit of serious negotiations" on TNF, hence the dual-track concept; it aimed at meeting both political-arms control and deterrence needs. But the subsequent public rationale for the December 1979 decision has been inconsistent, varying among such objectives as deterrence, war-fighting, political signalling, answering the Soviet SS-20 deployments, and meeting NATO's inherent modernization needs, according to the points of view represented.

After initially rejecting negotiations—NATO had properly dismissed as propaganda Brezhnev's offer to freeze insted of deploying even more SS-20s—the Soviets did participate in preliminary negotiations in October 1980, which were suspended for the U.S. elections. It was May 1981 at the Rome meeting of NATO Foreign Ministers before agreement to begin the Intermediate Nuclear Force discussions during that year was announced. They have been going on in Geneva in a parallel forum to START since late 1981.

In November 1981 President Reagan announced the U.S. proposal for a "zero option" in which the U.S. would agree not to deploy the 572 Pershing II or ground-launched cruise missiles if the Soviets would dismantle all their intermediate range missiles based on land, about 600 SS-4s, SS-5s, and SS-20s. The U.S., of course, has no missiles of this range on land to dismantle. Aircraft and U.S. sea-based missiles assigned to NATO would not be limited, nor would comparable Soviet systems. British and French forces would also not be covered by the proposed agreement. The Soviets argued that the U.S. proposals would change the balance in total intermediate range nuclear weapons from 1:1 to 2:1 in favor of the West. Because of the underlying divergencies on what to count, a Western estimate of the theater balance, including all nuclear-capable aircraft, comes out 560 to 3,890 in favor of the Soviets, while the latter count only 975 for themselves against 986 for the West.[24] The first substantive Soviet proposal, according to the then Director of ACDA, was to limit both sides to 300 intermediate range missiles launchers and 900 warheads.[25] These would include only missiles deployed in the European portion of the U.S.S.R. (where the Soviets have now deployed 340 SS-20 triple warhead missiles) and for the West some 162 British and French missiles.

The INF negotiations resumed in January 1983 against a backdrop of a new offer by the Soviets to reduce their missiles to the level of the combined British and French missile forces (approximately 162). Andropov's December 21 statement also indicated that the Soviets would reduce to any lower number to which these allies might scale down.[26] This was promptly rejected by the United States on its merits and because of many ambiguities (including the status of "reduced" SS-20s removed beyond the Urals), and by Britain and France as inappropriate to their special situations. It is clear, however, that a bargaining process is underway, even though it is heavily larded with propaganda.[27]

Press reports suggest that the Administration is split on how far the U.S. should deviate from its initial zero-option negotiating proposal.[28] Our Working Group is also divided between those who feel that the original December 1979 decision was so unnecessary or wrong (or at least that it was overtaken by the subsequent failure to pursue SALT) and a larger group who believe that the decision was made by responsible Alliance leaders only after long evaluation and should be implemented on schedule unless a negotiated solution satisfactory to the West is reached.

We all agree that although only the U.S. is directly negotiating with the Soviet Union, any and all decisions must be made by the Alliance—or at least the European countries principally concerned with the deployments (Britain, Germany, and Italy and possibly Belgium and the Netherlands). This is especially true for West Germany, where March 1983 elections promise to highlight the nuclear deployment issue.

The problem is twofold: some U.S. officials feel that only a "zero-zero" balance is satisfactory, since the Soviets would otherwise retain a significant Euro-strategic advantage, while NATO would suffer from the political perceptions of that advantage. Others see the GLCMs as posing verification problems and regard the Pershing IIs as potentially destabilizing because of their few-minute flight time to the Soviet Union, so that the actual deployment might set back arms control hopes. The other problem is that anti-nuclear protests plus Soviet propaganda could undermine the determination of European governments to proceed, offering the Soviets no incentives to reduce and handing NATO a bad psychological defeat.[29]

The majority of our Working Group believe the answer lies in continuing with the deployment plan (as NATO agreed to do at its December 1982 ministerial meeting) while pursuing negotiations realistically and flexibly, especially as the first deployments draw near in 1983. Without specifying how "flexibly" might be defined, it seems clear that the zero option cannot be construed as an all-or-nothing proposition. Otherwise there would be no point to holding negotiations! Some combination of limited or modified NATO deployments of U.S. missiles and partial Soviet dismantling and withdrawal should be possible if both sides persevere in private bargaining. Even the British and French forces (which are a part of the "threat" as viewed from Moscow) need not be an insuperable obstacle. As some involve single warhead systems, while each Soviet SS-20 has three warheads, some qualitative or asymmetrical adjustments could be made which would allow the two sides to take allied forces "into account" without negotiating about them. But clear understandings would be needed about dismantling, not just redeploying, the SS-20s, as the Soviets have since recognized in principle.

On the contingency that the negotiations nevertheless fail, it is important in the working group's view for NATO to have demonstrated genuine flexibility so that the necessary deployments proceed on the basis of evident Soviet intransigence or propaganda initiatives. But if the Europeans should decide otherwise, then it is important for the U.S. to avoid making this a test of loyalty to the Alliance with a public orgy of agonizing reappraisals. For that could do the Alliance more harm in the long run than the good that might flow from either a successful deployment or a negotiated outcome.

There may be other ways of skinning the cat, such as to deploy MRBMs on ships stationed off Europe, as some U.S. officials have suggested, although there are also drawbacks to such a course. But any actions will require great sensitivity by the United States to the special political problems of Germany and Italy (which may also face 1983 elections) as well as an avoidance of threats and posturing, and a corresponding awareness of U.S. congressional sensibilities by Europeans.

The allies can only solve the basic problems by working together on both the deployment and the arms control tracks, keeping in mind that the Alliance is concerned with solidarity, rather than pieces of military hardware or their siting. Moreover, the INF issue is only one thread in the interwoven fabric of arms control issues and processes. The important thing is to keep it in that context and not to pull on it to the extent of unraveling the whole.

Conventional forces and the MBFR negotiations

Since the early cold war there has been a quantitative military imbalance in Europe favoring the Warsaw Pact, especially in a scenario where the Pact takes the initiative in attacking; and that disparity is unlikely to change, at least in this decade. As the International Institute for Strategic studies says in the 1982-83 version of its Military Balance series: "The numerical balance over the last 20 years has slowly but steadily moved in favor of the East. At the same time, the West has largely lost the technological edge which allowed NATO to believe that quality could substitute for numbers."

Chart V shows some current comparisons of NATO and Warsaw Pact forces.

However, there has also been a balance of deterrence, as shown by NATO's 33 years of peace, which reflects not only qualitative factors but also the Western mobilization potential, and Soviet uncertainties about nuclear escalation and about the reliability of their Warsaw Pact allies in a shooting war. The tendency of military establishments to overestimate the capabilities of prospective opponents may also add to the credibility of NATO's deterrent as seen from Moscow.

Given the Soviet Union's superiority in theater nuclear capabilities and its attainment of full parity in strategic weaponry, it is only prudent for NATO to strengthen its non-nuclear defenses to the maximum consistent with political and economic realities, while in the meantime planning defenses that avoid the vulnerabilities of depending on early first use of nuclear weapons. Beyond this, there is little consensus among experts on either continent. (Background on the "no first use" debate is given in Annex I.) Europeans are now intellectually interested in improve conventional capabilities, but only in the context of the agreed NATO strategy of flexible response. We believe that much should be done to improve them along the lines SACEUR General Rogers has been urging. Increasing annual real defense spending by 4 percent annually, he believes, could achieve meaningful conventional flexibility in NATO's response capability over the next six years, at a 1983 average

cost per capita throughout the Alliance of under $25.[30] The U.S., of course, is planning almost twice as large a percentage of annual real increases but may not be able to sustain it under present economic conditions. The European allies, already hard pressed to make 2 or 3 percent real increases, will find it even less feasible in the near term but they could do so if there is a robust recovery.

It is hoped in NATO that interallied armaments cooperation, including the efforts of the Eurogroup, can improve the effective utilization of defense resources. France and Britain, however, face the nuclear power's problems of being unable to fund both nuclear and conventional modernization and the temptation of what might be described in Paris as "plus frappe pour le franc." Many NATO officials felt that Britain's decision to buy the Trident was the least effective use of these funds from the Alliance point of view. France, by her own choice outside the military structure of NATO, now faces the dilemma that only closer coordination with allied forces can make her conventional ground and air power meaningful if they are underfunded during the current economic stringency.

In the event of a conflict in Europe, any nuclear escalation would enter a vast unknown with unlimited possibilities for Murphy's law and panic and miscalculation. But since this condition applies to both sides, the very uncertainty contributes to the structure of deterrence. NATO should therefore preserve as wide a range of nuclear options as possible. Although the central front properly remains the primary concern, improvements must also be made in NATO's ability to respond to contingencies on its flanks and at sea, which are probably as likely as the massive attack in Germany often cited in the defense planning literature.

Against this background, do the negotiations for Mutual and Balanced Force Reductions (MBFR)[31] hold any promise? Despite the discouraging stalemate at Vienna for almost a decade, it has provided a valuable education for all participants, in the only set of alliance-to-alliance negotiations since Athens and Sparta.

Prior to July 1982, Western participants in Vienna had proposed that reductions to a common ceiling be achieved through separate, consecutive, negotiated agreements. The first would cut U.S. and Soviet forces only but would include commitments by the other Western participants about a second agreement for reducing the remaining forces. In July 1982 following the Bonn Summit meeting, the western side submitted a new proposal which moved back to the original Warsaw Pact concept of a single agreement on reductions with successive stages of implementation. The first stage would still comprise only U.S. and Soviet reductions. This willingness of the non-U.S. participants to commit themselves to reductions from the outset could provide a basis for some movement in the negotiations.

Over the years, considerable progress has been made in Vienna, although no soldiers have yet been removed as a result. Both sides have now tabled treaty drafts. In its version, the East has confirmed its informal acceptance of the West's concept that the United States and the Soviet Union should reduce first, that personnel reductions should focus on active duty ground force manpower, and that ground forces should be cut to a common ceiling for both alliances set at 700,000 ground force manpower and 900,000 total manpower for each. In principle, it has been accepted that the ceiling should be collective for each alliance, that is without national subceilings but with a possible limit of 50 percent of the aggregate for any one country, thus easing Eastern concerns about Germany.

The West has proposed "associated measures" including advance notification of large numbers of troops entering the Central European reduction area and of major out-of-garrison activities. The Western terms would permit entry to and departure from the reduction area only through permanent exit-entry points manned by observers; periodic exchanges of force data would be required; and, most important, each alliance would be allowed an annual quota of ground and/or air inspections of the forces of the other. The East has agreed, in principle, although with significant differences of detail, to temporary exit points with observers, prenotification of major movements into the area and out-of-garrison activities, and to exchange data after reductions.

The stumbling block to an agreement is the data issue—disagreement as to the number of Warsaw Pact ground and air force personnel in the reduction area, a difference of about 160,000 for ground forces alone.[32] The West's figure for Warsaw Pact ground force manpower is about 960,000 while the total provided by the Warsaw Pact; is about 800,000.

Agreement on data would seem to be intrinsic to the concept of reducing. A reduction must be accompanied by a ceiling on the remaining forces expressed in a finite number. Since it is impractical to count all of the personnel comprising the forces under the ceiling as of a given moment, the necessary tools for checking compliance reduction backed by continuing data exchange and an adequate verification regime.

It would appear that the Warsaw Pact has omitted some categories considered by the West to be active duty military personnel. The ideal way to resolve the difference as to data would be to compare Western and Eastern figures for the same components. To date, the East has been unwilling to furnish the necessary data. It has argued that agreement on data is not a prerequisite, claiming that both sides should undertake to reduce to the agreed common ceiling of 700,000 and rely on commitments to cooperatively verify thereafter the residual force levels.

If the Warsaw Pact's refusal to supply data is motivated by a basic unwillingness to make reductions of the size and asymmetry which would be called for by accurate data on its forces, then relying on verification of residual levels *after* withdrawal could lay the groundwork for later recriminations. And those, in turn, would undermine the mutual confidence which a successful agreement should enhance.

To date, neither the Warsaw Pact nor NATO participants have committed the sustained high-level political effort necessary to an agreement. Progress on the data problem and the other remaining issues might be achieved if both sides, including the British and Germans, decide to make such an investment. Progress in other arms control negotiations, such as INF, might help the Soviet Union to resolve the data roadblock. The economic cost to both sides of maintaining the present two million-man military confrontation in Central Europe and the damage it does to the overall East-West relationship will continue to provide incentives for both sides to make the compromises necessary to reach an agreement.[33]

Intergrating arms control efforts?

These are many reasons, tactical and political, why the three negotiations discussed have been held in separate forums. For one thing, most of the NATO allies, like their Warsaw Pact counterparts, are involved in MBFR, whereas naturally only the United States and the Soviet Union are involved in the SALT-START process. On INF, the West did not want to discuss British and French nuclear forces, and so that too is a bilateral negotiation—although the U.S. is closely coordinating its positions through NATO's Special Group on this subject. But in substance, as contrasted with procedure, all three negotiations are linked; for progress—or obstacles—if one can facilitate (or impede) others. In the long term, we believe, all of the bargaining chips may have to be dealt with concurrently and in coordination, and thus be figuratively on the same table, up to and including summit-level processes, in order to clarify options for tradeoffs. For example, an equitable MBFR accord might reduce both sides' theater nuclear requirements somewhat, or an INF agreement could help START to make progress and vice versa.

Despite the lack of progress in recent years, we believe that arms control can play a meaningful role in Western security, and that the leaders of the NATO countries should look to a new era of opportunities as the transition from Brezhnev to Andropov settles down and as the West redresses some of the military imbalances it faces. Not to do so would be to concede that the future can only offer more of the past, a conclusion not likely to be well received by the West's "successor generation."

We suggest that NATO may need a new "wise men" (or women) type of exercise, carefully structured as was the 1967 Harmel study,[34] to help regenerate the Alliance during the eighties, reinforce *both* its defense and arms control policies, and hold out the hope of realistic arms control accords for the future.

Such an effort could also help seize the "peace" initiative from the peace movements and from the Russians; for peace is far too important to be left to either one. Preparing now for a concerted effort to achieve real arms control and reduction progress in the late eighties and nineties need not undercut needed Western defense efforts. Indeed, one theme of a new Harmel report might well be that adequate defense and deterrence is the other side of the coin of arms control and may indeed be its prerequisite. At the same time, such a project could ease the concerns of those worried about the economic burdens of armaments and take advantage of the very real incentives on both sides to ease the arms burden for the future. Most important from an Alliance standpoint, is the role such an initiative could play in narrowing transatlantic gaps and defusing the mounting tensions between the political right and left in virtually every country in Europe.

One must not forget, however, that many troublesome asymmetries disturb the climate for East-West arms control. One obvious one is that hundreds of thousands of people can gather to express their views and protest in Bonn and New York and Paris, while a dozen Russians doing the same thing in Red Square are arrested![35] Another is that secrecy has been a hallmark of Russian society since before the Bolshevik Revolution, and it serves as an instrument of security against external enemies and a

tool of internal governance. Information control limits the debates and frictions that might occur over resource allocation between guns and butter, for example. The Soviet Union consistently maintains that its defense spending is under 18 billion rubles per year (about 3 percent of the national income) while Western sources estimate it at four to five times that figure, in both rubles and percentage of GNP. There is no agreement, however, as to what is included or excluded, so that the Soviets' stated figures may involve only operating and construction costs.[36]

The problem of the numbers gap in MBFR has already been mentioned; but questions have been raised about Soviet adherence to the Limited Test Ban Treaty and there are apparent violation of chemical/biological warfare agreements in Southeast Asia.[37] We believe, therefore, that the Reagan Administration is well advised to emphasize the importance of verification and include inspection where this is essential. It might be useful now to try to establish and test some agreed verification machinery, manned either by NATO and Warsaw Pact observers or by a team drawn from neutral countries, who could exercise a hypothetical inspection mandate initially in the West and then in a noncontroversial area of the East. This procedure should not become an obstacle to arms control accords; they might in fact be eased forward if a mutually acceptable verification infrastructure were created ahead of time.

A New Approach?

Given the apparent impasse in all three major arms control fora, and the possibilities that new opportunities that may arise from Andropov's succession to Brezhnev's mantle in the Soviet Union, it seems useful to consider an unorthodox proposal for breaking the deadlock. This is to temporarily leapfrog the current negotiating postures and force structures of both sides and look for an opportunity in the future which could feed back into the present.

Suppose that the U.S. and Soviet governments created a high level joint commission to examine prospects for stable security between the superpowers and their allies in the nineteen nineties. The composition, terms of reference, and modalities of such a body are vital and seem a worthy agenda item for preparation for a possible summit-level meeting. Numerous variations are possible, including participation by a few key allies and nongovernment experts such as, for the U.S., some members of the House and Senate. Alternatively, the Soviet government Academy of Sciences and its U.S. counterpart with some executive branch officials added might be the sponsoring organizations. Another option, and a way to avoid the asymmetrical problems of a commission in which the Soviet side would tend to be monolithic, would be to establish without publicity a very small negotiating group on an official basis, according to the precedents mentioned in Henry Kissinger's memoirs. But all such options would have to involve some high-level interallied consultation at the appropriate stages. Whatever the details, the focus would be on arms control at the broadest level and need not attempt to resolve basic East-West differences on such topics as conflicts in the Third World or the Brezhnev doctrine. By moving from the technical and bureaucratic to the longer term political-economic-strategic context, shared interests might become more readily discernible. The parties could continue to look at the trees in the arms control forest now being explored in actual negotiations; but at least there would be a joint effort to survey the entire forest as it is likely to exist in the *next* decade.

One might consider a variation in the normal adversarial approach, in which each side initially proposes an overall security posture for the *other* during the nineties which should meet that side's legitimate security needs and be acceptable to its opponent within a stable security context. The exchanged critiques of such postures would make possible a more constructive dialogue in which the participants would look at security—and especially survivability of strategic deterrent forces—through each other's eyes.

To those worried about nuclear conflict or escalating armaments, the nineties may seem far away. But the U.S. is already locked into its major military programs through at least 1986-7 and well beyond if Congress funds such major programs as the B-1 bomber and MX missile. Momentum and the bureaucratic, military and industrial vested interests of both sides may well preclude significant shorter term adjustments. Moreover, such an initiative could reassure the younger generations that their future need not be mortgaged to an arms race at ever higher costs and risks, and that a saner superpower relationship is possible, at least in arms control matters.

By looking beyond the horizon one need not necessarily be stymied by situations such as Poland, Afghanistan, and the other current East-West issues. If the Soviets are in fact interested, it might then be possible to construct a "START-SALT III" framework in which the limitation objectives of SALT II and the deep reductions, as in START, could be combined. The stabilizing values of walking the cat back toward single warheads and away from MIRVs and their first-strike potential might be seen more clearly in this context.

Such a framework would have to take into account the theater nuclear and non-nuclear balances, which have proved intractable in the INF and MBFR negotiations, respectively. The parties could allow "in principle" for forward-based and allied nuclear systems without having to negotiate precise tradeoffs, and they would have to allow for Soviet Far Eastern needs and missile deployments as well. By also taking account of the agreement already reached in principle in MBFR for common manpower ceilings in the reductions area, some guidelines might then result for all three current negotiations which could reinforce—and be reinforced by—consensus on stable security in strategic systems.

Moreover, it is impossible to imagine eventually putting an even broader framework around the subject matter: some limitations on total military expenditures for the two sides. This could be to hold them to a percentage of gross national product no larger, or even smaller by a specified degree than at present. Because such an undertaking does not lend itself to "verification," given the Soviet penchant for secrecy, the myriad difficulties of definition, and the possibilities of cheating, some members of the working group do not see merit in the approach. On the other hand, the Soviets say that they do trust (to a degreee) the macro figures which are available on the U.S. defense program, and some U.S. experts assert that modern input-output models of the Soviet economy could have fairly high reliability for detecting any major shift from a "baseline" military posture. But the underlying hope, of course, is that such an agreement would tend to be self-enforcing because of the clear economic advantages for both sides. The magnitudes of their defense spending over the past two decades are shown in Chart VI, which also reveals the sharp Soviet increases since 1972 and since 1980 for the United States.

The fact of an understanding, if one could ever be reached, might provide vital ammunition to those Soviet leaders who would like to shift the heavy allocation of resources from the Russian military-industrial complex toward agriculture and other nonmilitary investment and consumption. They could presumably be counted on to see that their side adhered as long as the other one did. Or if they could not prevail in internal debates, their failure might become known to the West through intelligence channels and reinforce the limited verification possibilities by national means. An understanding on military expenditure limitations[38] might have to be an informal one, similar to the arrangement whereby both sides are adhering to the SALT II accords. But it would make the most sense and be most feasible in the context of other, more specific, arms accords, as discussed above.

Supposing a joint commission—or any other suitable mechanism—could agree on a broad framework for stable East-West security in the nineties, taking account of space systems and other technology, what then? It would hardly be binding and their government could treat it as an academic exercise. But even if it were not made public, the mere existence of such a report with the inevitable caveats and dissents could gain the attention of the top leadership in East and West alike. From there, summit-level communications might spawn new initiatives in the negotiations underway. By looking to a high common ground of the future, both leaderships would gain short-term political advantage, minimize risks of backlash from currently opposed constituencies, and imbue the future with a new sense of hope, rather than mutual fears.

From a U.S. standpoint, such an approach should facilitate public and congressional support for the defense improvements underway (many of which we agree are needed) by establishing a future framework for meaningful arms control which could have valuable feedback on all of the current negotiations. Both leaderships might thus gain confidence that the other side was not seeking to gain strategic superiority and see hope for reducing the long-term armaments burden on their economies.

III. ECONOMIC AND DEFENSE INTERACTIONS

The members of the Alliance, like much of the world, are experiencing the worst recession since the nineteen thirties. Growth is stunted and Western forecasts show relatively slight real increases in GNP. Unemployment is making records in some countries, has reached politically disruptive levels every where, and is threatening to remain so. The many causes of this universal malaise include the two OPEC shocks of 1973-74 and 1979-80 which acted as an excise tax on all oil-consuming countries, reducing their disposable income and increasing inflation. The seven economic summit countries, for example, saw their GNP growth cut in half, inflation doubled, and productivity slashed between the five years before and after the 1973 oil price watershed.[39] These events also created a maldistribution of liquidity, which the banking system recycled successfully at first but at

the cost of mountainous debt burdens in many developing countries. The danger of large-scale defaults still overhangs the world economy.

Another problem was the accumulation of structural shifts caused by changing factor costs, especially for energy, advances in technology, increased competition, including the newly industrialized countries, and altered consumption patterns. A further cause was the failure of macroeconomic policies in many countries to adjust adequately to these and other changes. Also, slow growth and shifting demographic patterns meant too few workers to pay for the inflation swollen social entitlements promised in the high-growth sixties.

Persistent unemployment at high levels poses major problems for all our governments in addition to the human deprivation involved. It strains budgetary resources, wastes human and economic ones and restrains production and economic growth. It also casts disquieting shadows. The longer it continues at high levels the greater becomes the danger of social and political instability throughout the Alliance.

The causes and cures of the economic situation are not the subject of this policy paper, but its effects impinge directly upon the ability of the Alliance to carry out its most basic task of maintaining a defense posture to provide for the common security. Yet they also increase the incentives for a balanced approach to arms control.

The Working Group sees these relationships: Arms control is illusory without a strong defense; but defense cannot assure security without arms control. The economy serves as the base of the triangle.

NATO's unofficial target is an average real increase in defense spending of 3 percent annually, and General Rogers as SACEUR is urging 4 percent, as noted earlier. Low growth rates in the economy will mean that such increases must come out of domestic programs already strained by the social insurance costs of unemployment. It is doubtful that many other countries will find it politically feasible to emulate President Reagan's success in increasing defense while holding down nonmilitary programs.

Even he may have increasing trouble on that course, as rising budget deficits are perceived as a potential cause of a new climb in interest rates which could abort a U.S. economic recovery and as various political constituencies begin to target defense cuts as an alternative to further belt-tightening in their own programs. Moreover, the magnitude of the funds allocated to the Defense Department in a relatively short period may lead others to conclude, like a former Comptroller General of the United States, that they simply cannot be spent effectively. His belief is "that present schedules constitute unacceptable risks of waste, mistakes and even loss of public confidence in the (defense) goals themselves."[40] The Pentagon denies that it is simply "throwing money at the problem", but many Working Group members, believe that a more measured and sustainable military buildup would be preferable to the Administration's current approach, which has been criticized even by the conservative Heritage Foundation.

While some additional demand is generated in the defense sector of the economy, its multiplier and job-creating effects are generally believed to be less than other forms of public spending produce, and the fiscal and monetary effects tend to offset each other, at least in the United States. There are also some questions about the inflationary and bottleneck effects of defense spending,[41] although these are less troublesome when there is great slack in the economy.

In the Administration's current five-year plan, the defense budget is projected to grow 7.4 percent annually in real terms and rise to over 7 percent of GNP by FY 1986.[42] But even if it proves able to overcome growing congressional opposition and go ahead with this plan, it is possible to foresee heightened friction in the Alliance over burden sharing. The United States has one of the lowest real defense budget increases in NATO (actually a negative 1.5 percent) between 1970 and 1980,[43] but as a percentage of GNP, U.S. defense spending was already the highest in NATO in 1981 even before the Reagan increases took effect.

As the U.S. burden (measured by share of GNP) rises to nearly twice what most of the other allies are able to do, we are concerned that there will be renewed interest in a Mansfield-type amendment calling for American troop withdrawals from Europe unless the allies do more. (Indeed in September 1982, the Senate Defense Appropriations subcommittee voted 12 to 1 to reduce American troops in Europe by 15,000 men.) The concern here over Japan's modest defense efforts is also illustrative of the sentiments.

We believe that U.S. force withdrawals would not have the desired effect in Europe. They would most likely be counter-productive by encouraging a slackening in European efforts, possible initiating a vicious cycle with adverse effects not only on security and Alliance solidarity but on prospects for the MBFR and other arms control negotiations. It seems important therefore for the Alliance to stay at least roughly in tandem, moving forward together, even if slightly more slowly, to implement the agreed force improvement program on a cost-effective and politically substainable basis, although that may mean slowing the U.S. buildup to a somewhat more measured pace.

The economic squeeze also will require maximum feasible use of armaments cooperation to achieve economies of scale and enhanced standardization and interoperability to improve efficiency, subjects which attract some lip service but little commitment. Hard choices may also have to be made about future weapons systems, looking to trade off qualitative technological sophistication for greater simplicity and cost-effectiveness. Different approaches to problems in these areas, including competition in high technology systems and the problems of opening a two-way street in armaments procurement, can also exacerbate inter-allied frictions.

The only "good" news on the economic front is that the Warsaw Pact countries seem to be in even worse shape economically. The Soviet Union faces slow labor growth in the eighties (0.4 percent annually, and much of that is in the non-Russian Republics) continuing inefficiencies in agriculture, recurring energy bottlenecks, and industrial and GNP growth rates only about half what they were in the late sixties. They will face difficult investment decisions, not only between guns and butter (i.e., agriculture), but also between housing and consumer goods and modernization of industry.[44] Of course, no government in Eastern Europe has to submit its defense budget to a democratic legislature, and while public opinion counts to a degree, it can be manipulated. Still, in a climate of adversity, added economic incentives for meaningful arms control progress should exist.[45] The scope for large savings on nuclear systems is relatively small in the short term, so MBFR is the most likely beneficiary from the standpoint of both East and West.

Looking ahead to the competition in space and other high technology systems, one commentator has observed: "For those who look not for the end, then perhaps for some pause in the arms race, the only hope lies in the budget-defeating costs which new weapons now lay upon productive populations wherever they live. The point really does seem to be approaching when man will no longer be able to afford the things which he is clever enough to invent,"[46] nor, one might suggest, to live with their consequences.

The security problems discussed in this paper have been with us for a long time. Even with arms control progress, they will continue to absorb significant portions of national output. If the defense burdens on the economy can be eased somewhat so as to aid recovery, not only in the United States but throughout the world, then the healthier economic outlook which seems probable for the mid- to late-eighties can sustain a long-term commitment to necessary defense programs—and to the augmented conventional capabilities in Europe we feel are essential to ease the Alliance's nuclear dilemmas. Thus we must close the gaps between arms control and defense and between both of them and the economy, and resolve differences between the United States and Europe on the way these interactions are approached. They must be better integrated both conceptually and in the day-to-day conduct of policy.

IV. THE POLITICAL ECONOMICS OF EAST-WEST RELATIONS

A Senate Foreign Relations Committee study concluded that a major source of the Alliance's most severe crisis in many years "can be found in differing U.S. and European attitudes toward East-West relations. Many of these differences are not new; they have been part of the dynamic of alliance relations since NATO was founded."[47]

As the cold war intensified and NATO came into being, the United States established controls on trade to the Soviet Union and later to Communist China after that country's entry into the Korean War. Legal authority for these measures was provided by the Export Control Act of 1949 and the Mutual Defense Assistance Control Act of 1951, better known as the Battle Act. The latter threatened to cut off American military and economic aid to states that did not conform to U.S. policies on exports to the Communist countries.

In the words of one congressional report: "From the outset, few West European or Japanese statesmen or businessmen shared the underlying assumption, or for that matter, the ultimate objective of the embargo. Only under the most intense pressure and coercion did Europe and Japan accede to this restrictive policy . . . allied differences with the United States rested both on policy and economic interests. Europeans simply could not accept the view that denying trade would put an end to communism or even curtail the Communist countries' development."[48]

Although other Western nations resented U.S. pressure, they recognized that a unilateral U.S. embargo would be ineffective if the Soviets could get similar goods from our allies. So they cooperated in forming the Coordinating Committee for Multilateral

Export controls, known as COCOM. The COCOM lists of restricted items generally parallel those of the United States. They cover military and atomic energy categories plus an industrial-commercial list which has proved the most controversial, since many items on it are "dual-use," i.e., have civilian as well as military potential and often are technologically advanced.[49]

One writer evaluating COCOM's effectiveness has concluded that it "can be looked at like the proverbial glass of water—as half full, half empty! To the extent that some advocates of a hard line toward the Communist bloc sought to establish a complete economic boycott, then the COCOM system was a relatively weak instrument and, at best, a 'sieve.' But taking account of the widely divergent interests working within and among a group of sovereign countries, the case can also be made that COCOM has accomplished its stated purposes quite well over an extended period of years."[50]

Disputes in the West about the political purposes and effectiveness of trade denial were inevitably compounded by important differences of national economic interest. Historically, trade flows with the East have always been of greater consequence for Western Europe than for the United States. As noted earlier, European NATO countries have averaged nearly 10 percent of their world trade with the Eastern bloc countries compared to half that much for the United States. Even during the heyday of detente, Henry Kissinger candidly acknowledged that:

"Our strategy was to use trade concessions as a political instrument, withholding them when the Soviet conduct was adventurous and granting them in measured doses when the Soviets behaved cooperatively." [51]

U.S. attitudes on trade and investment with the nonmarket economies have, in the words of one analysis, "moved between the carrot and the stick, never quite certain which is the preferred instrument, and from time to time actually trying both concurrently." [52]

The Europeans, while following COCOM procedures on military goods, have tended to press for liberalization in the system and join reluctantly, if at all, in sanctions such as the Carter Administration imposed as a result of the Soviet invasion of Afghanistan and the Reagan Administration's moves in response to the repression in Poland.

The Soviet Union, while expressing resentment over "linkage," has tended to ride with the tide of U.S. policy shifts. When the U.S. has been more open and positive, as during the detente of the early and mid-seventies, the Soviets have appeared as eager trading partners and beneficiaries of Western transfers of capital and technology; but they have also been able to make the necessary adjustments when U.S. policy turns more restrictive, as at present.

This set the stage for the major dispute over the pipeline to bring natural gas from Siberia to Western Europe. The Reagan Administration attempted to persuade the Europeans that the project would make them vulnerable to Soviet pressure and, because the USSR could earn some $10 billion per year in hard currency, that it would reduce pressure on the Soviet economy and facilitate their military buildup.

The U.S. pleas fell on deaf ears, and by the fall of 1981 arrangements involving European firms and contracts for pipe and machinery were nearing completion. With the establishment of martial law in Poland in December, President Reagan announced a program of sanctions which included a retroactive denial of export licenses to U.S. firms involved in the pipeline.

At the Versailles Summit meeting in June 1982, the pipeline controversy was brought up again, but U.S. views were not accepted. The United States thought it had made headway in gaining European consent for greater prudence in government-subsidized or guaranteed credit to the East and in tightening COCOM restrictions on "critical technologies." The Europeans thought they had attained greater U.S. willingness to examine sympathetically the prospects for coordination of macroeconomic policy and central bank intervention in monetary disturbances. But contradictory statements on both sides started even before the meeting adjourned.

While the degree to which misunderstandings played a role in the U.S. decision of June 23, 1982 is unknown, it is clear that much European resentment centered on the President's decision to ban the use of even U.S.-licensed products for the pipeline to be furnished by European firms.

The extraterritorial application of U.S. controls, i.e., to foreign subsidiaries of U.S. companies, has long been a source of controversy.[53] It was compounded in this case by the fact that the controls were retroactive in the sense that contracts had been made prior to the imposition of U.S. sanctions. For its part, the United States argues that it is not logical to allow a company to do from its overseas affiliate what it is prohibited to do from the United States.

All the European governments involved reacted strongly, intervening with local subsidiaries to insure delivery of goods, regardless of orders from the parent company.[54] The United States applied sanctions and the entire Alliance went into an uproar.

President Reagan defended his policy of refusing to ban grain exports on the ground that grain could be obtained elsewhere and that it costs the Soviet Union money, whereas the pipeline would bring them earnings.[55] Meanwhile both the European allies and the Soviet Union made clear their determination to proceed.

In any event, following an unusual NATO foreign ministers meeting in Canada in October, the President announced on November 13, 1982, that enough progress had been made in coordinating trade relations with the U.S.S.R. to lift the sanctions.

The Working Group believes that several lessons can be learned for the future: First, the energy vulnerability argument should have been thrashed out among the allies before the project was so far advanced. The European Community maintains that "even when gas is flowing at the maximum rate in 1990, it will represent less than 4 percent of the Community's total energy consumption." [56] By contrast, Germany is currently about 24 percent dependent for its share of energy on Middle East oil, France nearly 30 percent. Some degree of diversification may be prudent. The question is what degree might make the allies vulnerable to Soviet pressure. And that basic question was never aired in the North Atlantic Council, which provides a forum for consultation that might have been useful in this case.

Second, the rationale of hard currency denial is an issue that will return on other East-West questions. The Europeans believe that the Soviet economy is structured so that allocations of resources can be enforced by fiat, despite the current economic situation and competing resource demands. The United States tends to believe that any action which limits the Soviet's ability to purchase in the West will help to constrain the Soviet defense budget. This is another question worthy of dispassionate study on an Alliance basis.

Third, the dependability of U.S. suppliers has received a setback all over the world. Countries that have looked to Americans as leaders in advanced technology are now likely to have second thoughts about entering into contracts, fearing that they, too, might be subject to some ex post facto change in arrangements on which they had relied.

Perhaps the most significant long-term effect of the controversy is its strain on the solidarity of the Alliance, and the revelation of the limits of that solidarity. It is too soon to tell whether the allied discussions will lead to greater European cooperation in COCOM restrictions and a tightening of future governmental credits to Soviet bloc countries. That should certainly be the outcome. We believe even non-security-related trade should be conducted with the East on as commercial a basis as possible.

On the broader East-West issue, however, we believe than an effort must be made to provide a better institutional framework within which a coherent approach to economic relations can be constructed to serve the interests of the Alliance. Suitable fora exist in NATO, the OECD, the IEA, and COCOM. Special machinery could be constructed, drawing on the expertise of all four institutions, to develop a common policy framework.

In particular, NATO presents possibilities which have never been tapped because suggestions that NATO consider economic matters have often been rejected on the grounds that "OECD can do it better." Yet the relationship between economic and strategic policy is both beyond the competence of the OECD, with its neutral members, and of direct relevance to the defense problems which are NATO's responsibility. This might also become a useful agenda item for the new "Harmel" exercise—a review of major Alliance policy issues by a group of respected statemen—recommended above.

It is evident from the history recited that reaching an agreement will not be easy. The United States will have to give considerably in its "carrot and stick" approach, since the Europeans clearly are not prepared to conduct economic warfare with the East against the grain of their immediate economic interests. But to the extent agreement can be reached, the U.S. policies, however, watered down from the optimum desired by Washington, will be more effective precisely because they are an Alliance position. If broad guidelines can be agreed upon, particular issues such as the pipeline can be avoided or resolved. Without a common framework, unilateral U.S. policies are bound to fail; and common sense argues that half a loaf would be better than none.

One element in such a unified policy might be the establishment of NATO guidelines for government-to-government umbrella agreements with the Soviet Union and its allies. If these were limited to, say, a three-year period, there would still be some leverage in terms of their renewal and a basis for common contingency planning about responses to future Soviet action. But within the specified period, it would be understood that governments would not interfere with approved commercial projects, i.e., those not involving COCOM list items, absent an overt hostile act against an Alliance member. A better sense of mutual benefits

could emerge from a series of such short-term agreements which would increase the reluctance in both East and West to damage the prospects for their continuation.

Finally, as previously noted, there are a whole set of "West-West" economic tensions affecting the Alliance. The painful industrial restructuring which deep-rooted as well as cyclical factors are forcing on the industrial world at a time of recession and high unemployment is generating serious discord. The trade and investment issues involved are often intractable; but their corrosive side-effects can be limited by a common effort, such as the pledge to avoid protectionism which was renewed, albeit weakly, at the GATT Ministerial Meeting in November 1982, and has been a feature of most economic summit sessions.

No matter how painful politically the competitive issues may become, it is the duty of statesmanship to see that they are not placed on a par with the core issues of the Alliance: preserving our common security and freedom and preventing nuclear war.

ADDITIONAL COMMENTS FROM WORKING GROUP MEMBERS

A number of the members of the Working Group believe it important to make the following supplementary statement with regard to nuclear arms control:[57]

There is an urgent requirement for United States arms control policies aimed at limiting and ending the nuclear arms competition with the Soviet Union through negotiated agreements. Indeed, unless the United States demonstrates a genuine and persuasive intent to negotiate and conclude such agreements, the cohesion of the North Atlantic Alliance and the security of its members will be seriously weakened, especially during a period in which the declining performance of their economies renders member countries unusually vulnerable to political instability.

Specifically, we believe the interests of the U.S. and its allies call for:

1. Prompt ratification of the SALT II Treaty.

2. Sustained commitment to further agreements on controls and reductions of nuclear weapons, based on the principles of essential equivalence and adequate verification. While recognizing the desirability of an interim agreement in the intermediate range nuclear force (INF) talks, we believe that in the longer run, owing to the fact that the various weapons are inter-related, the negotiations for INF and inter-continental range missile systems should be combined.

3. Completing negotiations on the Comprehensive Test Ban Treaty, followed by prompt ratification.

4. Negotiating a ban on the deployment of long-range land-launched and sea-launched cruise missiles. These weapons are so small, so easily hidden, and so impossible to distinguish between nuclear and conventionally armed versions, as to make verification—and hence arms control itself—virtually impossible.

5. Resuming the negotiations to ban anti-satellite weapons.

COMMENTS BY R. DANIEL M'MICHAEL, ROBERT L. PFALTZGRAFF, JR. AND JEFFREY RECORD

In our judgement, the Atlantic Council Policy Paper is fundamentally flawed in its underlying assumptions which are best summarized in the introductory comment: "What matters most, however, is the likely Soviet response to the fears which U.S. actions and rhetoric are instilling in them and the counter-programs they may develop." It is from this notion of U.S. culpability that flow the major themes and general assessments contained in the Policy Paper. In essence the paper underplays the scope and nature of the Soviet strategic arms buildup and efforts to achieve military superiority while it implies that U.S. effors to respond to this are confrontational and destabilizing. To portray the United States in such a light represents a gross distortion of reality that essentially ignores our nation's long history of responsible arms control policy. It is a view from which we must disassociate ourselves.

We are equally troubled with what this Policy Paper does not contain. There is no coherent examination of Soviet strategic doctrine, whose central proposition is that nuclear war is not only thinkable but winable. There is no informed discussion relating the potential for "nuclear blackmail" that may result from the ongoing Soviet strategic-military buildup to the Brezhenev Doctrine or to "wars of national liberation." Further, the Policy paper fails adequately to analyze the security environment in Europe in light of the Soviets' long-term global strategy: the withdrawal of the United States and the decoupling of the American security guarantee from Western Europe. In the short period since assuming power, Andropov has moved adroitly in support of this Soviet goal.

We concur in the expression of support in the Policy Paper for deployment of the 572 Pershing 2 and Ground Launched Cruise Missiles taken by the NATO Ministerial Council in December 1979 after more than two years of intra-Alliance consultation. However, we believe that the Policy Paper should have reaffirmed the need to begin deployment in accordance with the present timetable, i.e., before the end of 1983.

Although NATO has yet to deploy any of the INF systems, the Policy Paper calls upon the United States to demonstrate greater "flexibility" in the INF talks. Instead it is the Soviet Union which has shown little real flexibility in deploying SS-20s at the rate of one every five days.

There are many other conclusions and recommendations contained in this Policy Paper with which we do not agree:

1. The Policy Paper sets forth arms control recommendations which essentially represent a restatement of the failed policy of the past, whose principal result has been the unilateral weakening of the U.S. strategic military posture. Despite years of SALT and MBFR negotiations, the Soviet Union made huge strides in its armaments buildup at all levels—nuclear and conventional.

2. It is in light of Moscow's continuing anti-arms-control performance that we reject the assumption set forth in the Policy Paper that "real arms control" (whatever that means) would reduce the Soviet perception of threat. Their foreign policy behavior is driven by a combination of ideological imperatives and a conception of security that calls for successive zones of control and influence, based upon global power projection capabilities.

3. We oppose ratification of the SALT II Treaty because it would codify, or formally legalize, the advantage given to the Soviet Union in weapons of intimidation, the counterforce-capable strategic launchers that constitute a first-strike potential. The SALT II unit of account, deployed launchers, is inadequate. In START, the United States has properly emphasized the need for substantial reductions in the number of missile warheads and their destructive potential.

4. Placing a limitation upon defense expenditures, as the Policy Paper recommends, does not provide, in itself, a useful approach to arms control. What matters, in the context, is not the total of expenditures, but rather the military capabilities which result. Moreover, there is no evidence of persons in the Soviet system who would be able to reorient spending on a substantial scale from defense to nondefense sectors.

5. The Policy Paper is unduly obsequious with respect to the political and economic sensitivities of our European allies. It conveys the image that the United States must never do anything that would irritate our allies or dispel whatever illusions some in Europe may have about the nature of Soviet power and the required responses to it. As the Policy Paper points out in one discussion but ignores in another, European opinion is not monolithic. Moreover, political solidarity is deemed to be paramount, even at the lowest common denominator, and even at the expense of maintaining the effective military deterrence for which the Alliance was created and upon which the security of the West depends.

In conclusion, we believe that the United States must attempt to conclude arms reduction agreements designed to eliminate the present Soviet advantages in destabilizing weapons, notably SS-20s and heavy intercontinental systems. Both in our public statements and our negotiating policy we must reject the idea that the Soviet Union has any legitimate security interest calling for the possession of such clearly offensive weapons.

The prerequisite to the rebuilding of Alliance consensus is a policy of strength on the part of the United States which cannot be accomplished by arms control policies which codify a military imbalance unfavorable to NATO. This would make difficult reestablishing Alliance cohesion and tempt the allies to press the United States toward ever more "flexibility" in diplomacy with the East—leading to even greater imbalance and to the potential for Soviet nuclear blackmail to "get America out of Europe."

APPENDICES

ANNEX I

The Background of the Alliance

Many people do not remember the formation of the Atlantic Alliance in the spring of 1949 or the pervasive fear of the Soviet Union which gave it birth. Against the background of a devastated Europe, Soviet post-World War II conduct provoked the West into one of the most ambitious "entangling alliances" ever undertaken by a group of sovereign states.

In 1949, the consensus was that only a policy of firmness and substantial U.S. aid to war-weakened Europe could prevent gradual expansion of the Soviet sphere of influence. Within a year, this view was reinforced by the North Korean invasion of South Korea, an action believed approved by the Soviet Union. Because of these hostilities, the United States began a major rearmament effort which gradually involved the Europeans through mutual defense assistance, and ultimately led to the creation of German armed forces within NATO.

During the late sixties, revisionist historians argued that the West had overreacted in the late 1940s to the Soviets' traditional sense of insecurity, a fear reinforced by the U.S. monopoly of atomic weapons. According to this view, Soviet moves were designed to prevent the West from interfering with the installation of Communist governments

in Eastern Europe. Although this thesis held an attraction for many, especially in the United States, history suggests that West European fears for survival as independent countries were justified.

In retrospect, to counter Soviet actions, NATO overreacted with respect to estimates of its political will and capabilities. For example, the Lisbon goals of 1952 called for 35 to 40 active and 55 to 60 reserve divisions, plus 9,000 aircraft by 1954. These goals were not met and the Alliance entered a phase of "rearmament and relaxation," [58] where a wide discrepancy persisted between strategy and forces.

When the Eisenhower Administration assumed office in 1953, it adopted the strategy of "massive retaliation" which allowed the Joint Chiefs of Staff, subject to Presidential control, "to base their plans on using tactical and strategic nuclear weapons against conventional attacks wherever this was militarily advantageous." [59] This reliance on nuclear deterrence, however, was to have far-reaching consequences.

In time, NATO strategy was aligned with that of the United States in the form of MC 14-2 which called for the use of nuclear weapons at the outset of any war initiated by Soviet aggression against any NATO member. Although the Soviet Union had detonated a fission nuclear weapon in 1949 and demonstrated fusion (or hydrogen bomb) weapons by 1953, allied planning continued to be based upon an assumed predominance of American nuclear power for the foreseeable future.

Defense and Deterrence: The Traditional U.S.-European Debate

From its inception, NATO faced discrepancies between declared strategy and military capabilities. The Korean War had spurred the dispatch to Europe of additional U.S. ground forces. Any by the mid-fifties, imaginative diplomacy had overcome the demise of the European Defense Community and incorporated German forces into the Alliance. Though lacking an adequate posture for conventional defense, NATO had become more than a paper organization.

Britain, the only other nuclear power in the Alliance in the 1950s, followed the U.S. lead in emphasizing nuclear weapons because of their cost-effectiveness. NATO also began to emphasize the availability of tactical nuclear weapons for ground as well as air forces. The Deputy Supreme Commander, SHAPE, Field Marshal Montgomery, made it "absolutely clear that we at SHAPE are basing all our operational planning on using atomic and thermonuclear weapons in our defense." [60] This nuclear emphasis, formalized in MC-70 and MC-14/2, inevitably raised questions about the role of nonnuclear forces. Accordingly, various conventional forces formulae were advanced such as the "trip wire", the "plate glass window", and the "shield". [61]

Throughout the fifties and into the sixties, debates also raged on both sides of the Atlantic about the possibility of "limited" nuclear war. The dispute was complicated by the Soviet Union's rapid acquisition of substantial tactical and strategic nuclear capabilities. By the late fifties, the Soviet Union posed an array of medium-range missiles against Western Europe which led General Norstad, SACEUR, to recommend the establishment of a countering MRBM force in Western Europe. This force ultimately was composed of Thor and Jupiter ballistic missiles and Mace and Matador cruise missiles. These missiles were eventually overtaken by technology and phased out in favor of submarine-launched Polaris and intercontinental missiles.

Thus, the stage was set for the argument as to whether the fundamental mission of the Alliance was deterrence or defense. None doubted that nuclear deterrence by threat of retaliation was a sound strategy if it worked, but what if it failed? Assuming the initial battleground would most likely be on Western Europe soil, it was understandable for the Europeans to favor rapid escalation to intercontinental exchanges rather than a continent-destroying tactical nuclear (or even a large-scale conventional) war. On the other hand, the United States found it difficult to contemplate the initiation of intercontinental nuclear destruction except as a last resort and pointed out that such a strategy was losing its credibility. There was also a well-founded suspicion that the Europeans preferred the anomaly of relying on the nuclear guarantee (which some began to call an option of "pre-emptive surrender" if the Russians successfully called the Americans' bluff) in order to avoid substantial increases in defense spending required to reduce NATO's nuclear reliance. Some of the classic arguments were summed up in books by various European defense ministers. [62]

With John F. Kennedy's inauguration in 1961, America sought to deemphasize strategic nuclear retaliation, and to create the ability to fight limited wars and to counter insurgencies—thus returning to the conventional forces emphasis of the Truman-Acheson era. [63] This shift in strategy was, in part, due to the concern that the Eisenhower "New Look" had placed the United States in a musclebound posture. But more was involved than doctrine. The Eisenhower policies gave priority to the Air Force strategic nuclear mission, thus leaving the Army and Navy chafing for larger roles and appropriations.

Early in 1962, the Kennedy Administration began to seek modifications in NATO's strategy in accord with this new U.S. approach. Under the leadership of U.S. Secretary of Defense Robert McNamara and the British Defense Ministry, NATO Secretary General Dirk Stikker was persuaded to launch an exercise intended to be "the first genuine attempt at a cohesive examination of the military strategy and force requirements of the Atlantic Alliance . . . to bring every government from Ottawa to Ankara face-to-face with the hard question" about defense budgets. [64]

Initially, the Stikker exercise was conducted for the United States by a group of civilian experts from the Rand Corporation; but Secretary McNamara decided to change the arrangement to a more official one and appointed Timothy W. Stanley as his Assistant for NATO Force Planning in the spring of 1965. The extent to which European members were determined to cling to the MC-14/2 nuclear doctrine is revealed by the difficulty encountered in establishing an experimental political/military game which postulated a limited Soviet incursion into NATO territory. Three countries refused to allow their territory to be involved in any such scenario on the basis that rather than meeting the assumed incursion, NATO was obligated by its strategy to bomb Moscow!

NATO also adopted a "rolling" five-year force planning system that depended upon political guidance from defense ministers. A parallel effort was made to involve the defense ministers personally in Alliance planning through the Nuclear Planning Group mechanisms, also established by Secretary McNamara, as an alternative to the foundering proposal for a mixed-manned multilateral force (MLF) proposed by some American and European officials as a solution to NATO's longstanding "nuclear sharing" dilemma.

After sharing with the European defense ministers theretofore highly classified U.S. information, and involving them actively in assessing the consequences of different nuclear use scenarios, NATO finally agreed in 1967 to the modified strategic concept of "flexible response." This concept was a compromise between two points of view—the Europeans viewed the threat of nuclear escalation as an essential part of the deterrent, while the Americans contended that a substantial nonnuclear defense capability was essential to make a credible deterrent. [65] Actually, the term "flexible response" was regarded by its drafters as an oversimplification. The basic concept was one of assured response with flexibility in escalation to bring about a favorable solution, with the element of uncertainty of that response viewed as an essential part of the deterrent. Also involved in the flexible response concept was a renewed commitment to "forward defense", a political imperative for the Germans, despite the military drawbacks. [66] For Americans, flexible response meant an increased commitment to a conventional defense in Europe.

On 9 May 1967, the NATO ministers, for the first time, gave detailed political, strategic, and economic guidance to the NATO military authorities; in December, they approved the revised NATO strategic concept, MC 14/3, which had been prepared in accordance with previous ministerial guidance:

"This concept, which adapts NATO's strategy to current political, military, and technological developments, is based upon a flexible and balanced range of appropriate responses, conventional and nuclear, to all levels of aggression or threats of aggression. These responses, subject to appropriate political control, are designed, first, to deter aggression and thus to preserve peace; but, should aggression unhappily occur, to maintain the security and integrity of the North Atlantic Treaty area within the concept of forward defense." [67]

Thus, a period of doctrinal peace emerged, made possible, in part, by the withdrawal of France (which was against any NATO Doctrine that might undercut the French *force de frappe*) from the military affairs of the Alliance. However, the underlying issue of the role of nuclear weapons in NATO strategy was not solved.

It is ironic that fifteen years later, the debate has been reopened with a proposal for "no first use". [68] McGeorge Bundy, George Kennan, Robert McNamara, and Gerard Smith argue that limiting nuclear weapons to the role of deterring the other side from using them could significantly reduce the dangers of nuclear conflict, as well as some of the Alliance's nuclear dilemmas, and that a nonnuclear defense of Western Europe is possible, taking advantage of new conventional technologies, such as "smart" guided weapons, without calling for unrealistic increases in the defense effort. [69] This thesis has been countered by a group of German experts who contend that such a doctrine would allow an aggressor to make war a calculable rather than an incalculable option, thus increasing the risk of war. [70]

Questions have, however, been properly raised about the availability of NATO forces and resources to meet higher levels of con-

ventional defense that would be required, even though on an aggregated basis the resources are theoretically there. NATO has a larger population, significantly greater gross national product, more men under arms, spends more on defense, and has a higher technological base than the Warsaw Pact. The problem is that as a voluntary coalition of countries whose parliaments represent widely divergent viewpoints on the Soviet threat and on defense needs, it is improbable that political leaders could deliver forces matching the resources potential. Thus, there is no agreement in the Alliance on a doctine of no first use of nuclear weapons. But there is a consensus that NATO's defenses must be structured to avoid the necessity for early first use, and the "use or lose" dilemma must be avoided or at least postponed as long as possible.[71]

Detente

Coincident with these developments in NATO's strategy and force planning was a year-long study on "The Future Tasks of the Alliance" undertaken on the basis of an initiative by former Belgian Foreign Minister Harmel. This project was designed to answer critics of the Alliance who felt NATO's emphasis on maintaining military strength was interfering with the prospects for political settlements of the many East-West issues that gave rise to the Cold War. Its central conclusion, widely accepted at the time but subsequently overlooked, was that "The Atlantic Alliance has two main functions: . . . to maintain adequate military strength and political solidarity, to deter aggression and other forms of pressure, and to defend the territory of member countries if aggression should occur . . ." and "to purse the search for progress towards a more stable relationship in which the underlying political issues can be solved." The study concluded that:

"Military security and the policy of detente are not contradictory but complementary. Collective defense is a stabilizing factor in world politics. It is a necessary condition for effective policies directed toward a greater relaxation of tensions. The way to peace and stability in Europe rests in particular on the use of the Alliance constructively in the interest of detente. The participation of the USSR and USA will be necessary to achieve a settlement of the political problems of Europe."[72]

The Harmel study was approved at the same December 12-14, 1967, meetings dicussed earlier. But in this case, France was an active participant, albeit opposed to any bloc-to-bloc diplomacy.

The interest in Soviet-American relations was taken a step futher in 1968 at the Reykjavik Ministerial session when NATO issued a declaration concerning East-West mutual force reductions. By December 1968, the philosophy of the Harmel report, combined with Chancellor Brandt's *Ostpolitik* and the possibility of some breakthrough in the long impasse over Berlin, led NATO to issue a declaration, responding in part to various Warsaw Pact messages and appeals, concerning the readiness of its members to negotiate on a wide range of European security issues but only on a realistic basis and if accompanied by positive Soviet responses.[73]

The eventual outcome of several years of such "detente diplomacy" was the Conference on Security and Cooperation in Europe (CSCE) which led ultimately to the 1976 Helsinki Final Act and the current talks on Mutual and Balanced Force Reduction (MBFR) in Vienna.[74]

NATO repeatedly resolved that "until agreement can be reached on East-West mutual force reductions . . . NATO will continue to ensure that there is no reduction in its overall military capability.[75] But the Alliance was weakened by the drawdown of some U.S. forces for Vietnam, Canadian and British restructuring, and by a failure of various members of the Alliance to meet their force goals in both qualitative and quantitative terms.

The United States, meanwhile, leveled off its own strategic nuclear forces and undertook the Strategic Arms Limitations Talks (SALT), a process started under President Johnson, continued through President Nixon's tenure, and extended through the Ford and Carter Adminstrations.[76] By the late seventies, however, detente increasingly came under fire, particularly by U.S. groups such as the Committee on the Present Danger, which felt that detente had worked in a one-sided manner, leading the West to relax its military preparedness while the Soviet buildup continued unimpeded. President Ford even forbade the use of the term "detente" during his reelection campaign. Other critics argued that the Helsinki agreements, in the context of the CSCE, provided Western recognition of the Soviet postwar territorial acquisitions, but allowed the Soviets to disregard human rights principles.

The death of detente was sounded when the Soviets invaded Afghanistan in 1979. President Carter imposed sanctions, withdrew the SALT II agreement from Senate ratification, and recommended substantial increases in U.S. defense spending, which were further enlarged under the Reagan Administration.

In NATO in the late 1970's, the perceived shifts in the conventional and nuclear military balance led to twin responses by the Alliance. A long-term defense program, undertaken at U.S. urging, and various arms cooperation measures were initiated to try to reduce both the conventional and the nuclear gap. As the Soviet nuclear buildup continued, especially the deployment of the mobile Soviet SS-20 missile, concerns about the Eurostrategic balance led to a European initiative which resulted in the Long Range Theater Nuclear Force (LRTNF) also known as the Intermediate Nuclear Force (INF) modernization. This program involves the planned deployment in Western Europe, beginning in December 1983, of 464 ground-launched Tomahawk cruise missiles and 108 Pershing II intermediate range ballistic missiles. This decision, arrived at a special meeting of the foreign and defense ministers on December 12, 1979,[77] was taken on the basis of a two-track approach also calling for U.S.-Soviet negotiations on Intermediate Nuclear Forces which commenced in Geneva in November 1981.

All of the issues noted above and discussed further in the text retain a potential for divisiveness within an Alliance characterized by a collective short memory about the many other occasions when it has survived the "disarray" attributed to it by the media. The key point is that for over thirty years, NATO has managed to keep the peace in Europe, which is longer than any other period in modern history.

ANNEX II

ANNEX III

Selected glossary of terms and weapons

Antiballistic Missile (ABM). A missile system specifically designed to detect, intercept, and destroy incoming nuclear warheads.

Arms Control. Any plan, arrangement, or process resting upon explicit or implicit international agreement, governing any aspect of the following—the numbers, types, and performance characteristics of weapons systems (including their command and control, logistics support arrangements, and any related intelligence gathering mechanisms) and the numerical strength, organization, equipment, deployment, or employment of armed forces.

Arms Race. A reciprocal build-up in the quality or quantity of the military power of two opponents, caused by each striving to maintain or achieve a desired military posture relative to the other.

Balance of Power. An equilibrium of adjustment of power (as between potentially opposing sovereign states) such that no one state is willing or able to upset the equilibrium by waging war or interfering with the independence of the other states.

B-1 Bomber. A new U.S. strategic bomber capable of flying intercontinental missions without refueling. The B-1 will be capable of high subsonic speeds. The aircraft is in an advanced state of development and has a planned armament of twenty-four nuclear-tipped short-range attack missiles (SRAM) and free-fall nuclear bombs.

Command and Control. An arrangement of personnel, facilities, and the means for information acquisition, processing, and dissemination employed by a commander in planning, directing, and controlling operations.

Counterforce Strategy. A strategy of using nuclear weapons to destroy the opponent's nuclear and general military forces. The main consequence of adopting such a strategy is the need for large numbers of extremely accurate nuclear weapons.

Countervalue Strategy. A strategy of targeting nuclear weapons on the opponent's cities and industrial areas. When compared with a counterforce strategy, this strategy requires fewer and less accurate nuclear weapons.

Cruise Missile. A non-ballistic, air-breathing missile using sophisticated guidance systems. The U.S. Tomahawk cruise missile scheduled for deployment in NATO will be ground-launched (GLCM) and each launcher carries four missiles. There are also air-launched (ALCM) and sea- (or submarine) launched (SLCM) cruise missiles.

Damage Limitation. A term used in nuclear strategy debates to indicate a situation in which one side, feeling that an attack is imminent launches a pre-emptive strike with the objective of reducing the opponent's nuclear forces and therefore the severity of the expected strike.

Deterrence. The prevention from action by fear of the consequence. Deterrence is a state of mind brought about by the existence of a credible threat of unacceptable counteraction.

Disarmament. Reduction of military forces or armaments, especially to levels set by international agreement.

Escalation. The deliberate or unpremediated increase in the scope or violence of a war.

First Strike Capability. The ability to destroy all, or every nearly all, of the enemy's strategic nuclear forces in a pre-emptive nuclear attack.

First Strike Strategy. A strategy adopted perforce by a country which possesses nuclear weapons that are vulnerable to an attack and must therefore be used before such an attack is made.

Flexible Response. The capability to react across the entire spectrum of possible challenge, for coping with anything from general atomic war to infiltration and aggression. Also, a shorthand description of NATO's current strategy. (See Annex I).

General and Complete Disarmament (GCD). Reduction of armed forces and armaments by all states to levels required for internal security and for an international peace force.

Gray-Area Systems. Weapons systems that are not classified as central systems per se, yet have strategic capabilities (e.g., the Soviet Backfire bomber, US forward based FB-111s).

Inspection. Agreed procedures by which individuals as representatives either of national states or of international organizations conduct activities for the primary purpose of verifying compliance with arms control and disarmament agreements.

Military Strategy. The art and science of employing the armed forces of a nation to secure the objectives of national policy by the application of force or the threat of force.

Minuteman III. Principal U.S. intercontinental ballistic missile, introduced in 1970. Range 7,020 nautical miles and a payload consisting of three 160-kiloton independently targetable warheads.

Multiple Independently-Targetable Re-Entry Vehicle (MIRV). In this multiple warhead system, each warhead can be directed toward an individually selected target. The warheads are mounted on a "bus" which is guided through a series of predetermined velocity changes, releasing a warhead after each change.

Mutual Deterrence. The situation that obtains between two powers when each is deterred from attacking the other (i.e., launching a first strike) because the damage expected to result from the victim's retaliation (second strike) would be unacceptable: usually thought of as applying only to attacks upon the homelands of the opponents, but sometimes extended to important interests and commitments outside the homelands.

Neutron Bomb. An enchanced-radiation warhead, designed to maximize radiation and minimize blast effects.

Nuclear Parity. A mutually recognized equivalence of nuclear military power between two adversary states such that the military plans of both are based upon qualitatively similar though not quantitatively identical factors of strength. Generally employed with primary reference to the correlation of strategic power.

Nuclear Superiority. Advantage possessed by a side having a nuclear striking force so large that it would be credible that its possessor might use a nuclear strike in retaliation to conventional aggression and still have sufficient nuclear capability to carry out a second-strike response.

Pershing. A U.S. ballistic missile deployed in Germany in its first mode since 1969. The Pershing II planned to modernize the system, would extend its range (to 1,000 miles) and improve its accuracy. It is included in the NATO INF plan.

Polaris. U.S. submarine-launched ballistic missile. The current A3, first deployed in 1964 has a range of 2,500 nautical miles and three kiloton warheads (not independently targetable).

Poseidon. The latest U.S. submarine-launched ballistic missile, first deployed in 1971. Range 2,500 nautical miles and a payload consisting of ten to fourteen 40-kiloton independently targetable warheads. Currently deployed on twenty-seven strategic submarines.

Proliferation of Nuclear Weapons. The acquisition of national nuclear capabilities by states not previously possessing them, either by the dissemination by nuclear weapons or information necessary for their manufacturer, or by the development of domestic nuclear programs.

SALT I. The series of negotiations beginning in the late 1960s resulting in the "Interim Agreement Between the United States of America and the Union of Soviet Socialist Republics on Certain Measures With Respect to the Limitation of Strategic Offensive Arms" and the "Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Limitations of Anti-Ballistic Missile Systems," signed at Moscow on May 25, 1972.

SALT II. The negotiations since SALT I, culminating in the signing on June 18, 1979, in Vienna, of the "Treaty Between the Union of Soviet Socialist Republics and the United States of America on the Limitation of Strategic Offensive Arms" and the "Protocol to the Treaty Between the Union of Soviet Socialist Republics and the United States of America on the Limitation of Strategic Offensive Arms." When the Soviets invaded Afghanistan in December 1979, President Carter suspended the SALT II Agreement from Senate ratification.

Second Strike Capability. The ability to mount a nuclear attack after a first strike by the opponent. For a strategy of deterrence the object is to convince the enemy that no matter what he does (in a first strike), his opponent will retain the capability to deliver an unacceptably severe second strike.

Stability. An international situation in which there are inherent forces that tend to combat disruptive influences or to restore order whenever disruptive elements threaten it.

Strategic Advantage. The overall relative power relationship of opponents which enables one nation or group of nations effectively to control the course of a military/political situation.

Strategy. The art and science of developing and using political, economic, psychological, and military forces as necessary during peace and war, to afford the maximum support of policies, in order to increase the probabilities and favorable consequences of victory and to lessen the chances of defeat.

Surgical Strike. A U.S. term used to indicate a selective attack with nuclear weapons in contrast to an all-out first strike or retaliatory second strike. The desirability of being able to carry out a surgical strike is being used to justify the development and procurement of nuclear weapons with counterforce capabilities.

Throwweight. The useful weight which is placed on a trajectory toward the target by the boost stage of a missile.

Triad. Combined strategic offensive U.S. force concept including intercontinental ballistic missiles, submarine launched ballistic missiles, and heavy bombers.

Trident C-4. A new U.S. SLBM currently being deployed. Range: 4,000 nautical miles and multiple independently targetable warheads.

Verification. The totality of means, of which inspection is just one, by which one

nation can determine whether another nation is complying with obligations under an arms control or disarmament agreement.

FOOTNOTES

[1] With the exception of the dissent filed by Working Group members McMichael, Pfaltzgraff and Record.

[2] The rapporteur also thanks the Stanley Foundation (no relation) for his opportunity to chair the U.S. Security and Arms Control in Europe panel at its 23rd Strategy for Peace Conference at Airlie House on October 15-17, 1982, and for including several members of the Council's Working Group in those meetings. Insights gained from these discussions are reflected in this study and have been published in the Foundation's Conference Report (Muscatine, Iowa, 1982, pp.41-49).

[3] This is not a unanimous view within the Working Group.

[4] See Bialer and Afferica, "Reagan and Russia," Foreign Affairs, Winter 1982/83, Vol. 61, p 249.

[5] Canada's ability to mediate has been undercut by the reduction of its military presence in Europe and other differences with its giant neighbor. The constructive report on "Canada and Western Security," by the Atlantic Council of Canada and several other Canadian institutes (Toronto, 1982) noted that "Canada cannot expect to have its voice in the Alliance taken seriously if Canadians fail to shoulder their responsibilities," and commented that the "country's contribution to NATO has been less than adequate." (p. 3)

[6] European NATO countries have averaged nearly 10 percent of their two-way world trade with the Eastern bloc countries, compared to under 5 percent for the United States. See U.S. Department of State, Trade With NATO and Communist Countries, Special Report No. 76, Washington: U.S. Department of State, January 1981.

[7] This school presses for the ability to punish the Soviet Union militarily from several directions in a protracted conflict, regardless of its origins, and is less centered on NATO Europe. See the "Comment and Correspondence" section of Foreign Affairs. Winter 1982-83.

[8] Blinov and Dremmer, "A Time-Tested Policy," International Affairs (Moscow, February 1971, p. 5).

[9] Translated By G. Vernon from "A Short Dictionary—Reference Book for Agitators and Political Information Officers," Moscow, 1977, see G. Vernon, ed., *Soviet Perceptions of War and Peace*, National Defense University Press, Washington, D.C. 1981, p. 133.

[10] Ibid., P. 135-136.

[11] According to press reports (for example *The Washington Post*, January 18, p. A17 and January 24, 1983, p. A13) some unauthorized explorations by U.S. INF negotiator Paul Nitze and his Soviet counterpart Yuli Kvitsinsky led to a possible compromise which was later rejected by both sides. (This would have involved reducing the U.S. Tomahawk GLCMs to 300, and eliminating the Pershing IIs in exchange for limiting Soviet European-based SS-20s. to 75 three-warhead missiles). The ensuing policy dispute in Washington may have contributed to the resignation of ACDA Director Rostow.

[12] This appears still to be U.S. declaratory policy. For example, the State Department's July 1982 "Gist" says, "We seek agreements that . . . enhance U.S. and allied security and reduce the risk of war, because arms control is not an end in itself but rather a complement to defense preparations as an important means of underwriting peace and international stability." Department of State, Bureau of Public Affairs, "U.S. Arms Control Policy."

[13] *Secretary of Defense Report to Congress, Fiscal Year 1983*, Washington, D.C., GPO, 1982, p. I-19.

[14] An October 1982 poll by the Associated Press and NBC showed 76 percent of respondents favoring a "nuclear freeze—although an even larger number indicated that they would oppose it if it worked to the net advantage of the USSR.

[15] For a good discussion of the "war-fighting" versus "war-winning" debate as well as many other current issues, see Stanley R. Sloan and Robert C. Gray, "Nuclear Strategy and Arms Control: Challenges for U.S. Policy," Foreign Policy Association *Headline* series, New York, Winter 1982-83 (forthcoming).

[16] Jonathan Dean, "MBFR: Ten Years of Negotiating Security in Europe, *Arms Control Today*, September 1982. Dean was head of the U.S. Delegation to MBRF from 1978-81, and deputy head from 1973-78.

[17] The official numbers used by the U.S. Government ("Strategic Nuclear Balance" chart, Department of State, July 1982), count 580 SS-11s (instead of the IISS' 570) but only 300 instead of 310 SS-19s, reaching the same total of 1,398. The U.S. counts 950 Soviet SLBMs, to which the IISS adds some 39 experimental or other systems in transition. The U.S. also counts 544 for itself, to 520 in the IISS data.

[19] See *Arms Control and Disarmament Agreements*, Washington, D.C., U.S. ACDA, 1982.

[20] The fact that the U.S. Joint Chiefs of Staff, with some State Department support, was the only agency in the Reagan Administration to publicly favor SALT II (because of the further constraints on Soviet forces it imposed) speaks rather for it. For a detailed account of the Administration's thinking, see John Newhouse's comprehensive treatment in *The New Yorker*, June 7, 1982.

[21] See *The Washington Post*, September 22, 1982, p. A-14.

[22] See *The Washington Post*, January 2, 1983, p. A-1.

[23] Writing in the Trilateral Commission's *Trialog* (Fall 1982), Zbigniew Brzezinski, who was President Carter's National Security Adviser, recalls: "I was never personally persuaded that we needed TNG (theater nuclear forces) for military reasons. I was persuaded reluctantly that we needed it to obtain European support for SALT . . . because Chancellor Schmidt made such a big deal out of the so-called Euro-strategic imbalance. . . . We felt we were responding to the European desire in shaping the TNF, but we were also very conscious of the fact that Europeans were ambivalent."

[29] Mr. Brzezinski, in the article quoted, adds, "I am now rather doubtful that a bargain can be struck in the TNF negotiation. This doubt is due in part to the fact that . . . since the Europeans are increasingly less likely to go through with the deployment, the Soviets have less of an incentive to reach an arms control accord."

[52] See Stanley, Danielian and Rosenblatt, U.S. Foreign Economic Strategy for the Eighties, (Westview Press, Boulder, Colorado, 1982), p. 153.

[53] However, in few if any cases, such as Fruehauf, did the U.S. try to enforce its controls by punitive action against companies following foreign government determinations contrary to the U.S. position. See "Extraterritoriality and the Long Arm of United States Law," International Financial Law Review (Euromoney). August 1982.

[54] The Department of Commerce had estimated that the sanctions could cost U.S. firms and their foreign subsidiaries some $1.6 billion over a three-year period for the Yamal pipeline alone.

[55] The provisions of the Agricultural and Food Act of 1981 (P.L. 97-98) also made it prohibitively expensive for the U.S. to embargo grain. Unless all trade to a country is halted, an embargo on an agricultural export involving 3 percent of its foreign sales triggers payments or loans to producers at 100 percent of parity, which could have cost the Department of Agriculture billions of dollars.

[56] European Community Message to the Departmens of State and Commerce, August 12, 1982, The New York Times, August 13, 1982, p. A4.

[57] Those supporting this supplementary statement include: Anne Cahn, Arthur Cox, Townsend Hoopes, Richard Kaufman, John Newhouse, Robert McNamara, Donald Petrie, and Joyce Shub.

Alexis Johnson supports the paragraph 3 recommendation on the Comprehensive Test Ban Treaty only if provisions can be made for proof testing of existing weapons.

Joseph Wolf believes paragraph 1 pins unrealistic hopes on ratification which could impair the continued reciprocal observation of SALT II. He supports the rest of the supplementary statement on the understanding that all negotiations should be fleshed out in light of a coherent security policy

which should encompass a balance between arms control and defense measures.

[63] Based upon the decision in NSC 68 for a general buildup of forces to counter the Soviet threat. A similar thrust was contained in the report of an expert group (the Gaither Commission) empaneled by the Eisenhower Administration but which was largely ignored by his Administration in favor of the "more bang for the buck" nuclear-heavy posture.

[64] See Stanley, cited, p. 354.

[65] The arduous bargaining involved in this agreement has been described by one participant as follows: ". . . our Committee formulated the Ministerial guidance for a new NATO strategy to instruct the generals to plan according to new principles and procedures. Timothy Stanley . . . represented the views of his, and I those of my government. The Englishman, Arthur Hockaday, Chairman of the Committee, brought the two views together, step by step. Gradually, over efforts of many months, we found compromises not fulfilling the maximal claims of both sides but good enough to satisfy Americans as well as Euorpeans. Our fundamental idea was simple: an attack on NATO should find an appropriate response from our side, and at the same time NATO should be capable to deter the eneny by threatening him with a higher level of escalation . . ." Gerd Schmueckle, *Ohne Pauken und Trompeten (Without Fanfare)*, Deutsche Verlagenstalt, Stuttgart, 1982 (author's translation).

[67] Communique of the Ministerial Meeting of the North Atlantic Council held at the new Brussels headquarters on 13-14 December 1967, paragraph 12; see *NATO Final Communiques, 1949-1974*, NATO Information Service, Brussels, p. 1971.

[68] See "Nuclear Weapons and the Atlantic Alliance," *Foreign Affairs*, Spring 1982, p. 753.

[69] The moral dilemmas of using nuclear weapons at all and especially in response to nonnuclear conflicts have been further sharpened by the American Catholic Bishops conference, which is attempting to draft a policy statement on the subject.

[70] Karl Kaiser, Georg Leber, Alois Mertes, and Franz-Josef Schultze, "Nuclear Weapons and the Preservation of Peace," *Foreign Affairs*, Summer 1982, p. 1157.

[71] General Bernard Rogers, NATO's current SACEUR, has argued that if the members could increase the current targets of 3 percent annual real increases in defense spending to 4 percent, a substantially improved conventional deterrent could be obtained over the next six years. Remarks to the Atlantic Treaty Association Annual Assembly, Oslo, Norway, September 22, 1982.

[72] *NATO Final Communiques, 1949-74*, cited, p. 199.

[73] Ibid., p. 229.

[74] The history of this period is discussed in detail in Stanley and Whitt, *Detente Diplomacy: United States and European Security in the 1970s*, Dunellen (for the Atlantic Council), New York, 1970. It should be noted that Soviet efforts initially focused on a *European* security conference which would have, by their definition, excluded the United States while including them.

[75] *1949-74 Communiques*, cited, p. 227.

[76] It should be noted that the provenance of the strategic arms control process goes back at least to the Geneva Summit meeting of the big four heads of government (British, French, Soviet, and U.S.) in 1955. There is also a long history of other postwar agreements including the Antarctic and Outer Space Treaties, the Limited Test Ban Treaty, the two hot line agreements plus two on reducing the risks of nuclear war, nonproliferation, seabed arms control, threshold test ban, and PNB Treaties, plus a convention on biological weapons and on environmental modification in addition to the SALT and ABM agreements. See U.S. Arms Control and Disarmament Agency, *Arms Control and Disarmament Agreements*, Washington, 1982.

[77] *Communiques*, cited, Vol. II, p. 121.

COMMEMORATING THE BICENTENNIAL OF THE TREATY OF PARIS

Mr. WARNER. Mr. President, turning now to a bill pending at the desk, House Joint Resolution 321, this is a companion bill to one that I and others have sponsored here designated as Senate Concurrent Resolution 36. It relates to the commemoration of the Bicentennial of the Treaty of Paris. I introduced this with the cosponsorship of other Senators from the Thirteen Original States.

The House resolution in addition to memorializing the signing of the Treaty of Paris, discusses the ratification of the treaty by the Congress of Confederation on January 14, 1784, in Annapolis, Md.

I believe this is fitting, Mr. President, therefore, I urge my colleagues to pass this resolution, rather than the Senate version.

Mr. President, this year will mark the bicentennial of the courageous and successful conclusion to the War for Independence. On September 3, 1783, John Adams, Benjamin Franklin, and John Jay, the American Peace Commissioners, signed a definitive Treaty of Peace with David Hartley, the representative of George the Third, the King of Great Britain, in the city of Paris.

This treaty, which ended the Revolutionary War, ushered the United States into the world of sovereign states and diplomacy. By this treaty, Great Britain recognized the independence we had so bravely declared 7 years before, and agreed to the Mississippi River as our western boundary, thus, more than doubling our territory.

Helping to plan our Nation's observance of this occasion is the National Committee for the Bicentennial of the Treaty of Paris. This committee, composed of distinguished citizens and chaired by Joan R. Challinor, has been hard at work for 2 years coordinating and planning programs and events. This committee is operated with private contributions and not taxpayer dollars.

Mr. President, I believe this group deserves our congratulations and support. We believe that 1983 is the midpoint in America's historic bicentennial commemoration: Our Declaration of Independence in 1776; the conclusion of the War for Independence in 1783; and the drafting of the Constitution in 1787, the high points of this commemorative period.

The theme of this observance will be a tribute to the importance of diplomatic negotiations between nations and their value to individual Americans. The three American signers, John Adams, Benjamin Franklin, and John Jay, spent months in arduous negotiations to realize this independence for the United States. Their achievement has been hailed as "The greatest triumph in the history of American diplomacy."

The President of the United States is the honorary chairman of the committee. This will assist the committee in their work with France and other nations who want to participate in the commemoration.

Many outstanding programs are planned both here and in France commemorating this historic event in our Nation's life.

I urge my colleagues to support this resolution.

It is my understanding that at an appropriate time today the leadership in the Senate will call up the House bill for floor action.

Mr. MATHIAS. Mr. President, will the Senator from Virginia yield?

Mr. WARNER. Indeed I do yield to my distinguished colleague from Maryland who has taken and played a very historic role on this subject as well as many others relating to the bicentennial.

Mr. MATHIAS. Mr. President, I want to support the proposal of the Senator from Virginia. He has, of course, for many years been a leader in the proper observance of the history of this Republic, dating back to the time when he led the Nation in the bicentennial celebration.

The Treaty of Paris was signed in Paris on September 3, 1783. There will be a celebration in Paris this year in commemoration of the bicentennial. Also on the same day, September 3, there will be a celebration in Annapolis, Md., which anticipates the fact that Congress met in Annapolis to consider and to ratify the Treaty of Paris.

Senator WARNER has mentioned Joan Challinor and her activities. I think it is some indication of the tremendous zeal she has shown in educating the people of this country about an important aspect of our history that she will lead the parade in Paris on Sepember 3, and she will then fly back to the United States and on the same evening will lead the festivities in Annapolis.

I take this opportunity to invite all Senators and their families to come to Annapolis, Md., and to take part in the significant ceremonies. There will be ceremonies on the date of congressional action, but we will really begin this cycle on September 3, and it will be a significant time for all who gather there.

I thank the Senator from Virginia for taking the lead in this matter and I again urge the Senate to follow his advice.

Mr. WARNER. Mr. President, I thank my distinguished colleagues from Maryland.

Mr. THURMOND. Mr. President, it is appropriate and helpful for us to

pause now and then to reflect on the wondrous accomplishments achieved by this great Nation is a remarkably short time, when measured against the sands of time.

Just 200 years ago, in the year 1783, the Thirteen Original Colonies had just completed ratification of the Articles of Confederation, binding themselves into the United States of America. The Constitutional Convention, held in Philadelphia, was yet 4 years away. Only 8 years had passed since the firing of "the shot heard around the world," at Bunker Hill.

In my native South Carolina, people were still talking about the brave men of Colonel Moultrie's batteries, who had turned back a strong British sea attack on Charleston. Talk also centered on the remarkable events which occurred in the ensuing years; events which led unmistakably to the tidewater Virginia settlement known as Yorktown; events which resulted in the execution of the Treaty of Paris on September 3, 1783.

Mr. President, Charleston finally fell to British occupation in May 1780, but I daresay that the soldiers of Lord Cornwallis would wish many a time thereafter that they had never set foot on South Carolina soil. The tenacious militiamen of South Carolina, led by such patriots as Gen. Francis Marion, harrassed the British unceasingly. Mr. President, should you have occasion to travel to Camden, S.C., today you would see chamber of commerce sponsored signs proclaiming, "Come spend a few peaceful hours where the British spent a miserable year." In early October 1780, a segment of Lord Cornwallis' forces led by Maj. Patrick Ferguson was soundly defeated by militiamen commanded by Cols. John Sevier, Isaac Shelby, William Campbell, and Benjamin Cleveland, on South Carolina soil near Kings Mountain.

British operations in the South under the command of Cornwallis and Col. Banastre Tarleton, in 1781, were checked by Maj. Gen. Nathanael Greene and Brig. Gen. Daniel Morgan in such encounters as the Battle of Cowpens where Tarleton was deceived into allowing his forces to become virtually surrounded by a horseshoe-shaped movement of Continental troops, resulting in a great loss of British forces with Tarleton, himself, barely escaping with his life. Such was the nature of the road which led to Yorktown where Lord Cornwallis was forced to surrender on October 19, 1781.

In 1782, the British Cabinet agreed to recognize the independence of the United States of America. Lengthy preliminary negotiations were held, with the United States being ably represented by John Adams, John Jay, and Benjamin Franklin. On September 3, 1783, the formal treaty of peace was signed in Paris, France. This became known as the Treaty of Paris.

For the United States the terms of the treaty were generous. Not only did the treaty explicitly recognize the independence of the Colonies; it also established territorial boundaries of our new Nation, extending our western boundary far past the Appalachians all the way to the Mississippi River. Tenacious bargaining gained for Americans the right to fish in the Grand Banks off the Newfoundland coast and to dry their catch on unsettled adjacent British shores.

Mr. President, it is said that King George III choked at the word "independence" when he announced the terms of the treaty in Parliament. Little did he realize that the fledgling Nation would become the greatest Nation ever to exist on this planet, nor could he have realized the mutual love and respect which would come to exist between the United States and Great Britain.

I am pleased, Mr. President, to join with the distinguished Senator from Virginia (Mr. WARNER) in urging the immediate passage of House Joint Resolution 321, commemorating the 200th anniversity of the signing of the Treaty of Paris.

Mr. WARNER. Mr. President, as I stated a moment ago, the leadership in the Senate at some appropriate time today will call this measure up for floor action. I hope that other Members of the Senate who are interested in this historic event will take the opportunity to avail themselves of making a statement about this historic moment in our Nation.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRESIDENT REAGAN'S SECRET WAR IN CENTRAL AMERICA

Mr. KENNEDY. Mr. President, yesterday the House of Representatives sent a clear and unequivocal message to this administration that it is time to end the dangerous escalation of covert warfare in Central America. I congratulate Representative EDWARD BOLAND, the chairman of the House Intelligence Committee, for his courage in taking up this cause and for his persistence, which brought it to a successful conclusion. The chairman of the House Foreign Affairs Committee, Representative CLEMENT ZABLOCKI, played an important role in the effort.

I now intend to hold the Boland-Zablocki bill at the desk, so that it can be called up before the full Senate for a vote. I intend to work hard to pass it. I will insist that every Senator stand up and be counted on the vital question of war and peace in Central America. I do not believe we should hide by not voting. If the House could take its stand openly, then so can we. The people do not want a military solution in Central America; they want a negotiated one. Now, all of us have an obligation to be honest with the citizens who elected us and to say "yes" or "no" to President Reagan's secret war against Nicaragua. My answer will be a resounding "no"—no to increasing violence, "no" to the mounting toll of casualties, and "no" to the risk of full-scale war.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

RADIO MARTI

The PRESIDING OFFICER. The Senate will resume consideration of the pending business which the clerk will report.

The assistant legislative clerk read as follows:

Motion to proceed to the consideration of S. 602, a bill to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes.

Mr. BAKER. Mr. President, the distinguished Senator from Connecticut today was kind enough to point out to me in advance that he intended to make a point of order against this measure under certain provisions of the rules of the Senate. I must say that after I examined that situation, I found, after consulting with the Parliamentarian, that the point of order the Senator from Connecticut proposed to make was probably well taken. In any event, it has sufficient merit that I think it should not be contested in the Senate.

Mr. President, therefore, I withdraw my motion to proceed.

The PRESIDING OFFICER. The motion is withdrawn.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, the principal business of the Senate today, since we are not on the motion to pro-

ceed, will be to wait around for the House to act on the supplemental appropriations conference report. It is possible we may get back to the Radio Marti bill today, but that depends on a whole string of circumstances that I cannot now predict.

ROUTINE MORNING BUSINESS

Mr. BAKER. While we do wait for the House to act and to send us the conference report, which I hope will be mercifully swift, I ask unanimous consent that there be a period for the transaction of routine morning business to extend not past the hour of 3 p.m. in which Senators may speak for not more than 10 minutes each.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

THE WOMEN'S HOUR

Mr. BAKER. Mr. President, for those narrow-minded and misguided individuals who continue to think of the U.S. Senate as an all-male, vested suited, Gucci loafered, silver-haired private club—submitted for your consideration, the scene which took place at approximately 10:50 a.m. this morning on the Senate floor:

The distinguished Senator from Florida (Mrs. HAWKINS) was delivering a persuasive speech on our Nation's drug problems; the distinguished Senator from Kansas (Mrs. KASSEBAUM) was presiding over the Senate; Mrs. Marilyn Courtot, the Assistant Secretary of the Senate was at the desk and subsequently called the roll during a quorum; Mrs. E. Frances Garro, the Official Reporter of Debates, reported verbatim the remarks of Senator HAWKINS; Miss Jennifer Smith, the second assistant bill clerk, was on duty in the well of the Senate acting as the staff assistant for the official reporters; Miss Elizabeth Baldwin, floor assistant for the secretary for the majority, was on duty in the Chamber; and, the operations on the floor were being serviced by half a dozen female pages.

Frankly, Mr. President, I do not know if I am more proud or more frightened by a total takeover by the female population here in the Capitol. It is obvious that we mere mortal men are not required anymore, and I just want to plead with my biological counterparts not to forget about us guys out here. I also hope that the press will not dwell on the reports that the Senate was a fixture of decisiveness and harmony, in an unprecedented fashion, during this time, which will no doubt come to be known as "The Women's Hour."

CLARION CALL OR UNCERTAIN TRUMPET?

Mr. MATTINGLY. Mr. President, I call the attention of my colleagues to the editorial that appeared yesterday in the Wall Street Journal entitled "Uncertain Trumpet."

The editorial cites what I believe to be the central reason why the President has not been able to rally the American people behind his efforts to stem the advance of communism in Central America.

In my view, and echoed in the editorial, the President is the victim of his own competing efforts. He is valiantly attempting to educate the American people on the very real menace that threatens their interests in Central America but at the same time he downplays the significant military actions that have taken place in the last 2 weeks and continues to allow himself to be manipulated by those who demand impossible guarantees about the future direction of U.S. policy.

It is little wonder, as the polls reflect, that the people of our land are divided and confused about the issue.

My colleagues will recall the ancient Roman god of gates and doorways, Janus, who was always depicted with two faces looking in different direcitons. Sadly, the President's performance at his recent press conference was as much Januslike as it was Presidential.

The editorial notes correctly that policies cannot move one way and rhetoric another without resulting in lost credibility.

The President would meet with more success if he matched his press conference comments with his commendable policy decisions.

I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, July 28, 1983]

UNCERTAIN TRUMPET

We are sending ships to Central America. There is ony one sane reason to send such a show of force anywhere. It is to remind our adversaries that we are capable of doing them a great deal of damage if push comes to shove, to deter them from running risks that might lead to actual use of force. Fidel Castro certainly has the message straight. He has yelled and screamed at our action, denouncing us in a most satisfying way.

At the president's news conference Tuesday night, the press corps was interested in almost nothing else. The journalists, in effect, accused Mr. Reagan of getting us into another Vietnam. So what does Mr. Reagan say? He says nothing unusual is going on at all. Military exercise? We've conducted bigger ones before, and no one paid attention. A larger U.S. military presence in Central America? Of course not. Nothing threatening about this at all. Nobody here but us chickens. No more Vietnams.

Some of those newsmen grilling the president the other night were, if you can believe it, too young to remember much about the Vietnam failure. The older ones mostly reflected the views of the left about what we did wrong there. We intervened in Vietnam against the will of the people, so the catechism goes. Therefore we lost and we deserved it. In the process, our government deceived us about our chances in Vietnam and what we would have to pay there.

From the beginning of its Central American policy the Reagan administration has been very, very respectful of this catechism. For a start, it has spent great effort to ensure and to demonstrate that our ally, the Salvadoran government, is morally respectable. We have pushed land reform and nagged the government about human rights. We invited the whole world down to El Salvador to observe the democratic elections there, held despite the efforts of the left-wing guerrillas and with the aid of U.S. technology designed to endure punctilious honesty in the electoral process.

The administration has also tried to meet the arguments of the American left when talking about the Sandinist regime in Nicaragua, which is supporting the Salvadoran guerrillas. The State Department has tried to provide detailed proof that Cubans and Soviets have borrowed deep into the Nicaraguan government; this is so no one can accuse us, God forbid, of getting in the way of the spread of what is simply a popular revolution.

Needless to say, none of this courtesy by the administration has done it any good. Liberals in Congress and the press have looked at the Salvadoran election and decreed that the government must negotiate with the unelected guerrillas anyway. The same liberals have reported in loving detail on the flaws in the land-reform program and given the government almost no credit for the effort.

On human rights, the critics argue that the Salvadorians' efforts are worthless because people are still being killed; these critics talk as if the government were no more morally acceptable than the guerrillas who are ripping El Salvador apart. By the same token, no White Paper is enough to prove to such critics that the Soviet presence in Nicaragua is serious; they say Soviet support of the Sandinistas is no worse than our support of the Salvadorans.

In spite of the futility of the exercise, the administration persists in trying to placate the left. The reason is that the administration is afraid. Battered every day by Congress and the Washington press corps, it thinks these cadres in the capital somehow stand for the American people. It fears that if it talks too tough, people out there will think it bellicose, and the White House will be swept under by a tide of peace-loving wrath.

This low estimate of the American people becomes a self-fulfilling prophecy. It is impossible for a president to build public support for his policies, especially foreign policy, unless he tells people straight out what he wants and asks them to stand behind it. And if the President cannot gather such support, U.S. policy will be forced to creep along sideways in that ambivalent way that turns peace into war. The president's attempts to reassure the American public Tuesday must have been profoundly reassuring to Mr. Castro and company, and profoundly discouraging to our friends on the firing line in Central America.

The same reassurances, of course, are anything but reassuring to the American people. Instead, they convey an image of a leadership that doesn't know that it wants, that might stumble in its attempts to deter war and slip into real fighting in a hesitant

and uncertain way. What Mr. Reagan needs to do is to challenge the myths of the left, above all the myths about the electorate's views on how to prevent war, the myths that retain such inexplicable power after having led George McGovern and Jimmy Carter to electoral disaster.

Instead, Mr. Reagan is ducking the challenge, moving his policies one way and his rhetoric the other. This is a recipe not for gaining support but for losing credibility at home and abroad. No one is going to rally behind a strong U.S. stand in Central America if the president himself is afraid to do so.

RADIO MARTI

Mr. HOLLINGS. Mr. President, as a cosponsor of S. 602, I rise in support of Radio Marti. As the ranking minority member of both the Communications Subcommittee, as well as the Appropriations Subcommittee that controls the funding of the Board for International Broadcasting, I am well aware of the concerns of our domestic broadcasters, as well as the success of Radio Free Europe and Radio Liberty in getting the truth to the enslaved people behind the Iron Curtain. Accordingly, I have examined this bill in all its aspects. It is my considered opinion that this legislation is needed as part of a U.S. strategy to stem Cuban and Soviet encroachment in the Caribbean and Central America.

This legislation takes into account the views of U.S. broadcasters concerned about Havana's longstanding interference with U.S. radio stations. It also guarantees that Radio Marti will "serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news."

Radio Marti is a peaceful foreign policy option which will build on the experience that has made Radio Free Europe and Radio Liberty successful for more than 30 years. The proposed cost of the station is very modest in relation to the benefits that will flow from its establishment and is very small in comparison with the cost of Moscow's international propaganda apparatus at work in this hemisphere. The Cubans and Soviets are currently outbroadcasting the United States in Latin America by a ratio of 5 to 1 in terms of hours on the air.

Some have criticized Radio Marti as "confrontational" while ignoring the source of the confrontation—Communist expansionism—and overlooking the fact that Radio Marti will give the truth to the Cuban people. Radio Marti will have the effect of defusing the war hysteria that the Castro regime fosters in Cuba. It promises to be an effective tool to counter Fidel Castro's aggressive propaganda campaign.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. JEPSEN). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ABDNOR). Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, there have been extensive conversations, deliberations, and negotiations that have been undertaken on the schedule of the Senate in relation to what we can do while we wait for the House of Representatives on the supplemental appropriations bill and how we will arrange the affairs of this Senate in respect to our business this week and next.

I have consulted with the minority leader, with the distinguished Senator from Connecticut (Mr. WEICKER), with those proponents of the Radio Marti bill, particularly the Senator from Florida (Mr. CHILES), the Senator from Florida (Mrs. HAWKINS), and a number of others.

I have a sequence of events which appears to be satisfactory all around. I would like to state a unanimous-consent request in several parts.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. First, Mr. President, I ask unanimous consent that the pending question, which is the motion to proceed to the consideration of the agriculture target price bill, be temporarily laid aside and that no call for regular order will bring it back.

I ask unanimous consent that if this arrangement is granted, that I be first recognized for the purpose of making a motion to proceed to the consideration of S. 602, the Radio Marti bill.

I ask unanimous consent, Mr. President, that if at that time a cloture motion is filed against further debate on the motion to proceed to the consideration of the Radio Marti bill, the vote on that cloture motion occur after a quorum is established beginning at 2 p.m. on Wednesday next.

I ask unanimous consent, Mr. President, that if the Senate adjourns today, when it reconvenes, the reading of the Journal be dispensed with, that no resolutions come over under the rule, that the call of the calendar be dispensed with, and, following the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business not to exced 30 minutes in length with Senators permitted to speak therein for not more than 5 minutes each, and provided that the morning hour will be deemed to have expired.

I further ask unanimous consent, Mr. President, that when the Senate completes its business today it stand in adjournment until the hour of 11 a.m. on Monday next.

That is the request, Mr. President.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, I take it the majority leader is referring to the hour of 2 p.m. on next Wednesday. I did not understand what was to happen at 2 p.m.—the beginning of the quorum call to establish a quorum or the vote itself on the cloture motion?

Mr. BAKER. Mr. President, I should clarify that point. What I have in mind was the mandatory provisions of rule XXII would begin at 2 p.m. and as soon as that quorum is established then, under the rule, a vote on cloture would occur.

Mr. BYRD. I thank the majority leader.

Second, still reserving the right to object, when the Senate completes its business today under the majority leader's request, as I understand, it will go over until Monday at what time?

Mr. BAKER. Eleven o'clock.

Mr. BYRD. One final question. Would the majority leader extend the period for the transaction of routine morning business to not to exceed 60 minutes rather than 30?

Mr. BAKER. Yes. I modify the request. I think it would be well to extend the time during which Senators may speak from 5 minutes to 10 minutes.

Mr. BYRD. I thank the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

RADIO MARTI

Mr. BAKER. Mr. President, I seek recognition now under the order just entered and I move that the Senate now proceed to the consideration of S. 602.

The PRESIDING OFFICER. The question is on agreeing to the motion.

CLOTURE MOTION

Mr. BAKER. Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to the consideration of S. 602, an act to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes.

Senators Jesse Helms, Paula Hawkins, Rudy Boschwitz, Slade Gorton, Steven D. Symms, Barry Goldwater, Orrin G. Hatch, Jeremiah Denton, Bob Kasten, Lawton Chiles, Paul Trible, Gordon Humphrey, John P. East, Dan Quayle, Robert Dole, and Frank H. Murkowski.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I do not anticipate any further action on this motion today. Indeed, I think the only remaining business before the Senate is to wait for the House of Representatives to send us the supplemental appropriations conference report. The latest information I have is that the conference report cannot reach us prior to the hour of 4:30 p.m. this afternoon.

There are some items in disagreement that will accompany the conference report. I would urge Senators to consider that there will be almost surely a vote on the conference report, but, as well, there may be votes on items in disagreement.

RECESS UNTIL 4:30 P.M.

Mr. BAKER. Mr. President, in view of the fact that there is nothing else that can be done this afternoon prior to the hour of 4:30 p.m., if the minority leader has no objection I am prepared to ask that the Senate recess until 4:30 p.m.

Mr. BYRD. I certainly have no objection.

Mr. BAKER. Then, Mr. President, I ask unanimous consent that the Chair now place the Senate in recess until the hour of 4:30 p.m. this afternoon.

There being no objection, the Senate, at 3:30 p.m., recessed until 4:30 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. GARN).

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I regret to inform the Senate that the House has still not completed action on the supplemental appropriations conference report. I must also say that I have conferred with responsible officials of the administration who indicate to me that it is urgently important that we complete action on that measure before Monday.

ORDER FOR RECESS UNTIL TOMORROW AT 10 A.M.

Mr. BAKER. Mr. President, in view of that, with great reluctance, I ask unanimous consent that the previous order be changed to show that when the Senate completes its business today, it stand in recess until the hour of 10 a.m. tomorrow. I further ask unanimous consent that when the Senate completes its business on Saturday, it then stand in adjournment under the terms and conditions ordered previously.

Mr. BYRD. Mr. President, reserving the right to object, if the Senate adjourns over until tomorrow, is the majority leader providing the same boiler plate——

Mr. BAKER. Recess.

Mr. BYRD. Pardon me.

Second, for the record, and the majority leader has already discussed this with me, why is there the necessity for coming in tomorrow? What I am asking is, what is there in the supplemental that makes it necessary for us to come in tomorrow rather than wait until Monday?

Mr. BAKER. First, I really do not think we will be in tomorrow. I dare say I think we can finish this bill today. But I dare not take the chance that we cannot finish it today. Hence, the change requested.

I am advised that, in addition to a number of other items, the food stamp matter is extremely urgent. I will say to the minority leader that I inquired of the White House staff this morning if they were absolutely sure we could not postpone final action on this measure until Monday.

I completed conversations with senior officials in the White House just a moment ago who indicated to me that it was their determination that they simply could not wait until Monday. As they put it, we ran the grave risk of great dislocation and circumstances that would cause great concern, maybe even worse, if we waited until Monday on the food stamp issue, that it must be resolved.

There is no procedural way we can spring out the food stamp matter by itself. Hence, I feel it is simply essential that we deal with the conference report and the items in disagreement.

I will also say for the minority leader just to illustrate how serious the administration is about this and how serious I am about this, he knows how strongly I feel about the IMF matter, how strongly the President feels, and the Secretary of the Treasury. The House did not go forward with the IMF funding, as I had hoped they would. But it is so important that we pass this conference report that it is not my present plan to insist on the Senate amendment with respect to IMF.

I hope that further illustrates to Senators how serious the administration views this situation and how serious I do, and why it is necessary to complete action on this conference report this evening if at all possible and, if not, then tomorrow.

Mr. BYRD. Further reserving the right to object, has the House already gone out for the weekend?

Mr. BAKER. No, Mr. President, the House is still in session. I am now informed that there are two more items in disagreement that must be dealt with. As a practical matter, the House may be hard put to get a quorum much longer, but it is the stated intention of the House leadership to finish this matter and get it to the Senate yet today.

Mr. BYRD. I thank the majority leader. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the minority leader.

Mr. President, if the information we have is still correct, that it is going to be at least an hour, I see no reason to stay in session. I am prepared to put us into recess until 5:30 p.m. I am going to suggest the absence of a quorum while I make one more check on the timing.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk preceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have now been advised that the House of Representatives has just completed action on the supplemental appropriations conference report and that the papers will be here within 15 minutes. I urge Senators to come to the floor. It is important that we deal with this matter promptly, and it is certainly important to do so if we are going to avoid a Saturday session. So I hope those who are listening in their offices will understand that by 5 p.m., we shall begin action on this matter and I hope we can finish it with reasonable dispatch. I shall put out a hotline from my cloakroom to that effect.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JEPSEN). Without objection, it is so ordered.

ORDER FOR ADJOURNMENT UNTIL MONDAY UNDER CERTAIN CONDITIONS

Mr. BAKER. Mr. President, earlier, I amended the order so we could be in tomorrow if we have to. I would like to amend that request in one detail.

I ask unanimous consent that if the Senate does complete its business today, it stand in adjournment until Monday under the same terms and conditions; and that, if the Senate does not complete its business today, it stand in recess until tomorrow and then stand in adjournment until Monday under the same terms and conditions.

Mr. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I had thought we would be on the conference report on the supplemental appropriations bill by now, but once again we are waiting for our friends and colleagues in the House of Representatives. They have completed action on the conference report. The last report I have had the bill has not yet reached their enrolling room, and it will be 15, 20, maybe long as 30 minutes before it can be offered to the Senate.

I hope they can improve on that. We are doing the very best we can. I make this announcement so that Senators will be apprised of the situation.

Let me point out to Senators it now appears certain we will have at least one, perhaps two, and maybe more than two, rollcall votes before this day is over. So Senators should not assume that this is going to go by voice vote. I will try to keep the Senate apprised of the situation. But right now it looks like we are 20 or 30 minutes away from taking up the conference report.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. JEPSEN). Without objection, it is so ordered.

SUPPLEMENTAL APPROPRIATIONS, 1983—CONFERENCE REPORT

Mr. BAKER. Mr. President, I am happy to report that there is now a messenger from the House at the door. I believe he brings us good tidings. I move that the Chair receive him.

Mr. President, the distinguished Senator from Alaska, the assistant majority leader, will manage the conference report on this side.

Before we proceed, Mr. President, is the minority leader ready for us to proceed?

Mr. BYRD. Yes, Mr. President.

The PRESIDING OFFICER (Mr. COCHRAN). Is there any objection? The Chair sees none. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I submit a report of the committee of conference on H.R. 3069 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3069) making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of July 20, 1983 on page 20101.

Mr. BAKER. Mr. President, I wish to say to Senators once again what I said a moment ago: I do expect rollcall votes, at least one, perhaps two, and maybe more.

I yield to the minority leader.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, at last the Senate has before it the conference report on H.R. 3069, the regular fiscal year 1983 supplemental. This bill was reported from the Appropriations Committee on May 26, the day after the House passed the bill, and passed the Senate on June 16, nearly 6 weeks ago.

In its consideration of the bill, the Senate adopted 254 amendments of a substantive and technical nature. Many of these amendments contributed substantially to the bill's total recommended spending level, and as a result the bill as passed by the Senate exceeded the President's request by more than a billion dollars, making it an obvious candidate for a veto.

Our chairman, Senator HATFIELD, said at the time the Senate passed the bill that he would attempt to secure reductions in conference with the House so as to insure Presidential approval of this bill. The conference was delayed in order to pursue negotiations with the administration and our colleagues in the House and identify reductions that were not only desirable but also possible.

The additional time for these negotiations proved to be quite useful, for in our conference on July 19 and July 20, we were able to agree on substantial reductions and produce a bill which I believe will be acceptable to the President.

Let me briefly summarize some of the more important elements of this bill. The largest single item in this supplemental as passed by the Senate was $8.4 billion for the International Monetary Fund, the amount requested by the President.

As the Senate knows, Mr. President, the House has not been able to pass an authorization for the IMF and the matter was reported in true disagreement from the conference. Earlier today the House insisted on its position to deny additional funding for the IMF at this time. If the Senate insists on its position, the bill would return to the other House. If we recede, we can complete action on the supplemental and clear it for the President.

That, Mr. President, is the recommendation of the leadership.

There is considerable urgency in doing this, Mr. President, because the food stamp program needs the additional $1.2 billion in this bill in order to avoid a reduction in benefits on Monday, August 1. Secretary of Agriculture Block and OMB Director Stockman have said that if this bill is passed by tonight, no reduction in food stamp benefits will occur. Otherwise, some 209 million food stamp recipients will be caught short come Monday.

We have conferred with the administration, and that is a fact. There is no escaping the fact that, because of the situation, this bill must be sent to the President tonight.

Additional matters of interest to Senators include:

Child nutrition, $118,000,000.

Elderly feeding, $16,000,000.

SBA/Business loan and investment fund, $152,000,000.

Pershing II missiles, $453,600,000.

Abandoned mine reclamation, $52,000,000.

Handicapped education, $47,900,000.

Reconstruction of American Embassy in Lebanon, $22,000,000.

Black Lung Trust Fund, $186,000,000.

Social security, $1,300,000,000.

Elementary and secondary education, $40,000,000.

West front restoration, $49,000,000.

Mr. President, the House receded to the Senate amendment relative to Senators' pay and the limitation on honoraria.

There is a series of amendments in disagreement, and there are other items for us to handle. The first matter before the Senate is agreeing to the conference report.

I yield to the Senator from Mississippi, if he desires to make a statement.

Mr. STENNIS. Mr. President, this bill has been very thoroughly gone over and put together in the hearings, the markup of the bill, and in its original presentation here, which was long and elaborate. It was debated, and there were key votes. I was privileged to attend every sitting of the conference of the House. They had their best teams present, and they are good at it. This matter was thoroughly weighed and considered. It is the end product. The bill has had the fullest consideration and is generally sound.

I think the leader is correct in asking for the adoption of the conference report.

Mr. STEVENS. I thank the Senator from Mississippi.

Mr. President, at the request of Senator DOMENICI, the distinguished chairman of the Budget Committee, who is still recuperating from his recent surgery, I ask unanimous consent to have printed in the RECORD his statement concerning the conference agreement on the fiscal year 1983 supplemental appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. DOMENICI. Mr. President, I support the conference agreement on H.R. 3069, the Supplemental Appropriations Act for fiscal year 1983.

I want to commend the distinguished chairman of the committee, Senator HATFIELD, and all of the conferees for bringing us a bill that is close to the levels originally reported to the Senate. At the time of Senate passage of the bill, I expressed my hope that the conference agreement would be in line with the Senate-reported totals. The conferees have done just that. I think their work deserves the support of the Senate.

The conference agreement provides $7.1 billion in budget authority and $4.7 billion in outlays for a variety of program requirements, including $1.2 billion for the food stamp program which will shortly run out of money.

H.R. 3069, together with all previous budget actions for fiscal year 1983, puts budget authority $8.1 billion in budget authority and $0.5 billion in outlays below the recently adopted fiscal year 1983 budget resolution totals.

With regard to the credit budget, the conference report provides $0.9 billion in new direct loan obligations and $5.1 billion in new loan guarantee commitments. When added to legislation already enacted, these amounts exceed the budget resolution nonbinding assumptions by $0.2 billion in new direct loan obligations and $0.1 billion in new primary loan guarantee commitments.

The conference agreement is $6.8 billion in budget authority and $0.3 billion in outlays below the President's request.

I submit for printing in the RECORD two tables showing the relationship of the conference agreement spending and credit totals to the fiscal year 1983 budget resolution.

H.R. 3069, FISCAL YEAR 1983 SUPPLEMENTAL APPROPRIATIONS CONFERENCE REPORT

[In billions of dollars]

	Budget authority	Outlays
1st concurrent resolution on the budget for fiscal year 1984 (H. Con. Res. 91)	877.2	807.4
Current level as of July 18, 1983	865.1	805.5
Amount remaining	12.1	1.9
H.R. 3069 as reported by conferees, including items reported in agreement	7.1	4.7
Less offsetting receipts affected by appropriation action	−2.3	−2.3
Less items already in current level	−.8	−1.0
Total, conference report items in agreement with adjustments	4.0	1.4
Items reported in disagreement	8.5	(1)
Total bill, assuming enactment of items reported in the true agreement	12.4	1.4
Amount (+) under (−) resolution assuming enactment of H.R. 3069, items in true agreement only	−8.1	−.5
Amount over (+) under (−) resolution assuming enactment of H.R. 3069 plus all items reported in true disagreement	+.4	−.5

[1] Less than $50,000,000.

Note: Details may not add to totals due to rounding.

CREDIT TOTALS—H.R. 3069, SUPPLEMENTAL APPROPRIATIONS ACT, 1983 CONFERENCE AGREEMENT

[In billions of dollars]

	Fiscal year 1983		
	Direct loans	Primary loan guarantees	Secondary loan guarantees
1st concurrent resolution on the budget for fiscal year 1984 (H. Con. Res. 91) nonbinding assumptions	52.70	99.60	68.25
Current level as of July 18, 1983	51.97	94.60	68.25
Amount remaining	.73	5.00	.....
H.R. 3069 as reported by conferees	.90	5.10	.....
Amount over (+) resolution assuming enactment of H.R. 3069	+.17	+.10	.....

●

Mr. METZENBAUM. Mr. President, I rise to inquire of the manager of the bill, my good friend from Alaska, concerning the deletion of an amendment in conference that had been rather vigorously contested here on the floor. It was an amendment I offered providing that none of the funds appropriated by the act would be used in connection with the indemnification of any person for their attorneys' fees or to indemnify them for their taxes in connection with the lease arrangements that had been made by some of the arms of Government, particularly the Defense Department.

As the Senator from Alaska will recall, there was a motion to table that amendment, which was defeated by a vote of 50 to 49, and the amendment was then accepted.

It concerns me much that that amendment did not remain in the conference committee report, and I am wondering whether the Senator from Alaska will be good enough to indicate, if he knows, why it is not in the conference agreement.

Mr. STEVENS. Mr. President, I say to my good friend from Ohio that the amendment was brought up in the conference committee, and the Senate conferees were prepared to defend the Senator's amendment.

The House informed us that they now have a rule which provides that if an amendment involves the jurisdiction of the Ways and Means Committee and did not originate in the House, it is subject to a point of order, and that the point of order would be raised. We checked that with the Ways and Means Committee, and they informed us that they would raise a point of order to this language, that it was not something we could avoid.

Under the circumstances, the chairman of the committee yielded on the amendment, rather than have the matter subject to a point of order on the floor.

We do not agree with that rule, I say to my good friend; and to my knowledge, we have not had the situation arise as yet. We wish to discuss it with the Senate Finance Committee and with the leadership here, to determine what to do about that procedure before the matter is left to the House to determine.

Mr. METZENBAUM. Is it clear, then, for the Senator from Ohio to assume that if there were other amendments that would be subject to a point of order, that are to be found subsequently in other appropriations bills, the managers of the appropriations bills on the floor of the Senate will not insist upon retaining those measures?

I specifically refer to one that is now being talked about concerning an Interior appropriations bill and another one that may come up in the continuing resolution.

I understand this one being deleted—not with enthusiasm, but with much concern on my part—but I am really inquiring as to whether or not similar amendments that will be contained in appropriations bills will be deleted before they go to conference, if the point is raised by Members of this body.

Mr. STEVENS. Mr. President, the concerns of the Senator were explored. The Ways and Means Committee has reported a bill on leasing which deals with this subject. The Ways and Means Committee has insisted on its jurisdiction under the House rules. I am informed that if a bill comes back to the House with an amendment that is within the jurisdiction of the Ways and Means Commit-

tee, involving revenues or the Internal Revenue Service, it comes within the province of this rule.

I cannot answer the Senator by saying it is a general policy that the managers would pursue, but in this instance, the chairman of the committee—and I believe he conferred with the distinguished ranking minority member; I remember being there, and the question arose—the chairman of the committee did yield under those circumstances.

Mr. METZENBAUM. I thank the manager of the bill.

Mr. LONG. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. LONG. Mr. President, let me say for the benefit of the Senator from Ohio that the House has indicated that they have conducted hearings. They are acting in this area. They have indicated that they are considering legislation on the subject.

We in the Finance Committee have conducted hearings on the subject. The chairman of the Finance Committee has every intention to act on the matter and deal with it on the Senate floor.

I believe the Senator will have an opportunity to support legislation to achieve his objective, out of the committee that has proper jurisdiction.

It can be argued that, from the Senate's point of view, this is revenue legislation; and, under the Constitution, revenue legislation must originate in the House. The House bill, as the Senator knows, was not a bill to raise revenues. It was an appropriations bill. That rule in the House really has the effect of upholding the Constitution in that respect, even though it is not done in the forthright manner of defending the Constitution, because the House has insisted on taking the point of view that an appropriation is a revenue bill.

Mr. METZENBAUM. I thank the Senator from Louisiana, and I say to him that I am indeed aware of the House action. I have consulted with Mr. PICKLE, the chairman of the committee, and I hope we can work together on a condition which I consider to be a rather egregious one.

Mr. LONG. I am sure the Senator will have an opportunity to achieve his objective.

Mr. METZENBAUM. I thank the Senator from Louisiana for his reassurance.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Mr. President, I intend to take a few minutes of the Senate's time talking about a matter that I think every Senator should be aware of and I hope that the distinguished manager of this bill will be able to respond to the questions that I will have concerning a particular matter in the bill related to the strategic petroleum reserve.

Mr. President, what is going on here? Any Senator interested in national security of this country should be aware of what he is voting for in this supplemental appropriations bill and what he is not voting for.

I thought the Senate had expressed full support for the strategic petroleum reserve on every possible occasion. I thought Congress in the Energy Emergency Preparedness Act of 1982 had set 300,000 barrels per day as a minimum target fill rate or 220,000 if the President found the lower rate essential to the national interest.

I thought the Senate version of this supplemental appropriations contained a disapproval of the largest impoundment in history, $800 million in SPR oil purchases, $800 million impounded. I thought that both the Senate and the House of Representatives had included funding for the construction of oil storage facilities at the Big Hill Salt Dome in Texas.

In spite of all of this, in spite of the disapproval of impoundment, the $370 million for the construction of new storage facilities, and the clear congressional intent in the Energy Emergency Preparedness Act of 1982, in spite of all of this, the conferees dropped the Big Hill funding and deleted the impoundment disapproval.

Further, the Appropriations Committee has now accepted a fill rate of 145,000 barrels per day, well less than the 300,000 target and less than the bare minimum of 220,000. I hope that the distinguished floor manager can help me understand what is going on here.

Let me try to explain some background for my questions.

Mr. President, in the face of broad sustained and deep support for the SPR for military and economic security, the conferees, as I have said, have dropped the provisions in the bill concerning the SPR, related to Big Hill funding and impoundment.

Mr. President, the SPR is essential for our national security. It is also the only component of our energy security policy. Our national security policy must consider the effect of our military capabilities if world oil supplies are disrupted. Our military depends on oil to power ships, planes, and tanks. Our industrial support base is heavily dependent on oil to provide a logistical backup required to mount an effective military operation.

The fact that a significant portion of the world's oil supplies is produced and must be transported from unstable parts of the world means that the Defense Department must take at least two special precautions.

First, the Defense Department must maintain a stockpile of petroleum products and must rely on the SPR for crude oil. It was reported this week that some administration officials are considering the establishment of a separate military reserve because of concern that the strategic petroleum reserve may be insufficient to meet the needs of both the military and private sector.

Second, the Defense Department must take extra precautions to keep maritime supply lanes open. This administration professes to take the second mission very seriously. Indeed, part of the justification for our current military involvement in Central America is based on the importance of Caribbean sealanes especially regarding oil supplies.

Arguing that Central America and the Caribbean Basin are strategically important to the United States, the administration is conducting war games with troops and naval forces in the area. The military exercises will involve 4,000 Army and Marine soldiers, two aircraft carrier battle groups, and the battleship *New Jersey*.

An interesting component of the administration's rationale for this military action is the volume of goods that passes through the South Atlantic in the Caribbean sealanes. We are told that nearly half of all goods shipped into the United States from abroad uses these lanes and that includes 50 percent of our petroleum and 75 percent of our nonfuel minerals.

So that is one picture, a willingness to defend those sealanes militarily.

Shift now, if you can, 8,000 miles away, to the long festering war between Iran and Iraq. Iraq this week threatened to attack Iranian oil fields and installations and in response naturally Iran threatened to block the entire Straits of Hormuz where the Persian Gulf meets the Indian Ocean and through which more than 20 percent of the world's oil passes.

This week also, and note this, the U.S. State Department vowed to keep the strait open using force if necessary. The Persian Gulf is of strategic importance to the United States and the industrialized world in that it contains more than two-thirds of the world's exportable oil.

The aircraft carrier U.S.S. *Vincent* was dispatched to the Indian Ocean.

So the importance of the Central American region and the Persian Gulf is beyond dispute. Nor is the need to protect our shipping lanes at issue.

But should we rely solely on the U.S. Navy for these security missions? If we are willing to send troops and naval forces to protect our interests 8,000 miles away and in the Caribbean should we not be able to take other less costly steps to protect these same interests? Of course, we should.

The existence of a large oil stockpile would lessen the danger of the grave economic damage that would result

from the interruption of oil deliveries from overseas.

Despite several fits and starts the United States is now on the road to building a credible strategic oil stockpile in the salt domes located in Louisiana and Texas.

(Mr. WILSON assumed the chair.)

Mr. BRADLEY. When the Reagan administration arrived in Washington the program was just hitting its stride, the reserve was being filled at a rapid rate.

Despite severely restricted budgets Congress passed a law, the Emergency Preparedness Act of 1982, requiring that the President fill the strategic petroleum reserve at no less than 220,000 barrels per day and it continued to provide more than the funds necessary to meet this goal. Why? One reason is the SPR is the only weapon, the only weapon, the Government has to counter the economic damage of an oil supply disruption. Sure, there are other possible alternatives. Some have argued to return to price controls, Government allocations during an oil supply disruption. Some have suggested rationing, and I have advocated financial assistance to low-income people and emergency block grants to Governors.

But this administration has rejected all of these as unwarranted interference in the market. So we are left only with the strategic petroleum reserve, not a bad alternative if it is filled rapidly.

It is for this reason that the Congress has provided the funds. But the administration has refused to spend the funds for oil and facilities. GAO has concluded that the Reagan administration has impounded $800 million for the strategic petroleum reserve. In the supplemental appropriations bill the Senate disapproved this impoundment and both the House and the Senate provide $370 million for the construction of oil storage facilities at the Big Hill salt dome in Texas.

Despite the fact that both Houses included this funding the administration convinced the conferees to drop these funds from the conference report, and to delete the disapproval of the impoundment.

How can you explain this? Look at the conference report. Amendment No. 111 deletes on-budget appropriations for construction of phase III of the strategic petroleum reserve, that is the Senate. Amendment No. 112 deletes disapproval of the impoundment. Amendment No. 113 deleted off-budget as opposed to on-budget, off-budget appropriations for construction of phase III, the Salt Dome. Amendment No. 114 deletes deferral of disapproval of the $800 million for the purchase of oil.

Now, those are the four actions, four simple amendments. But the report goes on:

> The managers reaffirm the strong commitment of Congress, as expressed in Public Law 97-229, to an average daily fill rate of 220,000 barrels per day.

And get this:

> At the insistence of the administration, the managers reluctantly have recommended no funds in this bill for the further construction of the Big Hill, Texas, storage site.

Everybody is for it but nobody wants to spend any money.

> The managers have been informed—

The report goes on—

> that a request for additional construction of these facilities will be presented in the fiscal year 1985 budget request as stated in the July 19, 1983 letter from the Director of the Office of Management and Budget. This schedule will permit fill at Big Hill to begin in the third quarter of fiscal year 1987.

And underline this—the report goes on:

> The administration's proposal delays the availability of additional permanent storage by 19 months and continued fill at 220,000 barrels per day as required by law will necessitate the use of expensive interim storage in fiscal year 1985.

This is very interesting, Mr. President. Let us take a closer look at that letter from Mr. Stockman on July 19. It states:

> The administration is now committed to a fill rate of 145,000 barrels per day.

Even though the Congress mandated a goal of 300,000 and no less than 220,000 barrels.

In March of this year the Senate Energy Committee in the persons of Senator JACKSON, Senator MCCLURE, Senator JOHNSTON, Senator WARNER, and I introduced Senate Resolution 84. It is not long. Let me read the resolve part:

> *Resolved,* That it is the sense of the Senate that the United States should provide the resources necessary for continuing the rapid buildup of the Strategic Petroleum Reserve in fiscal year 1984 so as to achieve a minimum fill rate of at least 220,000 barrels per day consistent with the Energy Emergency Preparedness Act of 1982.

It says that:

> For military and economic reasons we should fill the reserve at 200,000 barrels per day.

Military and economic reasons.

But now the conferees say 145,000 is just fine. How can this be? Who agreed to this? Did any of the original cosponsors of Senate Resolution 84 agree to this?

Mr. President, you perhaps see the source of the confusion. Has the threat of an oil supply disruption diminished? If so why are we moving the aircraft carrier *Carl Vinson* closer to the Persian Gulf?

The administration says it cannot fill the 220,000 barrels because it does not have sufficient permanent oil storage capacity, and interim capacity, and interim capacity is very expensive.

Well, if they are really concerned about the lack of permanent storage capacity why are they knocking funds out of the supplemental for the Big Hill permanent storage facility? Mr. President, this does not make any sense at all. It leads one to doubt the seriousness of the administration on this issue.

As a further justification for the reduced fill rate and the delay in Big Hill funding, Mr. Stockman writes:

> The Strategic Petroleum Reserve is just one facet of our energy emergency preparedness. As part of our continued effort to work with Congress to take the necessary steps to ensure such preparedness, we plan to implement certain additional actions which are outlined in the letter to you from Secretary Hodel, sent under separate cover.

So the administration has other emergency preparedness steps in mind but Mr. Stockman is not willing to put his name on these other steps. For these we have to go to yet another letter from the Secretary of Energy to Senator MCCLURE. Mr. President, these additional actions are reportedly the other half of the deal. In return for congressional acquiescence or I would say capitulation, because that is what it is, to a dramatically reduced fill rate, and a delay in the Big Hill funding, the administration is prepared to support the following steps:

First, amendments to give antitrust and conflict-of-interest immunity to permit the use of the executive manpower reserves in an oil emergency.

What a concession. It is the administration that has proposed mobilizing the oil company executives to become Government employees to implement the Government's response to an oil storage shortage. That is the first big concession that we gave up, the purchase of oil and the construction of new facilities.

What are the others? Legislative extension IEA, antitrust defense. That is no concession, that is what they have been asking for 3 or 4 years.

Third, legislation to correct shortfalls in existing emergency preparedness legislation. Mr. President, this concession is so ambiguous we cannot determine what, if anything, is conceded.

Fourth, Federal preemption of State and local laws on price and allocation controls. This concession calls for "appropriate legal resolution," so it may not even necessarily imply that legislation is involved. While this is no concession, given the administration's free market philosophy, it is a concession with regard to their position on States rights.

Fifth big concession, intra- and inter-agency changes to improve the emergency preparedness procedures. That is very reassuring, very reassuring.

Sixth, administrative changes in how SPR oil is to be distributed and used in a drawdown. This is not any

concession at all. It only concedes that "an analysis already underway will continue with a view to developments of measures necessary to insure" and so on and so forth.

So, let us clearly look at what the Congress of the United States has gotten in exchange for essentially gutting the strategic petroleum reserve.

Well, let me add that all that the administration has pledged to do with respect to emergency preparedness legislation is to "enter into a prompt and meaningful dialog * * * with a view to developing acceptable legislation which appropriately deals with these issues."

Mr. President, I can only conclude that the Congress has been taken. In return for slowing the SPR fill rate contrary to the law we passed only last summer and delaying permanent storage, we get the executive manpower reserves. Oil company executives to the rescue. This is emergency preparedness?

Mr. President, let me say in all seriousness that our only weapon to combat an oil supply disruption is not the strategic petroleum reserve. No rationing, no controls, no allocations, no block grants, no money to poor people. The only tools we have to combat the damage that would flow from an oil supply disruption are the stockpiles of oil that we have in Louisiana in salt domes that we can draw out to keep this economy moving. That is all.

Mr. President, oil prices will never be lower—never. Now is the time to fill the reserve at as rapid a rate as feasible.

Should we buy oil cheap now in big quantities and put it into a salt dome as a hedge against the day when the war in the Middle East blows up again, or should we defer purchases and buy oil after the disruption when the price goes through the roof again? The answer, to me, is self-evident—buy now, not later.

Mr. President, the turmoil and the threat of turmoil in the Middle East makes further delay of these purchases irresponsible. If Iran makes good on its recent threat to block the Straits of Hormuz tomorrow, we will wish that we had filled the reserve today. I must say that we delay at our peril, yet we proceed pellmell into placing and playing war games with combat troops in Central America to protect our sealanes, our oil sealanes. Clearly that must mean we are concerned about an oil supply disruption. Yet we are not concerned enough to stockpile so that disruptions will be bearable.

Mr. President, it does not make sense. It raises the question of the seriousness of the administration's purposes. It raises the question of how well thought out our whole national security apparatus is with regard to energy security.

Mr. President, with this background, I would like to ask the distinguished floor manager of the bill why the conferees, given the chaos in the Middle East, the possibility that war tomorrow will knock out the oil-producing capacity of Saudi Arabia or Iraq or Iran for 6 months or a year; and why, given the willingness to protect our sealanes in the Caribbean through which all this oil passes, why did the conferees delete the disapproval of the impoundment, thereby preventing us from using $800 million before September 30 to buy oil that is now cheap and putting it in stockpiles? Why did the conferees delete that disapproval and why did the conferees delay the funding for the Big Hill construction permanent storage sites?

Mr. STEVENS. Mr. President, I would like to respond to the Senator.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. The Senator has a great concern about this issue. The Senate should be advised there was no budget request for the funding on-budget of the $370 million that the House included off-budget. But the House provision putting the money off-budget was actually a change in the current law because the current law provides that oil acquisition and transportation be off-budget. Planning, construction of storage facilities, and administration are all on-budget under the current law.

So in order to comply with the current law, it was necessary to put the items on-budget. But if they were put on-budget, they would have raised this bill even further, as the Senate did, to the point where it was going to be vetoed.

In the conference, SPR was the last issue to be decided and the distinguished Congressman from Illinois, Mr. YATES, when he was unable to obtain the concessions that he sought, did agree to recede from the House position. The effect of the actions of the House and Senate receding was, as the Senator has stated, the supplemental no longer contained any provision for the construction of the phase III of the storage facility at Big Hill. That position has been sustained by the House now in its passage of the conference report on this supplemental appropriations bill.

The issues of the facility construction and the fill rate are, of course, interrelated. The earlier plan had been to begin Big Hill construction in fiscal 1984 and to complete it in 1986 and begin filling it in 1987. This facility is to provide the last 140 million barrel increment of the 750 million barrel strategic petroleum reserve.

Rather than complete SPR in fiscal year 1989 as planned, the administration believes that, due to the costs of borrowing, it is less expensive to fill at a slower rate and delay the completion by about 18 months. The action of the supplemental is consistent with the request of the administration, and the Senate 1984 Interior bill does provide for a fill rate of 145,000 barrels per day. The House bill carries a fill rate of 220,000 barrels per day. That bill, as the Senator knows, will be before the Senate sometime next week, we hope.

The change of direction that was agreed to by the committee, obviously, the change recommended by the administration does not mean that we are not committed to SPR. On the contrary, we are filling right now at the rate of 220,000 barrels per day. The full 750 million barrels of the SPR by 1991 is still the commitment. The budget request for the Big Hill construction in the 1985 budget will be presented to the Senate in January; and we do envision still a completion of Big Hill by 1987.

I want the Senator to know that we do appreciate his concern. We think that, under the circumstances, since the bill is coming up next week, the Senator will have an opportunity to express himself once again on the issue then because the same issue exists in the Interior bill for 1984.

Mr. BRADLEY. Will the Senator yield for a question?

Mr. STEVENS. I am happy to yield to my friend.

Mr. BRADLEY. Does that mean the Senator is supportive of the Interior appropriations bill of 220,000 barrels per day fill rate?

Mr. STEVENS. This Senator has not made up his mind yet on that. I do not think the Senate has, either. I understand there has been a savings of some $800 million due to the fact that the fill rate, while at the rate set by the Congress, has been achieved at a lesser cost. The $800 million that the Senator refers to is savings while filling at the rate that was mandated by the Congress.

I have not yet decided, personally, and I do not think the Appropriations Committee has had the opportunity to face that question.

Mr. BRADLEY. Since the Senator referred to 1982, the Congress is on record with a minimum fill rate of 220,000 and a preferred fill rate of 320,000. There is no mention of 185,000 barrels per day. Let us not have the Senator mistake what happened in conference, with all of this on-budget or off-budget discussion. What happened was the Senate decided that, yes, we should increase funding so we could build a bigger permanent reserve, and we will put that $370 million on-budget. The House said yes, we should increase our permanent storage capacity, and they put that $370 million off-budget. Both went to conference and under the pressure of this administration both agreed to

drop it, thereby running contrary to the clear intent of both Houses.

Likewise, both Houses disapproved the impoundment, the $800 million saving that the Senator is talking about. Yes, it is an $800 million saving. That means that oil is not being purchased and put into the stockpile. That means we are more vulnerable tomorrow and the next day than we would have been had we spent the $800 million.

I would argue that the Senator's explanation, while I understand it, is not acceptable.

Mr. STEVENS. Mr. President, the Appropriations Committee felt constrained to move because of the urgency of their food stamp question and they knew that this would be a contentious issue in both Houses unless there was a basis for the agreement. The basis for the agreement was that Congress could settle that matter in the Interior appropriation bills for 1984. The moneys we are talking about in this bill would have been carryover moneys from 1983 to 1984 anyway. They are not by definition moneys that are truly supplemental moneys to be spent in 1983. Everyone agreed these funds could not be spent in 1983. So we have left the issue to the 1984 appropriations bill. I urge the Senator to allow the Senate to adopt the same solution for this rather contentious problem because of the time frame of this bill.

Mr. BRADLEY. Mr. President, let me just say that these moneys could be spent but there was no permanent storage facility and no attempt made to find interim storage facilities. The one thing that the Senator and I agree on is that the Senate will have a chance to revisit this issue next week in the Interior appropriations bill. At that time we will clearly be able to test whether the Senate intends to fulfill the commitment that was made in 1982, whether we are going to continue to fill this reserve and enlarge it, or whether we are going to leave ourselves even more vulnerable, even at the time we are running war games to protect oil reserves in the Caribbean and the situation in the Persian Gulf continues to deteriorate. That will be the choice to make next week. I thank the Senator for his time and I hope for his support when the Interior appropriations bill is before the Senate.

Mr. President, I want to go on record as opposing a provision in the fiscal year 1983 supplemental appropriations bill as reported by the conferees. That provision temporarily bans truck traffic on Route 209 in Pennsylvania and by so doing creates potentially serious safety and environmental problems for New Jersey and New York.

The House-passed version of the supplemental appropriations bill would have permanently banned most commercial traffic on Route 209. The Senators from New Jersey and New York objected to the ban and took the matter to a vote of the full Senate. We explained to our colleagues that prohibiting trucks from using Route 209 would have a major regional impact because those vehicles would have to use other roads in New Jersey and New York. We pointed out that there has been no study of how this diversion would affect neighboring States. In fact, no one has even identified the alternative routes, let alone considered the impact that increased commercial traffic will have on the safety and well-being of the communities through which it passes. And we argued that the transportation problems the ban sought to address are regional problems that require a regional solution.

These arguments persuaded 60 Senators to vote with us to strike the entire House-passed provision. Notwithstanding the overwhelming vote for the Bradley-Lautenberg amendment, the conferees unfortunately adopted a modified version of the original ban. The conference agreement provides for the prohibition to take effect immediately and to continue until December 31, 1983. In the interim, a commission will be set up to study the impact of the truck ban on the entire region and to recommend a permanent solution to Congress within 90 days of enactment.

Even though the ban is only temporary and even though the legislation provides a mechanism for dealing with the problem on a regional basis, and even though the fee provided in the legislation applies only to trucks operating in the recreation area, I oppose the conference position. We need to get the States and the appropriate Federal agencies to work out an acceptable solution before any ban takes effect, not after the fact. I hope the commission will see the ban's unfairness and recommend that it be permanently lifted.

The only positive aspects of the conference agreement are that it explicitly provides that the legislation will not prejudice litigation on this issue that is currently pending between the State of New Jersey and the U.S. Park Service and that it cannot be construed as legislative approval of a permanent ban.

AUTHORIZATION PROCESS MUST BE PROTECTED

Mr. PERCY. During the House-Senate conference, the conferees agreed to waive the need for authorization of fiscal year 1983 foreign aid funds after September 15. On the House floor, the waiver was postponed until September 30.

I understand the reasons behind the position taken by the conferees, but I disagree with their fundamental assessment. Specifically, I believe that the foreign aid authorization legislation can be enacted by the end of this fiscal year. I am hopeful that the Senate will take up this bill in the near future. I know I speak for Senator PELL when I say we will both do everything we can to enact this bill prior to September 30.

I note that during House consideration of this provision, chairman of the Foreign Operations Subcommittee CLARENCE LONG agreed that this September 30 deadline would probably be extended in the continuing resolution if progress is being made on the authorizing legislation. I take assurance from this and hope that the chairman of the Senate subcommittee can make a similar pledge. I also note that if necessary I will offer such an amendment to the continuing resolution extending this deadline.

Mr. KASTEN. Mr. President, I want to assure the chairman of the Foreign Relations Committee that the conferees had a thorough, and I believe thoughtful, discussion of this issue, and I believe I represented his viewpoint in the conference. The conferees did not make this recommendation lightly, as we do believe that the proper process was for authorizations to come first and then appropriations. While this fact is not a defense, I know the chairman realizes that a great deal in this supplemental is not authorized, and, in fact, the supplemental contains a great deal of authorization legislation. This is not the proper process and procedure, but time once again has forced us to go this route.

There were three new elements which confronted the conferees which did not exist when the chairman of the Foreign Relations Committee and I had a discussion of this matter on the floor of the Senate. First was the explicit request by the Secretary of State that we provide a waiver of the authorization. We did not do what he suggested by either providing a flat waiver or a waiver with August 15 as a deadline, but instead we used the Percy formula developed in connection with the Caribbean Basin Initiative last year so that the funds which are not authorized cannot be spent without authorization or until September 15, whichever comes first.

On the floor of the House during consideration of the conference report, Chairman ZABLOCKI of the House Foreign Affairs Committee recommended that the date be changed to September 30 in order to give the authorization process more time. I have no problem with that, and, in fact, endorse it as a further indication of my own desire that the proper process be given every opportunity to work.

Second, the House conferees told us it was their very firm opinion that there was no chance for authorization on the House side.

Third, while I presented your views that authorization was possible in the Senate, and I believe it is, the timing of that has slipped from July to September, further complicating matters.

Mr. President, I regret that we have to continue this type of process. I am not for it, and I want to assure the chairman of the Foreign Relations Committee that I will do what I can to secure consideration and passage of authorization legislation.

Mr. President, the suggestion that the deadline be extended if the authorization process is near completion is a reasonable one, and if when the time comes it is practical, I would certainly have no problem with such an extension.

JORDAN

Mr. MATHIAS. Mr. President, I note that the statement of managers of the joint conference on H.R. 3069, the supplemental appropriations bill, contains a statement under the section on foreign military sales credits that "no funds provided in this chapter shall be available to Jordan." I am concerned that Jordan is being singled out for special critical treatment. Would you explain to me the origin of this reference to Jordan?

Mr. KASTEN. I am delighted to do so. There has been some confusion with respect to this issue.

In the legislative history of H.R. 3069, the House Appropriations Committee identified specific countries to receive FMS credits from authority made available under H.R. 3069. Jordan was not one of those countries.

The legislative history of the Senate amendment made it clear that our levels of FMS authority included $15 million for Jordan, thus bringing Jordan's FMS level for fiscal year 1983 up to $55 million, its fiscal year 1982 FMS level. At conference we split the total difference on FMS credits, but we decided not to earmark country levels either in the bill or in the statement of managers.

At the first of three meetings of the conferees, however, the difference on Jordan, Somalia, and other countries, was noted, and originally the conferees intended to indicate amounts for each of the countries involved. At the last meeting it was decided that we would not earmark countries, except for those which had been initially agreed upon—Jordan, Somalia, El Salvador, and Lebanon, with some limitation on the types of programs for Zaire and Guatemala. We had a very good conference agreement, and we did not wish to jeopardize it by returning to a subcommittee conference where our entire agreement could be unraveled. For that reason, there was no objection to the suggestion that some limitation on Jordan be placed in the statement of managers.

We took this approach to save a very favorable compromise for the Senate. I want to stress that this was a limited act in a supplemental appropriations bill in which we cut deeply into the administration's request.

Mr. MATHIAS. I appreciate this explanation. There has been some concern expressed as well with respect both to funds for Jordan in the continuing resolution and the use of economic support funds to repay Jordan for funds previously programed for that country which were diverted to Lebanon to meet emergency needs.

Mr. KASTEN. Let me respond to those questions:

First, we knew then, and we know now, that this language applies only to the supplemental appropriations bill, not to the continuing resolution.

Second, the prohibition clearly does not apply to the ESF funds appropriated for Lebanon, which can be repaid to Jordan, as this was not at issue in conference.

Mr. MATHIAS. Am I to understand then that the administration can use the FMS credits provided in the continuing resolution to provide an additional $15 million in FMS credits for Jordan?

Mr. KASTEN. Yes. If it can find the funds, the administration can reprogram from the authority contained in the continuing resolution. Of course, they would have to notify us of the reprograming, as they had previously notified us that they would allocate only $40 million in FMS credits for Jordan under the continuing resolution.

CHAPTER V—FOREIGN ASSISTANCE

Mr. President, the conference agreement, as it relates to chapter V, foreign assistance, was the result of 3 2-hour sessions with the House conferees, and the result, while not one that either side is totally happy with, is a reasonable compromise, and one I can nonetheless recommend that the Senate support.

While the House insisted that our funding levels be reduced for the economic support fund, the military assistance program, and the foreign military sales program, the lower figures come unencumbered by earmarks, thus giving the administration flexibility in allocating the programs. The conferees did make specific recommendations for earmarkings with respect to Lebanon, El Salvador, Jordan, and Somalia, but otherwise the administration is free to make allocations within the constraints of existing law.

The Senate receded to the House position on the International Development Association, the soft loan window of the World Bank. The House receded to the Senate position on an additional $16 million for IFAD, and on an additional $5 million in development assistance for Belize. However, overall the conference agreement is still well below the administration's budget requests, and within the budget resolution.

Some additional aspects of the conference agreement which need comment are as follows:

The House accepted the Senate deobligation/reobligation authority language with a technical change allowing the authority to be used for possible help in South America in response to the ongoing weather disaster. The deobligation/reobligation authority in the bill allows for congressional oversight of deobligated and reobligated funds by applying a 15 day notification requirement. Notification is required whenever the deobligation/reobligation authority of this section is used to make available funds which would otherwise not be available for reobligation because the period of their availability had lapsed. Where funds are deobligated for return to the treasury and not made available for reobligation, no notification is required. Reobligation of funds under this act in fiscal year 1983 may take place within a year from when they were recorded by AID, as deobligated.

The conference accepted the House suggestion for additional funds for African refugee programs and the antipiracy program in the Gulf of Thailand. However, in doing so, the conferees accepted my suggestion that we transfer the funds in the current fiscal year so that we could take advantage of funds which would have lapsed instead of reappropriating lapsed funds in fiscal year 1984 which the House had suggested and which would have been scored against us in fiscal year 1984. It is clear that the intention of the conferees with respect to the antipiracy program was that these funds are to be used to support the existing multilateral effort. While we have transferred the funds to the economic support fund, the conferees leave it to the Secretary of State to decide which office in the Department of State should properly have management and policy control.

Mr. President, the House has insisted on its position that we provide no funding for the International Monetary Fund. The Senate could now insist on its position and send this entire conference report back to the House for further consideration. But the leadership has determined that because of other very important matters, together with the lack of time and the House insistence that the IMF be authorized first, that we will not press our position at this time. We can expect that this matter will be considered again at a later date.

Mr. President, I would like to express my appreciation for the continuing cooperation by Senator INOUYE, the ranking member of the Foreign Operations Appropriations Subcommittee, and also my appreciation to

the chairman of the committee, Senator HATFIELD, who was his normal helpful self in this process.

REHABILITATION, RESEARCH, AND TRAINING CENTERS

Mr. WEICKER. Mr. President, I want to call my colleagues attention to a particularly significant item within the bill—amendment No. 144 to H.R. 3069—under the jurisdiction of the Subcommittee on Labor, Health, and Human Services, and Education and Related Agencies. I want to emphasize the need for a research and training center focusing on pediatric rehabilitation needs and reiterate the directive in the statement of the managers accompanying the conference report that this center be located at the University of Connecticut. Furthermore, the bill addresses the unique rehabilitation needs of the Pacific Basin and establishes a research and training center in this area; the conferees directed that this center be located at the University of Hawaii.

The need for the establishment of these two centers is reflected not only by this supplemental appropriations bill, but is also clearly addressed in the provisions of S. 1340, the Rehabilitation Amendments of 1983. S. 1340, passed by the Senate on July 26, specifically authorizes a pediatric and a Pacific Basin research and training center. The committee report for S. 1340 likewise directs that the pediatric rehabilitation center be located at the University of Connecticut and that the Pacific Basin center be located at the University of Hawaii.

By affirming the need for these two centers in two separate bills, and specifying their location in both reports, we have clearly indicated our intent regarding the establishment of pediatric and Pacific Basin research and training centers. Following enactment of this supplemental, the administration should act expeditiously to establish these two vitally needed research and training centers at the two locations directed by Congress.

MOANA GEOTHERMAL HEATING PROJECT

Mr. LAXALT. Mr. President, would the distinguished chairman of the Appropriations Committee and the conference committee yield for a question or two?

Mr. HATFIELD. I would be happy to yield to my good friend, the senior Senator from Nevada.

Mr. LAXALT. I thank the Senator.

I am pleased to note that the House and Senate conferees on H.R. 3069 agreed to the Senate position that the geothermal heating project in the Moana area of Reno should be expeditiously completed. To accomplish that objective, the statement of managers references the language of the Senate report directing the Secretary of Energy to make $475,000 in fiscal year 1983 funds available for the project.

I understand that the funds are to be used to complete construction of a pipeline network between the project's two successful geothermal wells, to finish retrofit work at the Salem Plaza Condominiums, to obtain commitments for the sale of excess heat, and to prepare engineering estimates of the capital costs of such heat sales. Does the Senator share this understanding?

Mr. HATFIELD. Yes, I concur with the Senator's statement.

Mr. LAXALT. I thank the Senator. As he knows, I am anxious to assist the officials of the Department of Energy in developing a completion plan which will be acceptable to them and to the project's private sponsors. I have been favorably impressed by the quality of leadership within the Energy Department, and look forward to continuing to work with Mr. Joseph Tribble and Dr. Robert San Martin to resolve this issue. I am sure it will be possible to reach an understanding with these highly skilled and reasonable individuals.

Mr. HATFIELD. I know the Senator from Nevada has worked hard to keep the Reno geothermal project going, and I share his view that a completion plan can be developed that is acceptable to all parties. It should be easier to work out such a plan now that both Houses of Congress have agreed that continued funding of the project is a priority item.

Mr. LAXALT. I appreciate the Senator's kind words, and I thank him for yielding to me.

THE SANTEE-COOPER EARTHQUAKE PROTECTION AMENDMENT

Mr. THURMOND. Mr. President, I want to express my deep appreciation to my colleagues in the Senate, as well as the conferees from the House and Senate, for their acceptance and support of the Santee-Cooper earthquake protection amendment to the supplemental appropriations bill, which was offered by me with Senator HOLLINGS as cosponsor.

This provision will allow the Corps of Engineers to design and construct remedial works in the South Carolina Public Service Authority Dam System, upriver from Charleston, S.C., at an estimated cost of $22 million. It also appropriates $2 million so that design work may begin immediately.

These modifications to the dam system are necessary in light of recent Federal Energy Regulatory Commission studies which indicate that both the Pinopolis West Dam, nearest Charleston, and the North Dam, on the Santee River, would likely fail in the event of an earthquake of intensity equal to the one which struck Charleston in 1886. Current data from the geological survey shows Charleston to be an area of high seismic activity, and a very likely region for a large east coast earthquake.

Following the determination by FERC that the two dams would likely fail, Santee-Cooper commissioned extensive geotechnical studies which revealed the likely consequences of dam failure and resulted in preliminary design of the necessary modifications.

Mr. President, in light of the seriousness of the threat, and considering the amount of study already done on this situation, I want to stress the need for the Corps of Engineers to begin work immediately on these remedial measures. I would also fully expect that the already completed, very detailed studies will be extensively used by the corps to save time and expense in refining the design for the necessary work.

Mr. President, I have discussed these points with Senator HOLLINGS, who shares this view, and I am confident that all of the members of the South Carolina congressional delegation join us in expressing their intent and desire that this work begin immediately and proceed expeditiously.

Our goal, of course, is to prevent potentially catastrophic losses to lives and property, including a number of Federal military installations in and around Charleston.

Mr. President, I wish to thank my colleagues for their support in this very important matter, especially Chairman HATFIELD and Senator STENNIS, who were especially helpful in working out this legislation.

Mr. HEINZ. Mr. President, this conference agreement on the supplemental appropriations bill deletes the Senate passed amendment, which I sponsored, imposing a 6-month moratorium on all social security disability reviews of people with mental disabilities, pending reforms in the disability review process.

The conferees deleted the Senate amendment because of concerns on the part of certain House members that the committee of jurisdiction, the House Ways and Means Committee, should have the opportunity to develop legislation on this issue. And indeed, since the Senate passed my amendment on June 15, the House Social Security Subcommittee has moved with great dispatch to hold hearings and mark up a bill that will reform the continuing disability review process.

The subcommittee's proposed bill, which is still in markup, and therefore subject to change, is an ambitious piece of legislation that includes, among other proposed disability reforms, a temporary moratorium on reviews of all the mentally disabled. It requires a revision of the standards used to evaluate mental disabilities. It sets up an outside advisory group to help the Secretary of HHS make the needed changes. And it requires that a qualified psychiatrist or psychologist

participate in the disability evaluations of people with mental disabilities, in those cases where a denial or termination of benefits is contemplated.

In short, the Social Security Subcommittee's proposed bill embodies all of the major elements of the Senate amendment to the supplemental appropriations bill. The chairman of the House Social Security Subcommittee, Mr. PICKLE, has also stated that it is his goal to get this bill through the House as soon as possible and hopefully by the August recess. In this legislative context, the conferees on the supplemental appropriations bill deleted the Senate amendment while expressing their strong support for the legislation being developed by the authorizing committees, and urging its prompt enactment. In the interim, the conferees directed the Secretary of HHS to proceed—and I quote, "with extreme caution in the termination of benefits, pending enactment of this legislation."

In conclusion, Mr. President, congressional passage of this conference report will send a strong and clearly worded message to the Secretary of HHS to stop what has become, sadly, a national scandal. And the badly needed reforms in the reviews of the mentally disabled that the Senate approved as amendment to the supplemental appropriations bill will—I predict—be passed by both Houses of Congress, on one legislative vehicle or another.

I am pleased that our colleagues in the House are moving quickly to pass a comprehensive bill. But if their efforts bog down, for whatever reason, I am prepared to again offer this bill, S. 1144, which now has 46 cosponsors, as an amendment to the next revenue bill that comes over from the House.

I thank my colleagues for their continued support.

Mr. DOLE. Mr. President, it is with great relief that we now have before us for consideration, the conference report on the supplemental appropriations.

During the last few weeks, the Senator from Kansas has been extremely concerned about the funding situation for the food stamp program. As has happened so often in the past, congressional action has occurred at the last minute, and there was very nearly a funding crisis for the States with regard to the issuance of program benefits for the month of August. At one point, it looked as if August benefits would have to be reduced by 20 percent, given the limited funds available, and States were beginning to gear up to implement these benefit reductions. This kind of crisis has now been controlled, thanks to instructions from the Department of Agriculture to the States, However, the major concern now is that there may still be some danger that August benefits will go out late, because of the issuance systems utilized by many States and the time frames within which they have to work. I sincerely hope that this kind of result can be avoided. I had previously recommended that the food stamp funding be separated from the larger supplemental and passed as an emergency measure because of what appeared to be an impending crisis for the program.

The supplemental appropriations measure before us contains about $1.2 billion in additional food stamp funds, and since Monday is the first day of August, it is advisable to get this money out to the States as expeditiously as possible. Although I plan to vote against this bill for a number of other reasons, it is a great relief that the food stamp program will receive the additional funding necessary to issue full benefits through the remainder of this fiscal year.

Mr. EXON. Mr. President, this Senator has many reservations with regard to the supplemental appropriations measure before us and support it only because of the many important appropriations favorably affecting Nebraska and its people especially with regard to our important water resources.

Mr. President, I am grateful for the Appropriations Committee's efforts and cooperation in providing language in the fiscal year 1983 supplemental appropriations bill directing the U.S. Department of the Interior to engage in a joint, State-led study of alternatives to the Norden Dam, O'Neill unit in the State of Nebraska and to immediately contract with the State to initiate this review.

The State of Nebraska has requested this opportunity to fully examine an artificial ground water recharge proposal as an alternate project to deliver irrigation water to north-central Nebraska. The primary objective of this study remains the same as that of the authorized project, to provide irrigation water. Both fiscal and environmental objections to the authorized project, however, have compelled us to reexamine and rethink the O'Neill project and to find an alternative which is significantly less costly and less environmentally objectionable. The State will examine workable alternatives which would not utilize a dam and reservior, and which could actually result in reducing project costs by nearly two-thirds while irrigating the same acreage as the authorized project now estimated to cost in excess of $370 million.

A well field and ground water recharge plan has been developed by the Nature Conservancy and has attracted attention as a possible alternative. The State of Nebraska will begin its review of alternatives with the Nature Conservancy proposal as its starting point.

The State's agenda for this 18-month study will include a review of existing wells in the Niobrara area as well as existing literature and studies; an examination of the kinds of wells best suited for the proposed well field such as conventional wells or horizontal wells, and the use of the latest technological advances available in this area; direct and indirect application of water from the wells; short-term and long-term well yields and replacement costs; energy costs and methods available to minimize those costs; location of the Niobrara River Valley's alluvial channel; the recharge potential and methods to reduce the siltation of the recharge basins; the effects of the project on the instream flow of the Niobrara River; the feasibility of additional components such as surface irrigation systems to the well field and ground water recharge proposal of the nature conservancy.

Mr. President, these and many other questions have been raised by water experts in the State of Nebraska regarding the workability of the nature conservancy plan. Interest in the well field proposal is strong enough that the State believes that a serious review is in order and merits the time and effort of water officials in the State. The State has indicated a willingness to match Federal contributions for this study of workable, less costly alternatives.

Mr. J. Michael Jess, director of Nebraska's Department of Water Resources, will lead the State study team, assisted by Mr. Dayle Williamson of the Nebraska Natural Resources Commission and Mr. Vince Dreeszen of the University of Nebraska's Conservation and Survey Division. These State water experts will examine the well field and ground water recharge proposal as well as other combinations of alternatives based upon the recharge concept.

Mr. Jess has outlined a five-part study outline to Assistant Secretary Carruthers, Commissioner Broadbent, and the Bureau's regional director Billy Martin.

First, the State will examine the potential for developing water supply in the Niobrara Valley. This will require test drilling, examination of the aquifer, well field feasibility, and direct diversion and delivery, and the use of gallery or collector wells.

Second, the State will inventory existing irrigated lands, quantify recharge potential by actual demonstration, and determine actual project needs.

Third, the State will develop a preliminary design for the project to provide for the water supply, conveyance system, and delivery.

Fourth, the State will examine cost estimates, and in particular, costs to irrigators. Finally, the study will review

other legal, institutional, and environmental considerations of the alternative.

The State has requested, and the Bureau has agreed, to provide a Bureau staff member to work with the State during the study process. This will permit a close working relationship, with the State as the lead agency, which will work out problems and questions while the study is in progress and thus expedite completion and avoid any unnecessary delay in the final evaluation of the study's assumptions, conclusions, and recommendations.

The State has also committed to provide periodic briefings for Members of Congress and their staff, local irrigators, the nature conservancy whose plan will be the starting point of the study, and all interested parties to provide ample opportunity for input during the study process. This study certainly is important to irrigators in the proposed reclamation district who have been asking for assistance, as well as taxpayers who will be footing the bill for a project in the area. The nature conservancy is an essential participant as the initial engineering designs and concept where developed by the conservancy. I would hope that the State study team would regularly consult with these groups during the study to work out assumptions and conclusions as with the Bureau staff.

The Bureau of Reclamation is directed to immediately contract with the State of Nebraska to conduct this 18-month study of the well field alternative. It is the intent of the Congress that the Department of the Interior participate and help finance this State-led study and to contract with the State to undertake the necessary work.

In a meeting last Friday, July 22, Assistant Secretary Carruthers, Bureau of Reclamation Commissioner Broadbent, and the Bureau's Regional Director Martin, committed to State officials to work quickly to implement the study and to provide the State with a grant to expedite the progress of the study.

Costs incurred by the Bureau of Reclamation to administer the contracts for this State-led study are not intended to be taken from the $100,000 designated for the review. The State, of course, will be expected to provide in-kind services to insure that the full $100,000 requested from the Department of the Interior's available funds be directed toward the study itself. The State has indicated that the full $100,000 is necessary to actually conduct the study itself and it is the intent of the Congress that these funds be made available for that purpose. The Bureau of Reclamation has indicated to the Senate Appropriations Committee that the funds are, in fact, available, and that further funding, thought to be necessary in the fiscal year 1984 appropriations legislation, is not needed.

In addition, Mr. President, it is the intention of the Congress that the Department of the Interior act with all speed to implement the contracts with the State of Nebraska. The clock will begin ticking upon enactment of this measure and the Congress intends that the full 18-month study period be devoted to the actual study itself. Any delay which reduces unnecessarily the 18-month time period will violate the intent of the Congress. Time is of the essence in initiating the study process. The State of Nebraska has been preparing in advance to initiate the contracting process with the Department of the Interior. The Congress is expecting similar expeditious action by the Department.

I was encouraged and pleased that, last July 22, Mr. Billy Martin, the Bureau's Regional Director pledged full cooperation in assisting the State to prepare the preliminary paperwork for the grant from the Bureau, and would assist the State during the study process in view of the 18-month time limitation imposed by the Congress. Commissioner Broadbent has pledged his full support and cooperation as well in preparing to expedite the initiation of the study upon the President signing the fiscal year 1983 supplemental appropriations bill into law.

On a separate track, the Bureau will examine the potential for making actual cost reductions of about $10 million to the authorized project. In addition, a review will be made of shifting about $40 million in authorized project costs to the State. The Governor of Nebraska will review the policy implications of such a cost shift as another alternative. The separate study was requested by Congresswoman SMITH and is not a part of the State-led study mandated in the supplemental appropriations bill.

I commend the State of Nebraska's eagerness to begin this study and to complete the review in an efficient and timely manner. More importantly, I commend State water officials who have recognized the realities facing the future of water project development. Fiscal constraints are forcing the hand of the Congress to look much more closely at water project development. Limited Federal dollars will challenge the creativity of today's water experts and require new thinking and innovations to meet tomorrow's water needs. Nebraska water officials have demonstrated that this is a challenge they are ready and willing to accept. Nebraska's leadership role in this regard will provide an example for the Nation's water leaders and offer a new direction in meeting water development needs for the future. The Nation will be watching with great interest and expectation.

Representative DAVID BONIOR, who led a successful effort in the House last year to defund the authorized Norden Dam project, has pledged that he will not press for deauthorization while the State of Nebraska studies realistic, workable alternatives which will significantly reduce project costs and environmental objections to the authorized project.

Again, I thank the committee members and staff who have been helpful in providing Nebraska with this opportunity.

PRAIRIE BEND

This bill also provides for a feasibility study of the Prairie Bend project which is a 4-year study to examine the potential for irrigation and ground water stabilization in the Platte River Basin area north of the Platte River in eastern Buffalo County and western Hall County in central Nebraska. The legislation would also provide for examining the need to locate a part of the facilities for a Prairie Bend project in part of Dawson County.

This study will review and identify several alternative approaches to addressing the water decline in the Prairie Bend area. The public will have an opportunity to review and compare the various alternatives. The study should be broad based to address all concerns.

In addition to identifying possible alternatives for a project, this feasibility study will, as a project purpose, integrate a plan to provide for the enhancement of habitat for fish, wildlife, and waterfowl including the migratory birds currently utilizing the Platte River.

The Prairie Bend feasibility study shall develop project alternatives which provide for the Federal responsibilities of instream flows, restoration and maintenance of the migratory bird habitat in the Big Bend area of the Platte River. The study will also examine a conjunctive use project as a possible alternative for the Prairie Bend. In its 1979 prefeasibility study, the Bureau of Reclamation recognized a conjunctive use project as holding the greatest promise for meeting the needs of the Prairie Bend unit and minimizing any detrimental effect on the environment.

This Prairie Bend feasibility study is important to the State of Nebraska. The area to be reviewed is experiencing ground water depletion and will eventually result in a decline in the agricultural economy as well as create future water quality problems. The feasibility study will assist the State in examining future options for the area and develop a plan which meets the needs of both irrigators and wildlife habitat.

SIDNEY INTERTIE PROJECT

Finally, Mr. President, the bill provides for the funding of an east-west

electrical grid intertie project for the Western Area Power Administration to be located at Sidney, Nebr. This project will benefit both the State of Nebraska and the State of Kansas in making available more economical electric power. Up to 75 people will be hired during the construction phase of the project in the Sidney area, and will bring nearly $6 million in direct revenues to that area through this construction activity. In addition, other communities in the Nation will benefit from this project. Design engineering, transformer and reactor manufacture, valve production, and other components for this project will create jobs in Pennsylvania, Iowa, Massachusetts, New York, Virginia, and New Hampshire.

I am pleased that the conference version of H.R. 3069 has been adopted by the Congress and I urge the President to sign this measure into law without delay.

Again, I thank my colleagues on the Senate Appropriations Committee and their staff members who have been helpful in my efforts to achieve adoption of these provisions so important to the State of Nebraska.

Mr. MATTINGLY. Mr. President, on April 27, 1983, I testified before the Transportation Subcommittee of the Senate Appropriations Committee about the extreme safety hazard that existed on the Talmadge Bridge in Savannah, Ga. It was stated that, "this hazard exists not only for surface transportation but for navigational traffic as well." In addition, it was also explained that, "the problem with the Talmadge negatively impacts the national defense capabilities of our country." Secretary of the Army John Marsh substantiated that, "timely movement of this element of our Rapid Deployment Force—the U.S. Army 24th Infantry Division—is seriously constrained by the height of the Talmadge Bridge."

Recognizing the seriousness of the safety problem at the Talmadge Bridge, the Senate approved for the inclusion in the fiscal year 1983 supplemental appropriations bill $5 million for the design and engineering for replacement of the bridge. However, a similar provision was not included in the House version of the bill.

Last Saturday, July 23 at 6:15 in the morning, a vessel participating in Operation Bright Star as part of the Rapid Deployment Force exercise struck and severly damaged the Eugene Talmadge Bridge. A forward boom of the vessel *Adm. William N. Callaghan* ripped through the lower, main structural support beams of the bridge. Fortunately, the vehicles on the span—including a passenger bus—did not plunge into the water below.

On July 25, my friend and colleague from Georgia, Senator NUNN and I wrote each Member of the House and asked that they recede to the Senate provision of $5 million for design and replacement of the Talmadge Bridge. I am happy to report that today the House did recede on this issue.

I am pleased and thankful that this action has taken place. It is unfortunate that there had to be an accident to prove that the Talmadge Bridge was unsafe. We should all be thankful that no lives were lost and that we now have the opportunity to act to prevent even more serious accidents.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. MELCHER. Mr. President, I thank the Senator for yielding to me.

I wish to make a couple remarks and ask him a question at the conclusion of my remarks.

Mr. President, I feel a little bit lonesome on this Senate floor, and I feel greatly forsaken because in the supplemental appropriations bill that was before us by 67 to 29 vote, more than 2 to 1, the Senate agreed to increase the soil conservation funds by an amount of $34.5 million, and locking that amendment into the supplemental with that kind of a vote gave heart to those of us in the Senate ardently hoping for an increase in soil conversation work, and it gave heart to the soil conservation districts throughout the United States, that indeed there was a determination by the Senate at least and hopefully by the House of Representatives also that we would start the process of conservation catch up, that is catching up on the necessary work to protect our land base.

We have been losing ground in soil conservation work for at least a decade, as I see it, for more than 12 years, and the desperate need to reverse that process is becoming more desperate each year.

We have had great erosion problems that are increasing year by year and are currently as bad now as they were during the Dust Bowl years of the dirty thirties.

Land does not stand still for a lack of concern in Congress. Land does not stand still and just remain the same without care and proper work, and our conservation efforts are an ongoing process that are really at the heart of protecting the U.S. land base.

Land does not stand still nor does it even contemplate nor does it even recognize the effects of inflation.

All during the past 10 or 12 years the inflationary rate in this country has assured that each year the same amount of money will produce less in soil conservation work.

The $34.5 million was a well thought of add-on to stimulate the necessary planning that is required before soil conservation work actually gets under way.

It covered five different programs involved in soil conservation work in the United States. Those programs are the resource conservation development program, the Great Plains conservation program, the soil conservation matching grants, the special areas conservation program, and the agricultural conservation program, the oldest of all of these programs that I have mentioned, and it is known as a cosharing program.

Three out of five of the programs actually generate matching funds, and because of that the dollars appropriated out of the Federal Treasury matched by other dollars from those working the land assure us an ongoing attack on perhaps our greatest enemy to our land base, an ongoing attack on erosion and other features of sound conservation practices.

I am deeply distressed that the result of the conference has been to strike this amount of money that was retained in the amendment I offered and was so overwhelmingly adopted by the Senate.

Does the Senator from Mississippi wish me to continue?

Mr. STENNIS. Well, I was interested in the measure, in the bill. This amendment just did not prevail and the regular bill that is coming along—I understand the Senator from Mississippi has an explanation though of just what was said.

Mr. MELCHER. I thank the Senator from Mississippi, my distinguished friend.

Mr. COCHRAN. Will the Senator yield?

Mr. MELCHER. Yes, Mr. President.

Mr. COCHRAN. Mr. President, I sympathize with the argument being advanced by the Senator from Montana because I too have a very strong feeling that we need to make available every possible allocation of our resources for soil conservation activities. As a matter of fact, in the 1984 bill that is going to be the subject of conference just in a few days between the House and Senate, there is $817 million for soil conservation, and water resource conservation activities. This includes the Soil Conservation Service and the ASCS accounts that are earmarked for soil conservation.

I realize the obligation of our conferees is to try to get the House to go along with the bill as approved by the Senate, but we found in conference that we were $1 billion over the President's requested appropriation for this supplemental in all the accounts combined, and we had to work with the administration and the House to try to get those numbers down to a point where the President could be expected to sign the bill and we could fund those programs that had to be funded to carry on the essential functions of Government for the remainder of this fiscal year, which is just a couple of months.

But nonetheless I am sympathetic to the arguments that the Senator from Montana is making, and I too am disappointed we do not have higher figures in this supplemental for soil conservation activities. As a matter of fact, one amendment that I suggested on the floor of the Senate, which was approved by the Senate, added $10 million for emergency work in this area, and that was cut in conference to $5 million. Every effort was made to get the maximum amount of money for these amounts in the bill.

So I have no way of explaining away the fact that we do not have the amendment of the Senator from Montana included in full in this bill except to say that there were restraints placed upon the conferees and we did the best we could. I am hoping that we can in the 1984 bill make up for some of the shortfall that now exists.

I might also say in 1983 we included $107 million for soil conservation activities in the jobs bill for that kind of activity.

So hoping that that will help solve some of the problems. I thank the Senator for yielding.

Mr. MELCHER. I thank the Senator for this remarks and I would like to ask a question of the manager of the bill, if he would yield for a question.

Mr. STEVENS. I would be happy to yield to the Senator from Montana.

Mr. MELCHER. I wonder if we could have assurances that in the conference that will be underway shortly on the agriculture appropriations bill for 1984, fiscal 1984, that the conferees, headed by the able Senator from Alaska, will work very diligently to protect these funds. I find it somewhat disappointing, more than somewhat, very disappointing that all too often when we are looking at how to trim costs we somehow decide that the conservation money is not essential as are some of the other program costs.

Mr. STEVENS. Mr. President, I will state to my good friend from Montana I am certain the Senate will be very devoted to the Senate version of the bill. The distinguished Senator from Mississippi is the chairman of that subcommittee and would be the manager for the Senate in the conference. Perhaps he will respond. The Senator from Montana wants to be assured the Senate conferees will work assiduously for the Senate position on conservation in the coming up agriculture appropriations bill.

Mr. COCHRAN. If the Senator will yield, I can assure the Senator from Montana personally that I will see to it that we have the maximum amount of money allocated to these accounts. I know of no other assurance I can give you except that we will do the very best we possibly can. We realize these accounts are very important.

Mr. MELCHER. I thank the Senator.

Mr. STEVENS. Mr. President, I urge adoption of the conference report and move adoption of the conference report. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The legislative clerk called the roll.

The PRESIDING OFFICER. Is there further discussion on the conference report? If not, the question is on agreeing to the conference report. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Alabama (Mr. DENTON), the Senator from New Mexico (Mr. DOMENICI), the Senator from Iowa (Mr. GRASSLEY), the Senator from Oregon (Mr. HATFIELD), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Nevada (Mr. LAXALT), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Oklahoma (Mr. NICKLES), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that the Senator from Oregon (Mr. HATFIELD) would vote "yea."

I further announce that, if present and voting, the Senator from Alabama (Mr. DENTON), the Senator from Iowa (Mr. GRASSLEY), and the Senator from Oklahoma (Mr. NICKLES) would each vote "nay."

Mr. BYRD. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Oklahoma (Mr. BOREN), the Senator from Arkansas (Mr. BUMPERS), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Alabama (Mr. HEFLIN), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from New Jersey (Mr. LAUTENBERG), the Senator from Vermont (Mr. LEAHY), the Senator from New York (Mr. MOYNIHAN), and the Senator from Arkansas (Mr. PRYOR) are necessarily absent.

The PRESIDING OFFICER (Mr. MURKOWSKI). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 49, nays 25, as follows:

[Rollcall Vote No. 238 Leg.]

YEAS—49

Abdnor	Chiles	Exon
Andrews	Cochran	Ford
Armstrong	D'Amato	Goldwater
Baker	Danforth	Gorton
Bingaman	DeConcini	Hawkins
Burdick	Dixon	Hecht
Byrd	Durenberger	Inouye
Chafee	Eagleton	Jackson

Bumpers	Heflin	McClure
Cranston	Heinz	Moynihan
Denton	Huddleston	Nickles
Dodd	Johnston	Pryor
Domenici	Kennedy	Tower
Glenn	Lautenberg	

The conference report was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. STENNIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the amendments reported in disagreement, with the exception of amendments numbered 65, 93, and 165, be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments in disagreement, with the exception of Nos. 65, 93, and 165, are as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 1 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter striken by said amendment, and insert:

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE PAYMENT-IN-KIND PROGRAM

All land rented or leased, and in production for crop year 1982, if now rented or leased by the same individual, partnership, or corporation, and eligible for acreage reduction shall qualify for designation under the payment-in-kind program for crop year 1983, the same as land owned by the producer.

Until such time as additional legislation to the contrary may be enacted, it is provided: That, notwithstanding any other provision of law, in order to acquire a sufficient amount of upland cotton to carry out the payment-in-kind program for the 1983 crop of upland cotton, the Secretary of Agriculture shall solicit bids from cotton producers, for sale to the Commodity Credit Corporation of 1980, 1981, and 1982 crop cotton pledged by such producers as security for nonrecourse loans made under section 103(g)(1) of the Agricultural Act of 1949 (7 U.S.C. 1444(g)(1)). Until sufficient cotton to carry out the payment-in-kind program for the 1983 crop of upland cotton is acquired under this procedure, or until a reasonable

bid period opportunity has been determined and made available by the Secretary, but in no event less than two weeks, no bid for 1982 crop cotton shall be rejected unless it exceeds (on a percentage basis) the amount of the highest bid received and accepted under the same procedure for feed grains. The Secretary shall also give any producer who has previously submitted a bid the opportunity to nullify such bid if the producer agrees to submit another bid under the provisions of this Act.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 2 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$25,000,000*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 4 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$25,000,000*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 8 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

CHILD NUTRITION PROGRAMS

For an additional amount for the "Child nutrition programs", $118,000,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 11 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$5,000,000*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 13 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$1,000,000*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 24 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES

For an additional amount for "Salaries and expenses, General Legal Activities", $4,600,000, of which not to exceed $3,800,000 for asbestos litigation support contracts shall remain available until September 30, 1984.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 25 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$5,800,000*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 38 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert: *, and, in addition there shall be available the sum of $4,000,000*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 40 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

GENERAL PROVISIONS

Notwithstanding any other provision of law, the Administration Office of the United States Courts, or any other agency or instrumentality of the United States, is prohibited from restricting solely to staff of the Clerks of United States Bankruptcy Courts the issuance of notices to creditors and other interested parties. The Administrative Office shall permit and encourage the preparation and mailing of such notices to be performed by or at the expense of the debtors, trustees or such other interested partries as the Court may direct and approve. The Administrator of the United States Courts shall make appropriate provisions for the use of and accounting for any postage required pursuant to such directives. The provisions of this paragraph shall terminate on October 1, 1983.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 42 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

AIRCRAFT PROCUREMENT, AIR FORCE

For an additional amount for "Aircraft Procurement, Air Force", $185,000,000, to be available until September 20, 1985, for long lead procurement of engine, defensive and offensive avionics, and airframe components, in quantities which will be required if Congress approves multiyear procurement of the B-1B pursuant to section 2306(h), title 10, U.S.C.: Provided, That $185,000,000 appropriated under this head for the B-1B in Public Law 97-377 is rescinded: Provided further, That nothing in this paragraph shall be deemed to approve multiyear procurement of the B-1B.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 49 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

None of the funds appropriated by this Act may be obligated or expended to formulate or carry out any requirement that, in order to be eligible to submit a bid or an offer on a Department of Defense contract to be let for the supply of commercial or commercial-type products, a small business concern (as defined pursuant to section 3 of the Small Business Act) must (1) demonstrate that its product is accepted in the commercial market (except to the extent that may be required to evidence compliance with the Walsh-Healey Public Contracts Act), or (2) satisfy any other pre-qualification to submitting a bid or an offer for the supply of any such product.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 53 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

The project for flood protection on the Lower San Joaquin River, California, authorized by the Flood Control Act approved December 22, 1944, as amended, is hereby further modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to perform clearing and snagging on the San Joaquin River from Stockton, California, to Friant Dam, at an estimated cost of $5,000,000. Prior to initiation of construction, a non-Federal entity shall provide adequate assurance for providing all lands, easements, rights-of-way and utility relocations at no expense to the Federal Government; execute a written agreement pursuant to section 221 of Public Law 91-611; agree to operate and maintain the project works upon completion of construction in accordance with rules and regulations prescribed by the Department of the Army; and hold and save the United States free from damages due to construction, operation, and maintenance of the project, not including damages due to the fault or negligence of the United States or its contractors.

Funds for the Wister Lake project, Oklahoma, authorized pursuant to the Flood Control Act of 1938 (52 Stat. 1218) shall be used to reduce sedimentation impacts by raising the level of the conservation pool permanently by 3 feet and seasonably by an additional 3.4 feet and the Secretary of the Army, acting through the Chief of Engineers, is hereby authorized to take such measures as are necessary to carry out this directive.

Contracts for architect and engineering services, and surveying and mapping services, shall be awarded in accordance with title IX of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 541 et seq.).

The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to include in the survey report on Threemile Creek, Mobile, Alabama, the costs and benefits of local improvements initiated subsequent to January 1, 1982, by the city of Mobile for flood damage reduction measures which the Chief of Engineers determines are compatible with and constitute an integral part of his recommended plan. In determining the appropriate non-Federal share for such plan, the Chief of Engineers shall give recognition to costs incurred by non-Federal interests in carrying out such local improvements.

The Secretary of the Army, acting through the Chief of Engineers, is hereby authorized to prepare a comprehensive study and recommendations for the development and efficient utilization of the water and related resources of southcentral and southeast Oklahoma and to prepare a similar comprehensive study and recommendations for the Red River and its tributaries in Arkansas, Texas, Louisiana, and Oklahoma.

Funds herein or hereafter provided for the Beverly Shores, Indiana, project may be used to operate and maintain the emergency shore protection measures constructed pursuant to section 103 of the Energy and Water Development Appropriations Act, 1982 (95 Stat. 1137).

Not to exceed $500,000 shall be available for removal of obstructive shoals within the project limits of the Kawkawlin River, MI, project.

Section 107 of Public Law 97-88 pertaining to maintenance and operation of the Chicago Sanitary and Ship Canal of the Illinois Waterway in the interest of navigation includes the Control Structure and Lock in the Chicago River, and other facilities as are necessary to sustain through navigation from Chicago Harbor on Lake Michigan to Lockport on the Des Plaines River.

Not to exceed $500,000 shall be available for channel clearing of Bayou Rigolette as determined advisable by the Chief of Engineers in the Project Aloha-Rigolette Area, Grant and Rapides Parish, Louisiana, au-

thorized by the Flood Control Act approved August 18, 1941.

The Wallisville Reservoir, Texas, project, authorized by section 101 of the River and Harbor Act of 1962 (Public Law 87-874), is hereby modified with respect to its physical elements and planned operation as recommended in the Wallisville Lake, Texas, Post-Authorization Change Report, July 1981, as supplemented, July 1982. Notwithstanding the above modifications, provisions of the Contract for Water Storage, Salinity Control, and Recreation in Wallisville Reservoir (Contract Numbered DACW64-67-C-0108 signed by the Secretary of the Army, 2 February 1968) between the United States Government and the city of Houston, the Trinity River Authority of Texas, and the Chambers Liberty Counties Navigation District, shall govern non-Federal participation: Provided, That total project cost as cited in said contract shall be understood to consist of (1) costs, exclusive of land costs, actually incurred by the United States in connection with construction of elements currently in place and to be used in the modified plan, including interest during construction; (2) the actual cost of lands used in the modified plan; and (3) completion costs of the modified plan, including interest during construction.

The Secretary of the Army is authorized, notwithstanding any other provision of law, to widen, as necessary for safe passage, the navigation opening of Franklin Ferry Bridge, Jefferson County, Alabama. The work herein authorized shall be accomplished at Federal expense; however, no construction to widen the navigation opening shall begin nor contract for alteration of the bridge may be awarded until the owner shall agree that upon completion of the alteration to thereafter operate and maintain the Franklin Ferry Bridge as altered. There is hereby authorized to be appropriated not to exceed $4,000,000, which includes $1,000,000 previously appropriated, to carry out this section. Amounts authorized by this subsection shall be available until expended.

The Ventura Marina project authorized by section 101 of the River and Harbor Act of 1968 (Public Law 90-483), as modified, is hereby amended to authorize the Secretary of the Army, acting through the Chief of Engineers to reimburse the Ventura Port District available Operation and Maintenance, General funds for work performed by the Port just priority to February 25, 1983, in the area normally maintained by the Corps of Engineers. None of the funds appropriated in this or any future Act for the Ventura Mariana, California, project may be used to reimburse local interests for any work performed unless such work has the prior approval of the United States Army Corps of Engineers and the Appropiations Committees.

Section 164 of the Water Resources Development Act of 1976 (Public Law 94-587) as amended by Section 3 of Public Law 97-140, is further amended—

(1) by inserting the following after the first sentence: "The Secretary of the Army, acting through the Chief of Engineers, shall construct an approach roadway from the end of the Washington State Route 129 overpass of such bridge to Sixteenth Avenue in the city of Clarkston, Asotin County, Washington,"; and

(2) in the last sentence, by striking out "$23,200,000" and inserting in lieu thereof "$24,000,000".

The authorization for the Sardis Lake project contained in section 203 of the Flood Control Act of 1962 (Public Law 87-874) as amended by section 108 of the Energy and Water Development Appropriation Act of 1982 (Public Law 97-88) is hereby amended to authorize the Secretary of the Army, acting through the Chief of Engineers, to plan, design, and construct a water intake structure at an estimated Federal cost of $500,000.

The project for navigation at Moriches and Shinnecock Inlets, New York, authorized in section 101 of the River and Harbor Act of 1960 (Public Law 86-645), and the items of local cooperation pertaining thereto, are hereby modified to the extent necessary to require the Secretary of the Army, acting through the Chief of Engineers, to provide for the construction of the Navigation feature independent of other features.

Notwithstanding subsection 5901(a) of title 5, United States Code (80 Stat. 508), as amended, the uniform allowance for uniformed civilian employees of the United States Army Corps of Engineers may be up to $400 annually.

The United States Army Chief of Engineers may accept the services of volunteers and provide for their incidental expenses to carry out any activity of the Army Corps of Engineers except policy making or law or regulatory enforcement. Such volunteers shall not be employees of the United States Government except for the purposes of (1) chapter 171 of title 28 of the United States Code, relating to tort claims, and (2) chapter 81 of title 5 of the United States Code, relating to compensation for work injuries.

Hereafter, notwithstanding any other provisions of law or of this Act, appropriations for the Yatesville Lake construction project made available by Public Law 97-257, chapter V and Public Law 97-377, title I, section 140 (96 Stat. 1916) shall be obligated to construct the Yatesville Lake project.

Section 104(b) of the River and Harbor Act of 1958, Public Law 85-500, as amended by section 302 of the River and Harbor Act of 1965, Public Law 89-298, is further amended by striking out "$5,000,000" and inserting in lieu thereof "$10,000,000".

The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to prepare and submit to Congress a feasibility report on the water resource needs in the vicinity of the Homochitto and Buffalo Rivers, Saint Catherine and Coles Creeks, Bayou Pierre, and other major tributaries draining into the Mississippi River between Bayou Pierre and the Buffalo River, Mississippi, to recommend remedial measures for flood control, bank stabilization, sedimentation, and related purposes.

The Columbia River at the mouth, Oregon and Washington, project authorized by the River and Harbor Act of July 5, 1884, as amended, is modified to provide for deepening of the northernmost 2,000 feet of the channel cross section to 55 feet at Federal expense: Provided, That $5,300,000 of "Construction, general" funds shall be made available to undertake this project modification.

Section 1114 of title 18, United States Code, is amended by inserting "any civilian official or employee of the Army Corps of Engineers assigned to perform investigations, inspections, law or regulatory enforcement functions, or field-level real estate functions," immediately after "National Park Service,".

The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to design and construct and undertake measures necessary to provide a level of protection as the Chief of Engineers determines necessary to prevent recurring flood damages along the Pearl River in the vicinity of Jackson, Mississippi, substantially in accordance with preliminary plans developed by the Mobile District Engineer, at a currently estimated cost of $26,500,000, including $2,300,000 made available in this appropriation for advanced engineering and design. Expenditures by the Pearl River Basin Development District in constructing improvements at the Mississippi Highway 25 Bridge, an integral part of the plan authorized herein, shall be credited toward the local share of the project costs. Prior to implementation of the work authorized herein, non-Federal interests must agree to provide the requirements prescribed in section 3 of the Flood Control Act of 1936, as amended.

The Secretary of Army acting through the Chief of Engineers is directed to start construction of the Crater Lake phase of the Snettisham hydroelectric project authorized by the 1962 Flood Control Act with funds appropriated in fiscal years 1982 and 1983.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 58 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

The Secretary of the Interior is hereby authorized to engage in a feasibility study for the Prairie Bend unit, Pick-Sloan Missouri River Basin program, located in Dawson, Buffalo, and Hall Counties in Nebraska for irrigation, stabilization of ground-water levels, enhancement of water quality, small community and rural domestic water supplies, management of fish and wildlife habitat, public outdoor recreation, flood control, and other purposes determined to be appropriate. Such feasibility study shall include a detailed report on any effects the proposed project may have on wildlife habitat, including habitat of the sandhill crane and the endangered whooping crane. Such feasibility study shall also develop alternative water management plans that are consistent with the Endangered Species Act and the Migratory Bird Treaty Act. Before funds are expended for the feasibility study, the State of Nebraska, or other non-Federal entity, shall agree to participate in the study and to share in the cost of the study. The non-Federal share of the costs may be partly or wholly in the form of services directly related to the conduct of the study.

In accordance with the repayment contract for the Dallas Creek participating project of the Upper Colorado River storage project, entered into January 14, 1977, and entitled "Repayment Contract Between the United States of America and the Tri-County Water Conservancy District", the portion of the costs of such project, including interest on construction costs, allocated to municipal and industrial use which exceeds $38,000,000 shall not be reimbursable.

To provide adequate access to the McGee Creek recreation areas, Wildlife Management Area, and Natural Scenic Recreation Area for use and enjoyment by the general public of those facilities, the Secretary of the Interior is authorized to secure right-of-way, design and construct or otherwise improve two existing county access roads (1) west-side road beginning at the existing county road extending from Oklahoma State Highway 3 near the community of Lane, Oklahoma, and extending adjacent to the McGee Creek Reservoir and terminating at the existing county road extending from Oklaho-

ma State Highway 43 in the vicinity of Stringtown, Oklahoma, a distance of some 19 miles; (2) eastside road beginning at State Highways 3 and 7 near Center Point, Oklahoma, and extending northward to the upper end of McGee Creek Reservoir, a distance of some 11 miles. The westside road will be constructed with a 24-foot berm and 20-foot paved surface and the eastside constructed with a 28-foot berm and 24-foot paved surface. Both roads will have a minimum 6-inch gravel base and be paved with all weather asphaltic surface. The cost for the facilities authorized by this Act shall be nonreimbursable.

The Secretary of the Interior is authorized, when he deems it appropriate, to defer over the remaining term of any repayment contract or for a period of five years, whichever is less, the 1983 water service and repayment contract obligations for capital and operation and maintenance costs associated with federally constructed or federally assisted projects to reflect the percentage of acreage removed from cultivation pursuant to the "Special program for Corn, Grain, Sorghum, Upland Cotton, and Rice" under title 7 of the Code of Federal Regulations part 770, and any regulations supplementary thereto or amendatory thereof. Such deferment of payments shall not be deemed a "supplemental or additional benefit" within the meaning of section 203(a)(2) of the Reclamation Reform Act of 1982.

The Secretary of the Interior is hereby authorized to engage in feasibility studies of the following proposals:

(1) Pilot Butte powerplant, Riverton unit, located in Fremont County, Wyoming;

(2) Siletz River Basin project, located in Lincoln and Polk Counties, Oregon;

(3) Water conservation and efficient use program, All-American Canal relocation project, located in Imperial County, California; and

(4) Gibson Dam powerplant, located on the Sun River in Lewis and Clark Counties, Montana.

The Secretary of the Interior shall, under the general investigations authority, engage in a joint, State-led study with the State of Nebraska, which will consult with its appropriate subdivisions, of cost-effective alternatives to the Norden Dam, O'Neill unit of the Pick-Sloan Missouri River Basin program, Nebraska; and shall use available funds to initiate such study. The study period shall not exceed 18 months, starting with enactment of this Act. No funds shall be expended for any construction activity for the Norden Dam, O'Neill unit prior to the completion of this study.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 66 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: *$20,500,000, of which $4,500,000 is available only for payment to the International Atomic Energy Agency and $16,000,000 is available only for payment to the International Fund for Agricultural Development*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 69 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert:

OVERSEAS PRIVATE INVESTMENT CORPORATION

The Overseas Private Investment Corporation is authorized to make such expenditures within the limits of funds available to it and in accordance with law (including not to exceed $30,000 for official reception and representation expenses), and to make such contracts and commitments without regard to fiscal year limitations, as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 9104), as may be necessary in carrying out the program set forth in the budget for fiscal year 1983.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 70 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

DEPARTMENT OF STATE

MIGRATION AND REFUGEE ASSISTANCE

For an additional amount for "International disaster assistance", $15,000,000, to remain available until September 30, 1984, which shall be derived by transfer from "Migration and Refugee Assistance": Provided, That this sum shall be available only for resettlement services and facilities for refugees and displaced persons in Africa.

For an additional amount for the "Economic Support Fund", $5,000,000, to remain available until September 30, 1984, which shall be derived by transfer from "Migration and Refugee Assistance": Provided, That this sum shall be available only for assistance to combat piracy in the Gulf of Thailand.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 74 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

Notwithstanding section 10 of Public Law 91-672 funds in this chapter may not be obligated until the enactment of authorizing legislation or until September 30, 1983, whichever comes first.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 75 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: *: Provided, That in addition to the above, the budget program set forth in the first proviso under the heading Annual Contributions for Assisted Housing (Disapproval of Deferral) in Public Law 98-8 (97 Stat. 13, 16, 17) is hereby amended to provide for assistance under section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), for additional section 8 housing of up to six thousand units under loan management, up to seven thousand units under property disposition, and up to nine hundred new or substantial rehabilitation units to be made available to satisfy an existing consent decree, settlement agreement, and set-aside pursuant to court order, respectively, in litigation in which the Department of Housing and Urban Development is a party; for up to one hundred additional public housing units for conversions from assistance under section 23 of such Act as it existed immediately before enactment of Public Law 93-383 (88 Stat. 633); and for amendments, $24,500,000 of contract authority and $245,000,000 of budget authority for existing units: Provided further, That such budget program is hereby amended further to reduce the budget authority to be made available for interest rate adjustments by $340,000,000, section 23 conversions by $63,450,000, public housing amendments by $62,000,000, and amendments for section 8 new construction/substantial rehabilitation by $198,000,000, and the budget authority made available by the foregoing reductions shall be used for the purposes and up to the amounts set forth in the immediately preceding proviso: Provided further, That notwithstanding the limitation on the use of recaptured budget authority in the third proviso under this heading in Public Law 97-377 (96 Stat. 1830, 1907), any budget authority authorized by such section 5 which is recaptured in fiscal year 1983 and exceeds $2,400,000,000 shall also, with the amounts of budget authority which become available as a result of the reductions set forth in the preceding proviso, be made available to satisfy the budget authority requirements of the amendments to such budget program set forth in the first proviso hereof, and such recaptured amounts exceeding the amount of the budget authority necessary to satisfy the requirements of such first proviso shall then be used in accordance with the third proviso under this heading in Public Law 97-377 (96 Stat. 1830, 1907).*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 83 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by said amendment, insert: *$9,000,000, of which $2,000,000 shall be transferred to "Research and development" to remain available until September 30, 1984 and shall only be used for establishing a center for hazardous waste management*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 84 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

CONSUMER INFORMATION CENTER FUND

Notwithstanding any other provision of law, there is hereby established in the Treasury of the United States a Consumer Information Center Fund, General Service Administration, for the purpose of disseminating Federal Government consumer information to the public and for other related purposes. There shall be deposited into the fund for fiscal year 1983 and subsequent fiscal years: (A) Appropriations from the general funds of the Treasury for Consumer Information Center activities; (B) User fees from the public; (C) Reimbursements from other Federal agencies for costs of distributing publications; and (D) Any other income incident to Consumer Information Center activities. Moneys deposited into the fund shall be available for expenditure for Consumer Information Center activities in such amounts as are specified in appropriation Acts. Any unobligated balances at the end of the fiscal year shall remain in the fund and shall be available for authorization in appropriation Acts for subsequent fiscal years. This fund shall assume all the liabilities, obligations, and commitments of the said Consumer Information Center account. The revenues and collections deposited into the fund shall be available for necessary expenses of Consumer Information Center activities in the amount of $5,415,000 during fiscal year 1983. Administrative expenses of the Consumer Information Center in fiscal year 1983 shall not exceed $1,382,000. For the purposes of the fund, administrative expenses shall be defined as those expenses pre-

viously paid from appropriations to the Consumer Information Center. Revenues and collections accruing to this fund during fiscal year 1983 in excess of $6,797,000 shall remain in the fund and shall not be available for expenditure except as authorized in appropriation Acts. The Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984 (Public Law 98-45), is hereby amended by deleting "other than administrative expenses" from the first proviso under the heading "General Service Administration, Consumer Information Center".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 85 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

GENERAL PROVISION

SEC. 1. (a) Subject to valid existing rights, administration of the following described lands is hereby transferred to the Veterans Administration for use as an addition to the Sitka National Cemetery: That tract of unimproved land lying easterly of existing structures which is a portion of the lands described in Public Land Order numbered 1707 of August 6, 1958, provided that the actual description of the lands to be administered by the Veterans Administration shall be determined by a survey made and approved by the Secretary of the Interior, after consultation with the Secretary of Agriculture. The actual description shall be published in the Federal Register by the Secretary of the Interior as a Public Land Order.

(b) The lands described in subsection (a) of this section are a portion of the lands reserved by Executive Order numbered 8854 of August 16, 1941, for use of the United States Coast and Geodetic Survey as a magnetic and seismological observatory site. Subsequently, a portion of the lands described in Executive Order numbered 8854 was transferred by Public Land Order numbered 1707 of August 6, 1958, to the jurisdiction of the Forest Service, Department of Agriculture for use as an administrative site in connection with the administration of the Tongass National Forest. Lands described in subsection (a) of this section are hereby deleted from Executive Order numbered 8854 and Public Land Order numbered 1707.

SEC. 2. (a) Subject to valid existing rights and subsection (c) of this section and provided that the National Park Service shall be permitted to continue to use the residence and other improvements on the lands described in this section for a period of not less than three years from the date of enactment of this Act in accordance with terms mutually agreed to by the Secretary of the Interior and the Administrator of the Veterans Administration, and provided further that the National Park Service shall pay no more for the use of the residence and other improvements than the money actually expended to maintain the same by the Veterans Administration, administration of the following described public lands is hereby transferred to the Veterans Administration for use as an addition to the Sitka National Cemetery: The lands described as tract numbered 2 of Presidential Proclamation 2965 of February 25, 1952, provided that the actual description of the lands to be administered by the Veterans Administration shall be determined by a survey made and approved by the Secretary of the Interior. The actual description shall be published in the Federal Register as a Public Land Order.

(b) The lands described in subsection (a) of this section were reserved by Presidential Proclamation 2965 on February 25, 1952, as an administrative site for the Sitka National Monument. Lands described in subsection (a) of this section are hereby deleted from Presidential Proclamation 2965.

(c) In the event that the Administrator of the Veterans Administration determines that all or any part of the lands described in subsection (a) of this section are no longer needed for National Cemetery purposes, those lands no longer needed shall be returned to the jurisdiction of the Secretary of the Interior.

SEC. 3. These provisions may be cited as the "Sitka National Cemetery Transfer Act of 1983".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 89 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

(4) a new section 6907 is added as follows:

(a) Notwithstanding any other provision of this chapter, A State may enact legislation which requires that any payments which would be made to units of general local government pursuant to this chapter be reallocated and redistributed in whole or part to other smaller units of general purpose government which (1) are located within the boundaries of the larger unit of general local government, (2) provide general governmental services and (3) contain entitlement lands within their boundaries.

Such reallocation or redistribution shall generally reflect the level of services provided by, and the number of entitlement acres within, the smaller unit of general local government.

(b) Upon enactment of legislation by a State, described in subsection (a), the Secretary shall make one payment to such State equaling the aggregate amount of payments which he otherwise would have made to units of general local government within such State pursuant to this chapter. It shall be the responsibility of such State to make any further distribution of the payment pursuant to subsection (a).

Such redistribution shall be made within 30 days after receipt of such payment. No payment, or portion thereof, made by the Secretary shall be used by any State for the administration of this subsection or subsection (a).

(c) Appropriations made for payments in lieu of taxes for a fiscal year may be used to correct underpayments in the previous fiscal year to achieve equity among all qualified recipients.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 94 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by said amendment, insert: $68,200,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 102 to the aforesaid bill, and concur therein with an amendment as follows:

In licu of the sum inserted by said amendment, insert: $53,150,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 103 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: : Provided, That $22,000,000 of such amount shall be available until expended for transfer to the State of Alaska on the condition that the State use the funds for the benefit of Alaska Native secondary students by either renovating the former Bureau of Indian Affairs Mount Edgecumbe Boarding School or constructing another non-Federal boarding school facility and the Bureau of Indian Affairs shall not expend any other funds for the operation of any secondary education program or facility in the State after June 30, 1983: Provided further, That while consultation concerning day school transfers to the State of Alaska will continue with affected villages, local concurrence is not required in this continuing effort to establish a single system of education envisioned by the State's constitution: Provided further, That after June 30, 1984, the Bureau of Indian Affairs shall fund no more than ten day schools in Alaska: Provided further, That the Bureau of Indian Affairs shall not fund any schools in Alaska after June 30, 1985: Provided further, That $9,350,000 of such amount shall be available until expended for transfer to the State of Alaska to assist in the rehabilitation or reconstruction of Bureau-owned schools which are transferred to the State: Provided further, That the $9,350,000 appropriated in Public Law 97-394 available to the State of Alaska to assist in the rehabilitation of Bureau-owned schools which are transferred to the State may also be used for reconstruction: Provided further, That when any Alaska day school operated by contract is transferred, the State shall assume any existing contract pertaining to the operation or maintenance of such school for a minimum of two years or until the expiration of the negotiated contract, whichever comes first: Provided further, That nothing in the foregoing shall preclude assistance otherwise available under the Act of April 16, 1934 (48 Stat. 596) as amended (25 U.S.C. 452 et seq.), or any other Act to such schools on the same basis as other public schools: Provided further, That the Secretary of the Interior shall prepare within one year after the date of this Act, an official survey by supplemental plat and convey to the State of Alaska all right, title, and interest of the United States, including all improvements situated thereon, in the following described lands:

That portion of Japonski Island (U.S. Survey No. 1496, within protracted sections 34 and 35, T. 55 S., R. 63 E., sections 2 and 3, T. 56 S., R. 63 E., Copper River Meridian, State of Alaska), withdrawn from the public domain of the United States by Public Law 79-478 and Public Law 83-568 for use of the Bureau of Indian Affairs and the Indian Health Service, except the smallest practicable tract, as determined by the Secretary of Interior, enclosing land actually used in connection with the administration of the Indian Health Service hospital on the date of this Act (this IHS-used land comprising no more than 15.25 acres, excluding roads). The southwesterly boundary of these lands is common with lands withdrawn for use of the United States Coast Guard by public land order and with lands held by the State of Alaska, Division of Aviation.

Such conveyance is conditioned upon the execution by the State of Alaska of an agreement to begin operating a Mt. Edgecumbe school facility no later than September 1, 1984. The above-described lands reserved for the use of the Indian Health Service shall also be conveyed to the State of Alaska if at any time the Indian Health Service or any

successor organization or agency ceases to operate a health care facility on said lands.

Enactment of this statute has the full force and effect of an interim conveyance, as defined in the Alaska National Interest Lands Conservation Act, to the State of Alaska, subject to the above condition. The force and effect of such an interim conveyance is to convey to and vest in the State of Alaska exactly the same right, title, and interest in and to the lands as the State would have received had it been issued a patent by the United States. Upon survey of lands covered by the interim conveyance a patent thereto shall be issued to the State of Alaska. The lands conveyed by this statute are not subject to acreage adjustment under section 6 of the Alaska Statehood Act.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 105 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

For payment to the authorized governing body of the Papago Tribe of Indians, $15,000,000 to remain available until expended, for deposit in the Papago Trust Fund established by said governing body pursuant to Public Law 97-293 (96 Stat. 1283) which fund shall be held in trust for the benefit of such tribe pursuant to section 309 of that law.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 115 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

ADMINISTRATIVE PROVISIONS, DEPARTMENT OF ENERGY

Notwithstanding section 303(3) of Public Law 97-257, funds provided for Economic Regulatory Administration by this or any other Act shall be used: (1) to maintain not less than three hundred and eighty full-time permanent Federal employees, of which not less than forty employees shall be assigned to the Office of Fuels Conversion, for the fiscal year ending September 30, 1983; and (2) to maintain not less than three hundred and five full-time equivalent Federal employees, of which not less than twenty-seven employees shall be assigned to the Office of Fuels Conversion, for the fiscal year ending September 30, 1984: Provided further, That notwithstanding any other provision of law, the minimum employment level established in Public Law 97-257 for the Office of the Assistant Secretary for Fossil Energy is reduced to 715 with no further amendment to the suballocations therein.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 117 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert:

DEPARTMENT OF EDUCATION

INDIAN EDUCATION

For part C of the Indian Education Act and the General Education Provisions Act, an additional amount of $1,938,000, to remain available until expended.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 119 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert:

The Secretary shall appoint a Commission to review the Department's coal leasing procedures to ensure receipt of fair market value within 30 days after enactment of this Act, and said Commission shall make its recommendations within 6 months after enactment of this Act.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 121 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert:

No funds provided in this or any other Act to agencies funded by the Interior and Related Agencies Appropriation Act, 1983 (Public Law 97-394) may be expended to take actions related to termination of programs or closure of facilities proposed to be terminated or closed in the budget for fiscal year 1984 until enactment of the Interior and Related Agencies Appropriation Act, 1984 or through approved reprogramming procedures.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 125 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

The Congress finds that the Forest Service's proposal of March 15, 1983, to consider six million acres of the national forest for possible sale has met with considerable opposition; and the national forests are an important part of the national heritage of the United States; and the national forests provide and protect important resources; and the national forests provide unique opportunities for recreation; and it is inconsistent with past management practices to dispose of large portions of our national forests. It is, therefore, the sense of the Congress that it is not in the national interest to grant the authority to sell significant acreage of the national forest until such time as the Forest Service specifically identifies the tracts which are no longer needed by the Federal Government; inventories the tracts as to their public benefit values; provides opportunities for public review and discussion of the tracts; and completes all necessary environmental assessments of such sales.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 128 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: *to remain available until September 30, 1984*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 129 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: *to remain available until September 30, 1984*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 130 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: *to remain available until September 30, 1984*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 131 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: *to remain available until September 30, 1984*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 132 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: *to remain available until September 30, 1984*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 137 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

From the Rural Development Loan Fund under the Community Economic Development Act of 1981, $10,000,000 in available appropriations shall be obligated in the form of loans only by December 31, 1983.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 138 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

From the Community Development Credit Union Revolving Loan Fund, the entire remaining balance of the Fund as of September 30, 1983, shall be obligated on or before December 31, 1983. No such obligations shall be made in the form of loan guarantees.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 144 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

For an additional amount to the National Institute of Handicapped Research for the establishment and support of two research and training centers, $1,500,000, to remain available until expended, one-half of which shall be available for the establishment and support of a research and training center in pediatric rehabilitation pursuant to section 204(b)(1) of the Rehabilitation Act of 1973, and one-half of which shall be available for a research and training center on the rehabilitation needs of the Pacific Basin.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 145 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

ELEMENTARY AND SECONDARY EDUCATION

For an additional amount for subpart 1 of part A of title I of the Elementary and Secondary Education Act of 1965, such as may be necessary but not to exceed $40,000,000, to remain available until September 30, 1984, for the payment of grants to local educational agencies located in a State in which the aggregate amount of grants determined for such agencies from amounts appropriated for fiscal year 1983 prior to the date of enactment of this Act is less than 95 percent of the amount of the grants for that State from amounts appropriated for fiscal year 1982 by reason of the application of the 1980 Census data in order to increase the amount for local educational agencies in each such State to the amount determined for that State for fiscal year 1982: Provided,

That the amount of the increase in any grant which a local educational agency in any State shall be eligible to receive by reason of the application of this paragraph shall be determined on a pro rata basis.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 146 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

STUDENT FINANCIAL ASSISTANCE

Notwithstanding section 413D(b)(1)(B)(ii) of the higher Education Act of 1965 and section 10 of the Student Financial Assistance Technical Amendments Act of 1982, funds appropriated under this heading and any funds appropriated for fiscal year 1983 for subpart 2 of part A of title IV of the Higher Education Act of 1965 that are not obligated or committed for the fiscal year 1983 shall be allocated in a manner designed to ensure that all eligible institutions receive a minimum funding level based upon a uniform State percentage for such fiscal year.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 148 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

FACILITIES DEVELOPMENT

HEALTH RESOURCES AND SERVICES ADMINISTRATION

HEALTH RESOURCES AND SERVICES

For an additional amount for "Health resources and services" for the remodeling and expansion of an existing academic health center library under section 720(a)(1) of the Public Health Service Act, $14,500,000, to remain available until expended; and notwithstanding any other provision of this or any other Act, such amount shall be made available without regard to the provisions of sections 702(b) and 722(a)(1) of the Public Health Service Act.

NATIONAL INSTITUTES OF HEALTH

NATIONAL LIBRARY OF MEDICINE

For an additional amount to carry out section 301 and parts I and J of title III of the Public Health Service Act with respect to conducting research, development, and demonstration projects at an existing academic health center, $5,900,000 to remain available until expended.

GRANTS FOR CONSTRUCTION OF ACADEMIC FACILITIES

For part B of title VII of the Higher Education act of 1965, $22,500,000, to remain available until expended.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 152 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$49,000,000*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 164 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

ACCESS HIGHWAYS TO PUBLIC RECREATION AREAS ON CERTAIN LAKES

Appropriations under this heading for fiscal year 1981 shall remain available until September 30, 1984.

HIGHWAYS CROSSING FEDERAL PROJECTS

The period of availability of approximately $400,000 appropriated in Public Laws 94-387, 95-29, 95-85, 95-335, and 96-131 is hereby extended through September 30, 1984.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 168 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert:

LIMITATION ON GENERAL OPERATING EXPENSES

The limitation on general operating expenses of the Federal Highway Administration is increased by $1,750,000 for necessary expenses to carry out the provisions of section 152 of the Surface Transportation Assistance Act of 1982 for a methane conversion study, to remain available until expended.

ACOSTA BRIDGE

Notwithstanding subsection (b) of section 142 of Public Law 97-377, the funds made available by such subsection for the Dodge Island Briage project in Miami, Florida, shall be available for the Acosta Bridge project in Jacksonville, Florida, in accordance with the provisions of section 144 of title 23, United States Code, to remain available until expended: Provided, That, notwithstanding any other provisions of law, obligations incurred under this section shall not be subject to any limitations on obligations for Federal-aid highways.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 172 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

OFFICE OF THE SECRETARY

Of the sums appropriated for Office of the Secretary, Salaries and Expenses, not to exceed $18,500 may be used for official reception and representation functions.

Of the sums appropriated for International Affairs, not to exceed $66,500 may be used for official reception and representation functions.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 176 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$1,000*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 181 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

CHAPTER XII

LOTTERY AND CHARITABLE GAMES ENTERPRISE FUND

For an additional amount for "Lottery and charitable games enterprise fund", $1,000,000.

GENERAL PROVISION

Title 11, section 11-1732(d) of the District of Columbia Code, is amended by striking out "1983" and inserting in lieu thereof "1984".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 205 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$1,388,000 Resolved,* That the House recede from its disagreement to the amendment of the Senate numbered 231 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$180,168,000: Provided,* That of the funds appropriated under this heading in the Department of Housing and Urban Development-Independent Agency Appropriations Act, 1983 (Public Law 97-272), $4,200,000 shall be available only for three integrated hospital system projects and such funds shall remain available until September 30, 1984

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 247 to the aforesaid bill,

and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

SEC. 403. Amounts certified pursuant to section 1311 of the Supplemental Appropriations Act, 1955, as having been obligated against appropriations heretofore made under the authority of the Foreign Assistance Act of 1961, as amended, for the same general purpose as any of the subparagraphs under "Agency for International Development" in prior appropriations Acts, are, if deobligated, hereby continued available for the same period as he respective appropriations in such subparagraphs for the same general purpose and for the same country as originally obligated or for relief, rehabilitation, and reconstruction activities in the Andean region: Provided, That the Appropriations Committees of both Houses of the Congress ar notified fifteen days in advance of the deobligation or reobligation of such funds.

Resolved, That the House receded from its disagreement to the amendment of the Senate numbered 251 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: *406*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 253 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: *407*

Mr. STEVENS. Mr. President, I move that the Senate concur in the amendments of the House to the amendments of the Senate considered en bloc.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. STEVENS. Mr. President, I have a similar motion to make as to the amendments that we must recede from. It is my understanding that there is a desire for a vote on this first motion. There would be no request for a vote on the second motion, on the motion to recede. If there is any Senator who wishes to request a vote on that, this is the time for him to speak up.

Mr. BYRD. Mr. President, what are the amendments in disagreement that we are talking about? I do not recognize them by number.

Mr. STEVENS. It is IMF, Cumberland Gap, and a bridge in Nevada.

Mr. President, I ask the yeas and nays on my motion.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there further debate?

Mr. TSONGAS. Will the Senator yield?

Mr. STEVENS. I yield.

Mr. TSONGAS. Can we assume there will be no vote after this one?

The PRESIDING OFFICER. The Senate will come to order.

Mr. STEVENS. I say to the majority leader that it is my intention not to ask for a rollcall vote on the succeeding motion. This will be the last vote, if the majority leader concurs.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, of course, we cannot keep anyone from requesting a rollcall. I do not plan one. I urge that we get on with this vote and then maybe we will find out.

Mr. BYRD. Mr. President, that is fine with me, but what are the three?

Mr. STEVENS. IMF, Cumberland Gap, and a Nevada bridge, but we will cover them in one move to consider those en bloc on a voice vote.

Mr. BYRD. I think it is well for us to know. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the motion. The yeas and nays have been ordered. The clerk will call the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Alabama (Mr. DENTON), the Senator from New Mexico (Mr. DOMENICI), the Senator from Iowa (Mr. GRASSLEY), the Senator from Oregon (Mr. HATFIELD), the Senator from Florida (Mrs. HAWKINS), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Nevada (Mr. LAXALT), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Oklahoma (Mr. NICKLES), the Senator from Texas (Mr. TOWER), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "Yea."

Mr. BYRD. I announce that the Senator from Texas (Mr. BENTSEN), the Senator from Oklahoma (Mr. BOREN), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Alabama (Mr. HEFLIN), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from New Jersey (Mr. LAUTENBERG), the Senator from Vermont (Mr. LEAHY), the Senator from New York (Mr. MOYNIHAN), the Senator from Rhode Island (Mr. PELL), and the Senator from Arkansas (Mr. PRYOR) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 49, nays 22, as follows:

[Rollcall Vote No. 239 Leg.]

YEAS—49

Abdnor	Baker	Bumpers
Andrews	Bingaman	Burdick
Armstrong	Bradley	Chiles
Cochran	Inouye	Riegle
D'Amato	Jackson	Rudman
Danforth	Kassebaum	Simpson
Dixon	Kasten	Stafford
Dole	Long	Stennis
Durenberger	Matsunaga	Stevens
Eagleton	Mattingly	Symms
Exon	Metzenbaum	Thurmond
Ford	Murkowski	Trible
Goldwater	Packwood	Tsongas
Gorton	Percy	Weicker
Hecht	Pressler	Wilson
Hollings	Quayle	
Humphrey	Randolph	

NAYS—22

Baucus	Helms	Roth
Biden	Jepsen	Sarbanes
Byrd	Levin	Sasser
Cohen	Lugar	Specter
DeConcini	Melcher	Warner
East	Mitchell	Zorinsky
Garn	Nunn	
Hatch	Proxmire	

NOT VOTING—29

Bentsen	Hart	Leahy
Boren	Hatfield	Mathias
Boschwitz	Hawkins	McClure
Chafee	Heflin	Moynihan
Cranston	Heinz	Nickles
Denton	Huddleston	Pell
Dodd	Johnston	Pryor
Domenici	Kennedy	Tower
Glenn	Lautenberg	Wallop
Grassley	Laxalt	

So the motion to concur in the amendments of the House to the amendments of the Senate was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion to concur was agreed to.

Mr. STENNIS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that it be in order to move en bloc that the Senate recede from the remaining three amendments in disagreement.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I move that the Senate recede from its amendments numbered 65, 93, and 165, amendment numbered 65 is the IMF, 93 is the Cumberland Gap, and 165 is the Nevada bridge amendment.

Mr. FORD. Mr. President, will the distinguished Senator yield for a question?

Mr. STEVENS. I would be happy to yield.

Mr. FORD. I ask the distinguished Senator, under one of these amendments that will be included in the en bloc motion, is money provided for the Cumberland Gap Tunnel? Is that correct?

Mr. STEVENS. The Senator is correct. That is amendment No. 93.

Mr. FORD. We, in Kentucky, are very interested in that particular item, and it is my understanding there are other vehicles on which this money might, or the amendment will, be applied, and I understand we will be in the posture where we will not lose the opportunity of securing this money at a later date.

Mr. STEVENS. That was the intention of the chairman of the committee.

I yield to the Senator from Tennessee.

Mr. BAKER. Mr. President, I thank the Senator from Kentucky for bringing the subject up and making sure the record reflects the situation as it exists.

The Tennessee delegation has worked with the Kentucky delegation for a long, long time regarding the measure on the Cumberland Gap, the Cumberland National Park. It was a matter of great disappointment to me, and I know Senator HUDDLESTON worked very hard on it, and I am sure Senator FORD and Senator SASSER were disappointed that it was not included in the final version. But rather than create any further problem with it, I am convinced that we can and we will include it in the Interior appropriations bill, and I will work very hard with Senator FORD, Senator SASSER, and Senator HUDDLESTON to see that it is contained in that bill.

Mr. FORD. I thank the distinguished majority leader for his remarks. Therefore, I have no objection to the motion en bloc.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the motion of the Senator from Alaska.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. STENNIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HECHT. Mr. President, I wish the RECORD to show that had a rollcall vote occurred I would have voted in the negative. The reason is the deletion of the $6.3 million for the Nevada bridge project.

Mr. BAKER. Mr. President, I wish to express my appreciation to the managers on both sides, the Senator from Alaska and the Senator from Mississippi, and to the Senator from Oregon, the chairman of the Appropriations Committee, and all of the conferees for their good work on this matter.

There were many disappointments imbedded in this conference report. There were many pieces of unfinished business, but this matter had to be disposed of and was disposed of in good style, and I wish to express the appreciation to the managers.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business to go on longer than 8 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE HOUSE

ENROLLED BILL AND JOINT RESOLUTIONS SIGNED

At 11:05 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the Speaker of the House has signed the following enrolled bill and joint resolutions:

S. 143. An act to authorize the Twenty-nine Palms Band of Luiseno Mission Indians to lease for ninety-nine years certain lands held in trust for such band;

S.J. Res. 56. Joint resolution to designate the month of August 1983 as "National Child Support Enforcement Month"; and

H.J. Res. 139. Joint resolution to designate the week beginning June 24, 1984, as "Federal Credit Union Week".

The enrolled bill and joint resolutions were subsequently signed by the President pro tempore (Mr. THURMOND).

At 12:52 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following measures, in which it requests the concurrence of the Senate:

H.J. Res. 266. Joint resolution designating the week beginning September 4, 1983, as "Youth of America Week";

H.J. Res. 321. Joint resolution to proclaim a day of national celebration of the two hundredth anniversary of the signing of the Treaty of Paris.

At 5:57 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3069) making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 5, 14, 16, 19, 20, 21, 22, 23, 26, 27, 28, 29, 30, 31, 35, 41, 43, 48, 50, 51, 56, 57, 67, 76, 78, 79, 80, 88, 126, 133, 139, 143, 149, 151, 153, 158, 159, 162, 169, 171, 180, 182, 183, 218, 230, 239, 248, and 249, and agrees thereto; it recedes from its disagreement to the amendments of the Senate numbered 1, 2, 4, 8, 11, 13, 24, 25, 38, 40, 42, 49, 53, 58, 66, 69, 70, 74, 75, 83, 84, 85, 89, 94, 102, 103, 105, 115, 117, 119, 121, 125, 128, 129, 130, 131, 132, 137, 138, 144, 145, 146, 148, 152, 164, 168, 172, 176, 181, 205, 231, 247, 251, and 253, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate; and it insists upon its disagreement to the amendments of the Senate numbered 65, 93, and 165 to the bill.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 153. Concurrent resolution providing for a conditional adjournment of the House from August 4 or 5 until September 12, 1983, and a conditional adjournment of the Senate from August 3, 4, or 5 until September 12, 1983.

The message further announced that the House has agreed to the following resolution:

H. Res. 290. Resolution electing the Honorable Bill Alexander, a representative from the State of Arkansas, as Speaker pro tempore during the absence of the Speaker.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 67. Joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "National Respiratory Therapy Week."

The enrolled joint resolution was subsequently signed by the Acting President pro tempore (Mr. BAKER).

HOUSE MEASURES REFERRED

The following bill and joint resolution were read the first and second times by unanimous consent, and referred as indicated:

H.R. 3497. A bill to defer proposed amendments to the Federal Rules of Civil Procedure and the Federal Rules of Criminal Procedure; to the Committee on the Judiciary.

H.J. Res. 266. Joint resolution designating the week beginning September 4, 1983, as "Youth of America Week"; to the Committee on the Judiciary.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secretary of the Senate reported that on today, July 29, 1983, he had presented to the President of the United States the following enrolled bill and joint resolution:

S. 143. An act to authorize the Twenty-nine Palms Band of Luiseno Mission Indians to lease for ninety-nine years certain lands held in trust for such band.

S.J. Res. 56. Joint resolution to designate the month of August 1983 as "National Child Support Enforcement Month."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1524. A communication from the Mayor of the District of Columbia, proposing, pursuant to D.C. law, that the United States seek immediate negotiation with the Soviet Union for a permanent mutual nuclear weapons freeze; to the Committee on Foreign Relations.

EC-1525. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, copies of international agreements, other than treaties, entered into by the United States within the previous 60 days; to the Committee on Foreign Relations.

EC-1526. A communication from the Deputy Assistant Secretary of the Interior transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1527. A communication from the Secretary of Education transmitting, pursuant to law, a report entitled "Private Elementary and Secondary Education"; to the Committee on Labor and Human Resources.

EC-1528. A communication from the Secretary of Education transmitting, pursuant to law, a copy of final regulations for chapter 1 of the Education and Consolidation Act of 1981; to the Committee on Labor and Human Resources.

EC-1529. A communication from the Principal Deputy Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on the decision to convert the custodial services function at the Naval Hospital, Camp Lejeune, N.C. to performance under contract; to the Committee on Armed Services.

EC-1530. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on a refund of excess royalty payments to Tenneco Oil Exploration and Production Co.; to the Committee on Energy and Natural Resources.

EC-1531. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, copies of international agreements, other than treaties, entered into by the United States during the previous 60 days; to the Committee on Foreign Relations.

EC-1532. A communication from the District of Columbia Auditor transmitting, pursuant to law, the annual audit report on depository activities, fiscal year 1982; to the Committee on Governmental Affairs.

EC-1533. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Review of the Federal Crop Insurance Corporation's Financial Statements for the year ended September 30, 1981"; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1534. A communication from the Director of the Office of Management and Budget transmitting, pursuant to law, a supplemental summary of the fiscal year 1984 budget; jointly, pursuant to the order of January 30, 1975, to the Committee on Appropriations and the Committee on the Budget.

EC-1535. A communication from the President and Chairman of the Export-Import Bank of the United States transmitting, pursuant to law, a report on transactions supported by Eximbank during June 1983 with Communist countries; to the Committee on Banking, Housing, and Urban Affairs.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

David John Markey, of the District of Columbia, to be Assistant Secretary of Commerce for Communications and Information.

(The above nomination was reported from the Committee on Commerce, Science, and Transportation with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BAKER, for Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 176. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1129.

By Mr. ANDREWS, from the Select Committee on Indian Affairs, without amendment:

S. Res. 187. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 856. Referred to the Committee on the Budget.

By Mr. ANDREWS, from the Select Committee on Indian Affairs, with an amendment in the nature of a substitute:

S. 856. A bill to provide for an Indian housing program for construction and financing of housing for Indians, and for other purposes (Rept. No. 98-203).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. Res. 189. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 500. Referred to the Committee on the Budget.

By Mr. ANDREWS, from the Select Committee on Indian Affairs, with amendments and an amendment to the title:

S. 1148. A bill to provide for the use and distribution of funds awarded the Assiniboine Tribe of the Fort Belknap Indian Community, Mont., and the Assiniboine Tribe of the Fort Peck Indian Community, Mont., in docket numbered 10-81L by the U.S. Court of Claims, and for other purposes (Rept. No. 98-204).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment and without recommendation:

S. 1715. An original bill to amend the Natural Gas Policy Act of 1978, to protect consumers from those price increases that would occur because of market distortions as a consequence of current regulation of natural gas prices, to permit natural gas contracts to reflect free market prices, to provide for a phased deregulation of natural gas prices in order to achieve a free market by a date certain, to eliminate incremental pricing requirements for natural gas, to eliminate certain restrictions on the use of natural gas and petroleum, and for other purposes (with additional and minority views) (Rept. No. 98-205).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DOLE:

S. 1706. A bill to amend title 18 to provide for the positive identification of persons holding identification documents; to the Committee on the Judiciary.

By Mr. WILSON:

S. 1707. A bill to provide a moratorium until June 30, 1988, on changes to the Federal Communications Commission rules regarding network television syndication, network television financial interests, and prime time access; to the Committee on Commerce, Science, and Transportation.

By Mr. GRASSLEY (for himself, Mr. DOLE, Mr. DURENBERGER, Mr. WALLOP, and Mr. HEINZ):

S. 1708. A bill to amend part D of title IV of the Social Security Act to assure that all children in the United States who are in need of assistance in securing financial support from their parents will receive such assistance regardless of the economic status of their parents and that parents prevent their children from becoming a burden on taxpayers by fulfilling, to the best of their ability, their financial obligations on behalf of their children; to the Committee on Finance.

By Mrs. HAWKINS (for herself and Mr. CHILES):

S. 1709. A bill to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes; to the Committee on Foreign Relations.

By Mr. DENTON:

S. 1710. A bill to amend chapter 25 of title 18, United States Code, to provide penalties for the forging of endorsements on, or fraudulently negotiating, U.S. checks or bonds or securities, and for other purposes; to the Committee on the Judiciary.

By Mr. JEPSEN:

S. 1711. A bill to extend patent numbered 3,376,198, and for other purposes; to the Committee on the Judiciary.

By Mr. MOYNIHAN:

S. 1712. A bill to amend the Agriculture Act of 1949 to modify the dairy price support program and repeal the dairy assessment and diversion programs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KENNEDY (for himself and Mr. PELL):

S. 1713. A bill to amend the Intelligence Authorization Act for fiscal year 1983 to prohibit U.S. support for military or paramilitary operations in Nicaragua and to authorize assistance, to be openly provided to governments of countries in Central America, to interdict the supply of military equipment from Nicaragua and Cuba to individuals, groups, organizations, or movements seeking to overthrow governments of countries in Central America; to the Select Committee on Intelligence.

By Mr. PACKWOOD:

S. 1714. A bill to amend the Federal Trade Commission Act to provide authorization of appropriations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. McCLURE from the Committee on Energy and Natural Resources:

S. 1715. An original bill to amend the Natural Gas policy Act of 1978, to protect consumers from those price increases that would occur because of market distortions as a consequence of current regulation of natural gas prices, to permit natural gas contracts to reflect free market prices, to provide for a phased deregulation of natural gas prices in order to achieve a free market by a date certain, to eliminate incremental pricing requirements for natural gas, to eliminate certain restrictions on the use of natural gas and petroleum, and for other purposes; placed on the calendar.

By Mr. METZENBAUM (for himself, Mr. KENNEDY, Mr. MOYNIHAN, Mr. INOUYE, Mr. SASSER, Mr. NUNN, Mr. RANDOLPH, Mr. BUMPERS, Mr. DURENBERGER, Mr. STENNIS, Mrs. HAWKINS, Mr. RIEGLE, Mr. MATSUNAGA, Mr. PRESSLER, Mrs. KASSEBAUM, Mr. ZORINSKY, Mr. DECONCINI, Mr. HOLLINGS, Mr. GLENN, Mr. BOSCHWITZ, Mr. HEINZ, and Mr. BRADLEY):

S.J. Res. 140. A joint resolution to provide for the designation of the week of October 2 through October 8, 1983, as "Myasthenia Gravis Awareness Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. ANDREWS from the Select Committee on Indian Affairs:

S. Res. 187. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 856; to the Committee on the Budget.

By Mr. HOLLINGS:

S. Res. 188. Resolution expressing the sense of the Senate that the President should award Benjamin Elijah Mays the Presidential Medal of Freedom in honor of his distinguished career as an educator, civil rights leader, and theologian; to the Committee on the Judiciary.

By Mr. THURMOND from the Committee on the Judiciary:

S. Res. 189. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 500; to the Committee on the Budget.

By Mr. BAKER (for himself and Mr. BYRD):

S. Res. 190. Resolution to authorize representation by the Senate Legal Counsel of Senator STEVENS and C. Braxton Valentine, Jr., a Senate employee, in the case of *Robert Fierer* v. *Daniel Minchew;* considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DOLE:

S. 1706. A bill to amend title 18 to provide for the positive identification of persons holding identification documents; to the Committee on the Judiciary.

IDENTIFICATION SYSTEMS

Mr. DOLE. Mr. President, I sent to the desk for appropriate reference S. 1706, a bill to amend title 18 to move toward the positive identification of persons holding identification documents. This proposal is intended to serve as a vehicle to focus congressional attention on the confusion, conflict, and redundancy which now exists in the various Federal identification systems. The hearings on S. 1706 can serve to develop the dimensions of the problem and explore alternatives, then appropriate legislative remedies can be developed.

In the 97th Congress, legislation was enacted in several diverse areas which suggest some of the dimensions of the problem. First, drunk driving legislation of the last year—Public Law 97-364—authorized the establishment in four States of pilot programs to develop an automated national drivers registry. This will be a system within the Department of Transportation which will contain information contributed from several States on bad drivers. Included would be information on persons whose licenses have been revoked for one reason or another such as drunk driving convictions. The drivers license system has been subject to abuse by those whose licenses have been revoked. These drivers can simply apply for another license under an assumed name or in another State where their previous record is unknown.

Second, last year the Congress passed the Missing Children Act—Public Law 07-272. This legislation authorized expansions of the FBI's National Crime Information Center, to include information contributed from either State or local criminal justice agencies or concerned parents of missing children. Very few children have been fingerprinted. While it is true that in many jurisdictions, a baby's footprint is taken at the time the birth certificate is issued, these prints are never used for identification purposes. This lack of documentation makes it difficult to establish the positive identity of a child when a missing report is filed with law enforcement officials.

Third, in the 1982 amendments to the food stamp legislation, Congress authorized the development of automated systems for the dispensing of food stamps. Currently, almost $11 billion of this Federal assistance is received by approximately 20 million people. In his recent state of the Union address, the President estimated that over $1 billion of this assistance was wasted through fraud, ineligibility, or other misuse of the system. At the center of the problem is the fact that current methods of dispensing food stamps do not require positive identification of recipients, thus opening the door for abuse of the system.

The Senate recently passed S. 529, a bill to revise comprehensively our immigration laws. Included in this bill is a provision which directs the President to develop a "secure system" within a 3-year period for the identification of those persons lawfully admitted to and entitled to work in the United States as well as those citizens of the United States who would be employed by companies having four or more employees. Criminal sanctions would be imposed of employers who knowingly hire persons not lawfully able to work in the United States.

The recent legislation and pending proposals have a common thread: They are forms of Federal identification that would extend to tens of millions of our citizens. To say the least, concerted action needs to be taken to reduce duplication and redundancy, to protect the privacy of persons who are subjects of these files, to develop sanctions for unauthorized use of disclosure of the information contained in them, and to provide for coordination of interested Federal, State, and local agencies and authorities who have legitimate uses for this information.

The May 12, 1983, report of the Permanent Subcommittee on Investigations dealing with Federal identification fraud underscores the tremendous need for reforms in the current system. The report shows that this fraud is costing the taxpayers through various Federal, State, and local agencies an excess of $24 billion annually. Illegal aliens have easy access to identification documents such as social security cards, birth certificates, and drivers' licenses. At present, more than 7,000 different agencies using more than 1,000 different formats issue original or duplicate birth certificates. These certificates are then used to obtain drivers licenses, passports, social security cards, food stamp identification cards, and so forth. These items then enable these people to collect unemployment benefits, food stamps, and student loans. Counterfeit INS green cards allow these aliens to remain in the country.

The problem lies in the inability to establish positive identification in the current system. Agencies such as the Social Security Administration, the Internal Revenue Service, the Immigration and Naturalization Department and the State Department as well as State and local agencies need to work out a system in which to work together to uncover fraud. The Subcommittee on Investigations listed in its report several projects in which agencies cooperated and were successful in tracking down fraud schemes. These projects are in limited areas, however, and if we are to stop this unnecessary waste and criminal activity it must become a nationwide effort.

Mr. President, these remarks are intended only to give the briefest discussion of the tip of the iceberg relating to the dimensions and problems of Federal identification systems. I have not even mentioned the passport system or various military identification systems. If the truth be known, there are undoubtedly hundreds of these systems serving a multitude of Federal information needs. At the base of all these systems are data bases of identification from birth certificates or fingerprints of individuals. Somewhere between 20 to 25 percent of the population is fingerprinted at some point. This occurs by reason of application for employment in public service, or exposure to the criminal justice system. This fingerprint identi-

fication then becomes the basis for positive identification of individuals. Yet millions of people never have occasion to be fingerprinted. In the existing state of the art of identification technology, the only reasonable positive means of identification is based on a comparison of fingerprint images. Without such comparison, the various and sundry identification systems have great potential to be misused and manipulated by those whom for whatever reasons, wish to abuse these systems. This abuse costs the taxpayers literally billions of dollars.

These are other important considerations to be considered, not the least of which are the concerns for the protection of privacy as well as safeguarding the methods of identification from use by unauthorized personnel. At the present time, identification systems are rushing headlong into the computer age with very little interface and cooperation.

Mr. President, I suggested at the outset that S. 1706 was intended as a vehicle to focus congressional attention on the confusion, conflict, and redundancy which exists in the system. I want to underscore that statement in closing. This Senator believes that there is an urgent need to focus on these problems and to develop appropriate legislative remedies.

By Mr. WILSON:

S. 1707. A bill to provide a moratorium until June 30, 1988, on changes to the Federal Communications Commission rules regarding network television syndication, network television financial interests, and prime time access; to the Committee on Commerce, Science, and Transportation.

(The remarks of Mr. WILSON on this legislation and the text of the bill appear earlier in today's RECORD.)

By Mr. GRASSLEY (for himself, Mr. DOLE, Mr. DURENBERGER, Mr. WALLOP, and Mr. HEINZ):

S. 1708. A bill to amend part D of title IV of the Social Security Act to assure that all children in the United States who are in need of assistance in securing financial support for their parents will receive such assistance regardless of the economic status of their parents and that parents prevent their children from becoming a burden on taxpayers by fulfilling to the best of their ability, their financial obligations on behalf of their children; to the Committee on Finance.

CHILD SUPPORT COLLECTION PROCEDURES

Mr. GRASSLEY. Mr. President, today I am introducing legislation which will make significant progress in improving current child support collection procedures. Joining me in sponsoring this important bill are Senators DOLE, DURENBERGER, WALLOP, and HEINZ.

The problems in enforcing child support orders are well documented. The lack of consistent child support payments is a national disgrace. A recent Bureau of the Census report highlights some startling findings:

First, only one-half of all children born this year will spend their entire childhood living with both natural parents; second, more than 8.4 million women in 1981 were raising children whose fathers were absent; 30 percent of these women and children were living in poverty; third, of the 4 million women due child support payments in 1981, only 47 percent received the full amount due and 28 percent received no payments whatsoever, and; fourth, two thirds of the children in families headed by women depend on welfare. A contributing factor to this situation is that AFDC recipients lack sufficient support from absent parents.

Even when mothers are employed their economic situation is grim. Divorce sharply reduces the family income. A recent California study of per capita income showed that after divorce the wife's income dropped by 73 percent on average and the husband's rose by 42 percent 1 year after the dissolution. This situation is affected by a number of factors including the fact that women earn about 60 percent as much as men. Women usually receive custody of the child and the income level is drastically affected by the father's compliance with the child support order.

Congress recognized the need in 1975 to enact title IV-D of the Social Security Act to establish the child support enforcement program. We must make a serious and permanent commitment toward improving present collection practices. While the current program has made gains in the area of child support enforcement, the above statistics indicate program revisions and modifications are warranted.

All aspects of the bill are designed to get better performance in States' efforts to collect child support owed, and to do so with a minimum of burdensome administrative techniques. The performance of States varies tremendously. My State of Iowa and five other States account for 88 percent of all the support collected, while those same States spend only 32 percent of total administrative funds. The remaining 44 States spend 68 percent of total funds but collect only 12 percent of welfare savings. The 10 "best" States collect $2.47 in child support for each dollar expended, while the 10 States with the lowest collections received only 49 cents in support payments for each dollar spent.

By mandating that States adopt certain cost-effective methods, more uniformity in performance can be achieved. Since 70 percent of the administrative costs of the IV-D program are federally funded, I feel it is crucial and appropriate that the Federal Government strive to achieve perfections in current State operations.

In order to achieve meaningful reforms in the success of collection efforts for all children it is necessary to change the incentive formula contained in current law. Presently, States receive bonus payments equal to 12 percent of support collected for AFDC families. One important change my bill accomplishes is to equalize the program's commitment to both AFDC and nonpublic assistance children. By altering the incentive payment formula to reward performance in areas other than AFDC collections, we can better attain that goal.

I must stress that while I believe modifications in the incentive payments are necessary, I am completely willing to examine alternatives other than those contained in my bill. I believe it is imperative to work with State administrators, county and local workers, and the administration to craft a workable incentive payment structure.

Several alternatives to the four-part financing provisions contained within my bill have been brought to my attention and merit further study. Both emphasize the need to encourage non-AFDC support collections. The first would be similar to current incentive payments but would base a portion of the bonus payments on non-AFDC collections. An additional option would be to calculate State collections per employee in both the AFDC and non-AFDC categories. States could then receive their bonus dollars based on its performance in each of those categories.

One issue we must reconcile is the lack of adequate data to determine appropriate benchmarks for performance. Central to efforts to improve State collections is the need for better management information systems. My bill would provide Federal grant money which States could utilize to update computer systems essential to enforcement efforts, particularly in pursuing interstate collections. It may be prudent to implement the data registry and clearinghouse provisions of the legislation prior to adopting financing changes in order to obtain solid information detailing what would be the most feasible and desirable revisions to reward States, performance.

Much work has gone into reworking current law to develop the various proposals now before the Congress. I would like to express appreciation to Representative CARROLL CAMPBELL for his leadership and work on this bill, and I commend the administration and Secretary Margaret Heckler for making child support enforcement a national priority. I am pleased to be a cosponsor of the administration's child

support enforcement bill recently introduced by my good friend Senator ARMSTRONG. Congress needs to have the full benefit of various options and initiatives to compile a reasonable package.

As Congress continues to focus on the needs of the child and the custodial parent, we cannot lose sight of the problems of the absent parent and the matter of visitation rights. This is a troubling concern. I remain hopeful that as the absent parent fulfills financial support obligations, emotional support will be a natural byproduct. The well-being of any child can only be enhanced through increased parental attention. Absent parents are more likely to feel a part of the child's life if both financial support and visitation orders are obeyed.

The bill I present to the Congress is a comprehensive package to deal with an extremely critical problem. I urge my colleagues to review its contents carefully. I am greatly encouraged that the Senate Committee on Finance will be holding hearings on this and other child support bills in early September. As chairman of the Subcommittee on Oversight of the Internal Revenue Service, I will be holding a hearing September 15 to examine one of the provisions contained within this bill which would extend the present Federal income tax offset to non-AFDC families.

Finally, I would like to take this opportunity to call attention to the designation of August as "Child Support Enforcement Month." The public needs to be sensitized to the harsh realities facing many children and single parents today, and this will serve to stimulate public awareness of the effectiveness of this program.

Mr. President, at this time I would like to ask unanimous consent that a detailed description of the Child Support Enforcement Act of 1983 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DESCRIPTION OF THE BILL

STATEMENT OF PURPOSE

Section 1 adds an explicit statement of purpose to Title IV-D where none now exists, as follows: "The purpose of the program . . . is to assure that all children in the United States who are in need of assistance in securing financial support from their parents will receive such assistance regardless of the economic status of their parents and that parents prevent their children from becoming a burden on taxpayers by fulfilling, to the best of their ability, their financial obligations on behalf of their children.

While this statement of purpose seems almost unnecessary, in fact there has been considerable disagreement over the extent to which the IV-D program ought to assist non-AFDC families obtain child support, if at all. Not only have several states virtually ignored the non-AFDC population, but at the Federal level as well there has been a substantial emphasis on the AFDC caseload as well as a reluctance to see states attempt "universal" enforcement systems under which support paid by all absent parents is closely monitored. I am suggesting a statement of purpose which makes clear that assisting all children who have been unable to obtain support from absent parents is just as valid a function of the program as preventing the dependency of these children on tax dollars when their parents refuse to support them. I have a strong suspicion that these two goals are more closely related than studies thus far have been able to demonstrate and that when families are reasonably confident that support payments will be made in full and on time, they will be able to build economic, emotional, and social and educational strengths in the family that will help ward off dependency and breakdown later on.

FINANCIAL INCENTIVES FOR BALANCED AND EFFICIENT STATE PROGRAMS

Section 3 replaces the present law incentive payment which focuses exclusively on AFDC collections. Under the current scheme, States are permitted to keep a "bonus" equal to 12 percent of support they have collected on behalf of families on AFDC. The remaining 88 percent is then divided among State and Federal governments in proportion to the rate at which the Federal government matches State AFDC payments. This 12 percent incentive is expected to amount to about $120 million in Fiscal 1984.

I am proposing to replace the 12 percent AFDC incentive with a four-part incentive plan which is intended to encourage States to provide child support enforcement services to all families which request assistance, to work as hard on interstate cases where the child and absent parent reside in different States or localities as on so-called domestic cases, as well as to seek child support to offset AFDC expenses incurred when parents fail to support their children.

These incentives will be computed and paid quarterly beginning in Fiscal 1986 so that States and localities will have frequent measures of their progress and so that Federal incentive funds will arrive throughout the year as they are needed. A pass-through requirement will make sure that localities which do the bulk of the work and bear a large portion of the costs will receive their share of the incentive payments. Because the record-keeping systems required to compute eligibility for incentive payments do not exist in many states, a phase-in provision assures States that they will receive amounts equal to at least four-fifths, three-fifths and two-fifths respectively in Fiscal 1986, 1987 and 1988 of what they would have gotten under the existing 12 percent AFDC incentive.

The first of the four incentive payments urges States to try to develop as many "perfect cases" as possible. By this I mean that the total amount of support owed has been paid in full and on time in each of the 12 months in the first four of the last five calendar quarters. The reason for measuring achievement in terms of cases rather than in dollar amounts is to value cases with high support amounts equally with those ordering low amounts and not to give wealthier localities or States which might order higher support on average an advantage over less well to do areas. However, in order not to encourage "low-balling" of support orders so that more cases will qualify for the incentive. The bill provides that incentive payments will be reduced proportionately to the extent that the average amount collected per case is less than the AFDC amount that would be paid to a family of two in that State. An AFDC payment for two is used because the average AFDC family has a parent and two children; only the children are potentially owed child support. The average payment for all cases (whether paying or not) is used because it is realized that in some cases it will be appropriate to order low support amounts and that in other cases, such as those where the absent parent cannot be located, it is unrealistic to expect payments.

While ideally we would want all cases to be completely paid up on time, in reality this will be impossible. Not only are lapses and arrearages an inescapable fact—often due to unemployment as well as recalcitrance, disinterest or slack enforcement—but there are always new cases being filed. Many of these families do not yet have a support order; some may not have yet legally established paternity; and others cannot locate the absent parent. Also, States may open a new "case" each time a family begins a new episode of AFDC dependency rather than reopen the old file. Therefore, this incentive payment begins with a threshold of 30 percent of all cases in which the state undertook after June 30, 1984 to collect support. That is, the incentive will be paid only on "perfect" cases in excess of 30 percent of all cases. The incentive payment will be equal to 0.2 percent of the State's administrative costs for the quarter in question for each 1 percent of cases in excess of 30 percent. For example, if 40 percent of a State's cases were in the "perfect" category, its incentive payment would be equal to 0.2 percent times 10 percent, or 2 percent of its administrative costs. If the average support collected on all cases equalled only 90 percent of the AFDC payment for two, the State's incentive payment would be reduced proportionately—by 10 percent.

The second incentive is similar to the first. However, it rewards States for having a high percentage of cases making "adequate" payment. This is defined as paying at least 80 percent of the ordered amount anytime during the first four of the last five quarters. Under this incentive, only cases in excess of 70 percent of all the State's cases would count toward the incentive payment. For each percent of "adequate" cases over 70 percent, the State will receive 0.4 percent of its administrative costs. As in the first incentive, this payment will be reduced to the extent that average support collected on all cases is less than the AFDC payment for two. The reason for having this second system-wide incentive is to make sure that States, in their efforts to achieve "perfect" cases, do not concentrate only on cases which are already approaching perfect status and neglect other cases making sporadic, incomplete, or no payments.

The third incentive encourages states to pursue interstate cases. This incentive will be paid at the rate of 0.4 percent of administrative costs for each 1 percent in excess of half the all a State's interstate cases in which at least "adequate" payment is obtained (80% of ordered amount anytime during the first four of the last five quarters). Both States would receive the incentive—the State where the child resides as well as the State where the absent parent resides. This puts the case on a par with "domestic" cases as far as the incentive payment is concerned.

The fourth incentive payment is based on AFDC caes, and is measured in terms of how much of total State AFDC payments

for single-parent families are recovered through child support collections for children receiving AFDC. Nationally, States average 6.6 percent AFDC "recovery" through child support enforcement. This incentive would pay States an incentive equal to 1 percent of support collected in AFDC cases for every 1 percent by which their recovery of AFDC payments exceeded 5 percent. This incentive would be paid regardless of whether the AFDC child lived in the State or elsewhere so that interstate cases can be pursued equally with in-state cases. Under this incentive, for example, if a State collected $50 million on behalf of children receiving AFDC and this equalled 10 percent of the State's $500 million AFDC expenditure for single-parent families, the State would get an incentive payment equal to 5 percent of the $50 million, or $2.5 million.

It is intended that where specific cases qualify under more than one of the four incentives, they be counted toward each. Therefore, an interstate AFDC case which paid in full and on time all year would count toward all four incentive payments.

Many States do not currently keep track of case-by-case statistics and cannot tell how many cases are fully paid, how many are in arrears, or the amount and duration of the arrearages. However, because child support enforcement must necessarily keep track annually of literally millions of financial transactions, it seems unrealistic not to develop an "accounts receivable" type of monitoring system for the future. Given the current lack of such information, I am the first to admit that the threshold levels and payment percentages set forth in my bill are educated guesses intended to aim high enough to enourage improvement and low enough to be within reach for well-managed, efficient systems. Also, the incentives will measure only support which the States have undertaken to collect after June 30, 1984 so that any new information system will need to pick up data only from that point forward. I have offered this 4-part scheme to stimulate discussion and to focus reform, not as a final proposal. Therefore, I hope that people familiar with the operations and potential for child support collections will study these suggested incentive levels and share with me any refinements, improvements or substitutes which might better achieve the goals I have discussed.

IMPROVED ENFORCEMENT TECHNIQUES

The remainder of the bill sets forth a number of methods which have been shown to increase the payment of child support obligations at relatively low cost, minimal personnel, and high return.

COLLECTION OF PAST-DUE SUPPORT FROM FEDERAL TAX REFUNDS

Section 4 extends to non-AFDC cases the present law procedure whereby Federal income tax refunds are used to offset past child support obligations in AFDC cases. This simple and inexpensive process ($11 per case) has been extremely successful, accounting for $168 million in collections the first year it was used (1981) and more in 1982.

A State will be permitted to limit its non-AFDC offset activities to only the amount of past due support which accumulated after it undertook to seek support. However, a State or locality may opt to submit to the Federal government arrearages that accumulated before the case was filed.

Because the bill merely broadens present law to include non-AFDC cases, the procedures and safeguards that have been worked out during the first two years for AFDC cases will apply. This includes procedures for notifying obligors and permitting them to respond and indicate any errors in the alleged arrearage.

WITHHOLDING FROM WAGES

Section 5 requires States to implement a procedure for withholding child support amounts from the wages of absent parents. This has been found to be a reliable, effective and low-cost technique which efficiently brings cases into paying status and keeps them there. My bill allows States flexibility as to when they implement withholding. At the latest, they must make withholding when support becomes past due in amount equal to two months' payments or when the absent parent requests withholding. However, States could implement withholding immediately, beginning with the first support payment as a means of preventing arrearages from ever occurring.

Because this withholding system will add to employers' paperwork burden, the bill permits employers to withhold fees, in addition to support, to cover any additional costs. Also, employers may send a single check to the appropriate State agency for distribution to the proper families.

States must impose fines on employers who dismiss or refuse to hire individuals because of withholding. Withholding must be used in interstate as well as domestic cases.

QUASI-JUDICIAL OR ADMINISTRATIVE PROCEDURES

Section 5 also requires the use of alternative procedures to the traditional and often lengthy and expensive judicial forums. States have found that administrative personnel can often get parties to agree on the establishment and enforcement of support obligations more quickly and at less public and private expense than in adversarial court proceedings. These alternative procedures must observe all due process requirements and provide for notice of actions to be taken, opportunity to be heard, and appeal to a court.

STATE TAX REFUND OFFSETS

Section 5 requires at the State level the same income tax refund offset proposed at the Federal level. This offset would be used in both AFDC and non-AFDC cases.

LIENS AGAINST REAL PROPERTY

Section 5 requires States to make greater use of their procedures for placing liens on real property for past due support owed by absent parents owning property in the state. In States where child support activities are handled at the local level, procedures must be implemented for using the lien procedure throughout the state. Liens are to be used in both interstate and domestic cases.

REPORTING PAST DUE SUPPORT TO CREDIT AGENCIES

Section 5 requires States to report periodically to consumer credit bureau organizations the amount of past due support owed by absent parents in both interstate and domestic cases. Child support obligations cannot be discharged in bankruptcy and stand in front of virtually all other debt an individual may incur. Therefore, creditors and credit reporting agencies are interested in knowing about child support arrearages. Absent parents will have to pay support arrearages in order to clear their credit ratings. Prior to reporting arrearage information. States must notify obligors and give them a chance to respond. The protections under the Fair Credit Reporting Act also protect absent parents in case of erroneous information.

The credit reporting, lien, and tax offset procedures are all intended to help collect support from non-wage earners who will not be affected by withholding. These individuals may be proprietors, farmers, independent contractors or otherwise self-employed. These are effective and relatively inexpensive techniques which are expected to bring these individuals into better compliance.

MEDICAL SUPPORT

Often the absent parent can provide employment-related health care or insurance for his children at little or no additional cost. Under section 5, States are to seek such support when the custodial parent has been unable to provide such health coverage.

The Secretary of HHS is permitted to waive any of these section 5 requirements if a State can demonstrate with factual, detailed data that a particular procedure would not improve the efficiency or effectiveness of its program. The effective date for these State procedures is October 1, 1984, or, if enabling legislation is required, until the close of the first State legislative session after January 1, 1985.

CENTRAL PAYMENT AND REGISTRY SYSTEMS

The incentive system proposed in section 3 as well as the demands of tracking the staggering number of transactions in millions of child support cases means that most States (and localities where child support enforcement is decentralized) will have to automate and upgrade their information management systems. At the very least, they need to know the amount of support ordered to be paid to children residing in the State, the amounts ordered to be paid by parents residing in or employed in the State, the amounts collected or paid and the dates of payment, and the amounts past due and the duration of arrearages. Without this essential data, States will not be able to respond to increasing requests for support assistance or to measure their progress.

States may wish to use their information systems as clearinghouse mechanisms through which all or most child support payments are channelled and forwarded. Other States may prefer to use the central registry concept wherein payments are made directly to the custodian via withholding, bank transfers, credit cards or other means and the central registry is notified that the payment, withholding or transfer has been made. Either way the State has a record of the timing and amount of payments and a means for triggering enforcement activities when payments are incomplete or late.

Although most States have automated at least part of their child support effort, upgrading to handle clearinghouse or registry tasks will be a lengthy and expensive process. Therefore, the bill authorizes a fund of $20 million per year for 5 years to be available until spent. This money will be available to States on a project grant basis for between 80 to 90 percent of project costs.

QUARTERLY SYSTEM OF WAGE REPORTING

Section 7 amends Title III of the Social Security Act to require all unemployment compensation agencies to collect employment, wage, name and address information at least quarterly. The vast majority of States currently do this now, and problems of interstate fraudulent claims is forcing the remaining few to consider switching to this approach. The bill further provides that

this employment and address information be shared with the child support agency in order to facilitate location of absent parents and ascertainment of their financial and employment status.

● Mr. DURENBERGER. Mr. President, this country was founded upon the notion of responsibility to one's family and country. In recent years, however, this basic tenet of our society has been eroded to the point of national disgrace. The situation to which I refer is the failure of many parents to assume financial responsibility for their children.

Divorce has drastically altered the composition of the American family. In 1981, there were 8.4 million women with children under 21 whose fathers were absent, an increase of over 100 percent from 1970. The Census Bureau predicts that only half of all children born this year will spend their entire childhood living with both natural parents. Women head 90 percent of the rapidly growing number of single parent families.

Many studies have been conducted on compliance with child support orders and the effect of failures to comply. These studies all point to one conclusion: absent parents don't pay child support. Of the $9.9 billion due from absent parents, only $6.1 billion was ever paid. Between a quarter and a third of parents never make a single court-ordered payment. According to a 1973 Michigan study, patterns of delinquency have no relation to the parent's income. In fact, the economic circumstances of single fathers are usually better than while they were married. A recent California study revealed that 1 year after divorce, the wife's income dropped by 73 percent while the husband's rose by 42 percent.

This situation should shock the conscience of a responsible society. It has directly contributed to the frequently mentioned "feminization of poverty" and must be remedied.

Congress, in 1975, established the child support enforcement program, title IV-D of the Social Security Act. It requires each State to have an approved program of child support enforcement, including measures to establish paternity, locate missing fathers, establish or modify court-ordered child support orders, and collect court-ordered payments. The program is intended to serve both AFDC and non-AFDC families, with the latter being charged fees for services provided.

The child support enforcement program is a good beginning but more needs to be done to help women who are seeking child support for their children.

Mr. President, I have been deeply troubled by this issue for a number of years. In 1981, when I first introduced the Economic Equity Act, I called upon the Department of Justice to conduct a study of this problem and recommend solutions.

I am proud to have introduced the 1983 Economic Equity Act, S. 888, in the Senate. Title V of the legislation is designed to improve and expand the IV-D program in order to return responsibility to those individuals who should properly bear such obligations.

As the principal author of the EEA, I am very pleased that Senator GRASSLEY has recognized the need to improve child support enforcement and is introducing this legislation, which I am pleased to cosponsor.

As I indicated when I cosponsored the administration's proposal, I will support any and all legislation that is aimed at making our child support enforcement programs more effective. This is not a partisan issue, neither is it just a woman's issue, nor a welfare issue—it is an issue that should be of concern to all Americans. We have reached the point where everyone knows someone who is not receiving child support. The effect this has on the children of America and on her institutions can no longer be tolerated.

I believe the most effective way for Congress to address child support enforcement is to pass S. 888 with all its other reinforcing provisions for economic equality. I am encouraged by the number of similarities between this legislation and the Economic Equity Act:

Mandatory wage withholding. Senator GRASSLEY's bill, like S. 888, would require mandatory wage withholding to assure compliance with child support orders. This proposal could impose mandatory wage withholding at an early date and, in this respect, is an improvement.

State income tax intercept. State income tax intercept programs have proven very effective where utilized and I am pleased to see that Senator GRASSLEY has adopted such a proposal. I continue to emphasize the need to make this available to both AFDC and non-AFDC parents.

Quasijudicial and administrative procedures. These procedures are much more cost-efficient and a far quicker way to enforce and establish child support. Both the EEA and Senator GRASSLEY suggest greater use of these procedures.

Liens against property. Both pieces of legislation would utilize liens against property. The EEA would also provide for liens against estates. Senator GRASSLEY has expanded this to property located in other States and this is a welcome addition.

Medical support. Medical support should be provided for children when it is available at a reasonable cost. Both the EEA and Senator GRASSLEY have made provision for such support. Similarly, the administration has proposed this as a regulatory change for next year.

Senator GRASSLEY has suggested the use of consumer credit agencies for reporting of past-due support owned by absent parents. This is an excellent concept and I endorse its inclusion in this legislation.

On the other hand, S. 888 is preferable to this bill in that it contains several additional enforcement proposals which I will work to see enacted into law: use of bonds or guarantees, default procedures for paternity, scientific testing to establish paternity, and the use of objective standards.

In recognition of the growing need to computerize and systematize child support enforcement programs, the Economic Equity Act requires States to establish clearinghouses to monitor and trigger enforcement. This legislation does not go that far, but does provide a grant procedure for the establishment of clearinghouses.

Senator GRASSLEY has proposed expanding the Federal income tax intercept to non-AFDC parents for past-due support the IV-D agency has undertaken to collect. He has also suggested that the States be given the option of including all arrearages and I wholehearteldy support this approach to the Federal income tax intercept.

With respect to Senator GRASSLEY's specific funding mechanisms, I agree that we should encourage States to become more effective and efficient. However, I am concerned about the complexity of the incentive formula in his bill and the impact it would have on States that are not fully computerized. Determination of eligibility for States that operate their programs on a county or city basis will be extremely difficult until clearinghouses have been established statewide. I believe it is important that these incentives be easily identified and equitably distributed.

Improvement of child support enforcement in this country is imperative—both from a societal perspective and from an economic perspective. In the long run dollars invested in this program today will be returned to society many times again. If, through improved child support collection efforts we can help single parents become self-sufficient, we will eventually see reductions in AFDC, food stamps, and many other public assistance programs. More importantly, the more adequate the parental support for children, the less costly the requirements on the education, justice and other societal systems.

Society cannot de facto dictate that single women assume the entire burden of raising a family. The responsibility for the children of our Nation rests with both the mother and father. We must enforce the responsi-

bility once undertaken to those who choose selfishly to abandon their familial duties. As Reinhold Neibuhr once stated: "Life has no meaning except in terms of responsibility." Society will profit from these changes.

Mr. President, I am hopeful that the Senate will act quickly to improve and expand child support in this country.●

By Mr. DENTON:

S. 1710. A bill to amend chapter 25 of title 18, United States Code, to provide penalties for the forging of endorsements on, or fraudulently negotiating, U.S. checks or bonds or securities, and for other purposes; to the Committee on the Judiciary.

PENALTIES FOR FORGING ENDORSEMENTS

● Mr. DENTON. Mr. President, today I introduce legislation that would amend the title 18, chapter 25 of the United States Code, thereby providing penalties for the forging of the endorsement or fraudulently negotiating U.S. checks, bonds, or securities.

At present, violations for forgery or fraudulent negotiations of a treasury bond or a check or a security are prosecuted under section 495 of title 18 that was not designed to apply to such violations. Section 495 applies to contracts, deeds, powers of attorney, and other writings. There is as a practical matter a gap in the law, making the prosecution of certain forgeries impossible. For example, a thief who steals a treasury check already endorsed and then endorses it himself is not violating section 495. A thief may steal Government checks from the rightful owner and then sell to a middleman and still a violation under section 495 has not occurred.

Mr. President, the proposal I introduce today would add a new section to title 18, United States Code, to make it a felony: First, to forge an endorsement or signature on a treasury check or bond or security of the United States, or second, to pass or attempt to pass such an obligation knowing that it bears a forgery. The bill also makes it a felony to knowingly exchange or possess, with knowledge of its false character, an obligation of the United States that has been stolen or bears a forged endorsement. The penalty would be a fine of not more than $10,000 or imprisonment for not more than 10 years, or both. If the amount of the obligation involved did not exceed $500, the penalty would be a fine of not more than $1,000 or imprisonment not to exceed 1 year, or both.

I would point out that this legislation in no way redistributes the investigative responsibility of any agency. Specifically, the Postal Service would retain primary jurisdiction to investigate mail theft. At the same time the Secret Service would be greatly assisted in investigating crimes involving securities of the United States.

I ask my colleagues to consider this legislation carefully. It seems that those who steal, forge, or fraudulently appropriate the property of others too easily find legal loopholes that afford a safe harbor for their crimes. This legislation blocks those loopholes, ultimately leading to better law enforcement and less criminal activity.

I ask unanimous consent that a copy of the bill appear in the RECORD immediately following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1710

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 25 of title 18, United States Code is amended by adding the following new section:

SEC. 510. FORGING ENDORSEMENTS ON TREASURY CHECKS OR BONDS OR SECURITIES OF THE UNITED STATES.

"(a) Whoever, with intent to defraud—

(1) falsely makes or forges any endorsement or signature on a Treasury check or bond or security of the United States; or

(2) passes, utters, or publishes, or attempts to pass, utter, or publish, any treasury check or bond or security of the United States bearing a falsely made or forged endorsement or signature shall be fined not more than $10,000 or imprisoned not more than 10 years, or both.

(b) Whoever, with knowledge that such check or bond or security of the United States is stolen or bears a falsely made or forged endorsement or signature buys, sells, exchanges, receives, delivers, retains, or conceals any such check or bond or security of the United States that in fact is stolen or bears a forged or falsely made endorsement or signature shall be fined not more than $10,000 or imprisoned not more than 10 years, or both.

(c) If the face value of the Treasury check or bond or security of the United States or the aggregate face value, if more than one Treasury check, bond or security of the United States, does not exceed $500, in any of the above mentioned offenses, the penalty shall be a fine of not more than $1,000 or imprisonment for not more than 1 year, or both."

SEC. 2. Section 3056(a) of title 18, United States Code, is amended by inserting in the fifth clause the number "510," after "509,".

SEC. 3. The analysis of chapter 25, of title 18, United States Code, immediately preceding section 471 of such title, is amended by adding at the end thereof the following:

"510. FORGING ENDORSEMENTS ON TREASURY CHECKS OR BONDS OR SECURITIES OF THE UNITED STATES."●

By Mr. JEPSEN:

S. 1711. A bill to extend Patent Numbered 3,376,198, and for other purposes; to the Committee on the Judiciary.

IMPRO PRODUCTS

● Mr. JEPSEN. Mr. President, I am today introducing a private bill for patent relief for Impro Products, a small company in Iowa which has developed a product to improve conception and milk production in cattle and to prevent cattle disease.

Impro received a patent for its unique process in 1968 but it has been unable to make full commercial use of its product. Prior to obtaining the patent, Impro applied to the Department of Agriculture for a license under the Virus, Serum and Toxins Act. While a temporary license was in effect, Department of Agriculture scientists conducted tests to determine the efficacy of the product. The tests resulted in a refusal of the Department to extend the temporary license when it expired in September 1967.

The unusual events surrounding the Department of Agriculture's tests of Impro's product were explored in an opinion last September by senior U.S. District Judge Howard F. Corcoran. The opinion by Judge Corcoran, in the case of Impro Products, Inc. against Block, focused on a 1970 article by several Department of Agriculture scientists which summarized the tests which they had conducted. Until Judge Corcoran's decision, the Department had been distributing the article to persons inquiring about Impro's products.

After a careful review of the methodology of the Department's tests, the district court found that the article contained false or misleading statements about the tests. For example, the court concluded that the article had inaccurately reported that each treated cow had been innoculated 5 to 7 days before the anticipated day of calving; the district court found that, in fact, only one-third of the treated cows had been injected during that time. The article further reported that Agriculture's test methodology had been developed in conjunction with Impro Products, when, in fact, Agriculture had altered the test procedures and goal's without Impro's agreement. The article did not reveal that data from distinct herds had been combined, and that crossbreeds had been used. The court concluded that these facts should have been noted to allow persons interested in the study to evaluate its deficiencies. On the basis of its examination of the record, the court enjoined further dissemination of the 1970 article and ordered that any future report by Agriculture of its tests should contain a fair and accurate account of the problems involved in conducting the tests.

The Secretary of Agriculture has appealed to the U.S. Court of Appeals for the District of Columbia Circuit. It is not my purpose to comment on the merits of the appeal; the court will reach its conclusions on the basis of the law and of the record before it. The issue which I am placing before the Senate in this bill is solely whether fairness requires that Impro Products have an additional period of time to benefit from its scientific innovation. The facts developed by the dis-

trict court demonstrate, in my opinion, that Impro has not had a fair opportunity to convince the Government or the public of the efficacy of its product. The bill I am introducing will provide Impro with the opportunity which all inventors deserve to demonstrate the efficacy of their products to licensing authorities and to potential customers.

I ask unanimous consent that a copy of my bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1711

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Patent Numbered 3,376,198 (relating to the production of immunocompetent factors in milk) issued on April 2, 1968, to Impro Products, Inc., of Waukon, Iowa (hereinafter referred to in this Act as the "patentee") be, and the same hereby is, renewed and extended for a term of seventeen years from the date on which such patent would otherwise expire, with the same force and effect as if said patent had been originally issued for a term inclusive of the terms provided for herein. The benefits conferred by this Act shall accrue to the patentee's heirs, assigns and successors in interest.

SEC. 2. The Commissioner of Patents shall—

(1) cause notice of the renewal and extension granted under this Act to be published in the Official Gazette and marked upon copies of such patent for sale by the Patent Office in such manner as the Commissioner may determine; and

(2) whenever requested by the said patentee or the successors or assigns of such patentee, make a certificate of renewal and extension and append an authenticated copy thereof to such patent, whenever the same shall be requested by the said patentee or the successors or assigns of such patentee.●

By Mr. MOYNIHAN:

S. 1712. A bill to amend the Agricultural Act of 1949 to modify the dairy price-support program and repeal the dairy assessment and diversion programs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

DAIRY ADJUSTMENT AND STABILIZATION ACT OF 1983

● Mr. MOYNIHAN. Mr. President, I rise today to introduce the Dairy Adjustment and Stabilization Act of 1983. I urge my colleagues to support this measure, which is designed to provide a lasting solution to the pressing problem of excessive dairy production.

Mr. President, Government subsidies to farmers have reached alarming levels. Farm price supports were $3.5 billion in 1979; in fiscal year 1983 they will exceed $21 billion, nearly equaling the total earnings of America's farmers. All agricultural subsidies, including payment-in-kind (PIK) and farm credit funding, will total $38 billion.

The Agriculture and Food Act of 1981 was predicated on the assumption that farm prices would continue to rise. That assumption was wrong. Soft export demand, dramatically higher yields, and lower inflation rates prevented price increases from occurring. Yet the Federal Government committed itself to an archaic system of price supports.

Now the Federal Government is obligated to purchase surplus agricultural commodities at exorbitant, artificial prices. At the taxpayer's expense, the Federal Government stores a bin-busting surplus of wheat, corn, and other grains. The PIK program begun to reduce this surplus has achieved mixed results, and is a short-term solution at best.

When we turn to dairy, we discover that the problem is no less serious. The cost of the dairy price support program has swollen from $250 million in 1979 to more than $2.2 billion in 1982. Expenditures for fiscal year 1983 could reach $2.7 billion. The Federal Government is the reluctant owner of a huge and expanding surplus of dairy goods for which there is no market. As of April 1, 1983, the Commodity Credit Corporation (CCC) owned 430 million pounds of butter, 758 million pounds of cheese, and 1.2 billion pounds of nonfat dry milk. The Federal Government's transportation, handling, and storage costs for these commodities were $112.8 million in fiscal year 1982.

In 1982, Congress passed the Omnibus Reconciliation Act. That act included a provision designed to decrease the quantity of surplus milk products and lower the cost of the dairy price support program. This provision authorized the Secretary of Agriculture to collect two 50-cent assessments from the proceeds of the sale of every hundredweight of milk marketed commercially.

Mr. President, I have opposed this provision since its enactment as being hastily considered, ill-advised, and counterproductive. The assessments, which have precipitated numerous lawsuits, penalize the farmer but do not lower the cost of milk to the consumer. In New York, the Nation's third largest milk producing State, dairymen will lose as much as $92 million this year if the second assessment is levied. A $1 assessment will penalize a dairyman whose herd produces 1 ton of milk daily, $600 each month. Such penalties will hurt all dairymen and will prove fatal to many younger, highly leveraged producers.

Does the assessment reduce production? It does not. The assessment encourages production. Dairy farmers produce more milk to compensate for the lost revenue. The New York State Farm Bureau estimates that its dairy farmers will increases production 3 to 4 percent to offset the assessments. Clearly, the assessment program and all other contemplated quick-fix ideas should be abandoned.

On February 16, 1983, I joined my distinguished colleagues, Senators D'AMATO, MURKOWSKI, BAUCUS, HATFIELD, INOUYE, SASSER, and PROXMIRE in introducing a bill (S. 498) to repeal the assessments. I am pleased to report that Senators MATSUNAGA, THURMOND, BOREN, PRESSLER, JOHNSTON, ANDREWS, and HEINZ have since become cosponsors.

S. 498 is a laudable bill, I am concerned, however, that more needs to be done. For this reason, I am introducing additional legislation today. My bill, quite simply, will repeal the assessments and authorize the Secretary of Agriculture to lower the dairy price support level from $13.10 per hundredweight to $11.60 per hundredweight. The Secretary will determine the size of the reduction administratively, and will have authority to adjust the price support level annually. Additionally, my bill will provide a referendum for producers to determine whether they wish to fund and participate in a national dairy products promotion program. Representative CONABLE has introduced similar legislation in the House.

Mr. President, the simplest, most effective way to reduce the quantity of surplus milk products is to encourage increased demand. We can do this by lowering the price support level so that America's dairy products will entice both domestic and international buyers. According to the National Milk Foundation, a price support reduction of just $1 will benefit the consumer tremendously: nonfat dry milk prices could drop 6 cents per pound, whole milk prices could drop 9 cents per gallon, cheese prices could drop 9 cents per pound, and butter prices could drop 11 cents per pound. The consumer could save as much as $4.2 billion in dairy costs next year. We have a choice: We can continue to levy a $1 per hundredweight assessment that encourages production or we can lower the price support to a level that encourages consumption.

Another way to encourage consumption is to advertise. I firmly believe that a nationwide dairy promotion program is desirable and would be effective. My bill provides an opportunity for dairy farmers to vote on a national dairy promotion program. The program would be funded through a 15-cent-per-hundredweight assessment and producers would receive credit for contributions made to State, local, or cooperative advertising campaigns.

Increased private sector demand will reduce pressure on the Federal Government to purchase surplus dairy goods. The Department of Agriculture estimates that CCC net purchases of milk—equivalent—would decline from 17.3 billion pounds in fiscal year 1983 to 6.6 billion pounds in fiscal year 1985

if the price support level dropped $1.50.

The dairy price support level has been lowered five times since the program was enacted in 1949. In each instance, CCC purchases were reduced significantly. Let me cite just a few examples: In fiscal year 1954-55, the price support level was lowered 16 percent. CCC net removals dropped from the prior year's 11.3 billion pounds to 5.1 billion pounds—a reduction of over 50 percent. In fiscal year 1958-59, the price support level was lowered 6 percent. CCC net removals dropped from the prior year's 6.8 billion pounds to 3.5 billion pounds—nearly a 50-percent reduction. Finally, in fiscal year 1962-63, the price support level was lowered 8 percent. CCC net removals dropped from the prior year's 11.2 billion pounds to 8.8 billion pounds—a reduction of over 20 percent.

My bill will stimulate demand and reduce CCC purchases. The consumer will benefit and the Federal Government's costs will be reduced. Moreover, these achievements will not be at the expense of the farmer.

Dairy producers acknowledge the need to reduce the price support level. They prefer a price support reduction which will stimulate demand to equivalent assessments, which do nothing to lower the consumer's costs. A price support reduction is equitable—far more equitable than a paid diversion program that requires all dairy farmers to pay an assessment so that the Federal Government can pay some dairy farmers to curtail production.

A return to the basic principles of the dairy price support program as it operated under the Agriculture Act of 1949 is the simplest, most effective, and most equitable way to curb excess production and increase demand. My bill, which is simple to administer, would perpetuate a program that has served producers, consumers, and the industry so well for the past 30 years. It gives the Secretary of Agriculture the flexibility needed to adjust the economic signals sent to dairymen so that the dairy price support program will achieve and maintain the equilibrium between demand and supply that is so urgently required.

Mr. President, my bill is supported by the American Farm Bureau Federation and the New York State Farm Bureau. I submit letters of endorsement from both of these organizations, and I ask unanimous consent that they accompany my statement in the RECORD. These organizations, it may be fairly stated, represent dairy farmers. Dairy farmers should support this bill because it is equitable and it will spur demand. Consumers should support this bill because it will lower the cost of assorted dairy products. I urge my colleagues to support this bill.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

AMERICAN FARM BUREAU FEDERATION,
Washington, D.C., July 28, 1983.

Hon. DANIEL PATRICK MOYNIHAN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MOYNIHAN: The American Farm Bureau Federation is pleased to support the legislation you plan to introduce to modify the dairy support program by returning to the Secretary of Agriculture discretionary authority to adjust the support price of milk. This legislation will return to the Department of Agriculture the authority necessary to make adjustments to keep supply in line with demand. The legislation will preserve a workable program and maintain it in an efficient and operable fashion. It makes possible reasonable adjustments in the support price of milk at the farm and assures an opportunity for those price reductions to be passed on to the consumer.

Additionally, the legislation would provide an opportunity for dairy producers across the country to vote on a nationwide dairy promotion program. It would protect the interests of those farmers who are already contributing to a promotion program, but preserve the precedent of allowing farmers to vote whether or not to impose a promotion program on themselves. Since dairy promotion programs are paid exclusively by the farmers, it is a clear statement of equity that this preserves their right to vote as a mechanism for determining whether a promotion program should be enacted.

For thirty years we have had a dairy program that has worked well in assuring an adequate supply protecting against the undue costs of oversupply and maintaining an orderly marketing framework for producers. The legislation continues this tradition and makes the improvements necessary to overcome current, unacceptable oversupply problems.

Sincerely,

JOHN C. DATT,
Secretary and Director,
Washington Office.

[Telegram]

GLENMONT, N.Y.

Senator DANIEL P. MOYNIHAN,
Capitol One, D.C.

DEAR SENATOR MOYNIHAN: New York Farm Bureau is pleased to support the Conable-Moynihan bill as the most effective and practical solution to the current dairy production-consumption imbalance. This legislation which provides for the repeal of the current dairy assessment authorizes the Secretary to annually adjust the price support and establishes a national dairy promotion program with producer referendum and rebate. We believe this approach offers the best opportunity for reducing overproduction and increasing consumption. In addition it continues a viable dairy price support program and gives the correct long-term signals to the dairy industry and lending institutions. While we believe that given the authority the Secretary would only reduce the support price $1 this year, we would support efforts that would specify a gradual reduction. We appreciate your concern and interest in resolving this serious problem.

Sincerely,

RICHARD MCGUIRE,
President, New York Farm Bureau.●

By Mr. METZENBAUM (for himself, Mr. KENNEDY, Mr. MOYNIHAN, Mr. INOUYE, Mr. SASSER, Mr. NUNN, Mr. RANDOLPH, Mr. BUMPERS, Mr. DURENBERGER, Mr. STENNIS, Mrs. HAWKINS, Mr. RIEGLE, Mr. MATSUNAGA, Mr. PRESSLER, Mrs. KASSEBAUM, Mr. ZORINSKY, Mr. DECONCINI, Mr. HOLLINGS, Mr. GLENN, Mr. BOSCHWITZ, Mr. HEINZ, and Mr. BRADLEY):

S.J. Res. 140. A joint resolution to provide for the designation of the week of October 2 through October 8, 1983, as "Myasthenia Gravis Awareness Week"; to the Committee on the Judiciary.

MYASTHENIA GRAVIS AWARENESS WEEK

● Mr. METZENBAUM. Mr. President, I am introducing today a joint resolution to designate the week of October 2, through October 8, 1983 as "Myasthenia Gravis Awareness Week."

I am pleased to have Senators KENNEDY, MOYNIHAN, INOUYE, SASSER, NUNN, RANDOLPH, BUMPERS, DURENBERGER, STENNIS, HAWKINS, RIEGLE, MATSUNAGA, KASSEBAUM, ZORINSKY, DECONCINI, HOLLINGS, PRESSLER, GLENN, BOSCHWITZ, HEINZ, and BRADLEY join me as cosponsors of this resolution.

Myasthenia gravis is a neuromuscular disease characterized by spells of extreme, sometimes fatal weakness. It can strike anyone at any age. An estimated 100,000 to 200,000 diagnosed, and over 100,000 undiagnosed, Americans of both sexes and of all races and ages are affected by this debilitating disease.

Although myasthenia gravis is called a neuromuscular disease, it is not a disease of either the nerves or the muscles. It literally lies between the two. Communication between healthy nerves and healthy muscles is lacking because the victim's body is deficient in a substance which acts as an electrical conductor between nerve and muscle.

Myasthenia gravis was first diagnosed in the 17th century, but substantial progress in diagnosing and treating this puzzling disease has only been made in the last decade. In its milder forms, the disease's symptoms indicate chronic fatigue, and doctors will often treat for that condition. Other mistaken diagnoses include emotional disturbance, brain damage, or diseases of the throat, eyes, lungs, limbs, or the heart, since the functioning of any of these may be affected by myasthenia gravis.

We face a continuing need to educate the public and to conduct research into the cause, treatment, and cure of this debilitating disease. Myasthenia Gravis Awareness Week is a first step in meeting this need.

Mr. President, I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows;

S.J. RES. 140

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, To authorize and request the President to designate the week of October 2 through October 8, 1983, as "Myasthenia Gravis Awareness Week."

Whereas the incidence and prevalence of myasthenia gravis present a significant health problem in the United States;

Whereas myasthenia gravis is a severe neuromuscular disorder, characterized by weakness of the voluntary muscles of the body;

Whereas an estimated one hundred thousand to two hundred thousand diagnosed, and over one hundred thousand undiagnosed, Americans of both sexes, and all races and ages, are afflicted with the disease;

Whereas the Nation faces a continuing need to support innovative research into the causes, treatment, and cure of myasthenia gravis;

Whereas it is appropriate to focus the Nation's attention upon the problem of myasthenia gravis: Now therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 2 through October 8, 1983, is designated "Myasthenia Gravis Awareness Week" and the President of the United States is authorized and requested to issue a proclamation calling upon all government agencies and the people of the United States to observe the week with appropriate programs, ceremonies, and activities.●

ADDITIONAL COSPONSORS

S. 616

At the request of Mr. DURENBERBER, the name of the Senator from Ohio (Mr. GLENN) was added as a cosponsor of S. 616, a bill to promote the use of solar and other renewable forms of energy developed by the private sector.

S. 764

At the request of Mr. WARNER, the names of the Senator from Pennsylvania (Mr. SPECTER) and the Senator from Nevada (Mr. LAXALT) were added as cosponsors of S. 764, a bill to assure the continued protection of the traveling public in the marketing of air transportation, and for other purposes.

S. 1333

At the request of Mr. HELMS, the name of the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 1333, a bill to amend the Federal Election Campaign Act to prohibit the use of compulsory union dues for political purposes.

S. 1359

At the request of Mr. METZENBAUM, the name of the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 1359, a bill to amend the Internal Revenue Code of 1954 to increase the amount of the credit for household and dependent care services, and for other purposes.

S. 1435

At the request of Mr. WALLOP, the name of the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 1435, a bill to amend the Internal Revenue Code of 1954 to allow a deduction for contributions to housing opportunity mortgage equity accounts.

S. 1615

At the request of Mr. MATSUNAGA, the name of the Senator from Kentucky (Mr. FORD) was added as a cosponsor of S. 1615, a bill to amend title XVIII of the Social Security Act to authorize payment for occupational therapy services under part B of the medicare program.

S. 1623

At the request of Mr. DOLE, the names of the Senator from Ohio (Mr. GLENN), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of S. 1623, a bill to establish a National Commission on Neurofibromatosis.

S. 1644

At the request of Mr. NUNN, the name of the Senator from Kansas (Mrs. KASSEBAUM) was added as a cosponsor of S. 1644, a bill to improve Federal criminal sentencing by imprisoning dangerous and violent offenders and by diverting nonviolent offenders from imprisonment to restitution or community service programs.

S. 1699

At the request of Mr. DOLE, the name of the Senator from New Jersey (Mr. BRADLEY) was added as a cosponsor of S. 1699, a bill to amend title XVIII of the Social Security Act to provide medicare coverage of hepatitis B vaccine for vaccine for end stage renal disease patients.

SENATE JOINT RESOLUTION 93

At the request of Mr. EAST, the names of the Senator from Nevada (Mr. LAXALT), and the Senator from Utah (Mr. HATCH) were added as cosponsors of Senate Joint Resolution 93, a joint resolution to designate the month of September each year as "National Sewing Month."

SENATE JOINT RESOLUTION 114

At the request of Mr. NUNN, the names of the Senator from Iowa (Mr. JEPSEN), the Senator from Idaho (Mr. MCCLURE), the Senator from Wisconsin (Mr. KASTEN), the Senator from Washington (Mr. JACKSON), the Senator from Rhode Island (Mr. PELL), and the Senator from New Hampshire (Mr. HUMPHREY) were added as cosponsors of Senate Joint Resolution 114, a joint resolution to request the President to proclaim September 1983 as "National Professional Security Month."

SENATE JOINT RESOLUTION 119

At the request of Mr. HUMPHREY, the names of the Senator from North Carolina (Mr. HELMS), and the Senator from California (Mr. WILSON) were added as cosponsors of Senate Joint Resolution 119, a joint resolution to designate the week of December 11, 1983, through December 17, 1983, as "National Drunk and Drugged Driving Awareness Week."

SENATE JOINT RESOLUTION 121

At the request of Mr. ABDNOR, the names of the Senator from Hawaii (Mr. MATSUNAGA), the Senator from South Carolina (Mr. THURMOND), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of Senate Joint Resolution 121, a joint resolution to designate November 1983 as "National Diabetes Month."

SENATE JOINT RESOLUTION 131

At the request of Mr. DOLE, the name of the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of Senate Joint Resolution 131, a joint resolution designating "National Cystic Fibrosis Week."

SENATE JOINT RESOLUTION 132

At the request of Mr. RIEGLE, the names of the Senator from Arkansas (Mr. BUMPERS), the Senator from Alabama (Mr. HEFLIN), the Senator from Michigan (Mr. LEVIN), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Nevada (Mr. LAXALT), the Senator from New Mexico (Mr. BINGAMAN), the Senator from Florida (Mr. CHILES), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from South Carolina (MR. THURMOND) were added as cosponsors of Senate Joint Resolution 132, a joint resolution to designate the week beginning August 7, 1983, as "National Correctional Officers Week."

SENATE RESOLUTION 126

At the request of Mr. WALLOP, the name of the Senator from Georgia (Mr. NUNN) was added as a cosponsor of Senate Resolution 126, a resolution to express the sense of the Senate that the changes in the Federal estate tax laws made by the Economic Recovery Tax Act of 1981 should not be modified.

SENATE RESOLUTION 139

At the request of Mr. ZORINSKY, the name of the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of Senate Resolution 139, a resolution disapproving the recommendation of the Study Group on Senate Practices and Procedures to abolish the Senate Committee on Veterans' Affairs.

SENATE RESOLUTION 167

At the request of Mr. PRESSLER, the name of the Senator from Tennessee (Mr. SASSER) was added as cosponsor of Senate Resolution 167, a resolution expressing the sense of the Senate that the Federal Government take all

necessary steps to promote travel to the United States by foreigh visitors during the 1984 Summer Olympics and the 1984 Louisiana World Exhibition, to inform such visitors of recreational and commercial opportunities throughout the United States, and to facilitate their entry into and travel within this country.

SENATE RESOLUTION 180

At the request of Mr. METZENBAUM, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of Senate Resolution 180, a resolution expressing the sense of the Senate in support of affordable and decent health care for older Americans.

SENATE RESOLUTION 181

At the request of Mr. BINGAMAN, the name of the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of Senate Resolution 181, a resolution expressing the sense of the Senate that the U.S. Government should support the peace initiatives of the four-nation Contadora group, should indicate its willingness to cease the flow of arms into Central America in conjunction with other nations, and should terminate all programs of assistance to guerrilla forces in Nicaragua.

SENATE RESOLUTION 187—BUDGET WAIVER RELATING TO CONSIDERATION OF S. 856

Mr. ANDREWS, from the Select Committee on Indian Affairs, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 187

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 856. Such waiver is necessary because S. 856 authorizes the enactment of new budget authority which would first become available in fiscal year 1984, and such bill was not reported on or before May 16, 1983, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The waiver of section 402(a) is necessary to permit congressional consideration of statutory authority to provide for an Indian housing program for construction and financing of housing for Indians, and for other purposes.

S. 856 provides an authorization for fiscal year 1984 of $132,500,000. S. 856 was not reported on or before May 16, 1983, because of a lack of agreement among Committee members on the scope of exemptions to the application of the Davis-Bacon Act to projects authorized under S. 856.

The waiver of section 402(a) is necessary to permit congressional consideration of statutory authority for what the Select Committee on Indian Affairs considers to be a viable alternative to the current HUD Indian housing program. In fiscal years 1982 and 1983, funds for the continuation of the existing HUD public assisted housing programs were provided through the appropriations process, without any legislative authorization. Again, a fiscal year 1984 HUD appropriations bill has been approved by both houses of Congress and is on its way to the President for his signature. S. 856 not only provides a workable alternative to the current HUD Indian housing program, which has been the subject of much criticism from the Administration, as well as Indian country, but will also provide a safety-net for Indian housing needs.

The funding for the programs proposed under S. 856 will be under the jurisdiction of the Appropriation Subcommittee on Interior and Related Agencies. The House Appropriations Subcommittee on Interior and Related Agencies completed mark-up on the fiscal year 1984 budget on June 28, 1983, and the Senate Appropriations Subcommittee on Interior and Related Agencies is near completion on its mark-up. It is, therefore, not feasible to provide for the inclusion of appropriations for S. 856, with the exception of Title I of S. 856. Title I, which gives a statutory base to the current Housing Improvement Program at the Bureau of Indian Affairs, was a part of the President's budget request for fiscal year 1984 and has been included in both Houses' appropriations bill for Interior and Related Agencies. The Select Committee on Indian Affairs' report to the Budget Committee on the fiscal year 1984 budget also recommended that $132.5 million in new budget authority be authorized for the initiation of this program. This recommendation was based on the fact that S. 856 had been originally introduced in the 97th Congress as S. 2847, but due to the heavy schedule of the lameduck session did not make it to the floor before the end of that session. In anticipation that S. 2847 would be reintroduced early in the 98th Congress, the Committee included this recommendation in their annual report to the Budget Committee. It is the belief of the Select Committee on Indian Affairs that in the event S. 856 is enacted into law this year, a supplemental request could be made in fiscal year 1984 for start-up costs for Titles II and III of S. 856.

SENATE RESOLUTION 188—RELATING TO BENJAMIN ELIJAH MAYS

Mr. HOLLINGS submitted the following resolution, which was referred to the Committee on the Judiciary:

S. RES. 188

Whereas Benjamin Elijah Mays, throughout his distinguished career of more than half a century as an educator, civil rights leader, and theologian, has inspired people of all races throughout the world by his persistent commitment to excellence;

Whereas Benjamin Mays persevered, despite the frustrations inherent in segregation, to begin an illustrious career in education;

Whereas, as head of the School of Regligion of Howard University and later as President of Morehouse College in Atlanta, Georgia, for twenty-seven years, Benjamin Mays overcame seemingly insurmountable obstacles to offer quality education to all Americans, especially black Americans;

Whereas, at the commencement of World War II, when most colleges suffered from a lack of available students and the demise of Morehouse College appeared imminent, Benjamin Mays prevented the college from permanently closing its doors by vigorously recruiting potential students and thereby aiding in the development of future generations of black leaders;

Whereas Benjamin Mays was instrumental in the elimination of segregated public facilities in Atlanta, Georgia, and promoted the cause of nonviolence through peaceful student protests during a time in this Nation that was often marred by racial violence;

Whereas Benjamin Mays has been the recipient of numerous accolades throughout his career, including fifty-three honorary degrees from universities across the Nation and the naming of a school and a street in his honor; and

Whereas the Presidential Medal of Freedom, the highest civilian honor in the Nation, was established in 1945 to appropriately recognize Americans who have made an especially meritorious contribution to the security or national interests of the United States, world peace, or cultural or other significant public or private endeavors: Now, therefore, be it

Resolved, That it is the sense of the Senate that the President should award Benjamin Elijah Mays the Presidential Medal of Freedom in honor of his distinguished career as an educator, civil rights leader, theologian and his many contributions to the improvement of American society.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to Benjamin Elijah Mays.

Mr. HOLLINGS. Mr. President, I rise today for two purposes, both of them happy. First to wish a very happy 89th birthday to Dr. Benjamin Elijah Mays—he was born August 1, 1894; and second, to introduce a resolution expressing the sense of the Senate encouraging the President to award to Dr. Mays the Presidential Medal of Freedom in honor of Dr. Mays distinguished career as an educator, civil rights leader, and theologian.

Let me share with my colleagues, Mr. President, a brief statement of the background of this outstanding man. He is truly one of South Carolina's most extraordinary natives and a man who has meant much to the civil rights movement of this Nation and the aspirations of its people. His achievements, his ideas, and his principles are profound, and I believe, Mr. President, that my colleagues will readily understand why this distinguished citizen is so deserving of the recognition that the Presidential Medal of Freedom will confer.

The statement follows:

BENJAMIN ELIJAH MAYS

Born in Epworth, S.C., of slave parents, Benjamin Mays became one of the great forces and spokesmen for freedom and human dignity in our country. A graduate of South Carolina State College and Bates College, with a Ph.D. from the University of Chicago, Dr. Mays began his career as a teacher at Morehouse College and South Carolina State College. During the late twenties and the early thirties Benjamin Mays served with the Tampa Urban League, as national student secretary of the YMCA and conducted a study of Negro churches in the United States.

From 1934 to 1940, Dr. Mays served as the dean of the School of Religion at Howard University here in the District of Columbia. In 1940 Benjamin Mays began his distinguished career as president of Morehouse College in Atlanta. While at Morehouse, he served as the spiritual and intellectual fountain for Dr. Martin Luther King, Jr., and other major figures in the civil rights movement. In fact, Dr. King often times proclaimed Dr. Mays his "spiritual mentor."

Dr. Mays retired from Morehouse College in 1967 and was given the title of president emeritus. Subsequently he served as president of the Atlanta Board of Education for 12 years. Benjamin Mays has received many honors including scores of honorary degrees. A street and high school bear his name in Atlanta. South Carolina Gov. Dick Riley awarded him the Order of the Palmetto in 1980 during ceremonies unveiling Dr. Mays' portrait in the South Carolina State Capitol. But these awards and honors can never meet the measure of the man. For, more than a man with fine credentials, he was the spiritual and intellectual leader for a movement dedicated to human progress.

The great journalist and author Samuel Dubois Cooke once said:

"Benjamin Mays has strength of character, gifts of mind, vision, and ability, a zest for life, a stubborn moral courage, a prophetic imagination, a deep commitment to social justice, a single minded commitment to the most precious and enduring values of human enterprise, and a lifelong romance with the world of higher possibilities."

High praise from a very noble source.

But perhaps Dr. Mays described himself best when he said in his autobiography, "Born to Rebel":

"Foremost in my life has been my honest endeavors to find the truth and proclaim it."

And he not only found the truth and proclaimed for himself. He found the truth and proclaimed it for all men and women, of all races, of all religions and from all walks of life for decades to come.

Mr. President, it is obvious to me that the many achievements of Dr. Mays make him a very worthwhile recipient of a Presidential Medal of Freedom. His distinguished career and unselfish service to mankind are truly deserving of this recognition. So that my colleagues can capture the true spirit of Dr. Mays and his lifelong work benefiting his fellow citizens I ask unanimous consent that an address by Dr. Larry A. Jackson, president of Lander College, given at the dedication of the historic marker placed at the birthplace of Dr. Mays on November 7, 1981.

Mr. President, I urge my colleagues to join with me in passing this resolution.

There being no objection, Dr. Jackson's address ordered to be printed in the RECORD, as follows:

ADDRESS BY DR. JACKSON

"History is the essence of innumerable biographies"—Thomas Carlyle.

It is an honor to speak on a day when we reflect on the life of one of America's great teachers and moral leaders. I would like to use my time to explore two questions with you. The first question is this: What is the most important reason for the people of this State to place this monument in this place on this November day? To honor Dr. Mays? I answer "no." That is not the most important reason. The honor which the home county of Dr. Mays owes him by the right of his accomplishments has been far too slow in coming, but it has come. We now, thank God, live in a time when most school children in this county know his name. And a man with schools and college buildings named for him, and with 49 honorary degrees, from institutions as varied in purpose as Harvard University and Lander College, does not need another honor.

The most important reason for placing this monument here is not to honor Benjamin Elijah Mays but to remind us, the citizens who pass here, of the quality and message of his life.

This leads me to my second question. What was it that caused Benjamin Elijah Mays to be different from the crowd and to serve as a teacher and as an example to a whole generation of people who have dedicated their lives to make American democracy work better and to cure it of the illness of racial prejudices?

The historian who traces the movement toward the renewal of American democracy which has characterized this century will find intertwined in this history the life of the teacher and schoolmaster whom we gather to honor today. It was Benjamin Elijah Mays who was the mentor of Dr. Martin Luther King, Jr. and his fellow patriots. (I call them patriots because they were fighting to make reality of the dream of the earlier patriots.)

In a time when we desperately need similar examples of integrity and courage, I ask you to think about this question: "How did his life emerge in our midst." What were the forces which nurtured and generated it?"

Think back with me to the turn of the century. Which of us, had we been walking along this unpaved country road in the year 1894 would have thought that a few feet from us was being born a child who would become a force for justice, truth, and light in his generation. And if we had been told that the child was Black, our incredulity would have been multiplied.

How did this child, born in this simple house, in rural South Carolina, and in a time when the whole area knew little save poverty, overcome the many obstacles which any sane man would have predicted would have prevented him from becoming any kind of a leader, much less a gentle, unbitter leader who advocated dynamic evolution rather than revolution, non-violent love rather than armed hate? How did he come to be? That is the question which gnaws at us as we approach this celebation. Benjamin Mays could have so easily become bitter and resigned. He did not. Why not?

Although there is a great deal of mystery in any life which we human beings cannot explain, and there are providential movements through history that only the most arrogant would try to explain, I am, on the basis of having heard Dr. Mays speak on several occasions and on the basis of having read his autobiography, "Born To Rebel," going to point to at least three influences which nurtured him in a special way and which set him apart from other men from an early age.

These three influences, added to a sound mind and a very good brain given by God, were his family, his church, and his religion.

You are probably surprised that I have listed "his church" and "his religion" separately. In thinking of the church, I am thinking of a social institution of people who took a special interest in, and gave strong nurturing encouragement to Benjamin Mays. In thinking of his religion, I am thinking of prophetic faith which taught Benjamin Mays about justice at an early age and taught him that "love" is the law of life and anything that contradicts love contradicts life in its essence."

Let's look for a moment at the early life of Benjamin Elijah Mays. The simple home in which he was born was characterized by dignity and love. His parents, Hezekiah Mays and Louvenia Carter Mays, had been born into slavery and knew the importance of freedom.

You can sense something of the quality of the home if you picture Benjamin's oldest sister tutoring him in reading and writing prior to the time that the family was able to send him to school. She was an excellent teacher and the quality of her own concern that her brother become educated no doubt accounted in some measure for the success that always characterized him in school.

Picture him at the age of 5. Although he lived in a home characterized by warmth and support, he lived in a county where Blacks were considered not to be the equal of Whites in intelligence or humanity. One of his earliest memories was a night in 1898 when a group of white men rode into his yard on horses and held his father at gunpoint and forced him to humiliate himself by bowing down before them over and over again. It was a night in which seven Blacks were lynched in this county, and we can imagine the fear that ran through the Mays family that night, and we can understand why that scene has never disappeared from the memory of Benjamin Elijah Mays. We marvel that the memory of the Phoenix riots did not embitter Benjamin Elijah Mays forever.

Now picture him at the age of 8, still living in this same simple farm house. It was Children's Day at his church and Benjamin Mays had committed to memory the fifth chapter of the Gospel according to Matthew. When he finished his speech, it is reported that the women stood up and waved their handkerchieves and men stomped their feet in praise. After the applause died down, the minister said, "This boy is going to be a preacher."

In his autobiography, "Born to Rebel," Benjamin Mays reports that he was a marked boy from then on. I ask you today to contemplate on how much the encouragement of that family and that congregation meant to Benjamin Mays. And how much that one incident had to do with the burning ambition that was born in him to become an educated man. Even at eight, Benjamin Mays knew that the only way for him to be truly free and to lead his people out of degradation was by obtaining an excellent education. But it was not a goal easily attained. His father, although supportive in many ways, did not believe that an education was needed. As he told his son, "If you want to preach, the Lord will open your mouth and tell you what to say." "And if you want to farm, you can learn it from me." His father was convinced that these were the only two possible occupations for a Black boy.

In his autobiography, Benjamin Mays recalls many times when he tethered his horse between plowing chores and went into the woods to pray that he might become an educated man. At one point he said to a reporter, "I prayed myself into an education." After overcoming many obstacles, Benjamin

Mays was graduated from the high school at South Carolina State College at the age of 21.

At this point, Benjamin Mays decided to pursue his college education outside of the South. This decision was based upon a very rational analysis of two contradictory influences in his life. (1) He lived in an environment which said to him that he was an inferior person, and (2) he worshipped a God who said that all men were equal. He decided to compete at a very excellent liberal arts college where the majority of the students were white so that he could prove that he was not an inferior person. Benjamin Mays soon proved it. He was not only an honor student at Bates College with the highest academic honor awarded in American higher education, a Phi Beta Kappa Key. The picture of Benjamin Mays in the Bates College annual shows a very determined-looking young man.

He continued his education at the University of Chicago where he was eventually awarded a Master's degree and a Ph. D. degree. These degrees were earned by doing odd jobs and working as a pullman porter, the route to a new life for so many ambitious Black males in those days.

After serving as a pastor, as an urban league representative, and a Dean of the School of Religion at Howard University, Benjamin Elijah Mays reached his most important life's work. At the age of 46, he became President of Morehouse College in Atlanta. Dr. Mays turned a struggling institution into one of the strongest colleges in this country and it was here that he became the mentor for many of the leaders who have renewed American democracy in our generation, leaders such as Martin Luther King, Jr.

For 27 years, Benjamin Mays preached a weekly sermon in the chapel of Morehouse College and students such as Martin Luther King, Jr. looked back upon those sermons as turning points in their lives. Someone said of him during this time, "Mays wanted to invent souls. he wanted to root out the weaknesses and the evasions which were the heritage of 300 years of spiritual and material oppression." "If you are ignorant," he told his students "the world is going to cheat you. If you are weak, the world is going to kick you. If you are a coward, the world is going to keep you running."

And he said other things to those students in those days, and I want to quote a few of them now.

"No person deserves to be congratulated unless he has done the best he could with the mental equipment he has under the existing circumstances."

"It will not be sufficient for Morehouse College, for any college, for that matter, to produce clever graduates, men fluent in speech and able to argue their way through, but honest men, men who can be trusted in public and in private—men who are sensitive to the wrongs, the sufferings, and the injustices of society and who are willing to accept responsibility for correcting these ills."

"It must be borne in mind that the tragedy in life doesn't lie in not reaching your goal. The tragedy lies in having no goal to reach. It isn't a calamity to die with dreams unfulfilled, but it is a calamity not to dream. It is not a disaster to be unable to capture your ideal, but it is a disaster to have no ideal to capture. It is not a disgrace not to reach the stars, but it is a disgrace to have no stars to reach for. Not failure, but low aim is sin."

Now let me close by quoting a few things which others have said of Benjamin Elijah Mays. Samuel Du Bois Cook, a former student who is now President of Dillard University, says "Mays' genius was as an inspirer and motivator as well as a transformer of young men. With the possible exception of Robert Hutchins at the University of Chicago, he had no peer among his contemporaries as a school master. I rank him with America's great educators, with William Rainey Harper of the University of Chicago, Nichols Murray Butler of Columbia, and Charles W. Elliot of Harvard."

When Benjamin Elijah Mays was awarded an honorary Doctorate in Law from Harvard University in 1967, this is what was said of him.

"Creative president of one of our nation's strong colleges; unremitting champion of rigor and high purpose in education."

And finally, when the college in Benjamin Mays' county of birth, Lander College, became the 34th college to give him an honorary doctorate these words were included in the citation.

"We know of no life more characterized by concern for the needs and distresses of others than the life of Benjamin E. Mays. Against many odds, you disciplined yourself and prepared yourself morally and intellectually to walk among your contemporaries as befits a man whose life is informed by and dedicated to the Judeo-Christian ethic."

Let me close with this word of thanks to Benjamin Mays: If mankind has learned anything about teaching in our long years on earth, we have learned that no words, no gesture, can be more persuasive than an authentic life, a life dedicated to a quest for truth and justice. The monument will serve to remind us of such a life. Dr. Mays, you have given us a better vision of what human life is supposed to be like, and we will always remain in your debt.

SENATE RESOLUTION 189—BUDGET WAIVER RELATING TO THE CONSIDERATION OF S. 500

Mr. THURMOND, from the Committee on the Judiciary, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 189

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 500. Such waiver is necessary because S. 500, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1984, and such bill was not reported on or before May 15, 1983, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

The budget waiver will allow Senate consideration of S. 500 which provides for the establishment of a 30-member Commission, plus a nonvoting participant from Spain and a nonvoting participant from Italy, to plan, encourage, coordinate, and conduct the commemoration of the quincentennial of the voyages of Christopher Columbus.

S. 500 authorizes the appropriation of an estimated $220,000 for fiscal year 1984 and $220,000 for each of the fiscal years beginning on October 1, 1984, and ending before October 1, 1992, and $20,000 for the period from October 1, 1992, through November 15, 1992, resulting in a total appropriation of $2,000,000.

AMENDMENTS SUBMITTED

SUPPLEMENTAL APPROPRIATIONS CONFERENCE REPORT

MATHIAS (AND OTHERS) AMENDMENT NO. 2106

(Ordered to lie on the table.)

Mr. MATHIAS (for himself, Mr. SARBANES, Mr. SASSER, Mr. BINGAMAN, Mr. EAGLETON, Mr. TRIBLE, Mr. GLENN, Mr. BURDICK, Mr. WARNER, and Mr. DOMENICI) submitted an amendment intended to be proposed by him to the amendment of the House to the amendment of the Senate to the bill (H.R. 3069) making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes; as follows:

At the end of the matter proposed to be inserted by the amendment, add the following:

None of the funds appropriated by this Act may be obligated or expended—

(1) to adopt, to issue, or to carry out a final rule or regulation, a final revision, addition, or amendment to regulations, or a final statement of policy based on any proposed rule or regulation, any proposed revision, addition, or amendment to regulations, or any proposed statement of policy of which a notice was published in parts III-IV of the Federal Register on March 30, 1983 (48 F.R. 13,342 to 13,381) or in parts III through VI of the Federal Register on July 14, 1983 (48 F.R. 32,275 to 32,312); or

(2) to adopt, to issue, or to carry out any final rule or regulation, any final revision, addition, or amendment to a regulation or any final statement of policy which effectuates the purposes of any proposed rule, regulation, revision, addition, amendment or statement of policy referred to in clause (1).

(The remarks of Mr. MATHIAS on this legislation appear earlier in today's RECORD.)

CRITICAL AGRICULTURAL MATERIALS ACT

JEPSEN AMENDMENT NO. 2107

Mr. JEPSEN submitted an amendment intended to be proposed by him to the bill (H.R. 2733) to stabilize a temporary imbalance in the supply and demand for dairy products, to enable milk producers to establish, finance, and carry out a coordinated program of dairy product promotion, to adjust the support levels for the 1983 and subsequent crops of tobacco, to make modifications in the tobacco production adjustment program, and for other purposes, as follows:

AMENDMENT NO. 2107

At the appropriate place in the bill, insert the following new section:

BARTER OF SURPLUS DAIRY PRODUCTS FOR STRATEGIC AND CRITICAL MATERIALS

SEC. . (a) Notwithstanding any other provision of law, during fiscal years 1984

and 1985, the Commodity Credit Corporation shall accept offers from individuals or commercial firms to exchange strategic and critical materials needed to meet unmet national goals established under the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.) for surplus dairy stocks owned by the Corporation if—

(1) such stocks will be exported;

(2) the value assigned to such stocks at the time of delivery is less than the world price at such time;

(3) the value assigned to such materials at the time of delivery is less than the world price at such time;

(4) the Secretary of Agriculture is reasonably assured that export markets for United States dairy products through commercial channels will not be displaced by such exchange; and

(5) such exchange will not result in the expenditure of funds by the Secretary or the Corporation other than for normal administrative costs.

(b) In carrying out subsection (a), the Corporation shall use in each of the fiscal years 1984 and 1985 a quantity of dairy products equal to—

(1) at least 15 percent of uncommitted surplus dairy stocks existing at the beginning of fiscal year 1984; or

(2) if the Corporation does not receive offers to exchange such quantity of dairy products, a quantity equal to the quantity of such stocks offered to be exchanged.

(c) The Corporation may—

(1) transfer strategic and critical materials acquired under this section to the National Defense Stockpile established under the Strategic and Critical Materials Stock Piling Act, and shall be reimbursed for such materials, in accordance with section 4(h) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714(h)); or

(2) retain possession of, and title to, such materials.

(d) No later than six months after the date of the enactment of the Dairy and Tobacco Adjustment Act of 1983, and each six months thereafter through fiscal year 1985, the Secretary of Agriculture shall submit a report to the Congress describing—

(1) exchanges made under this section during the previous six month period; and

(2) any offers for exchanges made under this section during such period which were rejected by the Corporation and the reasons for such rejection.

NOTICES OF HEARINGS

SUBCOMMITTEE ON WATER AND POWER

Mr. NICKLES. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Water and Power to consider S. 752, to authorize certain additional measures to assure accomplishment of the objectives of title II of the Colorado River Basin Salinity Control Act, and for other purposes; S. 1027, to amend Public Law 96-162; and S. 483, to provide for the relief of water users deprived of winter stock water on Willow Creek, Idaho, below the Ririe Dam and reservoir.

The hearing will be held on Thursday, September 15, beginning at 10 a.m. in room SD-366 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Water and Power, U.S. Senate, Washington, D.C. 20510.

For further information regarding this hearing, you may wish to contact Mr. Russ Brown of the subcommittee staff at 224-2366.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Monday, August 1, in order to receive testimony on the following nomination:

Mr. John F. Keenan, of New York, to be a U.S. district judge for the southern district of New York.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Monday, August 1, to consider the following nominations:

Alvin L. Alm, to be Deputy Administrator of the Environmental Protection Agency;

Howard M. Messner, to be Assistant Administrator of the Environmental Protection Agency; and

Fred M. Bernthal, to be a member of the Nuclear Regulatory Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENT

TOWARD A NEW ERA

● Mr. GARN. Mr. President, in the June 24, 1983 issue of the National Review, there appeared an article entitled "Toward a New ERA?", written by Lincoln C. Oliphant, formerly a member of my staff and presently a member of the Senate Republican Policy Committee staff.

The article is timely, in light of the renewed interest in an equal rights amendment and the hearings on the subject that have begun to take place in both the Senate and the House of Representatives, and offers an entirely new perspective which ought to be carefully considered as the debate proceeds.

Mr. Oliphant points out that while the 1972 version of the Equal Rights Amendment "ought to remain interred," that does not necessarily mean there should be no such amendment at all. "In fact," he says:

A new amendment may be far preferable to hoping that the Supreme Court will reject, year after year, the absolutist arguments thrust at it by radical feminists and civil libertarians. . . . A new amendment would provide the opportunity to bind the Court to something besides its own dispositions.

He suggests that the necessary starting point for discussions about equal rights for men and women is "the idea that men and women can be importantly different without being fundamentally unequal." He goes on to propose language for an equal rights amendment which includes certain important exceptions, which supporters of the current 1972 version "aver is there implicitly" but refuse to spell out.

The article is a valuable and important contribution to the continuing dialog on the ERA, and I highly recommend it to all of my colleagues.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

[From the National Review, June 24, 1983]

TOWARD A NEW ERA?

(Lincoln C. Oliphant)

The Equal Rights Amendment is dead. But the faithful, led by Tip O'Neill in the House, Paul Tsongas in the Senate, and Judy Goldsmith in the streets, have begun calling it to arise, Lazarus-like, to live again. On May 26, the prayers of the faithful were partially answered, when the Senate Subcommittee on the Constitution began hearings on S.J. Res. 10/H.J. Res. 1: the same Equal Rights Amendment that was first proposed in 1972. A two-thirds vote in each House would reanimate this once-dead amendment, although three-fourths of the state legislatures would then need to adopt it for it to become part of the Constitution.

Amending the Constitution is just shy of impossible. Of some nine thousand constitutional amendments that have been introduced in Congress, only 26 have been ratified—11 of them in the eighteenth century. Generally, conservatives do not favor amending the Constitution, and the proposed 1972 Equal Rights Amendment was particularly ill-favored. But should opponents of that ERA oppose every amendment that would set a constitutional standard for sex-based classifications? Perhaps not.

Equal-rights amendments are not all created equal. One can see the need for an ERA without having any particular affection for the version that sprang forth in the spring of 1972—a version that was itself different from the original proposal of 1923. The 1972 version had more infirmities than strengths, yet it was not without the latter. Foremost among its strengths was an ability to express quite starkly a broad principle of equality that made many friends for the amendment. Ironically, some of these ostensible friends were responsible for the amendment's demise.

In addition, the infirmities of the 1972 amendment made it many enemies. It left gaping holes to be filled by the federal judiciary, and while some hole-filling is inveitable, the people—whose Constitution it is—ought to minimize the opportunities for judicial government. When a Senate subcommittee asked about the meaning of the 1972 amendment, its chief Senate sponsor, Paul

Tsongas of Massachusetts, could only repeat, "The courts will decide . . . the courts will decide . . . the courts will decide . . ." Yet in many highly sensitive areas where the meaning of the 1972 amendment was reasonably discernible, it would have set bad rules in constitutional concrete. The amendment was, in other words, both too vague and too specific, in the sense that its specifics were wrongly chosen. This seemingly contradictory criticism helps to explain the confusion about the meaning of the 1972 amendment, and the charges and countercharges exchanged during ten years of rancorous debate.

It also suggests that the 1982 Equal Rights Amendment ought to remain interred. Does this mean that there will be no Equal Rights Amendment at all? For now, it means exactly that. But, in the long run, we must ask ourselves if we are content with the status quo. The status quo is that the Supreme Court makes up sex-discrimination rules out of whole cloth.

Indeed, the current rules vary from case to case. Most recently, the Court has upheld some laws that classify persons according to sex, but only when the government can advance an "exceedingly persuasive" justification for such classifications. This rule is about right, in my judgement, but it cannot be said to be grounded in the original understanding of the Fourteenth Amendment or any other provision of the Constitution. Though the Court had no business doing so, it has done an admirable job of rulemaking. Had it not the 1972 ERA would today be the law of the land. The Court-created rules substantially reduced the felt need for an equal-rights amendment.

Since the current rules are more the Court's than the Constitution's, however, they are the Court's to change. Change will not occur haphazardly, for the Court has its precedents. But trusting the status quo is trusting the Court with its own rules. To propose and adopt a new amendment would be to entrust the Court with the people's ratified rule. There is risk in both alternatives, but that is the point: accepting the status quo is not a risk-free alternative.

A new equal-rights amendment should deal with fundamental questions about the nature of men and women, about the nature of equality, and about American constitutional government differently from the way the 1972 amendment did. The general rule of the 1972 amendment was that "sex should not be a factor in determining the legal rights of men or of women." Most Americans, while agreeing that in most cases sex should be irrelevant, would stop short of such an absolute rule. The gap between mostly not and never, while not wide, can be deep, and brimful of the most important questions facing the human race.

If the best rule is not an absolute one, then it will be one anchored in an equality that recognizes important differences between the sexes. The new rule should partake of the sort of insight shown by Professor Elizabeth H. Wolgast in her book, "Equality and the Rights of Women:"

"Justice requires men and women to be treated differently, not in all areas but in some important ones. It is not just a curious fact that men never bear babies. Nor do women bear them because society teaches them how and insists they do, while guarding this knowledge from men. And from this difference other consequences flow. A good society will acknowledge the differences, treating them with respect and fairness and accommodating institutions to the human condition. To proceed otherwise is to imitate Procrustes, who invited guests to spend the night and then cut them down or stretched them to fit his bed. It is to be guided by a strange sense of priorities."

Under an equal-rights amendment grounded in reality rather than in ideology, sex classifications would be carefully scrutinized but not always prohibited. A classification by sex ought to be permissible, for example, if its real effect is to bring about more equal treatment. The 1972 ERA seems to require a blind indifference to sex under the banner of fairness and equality.

For instance, the National Organization for Women (NOW), currently led by Judy Goldsmith, opposes the use of sex-based actuarial tables in insurance plans. The ERA would have eliminated this evil, NOW says. Of course there are real differences between women as a group and men as a group. Young women, as a group, are better drivers than young men. Women, as a group, live longer than men. The lifespan of any woman or any man is unknowable, but the best possible way to treat her or him fairly is to use all available data, including statistical data. NOW complains that this is stereotyping, not enlightened thinking, and it is currently litigating its complaints under the 1964 Civil Rights Act (by the time this article is published, the Supreme Court may have decided the issue as regards pensions); but in the words of Chief Justice Burger (in dissent), "This is in no sense a failure to treat women as 'individuals.' . . . It is to treat them as individually as it is possible to do in the face of the unknowable length of each individual life." Eliminating sex-based actuarial tables is also likely to increase the total insurance costs women will have to pay.

The idea that men and women can be importantly different without being fundamentally unequal is the necessary starting-point for all serious analysis of how to achieve equal rights between the sexes. Rather than a Procrustean rule, a new amendment should offer the flexibility of equal protection under the laws. The difference between these two concepts was illustrated in a recent 5 to 4 decision of the Washington State Supreme Court.

An old (1927) Washington state law requires each of its political parties to be governed by a state central committee. This committee is composed of two members from each county, one man and one woman. The chairman and vice chairman of the state central committee are to be of opposite sexes. The law was challenged under the state's Equal Rights Amendment. Five justices upheld the law, holding that "while there is certainly a classification [by sex], there is equality of treatment and this is sufficient to meet the requirements of the Equal Rights Amendment." Four justices dissented, writing, "The Equal Rights Amendment . . . absolutely forbids any classifications of persons based on sex."

The four dissenters in this case are quite clearly in accord with the stated objectives of the 1972 Equal Rights Amendment. Unlike that amendment, a properly drawn national amendment would tolerate the Washington law. The women of Washington and the 49 other states should consider such matters when contemplating their participation in political life and their support for a federal equal-rights amendment.

Even more fundamentally, the 1972 Equal Rights Amendment contradicted certain important heterosexual rights. We live in a heterosexual society based on heterosexual values. Correspondingly, we have established various heterosexual rights, the most important of which pertain to marriage. But heterosexual rights cannot be consistent with a constitutional amendment that prohibits all sex-based classifications.

The ideal non-heterosexual, non-sexist society has been described by Professor Richard Wasserstrom:

"If a non-sexist society is a society in which one's sex is not more significant than eye color in our society today, then laws which require the persons who are getting married to be of different sexes would clearly be sexist laws. [The] typical adult in this kind of non-sexist society would be . . . indifferent to the sexual, physiological differences of other persons for all significant interpersonal relationships. Bisexuality, not heterosexuality or homosexuality, would be the typical intimate, sexual relationship in the ideal society that was assimilationist in respect to sex."

Would the 1972 Equal Rights Amendment have created a society like the one Wasserstrom describes—one that is "assimilationist in respect to sex"? No, if for no other reason than that human heterosexuality runs deeper than does positive law. But the 1972 amendment would have undermined the legal foundations of a heterosexual society because a heterosexual society requires some classifications by sex.

Some supporters of the 1972 version argue that it does not conflict with legal preferences for heterosexuality because it contains two inherent exceptions to the general rule against all sex classifications. The first exception, these supporters say, permits classifications based on physical characteristics unique to one sex and "closely, directly, and narrowly confined" to the unique characteristic. The second alleged exception is for privacy. Doubts have been raised about the real existence of these exceptions. The doubts began when the Senate flatly rejected Senator Sam Ervin's proposed amendments to the 1972 ERA that would have included in the language of the amendment specific exceptions for privacy and unique physical characteristics. Doubt is all too natural when proponents of a measure refuse to spell out what they aver is there implicitly. If an exception is really there, sub silentio, why not remove all doubt by writing it down? I have never heard a satisfactory answer to that question.

If the 1972 version permits exceptions for unique physical characteristics, the exceptions are few indeed, and mostly irrelevant. Laws affecting sperm banks and wet nurses are the favorite examples of the amendment's advocates. Sperm-bank and wet-nurse laws hardly seem to go the heart of the policy's concerns, however. Consider instead the example of statutory rape.

Michael M. was charged under California law with the statutory rape of Sharon, a 16-year-old. Michael M. challenged the constitutionality of the law because it was sex-specific ("Sexual intercourse accomplished with a female not the wife of the perpetrator, where the female is under the age of 18 years"). He lost in both the California Supreme Court and the United States Supreme Court, but not for lack of powerful friends. The Women's Legal Defense Fund (WLDF) and the American Civil Liberties Union (ACLU) urged, with Mr. M., that the California law was unconstitutional under the Equal Protection Clause of the Fourteenth Amendment. By one vote, the U.S. Supreme Court disagreed. If the litigation had taken place within the framework

of the 1972 Equal Rights Amendment rather than the Equal Protection Clause, the statute would almost certainly have fallen.

There are reasons for treating young men and young women differently in matters such as statutory rape, but the 1972 ERA would not have countenanced these reasons. Some of the reasons that different treatment should be constitutionally permissible were explained by the Solicitor General of the United States in the Carter Administration, who came to the defense of the California statute: "Young men and young women are not similarly situated with regard to the problems and risks of sexual intercourse," because only women can become pregnant. There are "dramatic biological distinctions between prepubescent males and females" that expose the young female, but not the young male, to serious physical injury and the risk of later illness such as cervical cancer. Females may be engaged in sexual intercourse while still very young; very young males are generally incapable of intercourse. "Sexual assaults on young females are a far greater problem than sexual assaults on young males." And carnal-knowledge and statutory-rape laws "facilitate the prosecution of forcible rapes involving young victims" where, as in the Michael M. case, there are serious evidentiary problems that would make forcible rape difficult to prove.

As noted, part of the justification for the statute was based on a "unique physical characteristic": only females can become pregnant. (The WLDF thought this was a ruse because "only penetration and not emission is necessary to complete the crime . . ." Next, I suppose, the WLDF is going to be requiring prosecutors in rape trials to prove penetration, emission, *and* fertility.) The fact of female pregnancy did not satisfy the feminist and civil-libertarian litigators here, and it will not satisfy them in the future. These are the same people who brought us the 1972 amendment, and they are the people who will be defining, in the courts, any equal-rights amendment that is eventually ratified. Look for sperm banks and wet nurses to be within the alleged exception for unique physical characteristics, and statutory rape to be without it.

Concurring in the Court's judgment in the Michael M. case, Justice Stewart wrote:

"The Equal Protection Clause does not mean that the physiological differences between men and women must be disregarded. While those differences must never be permitted to become a pretext for invidious discrimination, no such discrimination is presented by this case. The Constitution surely does not require a state to pretend that demonstrable differences between men and women do not really exist."

A new amendment should reflect Justice Stewart's approach, allowing legislatures to enact sex-specific statutory rape laws justified in part as pregnancy-prevention measures.

The 1972 ERA is also alleged to have an implicit exception for privacy. There is reason to doubt the reality of this exception, too, at least if we judge from the words of two important advocates of that amendment, the United States Commission on Civil Rights and the NOW Legal Defense and Education Fund (LDEF). (The LDEF prepared the "draft report" that was the "basis for [the commission's] discussions." A very cozy arrangement.)

The Civil Rights Commission said in its 1981 report on the ERA that the 1972 version would close the bona fide occupational qualification (BFOQ) "loophole" (the commission's word) of Title VII of the 1964 Civil Rights Act. Title VII prohibits sex discrimination in employment, but sex can be a BFOQ permissible under the statute, where, for example, an employer wants to hire a man to play Hamlet. The bfoq exception is a tiny exception to the nationwide rule against sex discrimination in employment.

The bfoq exception is very important, however, for protecting privacy. The exception has been used to allow hospitals to limit their obstetrics and gynecology nurses to members of the female sex. States and localities have been permitted to require juvenile-home supervisors to be females in the girls' home and males in the boys' home. Based on records showing the system to be "rampant [with] violence" and like a "jungle," Alabama has been permitted to exclude women from "contact" positions in its all-male prisons, and men from such positions in all-female prisons.

The 1972 version—according to its prominent supporters, the Civil Rights Commission and the LDEF—would eliminate the bfoq exception to Title VII. When that exception is eliminated, our legitimate rights of privacy will be diminished. How the BFOQ exception can be eliminated when the ERA is supposed to have its own exception for privacy is a great mystery—unless the alleged exception is itself an illusion.

Some of the weaknesses of the 1972 amendment have been described here partly because that version is now once again a live issue; also because any movement toward a new amendment must begin with the knowledge obtained from the debate over the old. The wording for such an amendment, drawing on some of the lessons of the old one, is set out below. The proposal is my own, although most of the phrases have been borrowed from others. Like the 1972 amendment, this is a text that can be improved.

Section 1. Neither the United States nor any state shall deny to any person the equal protection of the laws on account of sex.

Section 1 is based on the Equal Protection Clause and contains the general rule, which requires equal protection or equal treatment. Sex classifications are not absolutely prohibited.

Section 2. This article shall not prohibit the United States or any state from making legal distinctions respecting motherhood, or based on pregnancy or other physical differences between the sexes, or from making laws respecting privacy.

The references to pregnancy and motherhood recognize that humankind is a two-sex species and that women are different from men in the important respect of having babies. This amendment would not prohibit laws reasonably related to the status of women as mothers. The references to motherhood and pregnancy are intended, inter alia, to emphasize the legitimacy of laws relating to heterosexuality and the primacy of the family among heterosexual institutions.

Section 2 also explicates what is said to be implicit in the 1972 version. Distinctions based on bona fide physical differences are made clearly allowable and legislatures are permitted to weigh privacy more heavily than equality when making legislative judgments. The subtleties of the 1972 amendment are not to be trusted. If an exception is real, let it be explicit.

Section 3. This article shall not prohibit the United States or any state from exempting women from the compulsory military service or combat assignment, or from regulating abortion or sexual offenses.

Section 3 lists specific exemptions where policy objections can now be anticipated and where reasonable legislative prerogatives should be preserved. The most important areas are included, although readers may find the list too long or too short.

Contrary to the assertions of some advocates of the 1972 ERA, that proposal has a great deal to do with abortion. (Some, but by no means all, of the available evidence is collected in Congressman Henry Hyde's testimony of May 26, 1983, to the Senate Subcommittee on the Constitution.)

Section 4. Congress and the several states shall have the power to enforce this article by appropriate legislation.

Section 4 permits the states and Congress to enforce the article within their respective jurisdictions. States might differ on their methods of enforcing the equal protection of the laws. For example, some states might require political parties to be organized along the lines required by Washington state. Other states might prohibit such restrictions and simply require that the two top vote-getters be the county representatives to the state central committee. Both approaches coud be upheld under the new amendment. There is enormous strength in a system so combining equality and flexibility.

Any attempt to draft a constitutional amendment to regulate sexual classifications is fraught with difficulty. It is easy to prohibit all classifications, and easy to permit them all, but delineating a reasonable standard between the two extremes is difficult indeed—which is an excellent reason for permitting some legislative flexibility. The drafting difficulties are substantial, but they will be dwarfed by the political realities. Radical feminists, by and large, will disapprove of a new amendment. They are committed to their 1972 version, now being revived in Congress. Opponents of the 1972 amendment are going to be much tempted to accept the status quo, a temptation that I find alluring my self. It must be remembered, however, that the status quo consists in the Supreme Court's making up rules out of an Equal Protection Clause that was not designed for the purpose.

There is no safety in the status quo. Arguably, there is less danger in the statue quo than in a change, but that is arguable. In fact, a new amendment may be far preferable to hoping that the Supreme Court will reject, year after year, the absolutist arguments thrust at it by radical feminists and civil libertarians.

The Court is not now bound by the chains of the Constitution, although it will pay some deference to its own precedents. A new amendment would provide the opportunity to bind the Court to something besides its own dispositions.●

HERBERT M. FRISBY

● Mr. SARBANES. Mr. President, I rise to pay tribute to the memory of Herbert M. Frisby, a courageous American and a truly outstanding Baltimorean, who died on July 26, 1983, at the age of 97. A student of Eskimo culture who made the last of his 21 trips to the Arctic Circle when he was 80 years old, Herbert Frisby lived his entire life to its fullest, truly embracing the spirit of his favorite maxim: "No worthy task is to be left undone because it seems impossible."

As a teacher and principal in the Baltimore City schools for more than 30 years and as a student himself and explorer of the Arctic north, Herbert Frisby both inspired and enlightened all whom he touched—students, friends, viewers of his exhibits, and readers of his numerous travel articles. His own inspiration had come, he said, from the announcement in his sixth grade geography class that another black Marylander, Matthew Henson, had accompanied Robert E. Peary on the first expedition to the North Pole in 1909. He vowed then to be the second black to attain that goal. And despite the immediate ridicule of his teacher and the racial barriers that existed, Herbert Frisby did become the second black man to reach the North Pole. Although 70 years old at the time, a lifelong dream was fulfilled when he was flown over the North Pole by the U.S. Air Force to drop a strongbox containing an American flag and a bronze plaque commemorating Mr. Henson as the first black to reach the North Pole.

The legacy left by Herbert M. Frisby is rich in spirit, courage, and vitality. His collection of arctic artifacts has been exhibited at the Maryland Science Center and the Maryland Historical Society. The Herbert M. Frisby Historical Society, devoted to the history of black Marylanders, is named after him. An editorial in the Baltimore Sun on July 27, 1983, summarizes well the achievements and accomplishments of this extraordinary Baltimorean. I ask that it be printed at this point in the RECORD.

The editorial follows:

FRISBY OF THE NORTH

Not long after Robert E. Peary and five other men reached the North Pole in 1909, a teacher told sixth graders in a Baltimore Jim Crow school about Matthew A. Henson, the Marylander in the group, the first black man at the Pole. "I'm going to be second," a boy blurted out. For this he was made to write 500 times, "I will not talk out foolish things in class."

In 1956, a U.S. Air Force plane swooped low over the North Pole. Out dropped a tablet honoring Henson and the flags of the United States and Maryland. They fell from the hands of that boy, who at that moment became the second black man to reach the Pole.

Herbert M. Frisby's message in a life career as teacher in Baltimore schools, mostly segregated, was the opposite of the admonition he received. He taught by demonstration to pick an impossible goal and get there. "There are no Alps," he said.

Most boys drop their 11-year-old obsessions. Mr. Frisby clung to his, for the Arctic and for Henson. It took World War II and service as a correspondent for the Afro-American newspapers to get north, following black servicemen wherever they went, including Alaska and Greenland. He returned again and again, often on his own teacher's salary, more than 20 times, even in his 70s.

"Living in the Arctic is rough, rugged, harsh and everything negative to human existence," he said. But he had "Arctic fever." He lived with Inuit or Eskimos in Alaska, toured scientific installations in Spitzbergen in International Geophysical Year, inspected facilities in Norway and a Canadian station on Baffin Island. His home, "the Igloo," was filled with Arctic hides and Eskimo artifacts.

Mr. Frisby believed that Henson reached the Pole 45 minutes before Peary. His 15-year crusade to obtain proper honors for Henson succeeded in 1961 with placement of a memorial to the "co-discoverer of the North Pole" in the State House.

The dogged Douglass High School science teacher crossed terrain closer to home that was harsh and negative to human existence. His insistence on taking a course in greenhouse gardening offered to whites in 1949 by the parks department broke the color bar at Druid Hill Park. Denied access to an anthropology summer course at the University of Maryland College Park because of race, he took it at the University of Alaska.

Mr. Frisby, who died well up in years on Tuesday, combined research with the honorable profession of science teaching. He overcame barriers no American today need face. He said, "No worthy task is to be left undone because it seems impossible." He personified achievement in the Baltimore city schools.●

SBA'S 30TH ANNIVERSARY

● Mr. D'AMATO. Mr. President, I rise today to commemorate the Small Business Administration's (SBA) 30th anniversary. Since 1953, the SBA has been hard at work providing for the needs of small businessmen, insuring that they are able to successfully compete in an increasingly complex economy.

Entrepreneurial spirit is one of the things that makes America strong. Small businesses make an overwhelming contribution to the technical and creative advantage that this Nation enjoys. Without the achievements of the small business sector, the United States would not be the great society it is today.

America's economy is based on the continued viability of two streets—Wall Street and Main Street. Millions of Americans, from all walks of life, are dependent on the goods and services provided by small business, from bakeries and barbershops to software and defense products. Small businesses provide a substantial proportion of the Nation's employment base. The continued health of the small business community is essential to the future strength of our economy.

Small businesses, however, operate at a distinct disadvantage in the marketplace. These firms have limited resources, but must perform many of the same corporate functions as large conglomerates with open access to the credit market. One of the most important problems facing the small business community is the difficulty raising capital. Wall Street and Main Street do not always interact well, financial institutions are often unwilling to extend the necessary credit. While large companies may rely on a corporate credit history, small businesses often do not have this advantage. One important role of the SBA is to help insure that small businesses have ample opportunities for capital formation.

In this era of budget cutbacks and Government belt tightening, legislators must remember that savings at the Federal level which shift costs onto other sectors are imaginary savings. Expanding the tax base should be the goal of policymakers. Actions taken to constrain SBA's lending authority do not serve this purpose. A Government agency such as the SBA cannot succeed in its goal if it is denied the ability to use all available efficient means to effectively pursue its mandate.

Mr. President, there are over 13 million small businesses in this country and this number continues to grow. The SBA makes an important contribution to the continued success of these enterprises through such programs as loan guarantees, disaster loans, and managerial assistance. I am proud to personally thank the men and women of the Small Business Administration for their significant contribution to the continued health of our Nation.●

THE CLINCH RIVER FINANCING PLAN: NOTHING TO SHARE

● Mr. HUMPHREY. Mr. President, recently Secretary of Energy Donald Hodel announced that he would ask Congress to make the Breeder Reactor Corporation's (BRC's) final off-budget funding proposal for the Clinch River breeder reactor project law before the end of this fiscal year. This announcement came in answer to Congress recent passage of the energy and water development appropriation for fiscal year 1984, which prohibits further funding for Clinch River until substantial industry cost-sharing is enacted.

Unfortunately, the proposal Hodel has agreed to back is no better than the plan he refused to submit to Congress 3 months ago in May. The reason why is simple: The plan he has been asked to back now is based on the earlier plan and has the same fundamental flaws. It still does not answer Congress' request for industry cost-sharing because it does not place any industry investment capital at risk. It still requires interim private borrowing and is virtually certain to increase the cost of paying for the project over continuing to fund it through congressional appropriations. Finally, it still depends entirely on Government guaranteed issues and Government guaranteed tax benefits.

Mr. President, it is important that whatever Congress does to defuse the Clinch River breeder reactor contro-

versy, it not end up making matters worse. My own staff has had a chance to analyze the proposal Secretary Hodel has agreed to back. I ask that the full text of this analysis and a dear colleague letter that Senator BUMPERS and I recently distributed on the BRC proposal's flaws be entered into the RECORD.

The material follows:

U.S. SENATE,
Washington, D.C., July 28, 1983.

DEAR COLLEAGUE: On July 21, 1983, Secretary of Energy Donald Hodel announced that he would ask Congress to make the Breeder Reactor Corporation's (BRC's) final off-budget funding proposal for the Clinch River Breeder Reactor Project law before the end of this fiscal year. This proposal (attached) appears to be fundamentally unsound and to fail the requirement of fiscal year 1984's Energy and Water Development Appropriation that there be substantial industry cost-sharing before the project is allowed to proceed.

Our reasons for questioning the BRC's final proposal are detailed in the attached stafff analysis and center on the following points:

1. Federal support and establishment of the BRC's proposed American Energy Development Corporation sets a dangerous precedent. The federally supported corporation could equally well be used to conceal funding for Clinch River's fuel cycle support activities—$3 billion worth of line items normally funded separately from the project. In fact, the project's proponents attempted to establish such off-budget funding for Clinch River last fall when it was suggested that an off-budget nuclear fuel cycle activities account be created within the nuclear energy budget.

2. The plan is not an industry cost-sharing proposal because no industry funds are placed at risk. Indeed, industry itself publicly admits this. Instead of true cost-sharing, which would reduce federal expenditures through increased industry contributions to the project, the plan would merely take a portion of the project's funding off the annual federal budget by having the government lend money to itself through the sale of government-guaranteed bonds. This cosmetic move in no way reduces federal spending on the project. More important, because the plan requires interim private borrowing before the government-guaranteed bonds are sold, it will actually increase the cost of financing the project as compared to continued federal appropriations.

3. The BRC task force and financial houses that the Department of Energy paid nearly $1 million to produce this proposal did not follow Congressional instructions to reconsider the original cost-sharing proposal of 1971, which had the nuclear industry pay for nearly one-half of the project's costs. Also, the task force failed to consider the aggressive cost-sharing plans now in place in Germany, France and Japan for their breeder industrialization development efforts, even though the task force was instructed to do a "vigorous" exploration of alternative cost-sharing proposals.

As the attached staff analysis, "The Alternative Financing Plan for Clinch: Nothing to Share," makes clear, the BRC's plan is far less than it claims to be. The plan should be carefully reviewed by the appropriate authorizing and appropriating committees and should proceed as normal legislation. In no event should the Senate resort to any last-minute legislative procedures.

With warmest regards, we are

Sincerely,

GORDON J. HUMPHREY,
U.S. Senator.

DALE BUMPERS,
U.S. Senator.

THE ALTERNATIVE FINANCING PLAN FOR CLINCH: NOTHING TO SHARE

BACKGROUND

Shortly after the Clinch River Breeder Reactor project was first authorized in 1971 at a cost of $400 million, an agreement was reached among the nation's electric utilities, the Breeder Reactor Corporation (the BRC, which acts on the utility industry's behalf on the Clinch River project), and the Atomic Energy Commission that the utilities would contribute $257 million (and whatever interest this amount might earn) to defray the project's construction costs. In exchange, the utilities would be able to get in on the ground floor of breeder technology, which they assumed they would require by the early 1980s to meet what turned out to be unrealistically high electricity demand projections. This 50 percent contribution did not entitle the utilities to any equity share or ownership in the project. The project itself was to be built on federal TVA property and TVA secured an option to buy the plant if the government chose to sell. In 1972 the AEC increased the project's estimated construction costs to $700 million and the utilities demanded that their contribution pledge by frozen at $275 million plus interest.

Unfortunately, the project's estimated cost continued to rise. The Department of Energy (DOE) now admits that the reactor's construction will cost at least $4 billion. Last December after funding for the project was defeated in the House and carried in the Senate by only one vote, Congress instructed DOE to "vigorously explore proposals, including a reconsideration of the original cost-sharing arrangement [the 50 percent contribution arrangement], that would reduce Federal budget requirements for the Clinch River Project." DOE was to report its findings by March 15, 1983.

DOE divided its study. It supplied technical information to the BRC, which in turn, submitted general suggestions for developing private financing for Clinch River to DOE on March 12, 1983. The BRC's general suggestion was that government surrender its claim to any of the revenues that might be made from the sale of electricity from Clinch River and use this revenue stream as the basis for issuing government guaranteed bonds that, in turn, could be used to spread out spending on the project.

The Congressional reception to this March suggestion was cool. The critique by the General Accounting Office was negative. GAO observed that "while the proposal will probably change many of the existing project arrangements" (such as the government's right to own and sell the plant and to take the revenues from electricity sales or impute them into the possible sale price it might ask for the plant), "the Federal government still appears to retain most risks if the project fails or if cost overrruns occur." In this case, the new bond holders would get their money back plus interest, plus tax benefits no matter what and would be responsible for none of the new costs or risks. The GAO also pointed out that industry would be able to claim over $400 million worth of tax credits (depreciation, accelerated depreciation, investment tax credits, and research and development tax credits) by participating in the plan even though industry would only be lending the government $800 million.

A possible bill to enact this proposal was drafted by DOE in late April. This bill was nearly introduced in May but Congressmen Bevil and Fuqua objected to the proposal because it failed to reduce the cost of the project to the federal government. After consulting these Congressmen, top officials at DOE decided not to submit the bill (see *Energy Daily*, May 10, 1983).

THE PLAN

Work to finalize the BRC draft proposal continued. On June 23, the BRC task force submitted a second report to Secretary of Energy Hodel. The task force claimed in this final draft that it had developed "a specific plan for raising one billion dollars of private capital for the CRBR project" and "one billion dollars represents 40 percent of the estimated remaining cost to complete the Project (2.4 billion dollars)." In its basics, this plan is identical to BRC's earlier proposals. This plan's elements are as follows:

1. Congressional obligation to be voted on in one up-or-down vote in 1983 and to be spent over the next seven or more years to construct the project (this would effectively remove Clinch River as an issue from Congress for several years)—$1,400 million.

2. Utility contributions already pledged ($257 million) plus interest (approximately $68 million) minus what the utilities have contributed to date ($150 million)—$175 million.

3. Equity shares in the project that a newly created corporation (The American Energy Development Corporation) would begin selling immediately $150 million.

4. $1.04 billion in proceeds from the sale of 30-year 10-percent bonds (to be issued beginning in 1990) minus the interest costs of borrowing an identical amount at 10 percent from private sources to pay for a portion of the project's construction from 1984 through 1990 before the bonds are issued ($365 million)—$675 million.

Total funds raised off budget—($1 billion) plus Congressional obligation—($1.4 billion) equals what DOE estimates it will cost to complete the balance of the project—$2.4 billion.

The first three elements of the plan (the numbered items 1 through 3 above) are fairly straight forward. The plan (1) would require Congress to commit itself to a multiyear obligation to spend $1.4 billion over the next seven or more years to complete the project's construction. The plan (2) assumes the nuclear utility industry will make good on its existing pledge to contribute $257 million plus interest (i.e, that after subtracting the $150 million already contributed, the nuclear industry will contribute another $175 million over the next 5 to 7 years). The plan (3) would create a new entity, the American Energy Development Corporation, that would immediately sell $150 million worth of equity shares in the Clinch River project. These equity shares would entitle their holders to any profits that might be made from the sale of Clinch River electricity (the federal government would surrender its existing claim to the project's electricity sale revenues to the new corporation), and certain tax benefits.

These first three elements would account for $1.725 billion of the $2.4 billion DOE estimates it needs to complete the remainder

of the project; and subtracting the Congressional obligation of $1.4 billion, the off budget elements would account for only $325 million). The balance ($675 million) necessary to bring the private sector funding up to $1 billion and the total funding up to $2.4 would be raised by the plan's fourth element—through the sale beginning in 1990 of 30-year, 10 percent bonds.

The proceeds from these bond sales, $1.04 billion, according to the plan, is precisely the amount of money needed to pay the principal and interest on $675 million (this assuming the money would be needed in equal amounts annually between 1984 and 1990 before the bonds were issued to help pay for the project's construction costs and that money could be had from private lenders at 10-percent).

Private lenders presumably would lend the project the $675 million at a cost of $365 million (the compounded 10-percent interest charge on $675 million for the interim period 1984-1990 described) on the expectation that beginning in 1990 $1.04 billion worth of 10-percent bonds would be issued to pay the private lenders back. The Congressional obligation to spend $1.4 billion to complete construction of the project through 1990 would also serve as an assurance that the project and repayment were sound prospects.

PROBLEMS

In presenting this plan, BRC claims that it has "vigorously explored proposals . . . that would reduce Federal budget requirements for the Clinch River Project." The BRC, though, carefully avoided reference to the complete Congressional instructions, which specifically asked DOE to "includ[e] a reconsideration of the original cost-sharing arrangement." This original cost-sharing arrangement required the nuclear industry to pay for nearly 50 percent of the project's estimated cost and entitled the industry to no equity share or ownership in the plant. The reason why BRC deleted reference to this original instruction is simple: Properly understood, their proposal has nothing to do with the original 50/50 cost sharing arrangement or cost sharing, which would place the nuclear utility industry's money at risk. Thus:

1. No new nuclear industry contributions are provided for by the Plan. In some press accounts the BRC proposal is portrayed as providing an additional $175 million in contributions from the utilities but this, in fact, is the precise amount the utilities already owe the project from their original pledge of $257 million plus interest. This pledge was made by the utilities in a contract with the BRC and the federal government. Given this contract, the utilities would have to pay this $175 million or go to court to get out of their contractual pledge. This would be the case with or without the plan.

2. The plan requires complete government guarantees to industry against all possible risks or losses. Thus, the plan explicitly states that the federal government must guarantee the principal, tax benefits, and a fixed rate of return on the bonds and the tax benefits on the equity shares if the nuclear industry is to participate. The BRC correctly notes that the nuclear utilities currently have neither the money nor the regulatory backing to participate in further support of the project beyond fulfilling their original pledge of $257 million plus interest (even this pledge, it should be noted, is uncertain since only $150 million has been raised so far and the last contribution the nuclear industry made was in very early 1977—over six years ago). What is even more disturbing is the prospect that many state public utility commissions may not allow their utilities to participate in the plan even if the federal government does provide guarantees. As the National Association of Regulatory Utility Commissioners pointed out June 13, 1983 (See The CONGRESSIONAL RECORD, "Alternative Financing for Clinch River—Utility Regulators Unenthusiastic," June 16, 1983), "Many regulatory agencies, by state law or regulatory precedent, either limit or do not allow utilities under their jurisdiction to recover from current ratepayers the cost of plants held for future use or construction work in progress. Some of these same jurisdictions are facing the issue of how to cope with the current and future costs of existing excess capacity and abandonment or termination of power projects that will still be a problem at the projected in-service date of the breeder reactor. To ask the nation's utilities (and ultimately the ratepayers) to invest an additional $800 million in the project during this period of financial uncertainty seems harsh. . . . In addition, while it has been suggested that the Federal Government offer enhanced tax benefits to utilities for financing the project, the fact is that the nation's utility customers already carry a heavy load through rates for deferred income taxes and investment credits." Whether or not utilities can get the government to guarantee a fixed rate of return on investment on the bonds or a high level of tax advantages on the equity shares, then, may be irrelevant to the prospect of them investing: They are already having a difficult time paying for their own construction projects and until these are paid for, their public utility commissions are unlikely to let them spend money anywhere else. What the task force must assume (although they do not admit it openly) is that the government guarantees will make the equity shares and long-term bonds look so attractive that the nuclear utilities (the supposed benefactors of the project) will not have to be relied upon to invest in these issues; that others will buy.

3. Most, if not all, of the plan's $150 million in so-called equity shares would be paid for out of the U.S. Treasury, not from the nuclear industry's existing pool of venture capital. One of the key objections to the BRC's earlier alternative financing formulations of March was under them the federal government would be extending hundreds of millions of dollars of tax benefits to secure industry's participation. Thus, in the case DOE itself used to test out BRC's early formulations, the investment tax credits, depreciation, and accelerated depreciation that industry could take on a loan of $763 million to the project would cause a tax revenue loss, according to the GAO, of over $400 million to the U.S. Treasury. Such tax benefits have not been eliminated in the latest final version of the BRC's plan. Unlike the early March formulations, the final plan would not allow depreciation and accelerated depreciation credits on the bonds that would issued beginning in 1990. But it still permits industry to take a tax investment credit of approximately 10 percent on these bonds, which, assuming industry bought all $1.04 billion of the issues, would be worth over $100 million. The plan also allows depreciation, accelerated depreciation, tax investment credits, and research and development tax credits to be taken on the $150 million worth of equity shares. GAO officials estimate that the later equity share tax benefits could exceed $75 million in value to the industry. Thus, the government guaranteed tax benefits associated with the bond and equity shares could more than repay the industry for the $150 million it might invest in so-called equity shares. Confirming these points, Miner Warner, Salomon Brothers vice president and Commonwealth Edison chairman James O'Conner conceeded in questioning before the press July 21, 1983 (see Energy Daily July 22, 1983) that industry's equity contribution would come from the tax benefits available to the investors, not from risk venture capital. In way of an explanation, O'Conner claimed that he had high confidence that the project would be built and run successfully, but that it was unfair to ask private companies to assume any of the risks associated with the project.

4. The nuclear industry assumes no responsibility for project failures, delays, or cost overruns. In fact, the plan emphasizes that the government must guarantee all tax benefits, interest, and principal on the bonds. These guarantees are to prevail no matter if the project costs more than expected or is not built, if the project fails to perform as well as projected, or if electricity from the plant does not command as high a price as DOE optimistically projects. As for the equity shares, which will be paid for by industry from the tax advantages they gain from investing in the project, these too, as noted above, are to come with their own government guaranteed tax benefits. Given the nuclear industry's repeated insistence that there will be no further cost overruns on the project (that the past overruns were simply due to Congressional delays), one might think that this plan might at the very least eliminate further requests of Congress for money. Yet, when asked (again see Energy Daily, July 22, 1983), the authors of the plan refused to make a commitment that the private participants in the project would not come back to the government for more support should the project turn out to cost more than planned or encounter expensive operation and maintenance problems. More important, the plan itself stipulates that if Clinch River revenues for any reason fall short of the amounts necessary to pay off the investors, the government must pick up the difference.

5. Ironically, the plan increases the federal government's risk exposure and is almost certain to increase the project's cost. As noted above, the government must guarantee tax benefits and full repayment of the bonds even though the project's true final cost is uncertain as is its performance level. More important, though, is that the plan assumes that the interim financing will only cost 10 percent or what it currently costs the government to borrow through the U.S. Treasury to fund federal projects and programs. Even with government assurances, though, the uncertainty inherent to the project is such that this interim financing is almost certain to cost more than Treasury issues. Finally, the plan assumes that the project bonds issued in 1990 will also sell for the same rate as Treasury issues. This again seems unreasonable since even if the bonds are heavily guaranteed, they must carry some risk premium over Treasury issues. Otherwise, the buyer would reason, there would be no reason for the bonds to be issued separately from Treasury issues in the first place. Here it is instructive to note that if the bonds sell for only 1 percentage point more than Treasury bonds, they would add nearly $100 million to the

project's financing costs over what the cost would be if Congress simply continued appropriating money for the project as it has in the past. The only possible way around this difficulty would be to have the Federal Financing Bank issue the bonds (a step that would require the review of the Finance Committee). Nothing in the plan, however, can assure against the need for additional funding to cover project construction and operation overruns or less than expected revenues from electricity sales. As the plan notes, "if net revenues available after paying for fuel and other expenses are insufficient to provide returns on and of private investments in the Project, the Federal government will have to provide money for such purposes."

6. The plan's ability merely to breakeven depends on electricity sales from the reactor, which are almost certain to prove insufficient. Indeed, the plausibility of even attempting this "movement of money around in time" (the phrase of Shelby Brewer, Assistant Secretary of Nuclear Energy) rests on the mistaken assumption that utilities in the region of Oak Ridge actually will need the electricity Clinch River will produce. The plan's authors are rather vague about who will buy Clinch River's electricity. Several utilities have allowed that they might buy some electricity from the plant at avoidance costs (at prices at or below their cheapest alternative source), but no utility has yet been willing to sign binding contracts for purchase of the electricity even under these favorable conditions, much less at fixed market rates. The reason for such reluctance was best explained recently by TVA's general manager, William Willis. As he explained in testimony before the Environment and Public Works Subcommittee on Regional and Community Development in April, ". . . we do not anticipate having any need for capacity in that time frame" (through the year 2000). Confirming his point are not only the TVA's own regional demand projections, but two major, recent Congressional Research Service studies (See Alvin Kaufman and Karen K. Nelson, "Do We Really Need All Those Electric Plants?", CRS Report No. 82-147 S, August 1982 and Office of Senior Sepcialists and the Science Policy Research Division, "Perspective On Regional Electric Utility Planning"—working title of CRS report to be issued July 31, 1983). Their conclusion: Even assuming high demand, electricity capacity for the regions within reach of Clinch River will be overbuilt through the 1990s. Perhaps in recognition of this, Gordon Corey, chairman of the BRC task force that authored the plan, privately volunteered that Clinch River electricity might best be sold to distant Florida—a prospect even DOE rejected in its March 1983 analysis since extensive new, efficient power lines would have to be paid for, built, and integrated into Florida's power grid merely to dispose of the generation capacity of a plant that at most will be equivalent to that of a small coal plant.

7. The plan is an embarrassment when compared against the original cost-sharing agreement and other nations' commercial breeder development cost sharing efforts. Assuming that industry completes its own pledge to contribute $257 plus interest, or approximately $350 million, it will have assumed less than 9 percent of the $4 billion DOE optimistically assumes the project's construction will finally cost. The so-called equity shares would increase the total to at most no more than 12 percent—a far cry from the 50 percent contribution required by the original cost-sharing arrangement, which allowed industry no equity share or ownership in the plant. The plan also compares unfavorably with foreign cost sharing arrangements. Germany, for example, requires private industry to pay for, (not lend government) 29 percent of the commercial breeder effort in that country. Germany's other advanced nuclear energy commercialization effort—a high temperature gas cooled thorium fueled reactor—is cost shared not only with industry, but with money from the state or locality where the work is being done on the reactor (such state cost sharing pays for 9 percent of the project). The French, meanwhile, pay for their industrialization development breeder—the Super Phenix—entirely through increased utility rates and foreign participation. Thus, absolutely no French national research and development money is involved in this effort. Instead, 51 percent of the plant's cost is paid out of increased French utility rates, 30 percent comes from Italian utility cooperation, and 19 percent comes from Dutch, German, and Belgian utility cooperation. Finally, Japan—a heavily corporatist state—requires private industry to pay for (again, not lend) at least 20 percent of the cost of Japan's commercial breeder effort.

CONCLUSION

Recently, Secretary Hodel spoke before the staff of the Washington Times and Nucleonics Week and emphasized that although it was important to maintain America's lead in breeder reactor research, building Clinch River or any other breeder demonstration plant in the near-term was not necessary to accomplish this and that maintaining our base breeder research program (currently funded at more than $300 million for fiscal year 1984) was sufficient to the task (See Los Angeles Times, June 27, 1983 and Nucleonics Week, June 30, 1983). Apparently industry agrees, since it no longer thinks they should share the project's costs by increasing their share of contributions. Nor do they think they ought to assume any of the project's risks.

As for the work of DOE and BRC task force, little that is favorable can be said. Congress gave DOE $1 million to produce increased industry cost sharing. Yet, neither DOE nor the BRC or the financial houses who were paid to participate seem to have worked all that vigorously to do so. Although instructed to do so, they did not seriously reconsider the original 50/50 cost sharing arrangement nor is there any evidence that other options such as foreign cost sharing, national utility taxes, or state cost sharing were examined in depth.

That Congress asked for increased private cost sharing on the project and only received a proposal for government to lend money to itself at increased risk is disappointing. The bigger point, though, is that this disappointment ought not to be all that surprising. For several years now the shortcomings of the Clinch River Breeder Reactor Project have been documented in great detail. A project that is difficult to justify economically generally is difficult to cost share with industry. Industry, unlike government, after all, needs to show a profit to survive. Although the nuclear industry was vitally interested in investing in Clinch River when it seemed that it would produce significant commercial benefits, it no longer is willing to put new capital at risk.

Under these conditions, proponents of the project find it easy to conclude that government should simply assume industry's share (thus, the hollowness of the plan they offer). They would have Congress ask how can we finance Clinch River? Yet, the difficulty the proponents are having in getting industry to pay for more of this "industrialization" project (the term DOE uses in its latest budget justification for Clinch River) suggests that this is the wrong question. If Congress is unwilling to pay for all of the Clinch River Project because it is too costly and open to question, and industry is unwilling to put any more of its capital at risk, the question no longer is how can government cost share the project, but rather whether or not government should at all.●

ALBANY COUNTY CELEBRATES 300TH ANNIVERSARY

● Mr. D'AMATO. Mr. President, this year, the residents of Albany County, N.Y., are most proud to celebrate their 300th anniversary. I join with them in commemorating this historic occasion by offering a special tribute in recognition of the numerous achievements of this important county along the Hudson. Throughout its 300 years, Albany has occupied a key position in the history of the Empire State and this Nation.

As the oldest continuous settlement of the Thirteen Original Colonies, Albany is well-deserving of its designation as "the cradle of the Union." Its colorful history began in 1609 when the English explorer Henry Hudson, sailing for the Dutch East India Co., landed on the site of present day Albany. Although originally under Dutch rule, Albany became an English colony in 1664. Nevertheless, the legacy left by the Dutch has remained to this day in terms of language, customs and traditions. Since Revolutionary times Albany has been an important center of political activity. In 1754, Benjamin Franklin offered his "Albany Plan of the Union," which was the prototype for our federal form of government.

Today, the city of Albany serves as the capital of New York State. The relatively small population of Albany County belies the vibrancy and importance of the area. In addition to its role as the seat of State government, Albany is also an important commercial center. The Hudson River's deep water channel has enabled Albany to become a world-famous seaport, each year handling several million tons of cargo from around the country and the world.

Albany County has long served as an educational center and currently has 18 institutions of higher learning. It is home to the State University of New York at Albany, the oldest in the SUNY system. In addition, Albany Law School, the oldest in the State, is located within the county's borders.

Over the years, Albany has successfully retained the charming qualities of smalltown life while developing a cosmopolitan air more often found in

larger cities. Albany provides a generous selection of theater, art, and music to residents and visitors alike. The imposing Empire State Plaza contains the Performing Arts Center, which features a variety of cultural presentations within its unique egg-shaped structure. Several excellent museums afford a diverse offering of works. Albany is also proud of its resident Albany Symphony Orchestra and Capital Repertory Co. With all that Albany has to offer, it is no wonder that it has become a major tourist mecca. Each year thousands visit the area in order to take advantage of the county's broad range of sights and activities.

For 300 years, Albany County has been in the forefront of economic, political, and cultural activity in New York State and this Nation. It is with great pride, therefore, that I extend my sincerest congratulations and best wishes to the residents of the capital region as they participate in the tricentennial celebrations. I am confident that the county will meet with continued success and prosperity in the years to come.●

ADDRESS BY SENATOR KENNEDY BEFORE NATIONAL COUNCIL OF SENIOR CITIZENS

● Mr. RIEGLE. Mr. President, most Members of Congress are aware that one of the most significant issues before us over the next few years will be the fiscal integrity of the medicare system. Recent actuarial estimates have slightly lengthened the period of time before the onset of the projected shortfall in the medicare insurance trust fund. Nevertheless, the need for exploring the full range of options available to us to avert any crisis in the medicare program is real and it is something we should be doing today.

In that regard, I urge all of my colleagues to examine the recent address delivered by the distinguished senior Senator from Massachusetts, Mr. KENNEDY, before the National Council of Senior Citizens. Senator KENNEDY, who throughout his many distinguished years of service in the Senate has established himself as a leading expert in the field of health care, has developed a medicare rescue plan which he has outlined in his address before the National Council.

Mr. President, I ask that the address by Senator KENNEDY to the National Council of Senior Citizens be printed in the RECORD.

The address follows:

ADDRESS OF SENATOR EDWARD M. KENNEDY TO THE NATIONAL COUNCIL OF SENIOR CITIZENS

First of all, let me thank Bill Hutton for that rousing introduction.

You know, every time I listen to Bill, I realize that Ronald Reagan's problem isn't his age.

What's wrong with Reagan isn't that he's over 70, but that all of those reactionary Republican ideas he has are at least 70 years out of date.

We know that this Administration is led by the oldest American President. But we also know how ironic and tragic that is. Let's say it bluntly and plainly: this is the most anti-elderly, anti-Social Security, anti-Medicare Administration in all of American history.

So I am proud to be here today to restate my opposition to that Administration—and to reaffirm my solidarity with all of you—with your President and my friend, Jake Clayman; with another great progressive leader, John Jacob of the Urban League; and with that extraordinary, tireless, and very special person, Evie Dubrow.

I am here today to renew my promise that I will stand with you in 1984 as we have stood together so often before. Although I will not be a Presidential candidate myself, I will work hard and campaign my heart out to replace Ronald Reagan with a new Democratic President—who will defend the rights of the elderly instead of denying them.

And I will work to elect a new Democratic Senate, so that we can protect the nutrition of our senior citizens by removing Jesse Helms as Chairman of the Agriculture Committee.

We can protect their legal services by removing Orrin Hatch as the Chairman of the Human Resources Committee.

And I hope you won't mind this at all: with a Democratic Senate, instead of Orrin Hatch, you will have Edward Kennedy as Chairman of that committee.

And then Bill Hutton and I will travel this nation and hold hearings and tell the American people the harsh reality: too many retirees are barely living on social security today; too many of them can barely pay for their rent or their heat; too many fear that illness will cost them their homes as well as their health—and so we cannot afford and we will not accept any more federal budget cuts in basic programs for the elderly.

We believe in reducing the deficit. But we insist that we should do it by taking from the gains of the greedy and not by adding to the pains of the needy. We believe that it is time, at long last, for the special interests to ask what they can do for their country.

We remember the President's reassurance that he really does care about the elderly. Well let me reply: Our senior citizens could do with a little less of Mr. Reagan's care and a little more Medicare.

Let me recall the dishonor roll of the Reagan record on the elderly:

We believe in the Older Americans Act, which provides social services so that elderly citizens can stay in their own homes and eat at least one square meal a day. You would think everyone would believe in that—but not Ronald Reagan. He tried to cut 70 million dollars last year—and 55 million more this year.

He was wrong then; he is wrong now—and on this issue, we have only just begun to fight.

We believe in low income energy assistance, so that the elderly will not be left cold in a bitter winter or face heat exhaustion in a brutal summer. You would think everyone would believe in that—but not Ronald Reagan. He tried to cut half a billion dollars last year and another half a billion this year.

He was wrong then; he is wrong now—and on this issue, we have only just begun to fight.

We believe in food stamps, so that the elderly will never again have to shop in the pet food section of our local supermarkets. You would think everyone would believe in that—but not Ronald Reagan. He tried to cut 2.3 billion dollars from food stamps last year—and three quarters of a billion more this year.

He was wrong then; he is wrong now—and on this issue, too, we have only just begun to fight.

We believe in legal services, so that senior citizens can have their day in court even when they can't afford a lawyer. You would think everyone would believe in that—but not Ronald Reagan.

This is his proposal: Eliminate the Legal Services Corporation. And this is our reply: Eliminate Mr. Reagan's Administration.

And the most shameful part of this record was his assault on Social Security. Ronald Reagan always opposed that program—and when he learned the system was in trouble, he saw a golden opportunity to salvage Social Security in order to salvage his $200 billion budget deficit.

But you and I and the Democratic Party, and millions of citizens, young and old, stood our ground and stopped that scheme.

We did not achieve every thing that everyone wanted, but we saved the system. And we sent a clear message to David Stockman and his friends: Keep your budget-cutting hands off our Social Security.

But now Reagan, Stockman, and Meese have picked another target. They want to exploit the crisis of Medicare in order to excuse billions of dollars in benefit cuts. And our reply to them is as strong today as it was a year ago on Social Security—Ronald Reagan and David Stockman, keep your budget-cutting hands off our Medicare.

You don't have to kill Medicare in order to save it. We can and we will save Medicare—and we will do it without unfair benefit cuts, without massive tax increases, and without tatooing a means test on any Medicare beneficiary.

The crisis in Medicare is real. If we do nothing, the deficit in that program over the next two decades will total one trillion dollars. But there is a right way and a wrong way to deal with the crisis—and the Reagan way is the wrong way.

If we try to eliminate the deficit in Medicare by reducing benefits, we will have to cut the program by thirty percent. If we try to eliminate the deficit by raising taxes, we will have to raise them by fifty percent. Now, we know something that Ronald Reagan is about to learn—higher taxes and lower benefits are unacceptable to N.C.S.C., unacceptable to Congress, and unacceptable to the American people.

The President actually seems to believe the preposterous notion that Medicare is in crisis because the benefits are too generous and the elderly are using too much health care. But we know that Medicare now pays only 44 percent of the total health care bill for the elderly; on the average, senior citizens now pay twenty cents out of every dollar of income for needed health care, yet they are worse off today than before Medicare was enacted.

No elderly citizens in America should have to choose between food on their table, heat for their home, or an appointment with their doctor. So let me make this pledge to you now: Medicare is one issue where we are not going to let Reagan be Reagan.

The Administration also refuses to acknowledge something else that everyone already knows—that the cause of the Medicare crisis is not the abuse or overuse of services by the elderly, but the uncontrolled

inflation that is corrupting every aspect of our health care system.

We often hear the President speak about his record as an inflation fighter—but he obviously is not aware that health costs are still rising at double digit levels. I think I can guess the reason. When do you think was the last time Ronald Reagan even looked at his own doctor's bills?

Instead of taxing workers and cutting Medicare benefits for the elderly who are ill, it is time to treat the cause of the problem by demanding far-reaching changes in the health care system. Instead of placing all the burden on elderly and the sick, it is time to demand a fair share of sacrifice from the hospitals and the doctors who have grown wealthy off of health care inflation. It is time to end that inflation, and to say to this Administration, to doctors and hospitals: You shall no longer impoverish the golden years of our senior citizens.

The alternative I favor—the Medicare Rescue Plan—contains four essential elements:

First, we must adopt a system of prospective payments for all hospital costs.

Senator Russell Long tells the story about three businessmen arguing over the check for dinner. The first one says, let me pay it; I'm in the fifty percent tax bracket and it only costs me fifty cents on the dollar. The second says, no, I'll pay it; I'm on a company expense account and it doesn't cost me a thing. And the third says, no let me have the check; I'm on a "cost plus" government contract and I can actually make money on it. Well, "cost plus" is the way we are paying for health care, and we can't afford it anymore.

Earlier this year, Congress went part way by adopting a prospective payment system for Medicare. But Congress did not go far enough—you can't squeeze just one part of the balloon or it will pop out in other places.

Adoption of prospective payment for all providers is the indispensable condition for solving the Medicare crisis. By itself, this step will cut the Medicare deficit almost in half and save billions of dollars in the coming years. Instead of loading new costs on workers and deep benefit cuts on the elderly, it is time to control health costs at the source, by putting real restraints on what hospitals can charge.

Second, we must establish reasonable incentives for out-patient treatment under Medicare in the many cases where in-hospital care is wasteful and unnecessary. In recent years, we have travelled in precisely the wrong direction. Because of the misguided incentives of present law, hospital admissions have increased four percent a year under Medicare, yet the Medicare population has gone up only 1.5 percent.

The incentives we need are already a feature of all the successful state systems for hospital control. But using out-patient treatment more often under Medicare, we can achieve essential savings without embracing the Reagan extreme of denying essential services.

Third, we must reform the way physicians themselves are reimbursed for their services in the hospital. At the present time, there is no effective constraint at all. The result is that physician costs under Medicare have been climbing an incredible 18 to 20 percent a year, the worst inflation in the entire health sector. And if doctors decide that Medicare doesn't pay enough, they are completely free to charge patients any additional cost.

The Medicare Rescue Plan will combine physician and hospital reimbursements in a single payment for each patient treated in the hospital. Instead of a system that challenges Medicare to end cost overruns. When an elderly citizen who is sick goes to the door, he ought to find a doctor making a house call, not a bill collector charging him for what Medicare won't pay.

These three elements of the rescue plan are sufficient to eliminate the entire projected deficit in the Medicare Hospital Insurance Trust Fund and make it sovent in every year covered by the economists' projections. But the plan has an additional feature as a margin of safety—it also places the current temporary borrowing between Medicare and Social Security on a permanent basis, so that each fund can assist the other in a future shortfall.

This plan to rescue Medicare is a positive approach and a progressive alternative for the 1980's. We have no illusions about the difficulty of the struggle. We know the power and the entrenched position of the special interests arrayed against us, but we shall not hesitate to make the effort. And we shall fight every bit as hard to save Medicare today as we fought to start it in the 1960's.

In fact, even more than Medicare is at stake. The present crisis poses a critical choice for the future of the entire health care system—not just for Medicare, not just for the elderly, but for every citizen of this country.

We cannot go on as we are. We cannot accept a situation where every year, the cost of health care demands an ever-greater share of the nation's wealth and enterprise.

We will not succeed in controlling costs by cozzing up to President Reagan and his self-defeating schemes for benefit cuts and tax increases. Democratic candidates will not succeed in their campaigns by posturing in ways that promise only to cut benefits a little less and not raise taxes quite so high.

And our candidates will not succeed by running away from one of the most fundamental issues of all—the continuing, urgent need for a national health plan as a fundamental right of all Americans.

The United States of America must not continue to stand alone with the apartheid regime of South Africa; we must no longer deny the basic necessities of health on the basis of a family's wealth.

Only with a national health plan can we halt the runaway inflation that has stricken American medicine. Instead of rationing health care, let us make our health care system more rational. And let me say again something that I have said before—and that I will continue to say until it finally comes true: If a national health plan is good enough for the President, the Vice President and the members of Congress, then it is good enough for you and for every citizen in this land.

Let me close with a few personal words to each of you. No group of Americans has meant more to me, no group meant more to my brothers, than the senior citizens of this land. Your hopes have been central to all of our public lives.

When John Kennedy ran for the presidency in 1960, one of the issues at the heart of his campaign was Medicare. Three years later, twenty summers ago, on a sunny day like this, he spoke at the White House to the members of the National Council of Senior Citizens. He expressed a commitment to decent health care for the elderly—which, he said, "is strongly supported by this Administration, and particularly by this President." It was a cause that was close to his heart. Your cares truly were his concern.

I am proud that across all the years since then, I have stood for that same commitment. I believe that there is no more important test of the quality of our country than how we treat our senior citizens, for all of us, if we are fortunate, will someday be elderly.

Finally, I am more grateful than words can say that so many of you stood with me during the most difficult hours of the 1980 campaign. When I recall how hard and long Bill Hutton worked, and how many senior citizens were there volunteering in our headquarters, sitting at the phone banks, getting out the vote, when I reflect on how much energy they had and gave, I realize the truth of Robert Kennedy's observation: "Youth is not a time of life, but a state of mind."

In fact, this is the youngest looking group of senior citizens that I have ever seen. And because you will continue to be young in spirit, I am confident that we will win the struggle for social and human justice—and that the 1980's will be, as they should be, among the very best years of your lives.

Fact Sheet—Kennedy Medicare Rescue Plan

BACKGROUND ON THE DANGER OF MEDICARE BANKRUPTCY

Health care cost the nation $322 billion in 1982, of which Medicare consumed $52 billion.

Health care as a percentage of the gross national product has risen from 5.3% of GNP in 1960 to 10.5% in 1982.

The latest Medicare Hospital Insurance (HI) Fund Trustees Report projects Medicare bankruptcy by 1990 under the most likely ("intermediate") economic assumptions.

Under more pessimistic economic assumptions, bankruptcy could come as early as 1988.

The accumulated deficit for the period 1985 to 2005 will exceed one trillion dollars under the most likely economic assumptions.

INFLATION IN THE COST OF HEALTH CARE

Year	Percent increase—			Health as percent of GNP
	CPI	Hospital costs	Physician costs	
1960	1.6	11.2	3.7	5.3
1965	1.6	7.2	8.4	6.0
1970	5.9	15.4	13.4	7.5
1975	9.1	16.4	17.4	8.6
1980	13.5	16.6	16.6	9.5
1982	6.0	14.9	12.8	10.5

PRINCIPLES OF THE KENNEDY MEDICARE RESCUE PLAN

(1) No reduction in benefits.

(2) No increase in taxes.

(3) Reimbursement reforms applied to all hospital patients, not just those under Medicare.

The Kennedy plan to eliminate the medicare deficit

	Billions
Cumulative medicare deficit (1985 to 2005) medicare savings under Kennedy plan	−$1,018
I. Prospective payment system for hospitals	+426

	Billions
II. Incentives to reduce unnecessary hospital admissions	+210
III. Prospective payment system for in-hospital physician services	+411
IV. Authorization for borrowing between medicare and social security trust funds (not needed under the most likely economic assumptions)	
Net surplus under Kennedy plan	29

THE KENNEDY PLAN ALSO PRODUCES SAVINGS FOR EMPLOYEES, EMPLOYERS, AND OTHER PRIVATE PAYERS OF HEALTH COSTS

In addition to the savings achieved under Medicare, corresponding savings will also be obtained in hospital costs in the non-Medicare sectors of the health care system.

Hospital costs will be reduced by approximately one-third.

DETAILED DESCRIPTION OF KENNEDY MEDICARE RESCUE PLAN

I. Comprehensive hospital prospective payment system

Hospitals will be paid prospectively for each admission; payments will increase from a base period at the market basket rate (a measure of the amount hospitals pay for their goods and services) plus one percent.

The prospective payment system provides incentives to hospitals and other providers to deliver health care efficently, and it will reward those who do so.

The prospective payment system lowers Medicare costs by reducing hospital demand for goods and services, which in turn reduces market basket prices.

The Kennedy plan also includes incentives for states to develop their own prospective payment systems under broad federal guidelines.

The plan will make additional revenues available to hospitals providing care to those who cannot afford to pay.

II. Incentives for hospitals to reduce unnecessary admissions

Hospitals will be reimbursed at a lower rate for unnecessary admissions.

The lower rate will encourage hospitals to provide treatment on a less costly, outpatient basis where feasible and appropriate.

This type of incentive reimbursement is a current feature of virtually every mandatory state program for hospital cost containment.

III. Prospective payment system for hospital-related physician costs

Lump-sum payment for physician services and hospital services for each hospital patient at the market basket rate plus one percent.

Incentives for physicians and hospitals to work together to promote cost effective care.

Transfer hospital-related physician services from the Medicare Supplementary Medical Insurance (SMI) Fund to the Hospital Insurance (HI) Fund. Savings will reduce the HI Fund deficit.

IV. Interfund borrowing authority

Under the most likely economic assumptions, Medicare balances will be lowest when other Social Security trust fund balances have large surpluses.

Interfund borrowing provides a safety net in the event of shortfalls in HI balances resulting from changes in estimates or unanticipated economic circumstances.●

REMARKS OF MRS. CHARLENE BAKER CRAYCRAFT AT 25TH ANNIVERSARY OF ACA

● Mr. HATCH. Mr. President, the Americans for Constitutional Action (ACA) recently celebrated its 25th anniversary. This fine organization met in Washington, D.C., on June 28, 1983, and I would like to bring to the attention of my colleagues the splendid remarks of the Chairman of the Board of Trustees of ACA, Mrs. Charlene Craycraft.

Mr. President, I ask that the remarks of Mrs. Craycraft be printed in the RECORD.

The remarks follow:

REMARKS OF MRS. CHARLENE BAKER CRAYCRAFT

Welcome to the 25th Anniversary Celebration of the Americans for Constitutional Action. Tonight is indeed a milestone . . . not just for ACA, but for the entire conservative movement in America.

With the tremendous growth of public interest groups supporting a variety of causes today, I think it is difficult for many of us to recall the days twenty-five years ago when groups such as ours were not in existence. In fact, ACA was established because a small group of very dedicated, conservative Americans believed that there was a need for balance in the American political system. The Americans for Democratic Action had been established and there was no credible conservative voice to represent a positive alternative to ADA.

So, ACA was established to provide that kind of positive conservative voice that America needed. You may recall that among the founders of our group was Admiral Ben Moreell, an outstanding American and the man who built the Navy's Seabees. For many years, Admiral Moreell led ACA and no one man better exemplified the guiding principles of our group than he. Governor Charles Edision was ACA's first treasurer and held that position until his death. Governor Edison was the son of Thomas Edison and a man whose name is even today still synonymous with philanthropy and patriotism.

ACA, as most of you know, has been a quiet organization for most of its years. We have never sought the limelight; we have never looked for headlines; rather we have just simply tried to do our best to elect solid conservatives to the House and to the Senate. Beyond that we have, of course, published what I believe is the finest conservative vote rating for Members of Congress for the past twenty-five years. Though we've been a quiet group, I hope you'll allow me to boast for just a minute. During the past twenty-five years, ACA has assisted countless candidates for public office in every state of the union. During the early years we were often the only Conservative voice to be heard.

For the last thirteen years we have been helping to raise funds for our Conservative friends. As a matter of fact, ACA handled approximately 4 million dollars in the 1981 and 1982 campaign years alone. The checks went directly to the incumbents and candidates, something no other group does. This was accomplished on an annual budget of $100,000.00 for ACA. Imagine what we could accomplish on twice that amount!

We have finally reached the point in America today where we have a winning Conservative coalition. Now it is our charge to keep that coalition going, to keep it strong, to keep it fresh, to keep it responsive to the needs of the American people. We still have major obstacles in our way. We still need more Conservatives in the Congress. We need to improve the Conservative ranks at the state and local level, too. Working together, I know that we can achieve our goals. We've come so far already, we must not stop now.

I know most of you here this evening gave personal donations to ACA because you believe in our work as strongly as I do. With a rent increase of 150 percent beginning in August, we will not be able to continue this important work without your support and I know we can count on you.

In less than a week we will celebrate the 207th Birthday of the United States of America. As we approach that important birthday I invite each of you to reflect upon the values that have made this Nation great—our commitment to the free enterprise system, to a strong defense, to the freedoms we so cherish, to local self-determination and to individual rights and the responsibilities that come with them. In short, to have the opportunities to enjoy the liberties that our system of government insures to each of its citizens. This is what our Nation is all about. This is what ACA is all about.

Thank you for being with us tonight to celebrate 25 good years. I hope that you will be with us in the years to come.●

BISHOP R. S. FIELDS

● Mr. METZENBAUM. Mr. President, this week, in my home city of Cleveland, the Ohio North Jurisdiction of the Church of God in Christ will hold its 67th annual convocation. I wish to extend to the delegates my best wishes for a productive meeting.

This convocation is a very special one, Mr. President, because it marks the 20th anniversary of the ordination and consecration of R. S. Fields, a truly outstanding religious and community leader, as bishop of Ohio, north.

Bishop Fields, who served for 27 years as a highly respected pastor before he was named to his current position, is a man who knows the meaning of the scriptural injunction to work the work of Him that sent me while it is day. He is a person who has earned the high respect in which he is held by his friends and colleagues of all religious persuasions.

Mr. President, I join the delegates to this convocation in honoring Bishop Fields and in expressing to him the gratitude of the entire community for his years of distinguished service. I wish also to extend my warm best wishes to Mrs. Helen Fields, who has contributed so greatly to her husband's success, and to the four Fields children, who will be able always to take pride in the accomplishments of their parents.

I ask, Mr. President, that a biographical sketch of Bishop Fields be printed in the RECORD.

BIOGRAPHICAL SKETCH OF BISHOP R. S. FIELDS

"I am crucified with Christ; nevertheless I live, yet not I, but Christ liveth in me: and the life which I now live in the flesh I live by the faith of the Son of God, who loved me, and gave Himself for me."—Galatians 2:20

Bishop R. S. Fields is the very epitome of those words spoken by one of the greatest spiritual and intellectual giants of all times, the Apostle Paul, in that there are many parallels. While Bishop Fields' life is exemplary of the indwelling Christ, he emulates both Christ and the Apostle. His record speaks for itself for he has lived under the influence of God and has edified great congregations and brought many to Christ. His accomplishments are most notable, and stand as a monument now, and will remain throughout history.

Bishop Fields was born in Mason, Tennessee, and came to reside in Cleveland, Ohio as a youth. He was saved at an early age under the late Bishop Riley F. Williams. He worked in the Church with all his might serving in many different capacities. For 27 years, he served as the State President of the Y.P.W.W. Department—until 1963 when he was ordained as Bishop of Ohio, North, and consecrated in Memphis, Tennessee during the Convocation of the same year.

In addition, Bishop Fields served loyally as the Assistant Pastor to the late Bishop R. F. Williams, and Assistant Overseer to the late Bishop U. E. Miller, whom he succeeded. He also worked out and pastored congregations in Massillon, Cleveland, Warren, and Youngstown, and the State Temple, Calvary Hill Church of God in Christ, Cleveland, Ohio, where he has been involved in an extensive restoration program which now reflects the beautiful fruit of his arduous labor. His theme is "I must work the work of him that sent me, while it is day."Bishop Fields has a lovely, devoted, supportive and competent wife working by his side, Sister Helen Fields, who is an inspiration to those who know her. They are the proud parents of four surviving, successful children, Ernest, Barbara, Doris, and Darrell.●

ARIZONA REPUBLIC ENDORSES COAL SLURRY LEGISLATION

● Mr. GOLDWATER. Mr. President, I am pleased to inform my colleagues that a prominent Southwestern newspaper, the Arizona Republic of Phoenix, Ariz., has recently endorsed the coal slurry pipeline legislation which Senator JOHNSTON has introduced and which I am cosponsoring, S. 267.

This development indicates that almost everyone in the West is now satisfied that the provisions of the bill are adequately protective of water rights and water use by local and State governments and users. I ask that the editorial which appeared in the Republic may be printed in the RECORD for the benefit of other Senators who may not yet have seen it.

The editorial follows:

[From the Arizona Republic, June 25, 1983]

AN O.K. FOR COAL SLURRY?

If Congress approves coal slurry pipelines—and it now seems closer than at any time in the past 20 years—this would cut the delivery price of Western low-sulfur coal.

More utilities across the country would buy cleaner Western coal, eventually generating greater income and jobs for the West.

Arizona produces 12.5 million tons a year, all on the Navajo Indian reservation.

Coal-fired plants produce more than half of all U.S. electricity.

Railroads, fighting to keep their high-volume coal traffic, have managed to defeat pipeline developers for two decades.

They are still attempting to block the pipelines—carrying a 50-50 mixture of coal and water through mostly underground lines—from crossing railroad rights-of-way.

Western coal and pipeline interests are trying to use the power of eminent domain.

One reason why the bill has a chance of passage is that much of Western agriculture's past fear of losing irrigation water to slurry had been calmed.

Reps. Richard Cheney, R-Wyo., and Morris Udall, D-Ariz., have written a measure that gives the states authority over water used in interstate coal slurry pipelines.

No firm may purchase water for slurry without state approval.

In some cases, moving coal by pipeline is half that of rail rates.

In all instances, the new delivery method offers savings to customers.

Coal slurry pipelines should make both the railroads and slurry lines more cost-efficient.

Such efficiency should help coal better compete with nuclear and oil energy.

The United States has hundreds of years of energy resources in its coal deposits.

Western coal is relatively clean-burning.

After two decades, the time for coal slurry pipelines has finally arrived.●

PERCY ROSS

● Mr. DURENBERGER. Mr. President, there is a name familiar to a lot of people without much explanation—Percy Ross. Millionaire philanthropist. Syndicated columnist. A man with a heart of gold who gives pieces of it away in the form of silver dollars, checks, and cash.

Percy Ross, born the son of a junk dealer, lived in poverty and dreamed of wealth. His wish was to become a millionaire, and to share his riches, helping underprivileged children and adults.

One such time he invited 1,050 children from low-income homes to a Christmas Eve party at his expense. Food and festivities abounded throughout the evening. At the end of the night, each child received a brand-new bicycle. Watching their great surprise and delight was Percy's own best gift.

He wants to keep giving it all away before he goes. His greatest joy in life is watching the recipients of his good will when they see their gifts from him. He has given color televisions, bikes, cash, checks, and even a cow—whatever someone in need, needed.

He is always ready and willing to share his advice and his optimism along with his heart and his pocketbook, with anyone who needs it.

I would like to share with my colleagues a story on this very special man in Minnesota.

I request that the article from the Washington Post of July 18, 1983, be printed in today's CONGRESSIONAL RECORD.

The article follows:

[From the Washington Post, July 18, 1983]

THE BUCKS START HERE—PERCY ROSS IS FREE WITH ADVICE—AND THE MONEY TO BACK IT UP

(BY JOYCE WADLER)

A letter in the newspaper from a lady in Ohio. She's written to Percy Ross, the Daddy Warbucks of the Modern Age, the Miss Lonelyhearts with the dough. "My dear Mr. Ross," the lady begins, for clearly, she is refined, "I am 73 and give my 86-year-old sister intensive care 24 hours a day. She is an epileptic, who can't talk, walk and can barely see . . . Our combined income is $665 a month, including food stamps. I need my roof fixed badly, it leaks from the upstairs into the first floor . . . The only money we have is about $400 I saved to bury us . . . I'm sure you're one of God's angels. Will you please help us?"

The naivete of the lady! To think she will get something for nothing! From a newspaper columnist, no less! Good lord, they're lucky if *they* can pay the rent.

But wait a minute, what's this?

"I have contacted Dick Baker of the Baker Roofing Inc. in Columbus and he is going to do the work and send me the bills," writes Percy Ross. "Hang on to your savings.

"Perhaps I can answer your prayers . . . although I'm not one of God's angels," it says.

Percy Ross. The Dear Abby of the Downtrodden. Millionaire Philanthropist who vowed to give it away before he dies, and is doing, at the age of 66, pretty well. Spent thousands and thousands on a party for disadvantaged children the night before Chistmas 1977, and before they went home, provided each with a brand-new bike. Threw a $25,000 steak and champagne party for the bellhops at Minneapolis Airport, who treated him just as well when he made his millions as when he was down and out. When he goes on a trip, he carries a few hundred in silver dollars to give out: his motto is Sharing is Caring.

Then there's the column, Thanks A Million, syndicated by the Register Tribune Syndicate in 80-odd papers. Advice. Better yet, cash. A woman on public assistance and her handicapped daughter without running water in Tennessee? Off goes the check! An elderly woman, the candy lady of Seattle, who's been dispensing goodies to the children for years, now in a wheelchair, and the neighbors want her to get a remote-control TV so she doesn't have to get out of her chair? Ross will go out to Seattle and buy the TV himself. Himself, himself!

Not out of a hat, not via a pumpkin, not even out of a private jet. Those high living flamboyant days, those days of the color TV in the shower, have been toned down for Ross, he insists; even if he still wears the Gucci loafers and drives the limo once

owned by Howard Hughes. A tuition check for the high school dropout who wants to better herself and take the high school equivalency test; Ross is a sucker for self-improvement, out goes the check. A 92-year-old woman who took her driving test at 72, but can't afford to fix her car, and she has to visit friends at the nursing home; out goes the check.

Oh, there's them that's turned down, of course; the idle dreamers, the loafers, looking for an easy way out. But for others, there will be the money, the common denominator only that it will change a life. And this money is the most suspect thing in the universe, the free buck.

Naturally, there are those who decline to carry the word. Ross' hometown paper, the Minneapolis Star and Tribune, the only major paper in town, does not run Ross' column, and some in town question his motivation.

"Percy Ross is a publicity hound from the word go," Minneapolis Star Tribune columnist Robert T. Smith told People magazine. "If you're going to be a real philanthropist, you do it quietly and get your reward in heaven."

Ross' rules, which have a tendency to rhyme (Sharing Is Caring) are absolutely the opposite.

"He Who Gives While He Lives, Knows Where It Goes," he says.

As for his needs, it is entirely possible that among them, publicity is only a small part.

Meanwhile:

Dear Mr. Ross:

I am 71 and never sleep well in this high crime area in Brooklyn . . . I'd feel a lot safer if I had steel bars on my windows—Mrs. L.O., Brooklyn.

Dear Mrs. O.:

I hope you sleep better. My check is in the mail.

What hot copy precedes Percy Ross! He sits in a hotel room with a Detroit reporter and throws silver dollars into the air, to glory in that unnatural, but in his case quite real, phenomenon, a shower of money. He rode in the Minneapolis Aquatennial Torchlight Parade as Honorary Swede of the Year five years back and, from the back of a Lincoln Continental, flung $16,500 in silver dollars to the crowd, trying for a giveaway rate of $5,000 a mile. His staff is all female. On the phone to Jimmy the Greek, it's "Jimmy Baby"—"Percy Baby."

So it's something of a surprise when Ross, age 66 comes into New York to promote the newspaper column and appear on "Late Night With David Letterman," to find, in the hotel lobby, a man quite subdued, perhaps even preoccupied with some sorrow. The build is slight, the voice is quite, he wears a quiet blue sports jacket, albeit with the silk pocket scarf and Guccis; he asks if it's okay if he's interviewed in the lobby; his wife isn't feeling well, he'd rather not disturb her upstairs. He is not covered with jewelry; he doesn't call anyone "baby." You know, only because you've seen the stories, that there's a medallion under the shirt that says Percy Ross—Millionaire; just as you know, only because he tells you offhandedly later, that the white strands of softly waving hair on the top of his head are transplants.

Does he still have the color TV set in the shower?

"That was in the good old days," he says, his voice as pleasant and friendly as a Fortune 500 exec. "I've changed. It was just a thing I always wanted . . . I was living out my fantasies." He laughs, a little at himself. "The steam in the shower clouded the screen, so that I had windshield wipers installed."

And the cars, the nine cars to match the colors of his 200 suits?

I've still got the cars," says Percy. "Generally, I'll use the limo only if I'm giving a talk at one of the schools, to take the kids for a ride, or if I have guests . . . I'm down to about 100 suits . . . I enjoyed my life, I'm pretty much back to normal now . . ."

A few days after the first discussion he is asked in a telephone conversation to comment on a charge of possession of hashish, which he was acquitted of two years ago, and he is considerably less affable.

"I'm only going to give you one sentence on that," he says. "I can't waste my time thinking of anything negative; what was found was not hashish and the case was dismissed." Pressed to explain further, he threatens to hang up, while a loyal assistant, Connie Hanson, interjects, "That was all started by a vindictive female employe, who was angry that Mr. Ross was giving money to other people and not to her . . . He was charged . . . and it isn't true."

The ups and downs of Percy Ross: it's no wonder the New York literary agents and Los Angeles producers are after him to do the story of his life. Born poor, the son of immigrants, twice rich, twice broke; buys a plastic-bag factory in '58 for $30,000, sells it 11 years later for $8 million. Gives $2 million each to his two sons and wife ("I didn't give it to her, she *earned* it," he corrects), cleverly invests the rest. No one now knows precisely what he's worth; the figure $20 million circulates only because a Newsweek reporter put that to him once as a guess, and Percy shrugged, and so it remains in the files. It's enough, at any rate, to do what he likes with it, and what he likes to do is give it away.

He's been asked why so often that his reply, accompanied by silver dollars for reporter and photographer, could probably be made in his sleep.

"What am I going to do with it after I'm gone?" he says. "My family is all taken care of, I could leave it all to different organizations, but I enjoy spending it while I'm alive. My motto, of course, is 'He Who Gives While He Lives, Also Knows Where It Goes' . . ."

They say if you were a true philanthropist, you'd give it away quietly, without hogging the limelight; that you could go off and build a hospital or something without this undignified spectacle of flinging money into the street; or bringing in disadvantaged kids the night before Christmas and making sure the TV crews are there when you give it away.

An unflappable shrug from Ross.

"I enjoy giving," he says. "I want to be there when I give. Just like parents want to be there when they give a present on Christmas morning—they don't go in the other room. I want to see the faces of those kids when they see those shiny new bicycles. That was a dream of mine ever since I was a kid, to help as many poor kids as I could."

That particular party: One thousand and fifty disadvantaged children, in Minneapolis, gathered in a high school auditorium. At each table, as "kind of a subconscious lesson," two policemen, as counselor and friend. He had policemen opening gifts for kids, he had policemen taking kids by the hand to the bathroom, chuckles Ross. The room is divided by a curtain. End of the evening, Percy has the kids stand up, backs to the curtain. "I said, 'you all stand up and keep looking at me'—I had 1,050 kids facing me." When the curtain goes up, he has the kids turn around. They see the 1,050 shining bicycles and they start screaming, yelling, knocking over chairs to get to their bikes. He can't describe it. He cried, that's for certain. Those kids and their bicycles. Because of him, Percy Ross.

Dear Mr. Ross:

I am a young pretty girl of 16. No 9-to-5 jobs for me. I'm going after a rich husband. I'm asking you to find out from your wife how she landed you—L. L., Pennsylvania

Dear Miss L. L.:

Actually, my wife landed a poor man and helped him become rich.

It was for a reason, by the way, Percy Ross invited 1,050 children to his bicycle party. One thousand fifty has significance in Percy Ross' life. He bets "10" and "50" at the tables in Vegas; at his parties, he often invites 1,050 guests. This is the significance: when he was a kid in Laurium, Mich., Upper Peninsula copper country, he opened his mason jar savings bank and counted 1,050 pennies. A number that remains with him. Which was, in addition, insufficient to buy a bike.

He was a poor kid, no question. His father was a Swedish Jewish immigrant who had come to New York and left it, finding the going rough for a man who spoke only Swedish. He relocated in Michigan, where, if he was a minority as far as religion, at least he was among people to whom he could speak. There was marriage, and three sons, the oldest of whom was Percy. The father's profession was a junk man, or, often, dealer in used goods. They bought old potatoes from the farmers and brushed off the dirt after the long winters in the bin and brought them into the city to be made into potato chips; they bought and rebuilt batteries; Percy sold eggs. The second son, Bernard, was considered the scholar; Percy tended to follow his father in business. His father did not do well.

"I never had clothes like the other kids," Ross says quietly, his hands folded across his chest in a protective way he does when he talks about his past. "We lived on the outskirts of town, near something called The Slop Ditch . . . it was an open sewer . . . once I fell into it . . ."

As for what he wanted, he answers without hesitation.

"I wanted to be rich," he says. "Because I remembered what the other rich people in town looked like . . . they were the copper barons, the copper kings, the Ryans, that was a big name in Montana . . . they rode around in their big cars; they had their big country clubs . . . in fact, I went to a country club, wasn't more than 8 or 9 years old, tried to shine shoes for some of these rich people, a nickel a shine; you know they wouldn't even let me through the door. I knew I looked good, my mother dressed me up neat and clean, Dad drove me up there in his wagon, they wouldn't let me in the door . . . I don't know why, maybe because I was Jewish, maybe because I was too poor . . . to this day, they invite me now, I won't set foot in that door . . ."

It was a life with some tragedy. His brother Bernard drowned when he was 16; years later his remaining brother would die at The Battle of the Bulge; his body, says Ross, is still "over there." Ross graduated from high school, moved to Duluth, Minn., started a scrap metal business. He met his wife at the tables in Las Vegas. She was in a maroon dress, beside Clark Gable, and such

a knockout Ross assumed she was a movie actress. He was trying to roll four, a difficult point. "If I make it, will you introduce me to your date?" he asked.

She turned out to be a vacationing Jewish girl from Duluth. They married. They had two sons. He made his first fortune in the fur business, then lost it; made his second as an auctioneer handling government surplus. He broke the law once, as a very young man, dealing stolen copper, but he confessed immediately and charges were never pressed. In '58, he bought Poly-Tech, a small plastic-bag manufacturing plant in Eau Claire, Wis. Five years later, he was $500,000 in debt. He pawned his wife's furs and, working with one of his sons, a business student, was able to turn the business around. Up, down; up, down! A friend of 25 years, Mrs. Eddie Cohen, says that even when he was down "he would never dwell on it; he was an up person." But Ross, recalling the hard times from the inside, says there were times you couldn't help but feel bad.

"When you call people and ask for help and they don't answer your phone calls, when you see them darting into doorways because they're afraid you're going to ask them for a loan, when you're not invited anywhere . . ."

That wasn't his style. During one of the up periods, he bought his wife a fur, and when, during a get-together with six other couples who were their closest friends, the women admired it, Ross said that if he got rich, he'd buy everyone of those ladies a fur.

He got rich.

They teased him about it.

"When are you getting us our mink, Percy? It's getting colder every year," Mrs. Eddie Cohen says.

Ross calls a furrier friend in New York. He has him send in 50 or 60 furs. He hires a country club for the night, for just these six couples who have been his friends for life. Because he has worried a bit about whether the husbands might be offended, he has determined to get them all plastered first. He gets everybody plastered. He tells the band to strike up "Promises, Promises." He stands up in front of the curtain—oh, yes Ross likes that curtain—and says, "Girls, 14 years ago, I made you a promise." "Who you kidding, Percy?" they yell.

The curtains fly open.

A half dozen models start parading 50, 60 coats. The women are screaming. For the Fabulous Mr. Moola; for the once-in-your-life real fairy godfather; for him, Percy Ross.

Dear Mr. Ross:

I am unhappily married and planning to get a divorce in order to marry a marvelous man I met while skiing last winter. Could you help me ($500 for the divorce)? Could you also include an extra $500 in case the new marriage doesn't work out?—R.P.

Dear R.P.:

You are not taking marriage seriously enough! Sorry no money.

So now there's the newspaper column, and an average of 4,000 letters a week. There are the visits to schoolchildren, to whom he gives the I-did-it-work-hard-you-can-do-it-too pep talk, followed by the ride in his limousine. There are the people who get his number and call him from England and Africa. There are the hard-luck readers he will attend to himself; the junk dealer in Fargo, N.D., who needs a truck; well it's clear why he feels close to that one; the lady in Seattle who's raising her dead sister's children, as well as her own, and feels they can scrape by if they get a cow; Ross will go out himself—he used to be an auctioneer, after all—and buy her a cow.

As for what he himself is missing, what Ross would request if he could write to some fairy godfather like himself; he can't really say.

"I wish I had another 66 years," he says, with a laugh. "Really, I've been pretty lucky. I have a wife who loved me and put up with me, I have a family . . ."

And yet he seemed somewhat sad at the beginning of this talk.

"I'm sad a lot of the time," he says. "I could tell you stories, but you probably wouldn't believe it . . . you don't know what poverty is. Or what buying 25 cents worth of junk was like; weighing out eight pounds of junk, 16 cents a pound in somebody's kitchen, I don't know if the word exactly is 'degrading' . . .

"It was hard," he says. "I was called 'Sheeny,' 'Christ Killer,' 'Goddamn Dirty Jew'—by some of the grandparents of the kids I buy bicycles for now. How I felt—I don't know how to explain it—how did Shylock feel? He knew he was an outcast in the community, and yet there they were, doing business with him. There we were in that old truck . . .

"Now I'm offering hope," he says. "I'm showing all rich people aren't selfish; they aren't bad; I'm saying I was poor once, I worked hard, I got rich, now I'm having a terrific time, so can you . . ."

And so what if the rich people snub him? And so what if the Mellons and the Rockefellers care to give theirs away building hospital wings and such? He, Percy Ross, will personally fly out to Seattle next week and buy that milk cow. Because he, Percy Ross, wants to have "the satisfaction of delivering that cow to that lady." And if she asks him to stay to supper, you can bet he will stay to supper. To bask not in the publicity, but in the appreciation, the thanks, the respect, of a woman who will look at him and see not a "Chirst-killer," not a "sheeny," not a poor boy left standing outside the country club or a fellow in need of a handout, but the Great Fairy Godfather, the Caring Rich Person, the Generous Human Being, the wonderful Percy Ross.●

ANIMAL AGRICULTURE WEEK

● Mr. TOWER. Mr. President, as we are in the midst of "Animal Agriculture Week," I wish to take this opportunity to highlight the importance of animal agriculture in our Nation. Because of the difficult times our Nation's farmers and ranchers are currently facing, I consider it more important today than even for us to reemphasize our commitment to the animal agriculture industry's well-being and stress its importance to our national and world economy.

Animal agriculture employs a wide range of ranchers, farmers, and stockmen while supporting many other industries. Animal agriculture products include beef, poultry, pork, eggs, veal, wool, leather, milk, and dairy products, as well as many other products that are essential to our lifestyles. Fifty percent of the land area of the world, including 45 percent of the land in the United States cannot be used to grow cultivated crops, yet, much of it can be used as grazing or range land. Through animal agriculture, we are able to harvest food from the billions of acres of land which are too rough, too dry, or too infertile to produce crops.

As a Texan, I am proud of the primary role my State plays in the Nation's animal agriculture sector. Texas is the No. 1 producer of cattle and calves. More than half of Texas' agriculture receipts were made up of livestock sales last year, totaling some $5.1 billion. Every dollar of cattle sales directly generates an additional $5 to $6 of business activity in the farm supply and food businesses.

Animal products are excellent sources of all but a few of the essential nutrients necessary to a healthy diet. They provide these essential nutrients in appropriate proportion with calories consumed. Animal agriculture is particularly important because it converts otherwise wasted resources into essential protein and nutrients.

For example, in addition to grazing land, 80 percent of the feed consumed by beef cattle in the United States comes from roughages and byproducts not edible by man. The grain that is fed to cattle is not food grain, but feed grain that would otherwise not be edible for humans.

In my view, those of us who are involved in deciding the agriculture policy for this Nation sometimes appear to forget the important role played by the animal producing segment of our overall agricultural industry. As we look at future farm programs involving wheat, corn, grain sorghum, and other feed grains, it is important that we remember the crucial part that animal agriculture plays in insuring these grain producers have a market for their products. As we work toward curbing our dairy production, we need to be watching how an increased culling rate of dairy cows affects our beef cattle industry—an industry that is not subsidized by the Federal Government.

The critical and primary role that animal agriculture plays in our overall agricultural economy cannot be overemphasized. I urge my colleagues to remember the importance of this industry in the weeks and years ahead as we decide the future course of our farm policies.●

ORDER OF PROCEDURE

Mr. BYRD. Mr. President, I wish to ask the distinguished majority leader what the program is for Monday insofar as he can see.

Mr. BAKER. I thank the minority leader.

ORDER VITIATING CONVENING TIME FOR SATURDAY

Mr. BAKER. First, Mr. President, in response to the minority leader, let me say I now ask unanimous consent to vitiate the order of the Senate to convene on Saturday, tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I believe that the situation is such that if we adjourn this evening under the order already entered that we will do so under the "boilerplate" language that has already been agreed to, is that not correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the Chair.

PROGRAM

Mr. BAKER. Mr. President, first I would say to the minority leader that I hope the warring parties to the agriculture target price bill can come together and give us an opportunity to work on that measure and maybe even dispose of it in a relatively brief period of time. So that is the first thing I would hope we can do on Monday.

There are other things that are available that I would very much like to take up if we can arrange for that. For instance, the Department of the Interior appropriations bill. We were not able to get a time agreement on that before, but maybe attitudes will mellow and positions will change. I will try that again on Monday to see if we can work out an arrangement to take up that bill.

Mr. BYRD. If the majority leader will yield, I would hope—since it does not cost anything for me to hope—that the majority leader would move to take up that bill Monday.

Mr. BAKER. Mr. President, that would be a good day for it. Let me say now that I will include that in the list of things I would like to do on Monday. And I hope that we will succeed in that effort.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. Mr. President, other matters for this coming week include, of course, the continuation of the debate on the motion to proceed to the consideration of the Radio Marti bill on which there will be a cloture vote on Wednesday. I expect to try to provide a brief time before that cloture vote for further comments or remarks the parties may wish to make, since we did not utilize our full time on that measure today. I know some Senators who wish to be recognized have not yet had a chance to speak.

Mr. President, there are other measures that many Senators wish to have brought up before we go out on the 5th of August. They include the revenue sharing reauthorization bill. If we cannot do that this week, maybe we can do that next week.

The distinguished chairman of the Foreign Relations Committee is pushing very hard to get two bills taken up of special interest to his jurisdiction; that is, the foreign assistance authorization bill and the State Department authorization bill. Both of those bills are controversial, but they should go on the list of possible items next week that can be taken up.

The intelligence authorization bill is here and available. The distinguished chairman of the committee, Senator GOLDWATER, has suggested we ought to consider the possibility of addressing that in the coming week and before we go out, as well.

There are conference reports that may become available, and as and when they do, of course, they will be placed before the Senate.

Mr. President, that is less definitive than I would like to make my answer to the minority leader, but it is a list at least of the things I hope we can do next week.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. I thank the minority leader. Mr. President, I see no other Senator seeking recognition.

Mr. BYRD. Mr. President, if the majority leader has yielded the floor, and if he has not, if he would yield.

Mr. BAKER. Mr. President, will the minority leader permit me to do one other thing?

Mr. BYRD. Yes.

Mr. BAKER. I apologize to him. I failed to see a calendar of cleared items here.

Could I ask the minority leader if he wishes to go forward with these routine items now or would he rather do them on Monday?

Mr. BYRD. Mr. President, I will be very happy to proceed now if the majority leader wishes.

First, I would like to ask the Chair if a message from the House has been received on H.R. 2760.

The PRESIDING OFFICER. The Senator has not received a message from the House on H.R. 2760.

Mr. BYRD. I thank the Chair.

AUTHORITY FOR CERTAIN ACTION

Mr. BAKER. Mr. President, the first request I would make is in light of the fact that the distinguished Vice President is not here and available this weekend, nor is the distinguished President pro tempore of the Senate. Therefore, with due humility, I ask unanimous consent that during the adjournment of the Senate over until Monday, August 1, 1983, the majority leader be authorized to sign any duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROCLAIMING A DAY OF NATIONAL CELEBRATION OF THE TWO HUNDREDTH ANNIVERSARY OF THE SIGNING OF THE TREATY OF PARIS

Mr. BAKER. Mr. President, I would say to the minority leader that I would propose now to proceed to the consideration of House Joint Resolution 321, if there is no objection.

Mr. BYRD. No objection, Mr. President.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate turn to the consideration of House Joint Resolution 321, to proclaim a day of national celebration of the 200th anniversary of the signing of the Treaty of Paris.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A House joint resolution (H.J. Res. 321) to proclaim a day of national celebration of the 200th anniversary of the signing of the Treaty of Paris.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 321) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE CALENDAR

Mr. BAKER. May I say to the minority leader, Mr. President, there are two Senate resolutions and a House concurrent resolution cleared on this side. They are Calendar Order Nos. 322, 323, and 326. If the minority leader is prepared to do so, I would ask that we next consider those.

Mr. BYRD. Mr. President, those items have been cleared on this side.

Mr. BAKER. Would the minority leader mind if we consider those en bloc?

Mr. BYRD. No objection.

Mr. BAKER. Mr. President, I ask unanimous consent that the items just identified be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE PAGE PROGRAM

The resolution (S. Res. 184) relating to the Senate page program, was considered, and agreed to, as follows:

S. RES. 184

Resolved, That until otherwise hereafter provided for by law, there shall be paid out of the contingent fund of the Senate such amounts as may be necessary to enable the Secretary of the Senate to furnish educational services and related items for Senate Pages in accordance with this resolution.

SEC. 2. The Senate Page Program shall be administered by the Sergeant at Arms and Doorkeeper of the Senate and the Secretaries for the Majority and Minority of the Senate. All policy decisions regarding the operation of the Senate Page Program shall be made by the Senate Management Board, with the concurrence of the Majority and Minority Leaders of the Senate.

SEC. 3. In order to provide educational services and related items for Senate Pages, the Secretary of the Senate is authorized to enter into a contract, agreement, or other arrangement with the Board of Education of the District of Columbia, or to provide such educational services and items in such other manner as he may deem appropriate.

SEC. 4. The educational services under the Senate Page Program shall consist of an academic year comprising two terms, and a page serving in such program shall be in the 11th grade.

SEC. 5. This resolution shall take effect as of the date of its approval.

GRATUITY TO KATHERINE C. AHLERS

The resolution (S. Res. 186) to pay a gratuity to Katherine C. Ahlers was considered, and agreed to, as follows:

S. RES. 186

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Katherine C. Ahlers, widow of John C. Ahlers, an employee of the Senate at the time of his death, a sum equal to one year's compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

The 100TH ANNIVERSARY OF THE BIRTH OF HARRY S TRUMAN

The concurrent resolution (H. Con. Res. 126) providing for the commemorative of the 100th anniversary of the birth of Harry S Truman, was considered, and agreed to.

The preamble was agreed to.

Mr. BAKER. Mr. President, I move to reconsider en bloc the vote by which the resolutions were agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION FOR REPRESENTATION BY THE SENATE LEGAL COUNCIL

Mr. BAKER. Mr. President, on behalf of the distinguished minority leader and myself, I send a resolution to the desk with respect to the Senate Legal Counsel and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

A resolution (S. Res. 190) to authorize representation by the Senate Legal Counsel of Senator Stevens and C. Braxton Valentine, Jr., a Senate employee, in the case of Robert Fierer v. Daniel Minchew.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. BAKER. Mr. President, this resolution would authorize and direct the Senate Legal Counsel to represent Senator TED STEVENS and staff of the Select Committee on Ethics in response to two subpenas duces tecum which have been served by the defendant in the case of Robert Fierer against Daniel Minchew, now pending in the U.S. District Court for the District of Maryland. The subpenas direct the production of investigatory records pertaining to the proceedings of the Ethics Committee in 1978 and 1979 regarding Senator Talmadge. At Senator STEVENS' request, the Senate Legal Counsel would be authorized to assert all privileges to which the committee may be entitled to protect these sensitive records.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 190

Whereas, the case of *Robert Fierer* v. *Daniel Minchew*, Civil Action No. B-79-2003, is pending in the United States District Court for the District of Maryland;

Whereas, counsel for the defendant has served trial subpenas for the production of documents upon Senator Ted Stevens, Chairman of the Select Committee on Ethics, or his agent, and upon C. Braxton Valentine, Jr., Staff Director of the Committee, relating to the Committee's investigation of former Senator Herman Talmadge and former Senate employee Daniel Minchew;

Whereas, title VII of the Ethics in Government Act of 1978, Public Law No. 95-521, establishes the Office of Senate Legal Counsel and provides that the Senate may direct its Counsel to represent the Senate, its committees, Members, officers, and employees: Now, therefore, be it

Resolved, That pursuant to section 704(a)(2) of the Ethics in Government Act of 1978, the Senate Legal Counsel is directed to represent Senator Ted Stevens and staff of the Select Committee on Ethics in connection with the subpoenas served for the production of documents in the case of *Robert Fierer* v. *Daniel Minchew*, Civil Action No. B-79-2003.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, on today's Executive Calendar, those nominations beginning on page 2, under new reports, and continuing through page 3, page 4 and page 5, nominations placed on the Secretary's desk in the Air Force, Army, Marine Corps, Navy, have been cleared for action on this side.

Could I inquire of the minority leader if he is prepared to consider at this time any or all of the nominations?

Mr. BYRD. Mr. President, all nominations on pages 1 through 5 have been cleared on this side with the exception of calendar orders numbered 234 and 235.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, in view of that, I ask unanimous consent that the nominations of the calendar as calendar orders numbered 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, and the nominations placed on the Secretary's desk be the subject of consideration by the Senate in executive session. I now ask unanimous consent that the Senate go into executive session for the purpose of considering those nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Leo Marquez, [redacted] FR, U.S. Air Force.

The follow-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Richard E. Merkling, [redacted] FR, U.S. Air Force.

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Lynwood E. Clark, [redacted] FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Bruce K. Brown, [redacted] FR, U.S. Air Force.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Clarence E. McKnight, Jr., [redacted] U.S. Army.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

To be vice admiral

Vice Adm. Thomas J. Bigley, [redacted] 1110, U.S. Navy.

DEPARTMENT OF AGRICULTURE

Daniel G. Amstutz, of New York, to be a member of the Board of Directors of the Commodity Credit Corporation, vice Seeley Lodwick, resigned.

FARM CREDIT ADMINISTRATION

Paul I. Enns, of California, to be a member of the Federal Farm Credit Board, Farm Credit Administration, for a term expiring March 31, 1989.

Joseph Alison Kyser, of Alabama, to be a member of the Federal Farm Credit Board, Farm Credit Administration, for a term expiring March 31, 1989.

FEDERAL ELECTION COMMISSION

Joan D. Aikens, of Pennsylvania, to be a member of the Federal Election Commission, for a term expiring April 30, 1989.

John Warren McGarry, of Massachusetts, to be a member of the Federal Election Commission for a term expiring April 30, 1989.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE, ARMY, MARINE CORPS, NAVY

Air Force nominations beginning Barry D. Guyse, and ending Robert C. Sparks, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of June 27, 1983.

Air Force nominations James E. Cobean, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of June 27, 1983.

Air Force nominations beginning David A. Beasley, and ending Xel Sant'Anna, which nominations were received by the Senate on July 8, 1983, and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Air Force nominations beginning Karel B. Absolon, and ending Erlind G. Royer, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Air Force nominations beginning Scott L. Brummett, and ending Leonard Smith, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Army nominations beginning James P. Basista, and ending Dennis P, Mcknight, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of June 27, 1983.

Army nominations beginning James N. Stearns, Jr., and ending Stanley J. Wolanin, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Army nominations beginning Larry E. Caylor, and ending Christopher Vanasche, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Army nominations beginning Stanford W. Hickman, and ending Brian E. Nockleby, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Marine Corps nominations beginning Tommy L. Adair, and ending Stephen W. Zolomij, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of June 27, 1983.

Marine Corps nominations beginning Robert H. Caldwell, and ending Troy M. Mitchell, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Navy nominations beginning Dianne Marie Abruzzo, and ending Rober Werling, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of June 27, 1983.

Navy nominations beginning Gary Wayne Aaron, and ending Peter Burr Loomis, IV, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 14, 1983.

Navy nominations beginning Gerald Paul Abbott, and ending Michael J. Zakrajsek, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 21, 1983.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed en bloc.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOUSE CONCURRENT RESOLUTION 153—CONDITIONAL ADJOURNMENT OF THE TWO HOUSES OF CONGRESS

Mr. BAKER. Mr. President, may I inquire of the Chair, is the adjournment resolution at the desk?

The PRESIDING OFFICER. The adjournment resolution is at the desk.

Mr. BAKER. Mr. President, I believe, but may I inquire of the Chair, is it necessary under the statute that a rollcall vote occur on that resolution?

The PRESIDING OFFICER. The statute requires a rollcall vote. However, that requirement may be waived by unanimous consent.

Mr. BAKER. Yes. Mr. President, I ask unanimous consent that the statutory requirement for the rollcall vote be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Now, Mr. President, I ask that the Chair lay before the Senate House Concurrent Resolution 153.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

H. CON. RES. 153

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Thursday, August 4, 1983, or on Friday, August 5, 1983, pursuant to a motion made by the Majority Leader, or his designee, in accordance with this resolution, and that when the Senate adjourns on Wednesday, August 3, 1983, or Thursday, August 4, 1983, or on Friday, August 5, 1983, pursuant to a motion made by the Majority Leader in accordance with this resolution, they stand adjourned until 12 o'clock meridian on Monday, September 12, 1983, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution whichever occurs first.

SEC. 2. The Speaker of the House and the Majority Leader of the Senate shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

Mr. BAKER. Mr. President, I have discussed this matter with the minority leader; and in the usual or extraordinary circumstance that would require the Speaker and me to concur in the call for Congress to reconvene, before any such determination is made, I will consult with the minority leader.

Mr. BYRD. I thank the majority leader. I compliment the Speaker and the majority leader on the recall provision.

Mr. BAKER. I thank the minority leader.

The PRESIDING OFFICER. The question is on the adoption of the concurrent resolution.

The concurrent resolution (H. Con. Res. 153) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE ATTORNEY GENERAL'S STATEMENT ON PRESIDENT REAGAN'S APPEARANCE BEFORE THE ILA

Mr. BYRD. Mr. President, I called to the attention of the Senate on yesterday a UPI wire which made reference

to something that the Attorney General had said with respect to Congress.

I simply want to say that the Attorney General called me and gave a very satisfactory explanation with regard to the matter, so far as I am concerned.

I watched him on television this morning and listened to his explanation. Inasmuch as yesterday I publicly remonstrated against his words, I wish today to thank him publicly for his call and to say again that his explanation is satisfactory to me.

SENATE PROCEDURE ON MONDAY

Mr. BYRD. Mr. President, I ask the majority leader what hour on Monday he feels we might expect the first vote.

Mr. BAKER. Mr. President, it is difficult to say, since the schedule is a little fluid.

It is my understanding, however, that a meeting between the Secretary of Agriculture and certain principally interested Senators will not occur until after the noon hour. Based on that, I would not expect any votes—certainly no votes other than procedural votes, such as to compel the attendance of absent Senators—prior to midafternoon and probably later.

Mr. BYRD. I thank the majority leader.

Mr. BAKER. I thank the minority leader.

ADJOURNMENT UNTIL 11 A.M. MONDAY, AUGUST 1, 1983

Mr. BAKER. Mr. President, I see no other Senators seeking recognition.

I move, in accordance with the order previously entered, that the Senate stand in adjournment until 11 a.m. on Monday next.

The motion was agreed to, and at 8:06 p.m. the Senate adjourned until Monday, August 1, 1983, at 11 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate July 29, 1983:

DEPARTMENT OF AGRICULTURE

Daniel G. Amstutz, of New York, to be a member of the Board of Directors of the Commodity Credit Corporation.

FARM CREDIT ADMINISTRATION

Paul I. Enns, of California, to be a member of the Federal Farm Credit Board, Farm Credit Administration, for a term expiring March 31, 1989.

Joseph Alison Kyser, of Alabama, to be a member of the Federal Farm Credit Board, Farm Credit Administration, for a term expiring March 31, 1989.

FEDERAL ELECTION COMMISSION

Joan D. Aikens, of Pennsylvania, to be a member of the Federal Election Commission, for a term expiring April 30, 1989.

John Warren McGarry, of Massachusetts, to be a member of the Federal Election Commission, for a term expiring April 30, 1989.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Leo Marquez, [redacted] FR, United States Air Force.

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Richard E. Merkling, [redacted] FR, U.S. Air Force.

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Lynwood E. Clark, [redacted] FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Bruce K. Brown, [redacted] FR, U.S. Air Force.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Clarence E. McKnight, Jr., [redacted], U.S. Army.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code. section 1370.

To be vice admiral

Vice Adm. Thomas J. Bigley, [redacted] 1110, U.S. Navy.

IN THE AIR FORCE

Air Force nominations beginning Barry D. Guyse, and ending Robert C. Sparks, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of June 27, 1983.

Air Force nomination of James E. Cobean, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of June 27, 1983.

Air Force nominations beginning David A. Beasley, and ending Xel Sant'Anna, which nominations were received by the Senate on July 8, 1983, and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Air Force nominations beginning Karel B. Absolon, and ending Erlind G. Royer, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Air Force nominations beginning Scott L. Brummett, and ending Leonard Smith, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

IN THE ARMY

Army nominations beginning James P. Basista, and ending Dennis P. Mcknight, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of June 27, 1983.

Army nominations beginning James N. Stearns, Jr., and ending Stanley J. Wolanin, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Army nominations beginning Larry E. Caylor, and ending Christopher Vanasche, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

Army nominations beginning Stanford W. Hickman, and ending Brian E. Nockleby, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

IN THE MARINE CORPS

Marine Corps nominations beginning Tommy L. Adair, and ending Stephen W. Zolomij, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of June 27, 1983.

Marine Corps nominations beginning Robert H. Caldwell, and ending Troy M. Mitchell, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 11, 1983.

IN THE NAVY

Navy nominations beginning Dianne Marie Abruzzo, and ending Robert Werling, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of June 27, 1983.

Navy nominations beginning Gary Wayne Aaron, and ending Peter Burr Loomis, IV, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 14, 1983.

Navy nominations beginning Gerald Paul Abbott, and ending Michael J. Zakrajsek, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 21, 1983.

HOUSE OF REPRESENTATIVES—*Friday, July 29, 1983*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We pray, O God, for Your blessing upon us and we thank you for all the gifts that Your creation bestows. For friendship and loyalty, for camaraderie and compassion, for kindly and loving hearts, we offer our thanksgiving and praise. May Your spirit of faith, hope, and love be with us this day and every day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3415. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1984, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3415) entitled "An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1984, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SPECTER, Mr. HATFIELD, Mr. MATTINGLY, Mr. DOMENICI, Mr. LEAHY, Mr. STENNIS, and Mr. BUMPERS to be the conferees on the part of the Senate.

INTERNATIONAL RECOVERY AND FINANCIAL STABILITY ACT

The SPEAKER. Pursuant to House Resolution 249 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2957.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2957), to extend the authority of the Export-Import Bank of the United States, encourage balanced worldwide economic growth, provide for continued participation in the International Monetary Fund, strengthen the supervision of international lending by U.S. banks, and provide for continued U.S. participation in multilateral development banks, with Mr. ALEXANDER (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee of the Whole rose on Tuesday, July 26, 1983, title III was open to amendment.

Are there any further amendments to title III?

Mr. FLORIO. Mr. Chairman, I commend the fine work of the Banking Committee and the very able chairman of the International Trade Subcommittee for his excellent work in bringing this bill to the floor. The legislation takes substantial strides toward clarifying and strengthening the mandate of the Eximbank and assuring the international competitiveness of Bank financing. I applaud the committee's efforts and hope that the authorities provided in this legislation will enable the Bank to help U.S. firms compete more successfully in world markets.

In this regard, Mr. Chairman, I would like to address the question of service industries. As you know, trade in services represents one of the fastest growing areas in export trade. The production of services currently accounts for over 67 percent of our Nation's GNP and employs nearly half of the Nation's private work force. In 1981, U.S. service exports supported an estimated $54 billion services trade surplus. Over the last decade, service exports have played an important role in offsetting increasing trade deficits in traditional manufactured goods.

It is time to recognize the vitality and importance of our service industries from an international trade perspective. Although we remain the world's leading services exporter, the U.S. share of total world service exports fell from 20 percent to 15 percent between 1972 and 1980. Increasingly, the same types of trade barriers and foreign subsidies which have hurt U.S. exporters of manufactured goods are emerging in the services sector. Greater attention to the effects of these international practices on U.S. service exports will be essential if we are to retain our current preeminent role in this area.

As the gentleman from North Carolina is aware, companion Senate legislation would mandate increased attention to the services sector by the Eximbank by requiring that services be afforded the same consideration for Bank support as other export sectors. While it is not my intention to offer a similar amendment to the legislation before us today, I would hope that this matter is something which can be regarded favorably in conference.

Mr. NEAL. Mr. Chairman, personally, I have long thought that Eximbank should give careful attention to financing the export of services as well as manufactured goods. Economically, there is little distinction between the two types of exports. Both increase our foreign earnings, and both employ more Americans in the export sector.

It is my understanding that Eximbank does not consciously discriminate against services. In fact, the latest notification Eximbank sent to the Congress is a notification of a new loan to finance the export of project management services for a nuclear science and engineering center in Indonesia. Eximbank will extend a direct credit of about $4 million to cover the purchase, from Bechtel Petroleum, Inc., of services that include project management, construction management, procurement management, quality assurance, project control, and training. This is, I think, a good example of our potential for the export of services, and of Eximbank's readiness to finance them, where appropriate.

I have looked at the language on services in the Eximbank legislation reported by the Senate Banking Committee. I am certainly prepared to give it my close attention in conference. I cannot, of course, commit the conferees, and I must reserve my own position until we enter conference negotiations. This particular language is but one instance of many potential differences that must be reconciled, and it will have to be dealt with in the context of all the conference compromises.

Nonetheless, whatever comes out of conference, I will continue to support Eximbank efforts to finance the export of services.

Mr. ST GERMAIN. Mr. Chairman, I ask unanimous consent that the remainder of the bill, H.R. 2957, be considered as read, printed in the RECORD, and open to amendment at any point.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

The text of title IV and title V is as follows:

TITLE IV—INTERNATIONAL LENDING SUPERVISION

SEC. 401. This title may be cited as the "International Lending Supervision Act of 1983".

DEFINITIONS

SEC. 402. (a) The term "appropriate Federal banking agency" has the same meaning assigned to the term in section 3(q) of the Federal Deposit Insurance Act (12 U.S.C. 1813(q)), and, for purposes of this title, the "appropriate Federal banking agency" for bank holding companies and any nonbank subsidiary thereof, Edge Act corporations organized under section 25(a) of the Federal Reserve Act (12 U.S.C. 611-631), and agreement corporations operating subject to section 25 of the Federal Reserve Act (12 U.S.C. 601-604(a)) is the Board of Governors of the Federal Reserve System.

(b) The term "banking institution", for purposes of this title, means any "insured bank", as that term is used in section 3(h) of the Federal Deposit Insurance Act (12 U.S.C. 1813(h)) or any subsidiary of an insured bank; any Edge Act corporation organized under section 25(a) of the Federal Reserve Act (12 U.S.C. 611-631); and any agreement corporation operating subject to section 25 of the Federal Reserve Act (12 U.S.C. 601-604(a)). To the extent determined by the appropriate Federal banking agency, the term "banking institution" shall also include any agency or branch of a foreign bank, and any commercial lending company owned or controlled by one or more foreign banks or companies that control a foreign bank as those terms are defined in the International Banking Act of 1978 (12 U.S.C. 3101). The term "banking institution" shall not include a foreign bank.

(c) The term "Examination Council" for the purposes of this title shall have the same meaning as the term "Council" as that term is defined in the Federal Financial Institutions Examination Council Act of 1978 (12 U.S.C. 3301 et seq.).

STRENGTHENED SUPERVISION OF INTERNATIONAL LENDING

SEC. 403. Each appropriate Federal banking agency shall evaluate banking institution foreign country exposure and transfer risk for use in banking institution examination and supervision. Each such agency shall establish examination and supervisory procedures to assure that factors such as foreign country exposure and transfer risk are taken into account in evaluating the adequacy of the capital of banking institutions.

RESERVES

SEC. 404. (a) Pursuant to regulations promulgated by the Examination Council, each appropriate Federal banking agency shall require a banking institution to establish and maintain a special reserve whenever in the judgment of such agency:

(1) the quality of such institution's assets has been impaired by a protracted inability of public or private borrowers in a foreign country to make payments on their external indebtedness as indicated by such factors, among others, as a failure by such public or private borrowers to make full interest payments on external indebtedness, or to comply with the terms of any restructured indebtedness, or a failure by the foreign country to comply with any International Monetary Fund or other suitable adjustment program, or where no definite prospects exist for the orderly restoration of debt service; or

(2) there is a substantial likelihood that such debt cannot reasonably be expected to be repaid in accordance with its original terms and conditions without additional borrowing or a major restructuring.

(b) The appropriate Federal banking agency shall have the discretion to grant reasonable time periods to a banking institution required to establish such a special reserve to come into compliance with the requirement, if such action is taken to avoid disrupting orderly international lending.

(c) Special reserves established pursuant to this section shall be charged against current income and shall not be considered as part of capital and surplus or allowances for possible loan losses for bank regulatory or supervisory purposes.

(d) The Examination Council shall promulgate regulations to implement this section within one hundred and eighty days after the date of the enactment of this title. The appropriate Federal banking agencies shall promulgate regulations or orders necessary to implement this section within ninety days after the promulgation of such Examination Council regulations.

ACCOUNTING FOR FEES ON INTERNATIONAL LOANS

SEC. 405. (a) The Examination Council shall promulgate regulations for accounting for agency, commitment, management and other fees charged by a banking institution in connection with an international loan. Such regulations shall establish the accounting treatment of such fees for regulatory and supervisory purposes to assure that the appropriate portion of such fees is accrued in income over the effective life of each such loan.

(b) The Examination Council shall promulgate regulations to implement this section within one hundred and eighty days after the date of the enactment of this title. The appropriate Federal banking agencies shall promulgate regulations or orders necessary to implement this section within ninety days after the promulgation of such Examination Council regulations.

COLLECTION AND DISCLOSURE OF CERTAIN INTERNATIONAL LENDING DATA

SEC. 406. (a) Pursuant to regulations promulgated by the Examination Council, each appropriate Federal banking agency shall require each banking institution with foreign country exposure to submit, no fewer than four times each calendar year, such information regarding that exposure in a format prescribed by the Examination Council regulations.

(b) Pursuant to regulations promulgated by the Examination Council, each appropriate Federal banking agency shall require banking institutions to disclose to the public information regarding material foreign country exposure in relation to assets and to capital.

(c) The Examination Council shall promulgate regulations to implement this section within one hundred and eighty days after the date of the enactment of this title. The appropriate Federal banking agencies shall promulgate regulations or orders necessary to implement this section within ninety days after the promulgation of such Examination Council regulations.

INTERNATIONAL COOPERATION AND STUDY OF INTERNATIONAL SUPERVISION

SEC. 407. (a) the Examination Council and the Federal banking agencies shall consult with the banking supervisory authorities of other countries to reach understandings aimed at achieving the adoption of effective and consistent supervisory policies and practices with respect to international lending.

(b) Within twelve months after the date of the enactment of this title, the Examination Council shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on the statutes, regulations, and examination and supervisory procedures and practices, governing international banking in each of the Group of Ten Nations and Switzerland with particular attention to such matters bearing on capital requirements, lending limits, reserves, disclosure, examiner access, and lender of last resort resources.

CAPITAL ADEQUACY

SEC. 408. (a)(1) Each appropriate Federal banking agency shall undertake to strengthen the capital of banking institutions by establishing adequate levels of capital for each category of institution, such as multinational, regional and community institutions, and by using such other methods as the agency deems appropriate.

(2) Each appropriate Federal banking agency shall have the authority to establish such level of capital for an institution as the agency deems to be necessary or appropriate in light of the particular circumstances of the institution.

(b)(1) Failure of a banking institution to maintain its established level of capital shall constitute an unsafe and unsound practice within the meaning of section 8 of the Federal Deposit Insurance Act.

(2) In addition to any other appropriate remedy, the appropriate Federal agency shall require any banking institution which does not maintain its prescribed capital level to submit and adhere to a plan, acceptable to the agency, describing how and when the institution will achieve its prescribed level.

(c)(1) The Chairman of the Board of Governors of the Federal Reserve System and the Secretary of the Treasury shall encourage governments, central banks, and regulatory authorities of other major banking countries to work toward maintaining and, where appropriate, strengthening the capital bases of banking institutions involved in international lending.

(2) The Chairman and the Secretary shall report to the Congress within one hundred and eighty days of the enactment of this provision on progress achieved in reaching such goal.

FOREIGN LOAN EVALUATIONS

SEC. 409. (a)(1) No banking institution shall extend credit, whether by loan, lease, guarantee, or otherwise, which individually or in the aggregate exceeds $1,000,000, to finance any project involving the construction or operation of any mining, processing or manufacturing facility located outside the United States or its territories and possessions unless a written economic feasibility evaluation of such foreign project is prepared and approved in writing by a senior official of such banking institution.

(2) Such evaluation shall—

(A) take into account the profit potential of the project, the impact of the project on world markets, the inherent competitive ad-

vantages and disadvantages of the project over the entire life of the project, and the likely effect of the project upon the overall long term economic development of the country in which the project is located;

(B) document that the extension of credit can reasonably be expected to be repaid from revenues generated by such foreign projects without regard to any subsidy or guarantee provided by the government involved, any instrumentality of any country, or by any international organization; and

(C) shall be available to representatives of the appropriate Federal banking agency and such other individuals and entities as have lawful access to such information.

(b) Such economic feasibility evaluations shall be reviewed by representatives of the appropriate Federal banking agencies whenever an examination by such appropriate Federal banking agency is conducted.

GENERAL AUTHORITIES

SEC. 410. (a) The Examination Council is authorized to interpret and define the terms used in this title, and the Examination Council and each appropriate Federal banking agency shall prescribe rules or regulations or issue orders as necessary to effectuate the purposes of this title and to prevent evasions thereof. The appropriate Federal banking agency is authorized to apply the provisions of this title to any affiliate of an insured bank, but only to affiliates for which it is the appropriate Federal banking agency, in order to promote uniform application of this Act or to prevent evasions thereof. For purposes of this section, the term "affiliate" shall have the same meaning as in section 23A of the Federal Reserve Act (12 U.S.C. 371c(b)) except that the term "member bank" in such section shall be deemed to refer to "insured bank", as that term is used in section 402(b) of this title.

(b) The appropriate Federal banking agencies shall establish uniform systems to implement the authorities provided under this title.

(c) The powers and authorities granted in this title shall be supplemental to and shall not be deemed in any manner to derogate from or restrict the authority of each appropriate Federal banking agency under section 8 of the Federal Deposit Insurance Act (12 U.S.C. 1818) or any other law including the authority to require additional capital or reserves. Any such authority may be used by an agency to ensure compliance by a banking institution with the provisions of this title and all rules, regulations, or orders issued pursuant thereto.

(d) The issuance of regulations, requirement of reports, and collection of information pursuant to this title shall be exempt from the requirements of section 3501 through 3520, inclusive, of title 44, United States Code, and sections 601 through 612, inclusive, of title 5, United States Code.

(e) Any banking institution which violates, or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such banking institution, who violates any provision of this title, or any rule, regulation, or order, issued under this title, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. Such violations shall be deemed to be a violation of a final order under section 8(i)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1818(i)(2)) and the penalty shall be assessed and collected by the appropriate Federal banking agency under the procedures established by, and subject to the rights afforded to parties, provided in said section.

(f) Within one year after the date of the enactment of this title and for each of the two succeeding years, the Examination Council and the appropriate Federal banking agencies shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on actions taken to implement the provisions of this title. The report shall include a description of the actions taken in carrying out the objectives of the title, and any actions taken by any appropriate Federal banking agency that are inconsistent with the uniform implementation by the appropriate Federal banking agencies of their respective authorities under this title, and any recommendations for amendments to this or other legislation.

LEGISLATIVE REVIEW

SEC. 411. (a) No rule or regulation promulgated by the Examination Council or by an appropriate Federal banking agency pursuant to this title may become effective until after the first period of thirty calendar days of continuous session of Congress which occurs after the day on which such rule or regulation is published as final. If within such thirty-day period, the Committee on Banking, Housing, and Urban Affairs of the Senate or the Committee on Banking, Finance and Urban Affairs of the House of Representatives has reported out or been discharged from further consideration of a joint resolution of disapproval or other legislation which is intended to modify or invalidate the rule or regulation or any portion thereof, the rule or regulation or portion thereof so addressed shall not become effective for a period of ninety calendar days from the date of committee action or discharge unless the House to which such committee reports has rejected such resolution or legislation, in which case the rule or regulation may go into effect only after the expiration of the thirty calendar days described in the first sentence of this subsection if the other House does not have such a resolution or legislation pending or adopted, and if the requirements of section 553 of title 5, United States Code, are met.

(b) The provisions of subsection (a) may be waived upon the written request of the Examination Council or the appropriate Federal banking agency, if agreed to by the chairmen and ranking minority members of both committees.

(c) Congressional inaction on any rule or regulation shall not be deemed an expression of approval of the rule or regulation involved.

(d) For purposes of this section—

(1) continuity of session is broken only by an adjournment of Congress sine die; and

(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of calendar days of continuous session of Congress.

GAO AUDIT AUTHORITY

SEC. 412. (a) Under regulations of the Comptroller General, the Comptroller General shall audit the Examination Council (as defined in section 402(c) of the Act) and the appropriate Federal banking agencies (as defined in section 402(a) of this Act), but may carry out an onsite examination of an open insured bank or bank holding company only if the appropriate Federal banking agency has consented in writing. An audit under this subsection may include a review or evaluation of the international regulation, supervision, and examination activities of the Examination Council and the appropriate Federal banking agency, including the coordination of such activities with similar activities of regulatory authorities of a foreign government or international organization. Audits of the Federal Reserve Board and Federal Reserve banks may not include—

(1) transactions for or with a foreign central bank, government of a foreign country, or nonprivate international financing organization;

(2) deliberations, decisions, or actions on monetary policy matters, including discount window operations, reserves of member banks, securities credit, interest on deposits, and open market operations;

(3) transactions made under the direction of the Federal Open Market Committee; or

(4) a part of a discussion or communication among or between members of the Board of Governors and officers and employees of the Federal Reserve System related to paragraphs (1) through (3) of this subsection.

(b)(1) Except as provided in this subsection, an officer or employee of the General Accounting Officer may not disclose information identifying an open bank, an open bank holding company, or a customer of an open or closed bank or bank holding company. The Comptroller General may disclose information related to the affairs of a closed bank or closed bank holding company identifying a customer of the closed bank or closed bank holding company only if the Comptroller General believes the customer had a controlling influence in the management of the closed bank or closed bank holding company or was related to or affiliated with a person or group having a controlling influence.

(2) An officer or employee of the General Accounting Office may discuss a customer, bank, or bank holding company with an official of the Examination Council or an appropriate Federal banking agency and may report an apparent criminal violation to an appropriate law enforcement authority of the United States Government or a State.

(3) This subsection does not authorize an officer or employee of the Examination Council or an appropriate Federal banking agency to withhold information from a committee of Congress authorized to have the information.

(c)(1) To carry out this section, all records and property of or used by the Examination Council or an appropriate Federal banking agency, including samples of reports of examinations of a bank or bank holding company the Comptroller General considers statistically meaningful and workpapers and correspondence related to the reports shall be made available to the Comptroller General, including such records and property pertaining to the coordination of international regulation, supervision and examination activities of the Examination Council or an appropriate Federal banking agency. The Comptroller General shall give the Examination Council or an appropriate Federal banking agency a current list of officers and employees to whom, with proper identification, records and property may be made available, and who may make notes or copies necessary to carry out an audit. The Examination Council or an appropriate Federal banking agency shall give the Comptroller General suitable and lockable offices and furniture, telephones, and access to copying facilities.

(2) Except for the temporary removal of workpapers of the Comptroller General that do not identify a customer of an open or closed bank or bank holding company, an open bank, or an open bank holding company, all workpapers of the Comptroller General and records and property of or used by the Examination Council or an appropriate Federal banking agency that the Comptroller General possesses during an audit, shall remain in such agency. The Comptroller General shall prevent unauthorized access to records or property.

TITLE V—MULTILATERAL DEVELOPMENT BANKS

INTER-AMERICAN DEVELOPMENT BANK

SEC. 501. The Inter-American Development Bank Act (22 U.S.C. 283 et seq.) is amended by adding at the end thereof the following:

"SEC. 31. (a)(1) The United States Governor of the Bank is authorized to vote for resolutions—

"(A) which were proposed by the Governors at a special meeting in February 1983;

"(B) which are pending before the Board of Governors of the Bank; and

"(C) which provide for—

"(i) an increase in the authorized capital stock of the Bank and subscriptions thereto; and

"(ii) an increase in the resources of the Fund for Special Operations and contributions thereto.

"(2)(A) Upon adoption of the resolutions specified in paragraph (1), the United States Governor of the Bank is authorized on behalf of the United States to—

(i) subscribe to four hundred twenty-seven thousand three hundred and ninety-six shares of the increase in the authorized capital stock of the Bank; and

"(ii) contribute $380,000,000 to the Fund for Special Operations.

"(B) Any commitment to make such subscriptions to paid-in and callable capital stock and to make such contributions to the Fund for Special Operations shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

"(b) In order to pay for the increase in the United States subscription and contribution provided for in this section, there are authorized to be appropriated, without fiscal year limitation, for payment by the Secretary of the Treasury—

"(1) $5,155,862,744 for the United States subscriptions to the capital stock of the Bank; and

"(2) $380,000,000 for the United States share of the increase in the resources of the Fund for Special Operations.

"SEC. 32. It shall be the policy of the United States that no initiatives, discussions, or recommendations concerning the placement or removal of any Inter-American Development Bank, African Development Bank, or Asian Development Bank personnel shall be based on the political philosophy or activity of the individual under consideration.".

ASIAN DEVELOPMENT BANK

SEC. 502. The Asian Development Bank Act (22 U.S.C. 285 et seq.) is amended by adding at the end thereof the following:

"SEC. 27. (a)(1) The United States Governor of the Bank is authorized to subscribe on behalf of the United States to one hundred twenty-three thousand three hundred and seventy-five additional shares of the capital stock of the Bank.

"(2) Any subscription to the capital stock of the Bank shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

"(b) In order to pay for the increase in the United States subscription to the Bank provided for in subsection (a), there are authorized to be appropriated, without fiscal year limitation, $1,322,999,476 for payment by the Secretary of the Treasury.

"SEC. 28. (a)(1) The United States Governor of the Bank is authorized to contribute on behalf of the United States $520,000,000 to the Asian Development Fund, a special fund of the Bank.

"(2) Any commitment to make the contribution authorized in paragraph (1) shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for the United States contribution to the Asian Development Fund provided for in this section, there are authorized to be appropriated, without fiscal year limitation, $520,000,000 for payment by the Secretary of the Treasury.".

AFRICAN DEVELOPMENT FUND

SEC. 503. The African Development Fund Act (22 U.S.C. 290g et seq.) is amended by adding at the end thereof the following:

"SEC. 213. (a)(1) The United States Governor of the Fund is authorized to contribute on behalf of the United States $150,000,000 to the Fund as the United States contribution to the third replenishment of the resources of the Fund.

"(2) Any commitment to make the contribution authorized in paragraph (1) shall be made subject to obtaining the necessary appropriations.

"(b) In order to pay for the United States contribution provided for in this section, there are authorized to be appropriated, without fiscal year limitation, $150,000,000 for payment by the Secretary of the Treasury.".

HUMAN RIGHTS

"SEC. 504. Section 701 of the International Financial Institutions Act (22 U.S.C. 262g) is amended—

(1) in subsection (a)(1), by striking out "consistent"; and

(2) in subsection (g)(1), by striking out "The Secretary of the Treasury, in consultation with the Secretary of State, shall report quarterly" and inserting in lieu thereof "Not later than thirty days after the end of each calendar quarter, the Secretary of the Treasury, in consultation with the Secretary of State, shall report.".

STUDY

SEC. 505. (a) It is the sense of Congress that—

(1) the multilateral development institutions serve an invaluable role in promoting development abroad;

(2) foreign direct investment, trade, and commercial lending make a contribution at least equal to that of development assistance in promoting development;

(3) United States economic interests are vitally affected by conditions in developing countries; and

(4) the multilateral development banks already play an important, although indirect, role in encouraging private investment flows.

(b)(1) The Secretary of the Treasury shall conduct a study of how the multilateral development institutions could more actively encourage foreign direct investment and commercial capital flows and channel such investment and capital flows to developing countries for sound and productive development projects through a new investment banking facility at one or more of these institutions. In addition, such study shall evaluate whether the multilateral development institutions could help increase foreign direct investment and commercial capital flows by insuring that the interests of investors and host governments are adequately protected.

(2) The Secretary of the Treasury shall solicit comments on such study from the multilateral development institutions and shall incorporate such comments with the study in a report to be transmitted to both Houses of the Congress within one hundred and eighty days of the date of the enactment of this section.

EFFECTIVE DATE

SEC. 506. This title shall take effect on October 1, 1983, except that section 503 shall take effect on the date of the enactment of this title.

Mr. ST GERMAIN. Mr. Chairman, I ask unanimous consent that all debate on the bill and all amendments thereto cease at 12 o'clock.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Rhode Island?

Mr. BETHUNE. Mr. Chairman, reserving the right to object, would the gentleman please restate the request.

Mr. ST GERMAIN. That all debate on the remainder of the bill and all amendments thereto cease at 12 o'clock.

Mr. BETHUNE. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

AMENDMENT OFFERED BY MR. ST GERMAIN

Mr. ST GERMAIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ST GERMAIN: Page 18, after line 13, insert the following:

PROMOTING ECONOMIC GROWTH AND CONDITIONS FOR EXCHANGE RATE STABILITY

SEC. 301. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"PROMOTING ECONOMIC GROWTH AND THE CONDITIONS FOR EXCHANGE RATE STABILITY

"SEC. 46. (a) In order to help assure that the resources provided under section 40 are used to support progrowth policies which will help establish the economic conditions necessary for greater financial and exchange rate stability, it is the sense of Congress that the Secretary of the Treasury shall instruct the United States Executive Director of the Fund to work for adoption of policies in the Fund, both within the framework of Article IV consultations and with respect to the conditions associated with Fund-supported balance of payments adjustments programs, that—

"(1) promote sustained noninflationary economic growth, monetary stability, and higher levels of productive employment;

"(2) support the evolution of broadly based, nondiscriminatory, low-rate tax systems which will encourage private sector savings and provide incentives for productive employment, investment, and private sector growth;

"(3) encourage the establishment of sound monetary and fiscal policies which limit government preemption of real and financial

resources and which are conducive to sustainable economic recovery and growth, full employment, and price and exchange rate stability;

"(4) discourage government regulation and government allocation of real and financial resources;

"(5) encourage international capital flows and investment by providing a predictable economic and legal climate based on sanctity of contracts with, and property rights of, foreign investors;

"(6) ensure that policies adopted by third world countries pursuant to their borrowing from the Fund are fair and equitable to all strata of their economy and society; and

"(7) would allow prices to better reflect underlying market forces.

"(b) In negotiating with third world countries, the United States Executive Director of the Fund shall work through the Fund for policies which assist low- and moderate-income families to maintain and increase their level and standard of living, and which provide for and foster the creation of democratic institutions.

"(c) The Secretary shall also instruct the United States Executive Director of the Fund to propose and work for the adoption of policies by the Fund that would strengthen efforts to promote conditions contributing to greater stability of exchange rates. Among other steps, the United States Executive Director of the Fund shall propose that—

"(1) Fund-approved economic adjustment programs seek to promote greater exchange rate stability by supporting policies which would reduce the need for abrupt or damaging exchange rate changes;

"(2) as part of the Article IV consultation process, the Fund review the efforts of each Fund member to collaborate with the Fund to promote stable exchange rates. If as a result of such review, it is determined by the Fund that a member is not pursuing policies which promote a stable system of exchange rates, the Fund shall recommend and encourage the adoption of policy changes to better promote greater economic, price and exchange rate stability.

"(d) The Secretary of the Treasury, as the United States Governor of the Fund, shall report to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and to the Committee on Banking, Finance and Urban Affairs of the House of Representatives on a semi-annual basis concerning the above directives to the United States Executive Director of the Fund.".

Page 18, strike out line 18 and all that follows through page 19, line 3, and insert in lieu thereof the following:

(A) by striking out "decision of January 5, 1962, and inserting in lieu thereof "decisions of January 5, 1962, and February 24, 1983, as amended in accordance with their terms,"; and

(B) by striking out "not to exceed $2,000,000,000 outstanding at any one time," and inserting in lieu thereof "in an amount not to exceed the equivalent of 4,250,000,000 Special Drawing Rights, limited to such amounts as are appropriated in advance in appropriation Acts, except that prior to activation the Secretary of the Treasury shall certify that supplementary resources are needed to forestall or cope with an impairment of the international monetary system and that the Fund has fully explored other means of funding,";

(2) in section 17(b), by striking out "$2,000,000,000," and inserting in lieu thereof "4,250,000,000 Special Drawing Rights, except that prior to activation the Secretary of the Treasury shall certify that supplementary resources are needed to forestall or cope with an impairment of the international monetary system and that the Fund has fully explored other means of funding,";

Page 19, line 16, insert "(a)" after "Sec. 40.".

Page 19, after line 10, insert the following:

"(b) The Secretary of the Treasury shall consult with the Chairman and the Ranking Minority Member of—

"(1) the Committee on Banking, Finance and Urban Affairs and the Committee on Appropriations of the House of Representatives, and any appropriate subcommittee of each such committee; and

"(2) the Committee on Foreign Relations, the Committee on Appropriations, and the Committee on Banking, Housing, and Urban Affairs of the Senate, and any appropriate subcommittee of each such committee, for purposes of discussing the position of the executive branch and the views of the Congress with respect to any international negotiations being held to consider any future quota increase for the International Monetary Fund which may involve an increased contribution, subscription, or loan by the United States. Such consultation shall be made (A) not later than 30 days before the initiation of such international negotiations, (B) during the period in which such negotiations are being held, in a frequent and timely manner, and (C) before a session of such negotiations is held at which the United States representatives may agree to such quota increase.

Page 25, strike out line 20 and all that follows through page 27, line 5, and insert in lieu thereof the following:

SUSTAINING ECONOMIC GROWTH

"SEC. 307. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"SUSTAINING ECONOMIC GROWTH

"SEC. 47. (a)(1) The President shall instruct the Secretary of the Treasury, the Secretary of State, and other appropriate Federal officials, including the Chairman of the Board of Governors of the Federal Reserve System, to use all appropriate means to encourage countries to formulate economic adjustment programs to deal with their balance of payment difficulties and external debt owed to private banks.

"(2) Such economic adjustment programs should be designed to safeguard, to the maximum extent feasible, international economic growth, world trade, employment, and the long-term solvency of banks, and to minimize the likelihood of civil disturbances in countries needing economic adjustment programs.

"(b) To ensure the effectiveness of economic adjustment programs supported by Fund resources—

"(1) the United States Executive Director of the Fund shall recommend and shall work for changes in Fund guidelines, policies, and decisions which would—

"(A) convert short-term bank debt which was made at high interest rates into long-term debt at lower rates of interest;

"(3) assure that the annual external debt service, which shall include principal, interest, points, fees, and other charges required of the country involved, is a manageable and prudent percentage of the projected annual export earnings of such country; and

"(C) provide that in approving any economic adjustment program the Fund shall take into account the number of countries applying to the Fund for economic adjustment programs and the aggregate effects that such programs will have on international economic growth, world trade, exports and employment of other member countries, and the long-term solvency of banks.

"(2)(A) Except as provided in subparagraph (B), the United States Executive Director of the Fund shall oppose and vote against providing assistance from the Fund for any economic adjustment program for a country in which the annual external debt service exceeds 85 percent of the annual export earnings of such country unless the United States Executive Director of the Fund first determines and provides written documentation to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives that—

"(i) the economic adjustment program converts short-term bank debt which was made at high interest rates into long-term debt at lower rates of interests;

"(ii) the annual external debt service required of the country involved is a manageable and prudent percentage of the projected annual export earnings of such country; and

"(iii) the economic adjustment program will not have an adverse impact on international economic growth, world trade, exports, and employment of other member countries, and the long-term solvency of banks.

"(B) The provisions of subparagraph (A) shall not apply in any case in which the United States Executive Director of the Fund first determines and provides written documentation to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives that—

"(i) an emergency exists in a nation that has applied to the Fund for assistance that requires an immediate short-term loan to avoid disrupting orderly financial markets;

"(ii) a sudden decrease in export earnings in the country applying to the Fund for assistance has increased the ratio of annual external debt service to annual export earnings, to greater than 85 percent for a period projected to be no more than one year; or

"(iii) other extraordinary circumstances exist which warrant waiving the provisions of subparagraph (A).

"(c) The National Advisory Council on International Monetary and Financial Policies shall include in each of its annual reports to the Congress copies of the analyses and any written documentation prepared by the United States Executive Director of the Fund pursuant to paragraphs (2)(A) or (2)(B) of subsection (b) and a statement detailing the actions and progress made in carrying out the requirements of subsections (a) and (b).".

PROMOTING DOMESTIC ECONOMIC GROWTH AND EMPLOYMENT

SEC. 308. The Bretton Woods Agreements Act (22 U.S.C. 286. et seq.) is amended by adding at the end thereof the following:

"PROMOTING DOMESTIC ECONOMIC GROWTH AND EMPLOYMENT

"SEC. 48. (a)(1) The cornerstone of a healthy world economy and international trading and financial system is a growing

domestic economy in the United States with price stability and low interest rates.

"(2) Sustained noninflationary economic growth in the United States, full employment in United States basic industries, and a robust economy are essential to avoiding the imposition of protectionist barriers that would inhibit the free flow of trade and undermine the economic and financial stability of countries using the Fund.

"(3) Provision of adequate credit at affordable rates of interest to the United States economy by the United States banking system is essential to promoting a growing domestic economy.

"(b) To that end, and especially to provide working capital to promote the expansion of domestic industries, the appropriate Federal banking agencies, as defined in section 402 of the International Lending Supervision Act of 1983, are directed to develop regulations to implement subsections (c) through (f) within 30 days of the date of the enactment of this section.

"(c) This section shall apply to all banking institutions which have foreign loans which are excessive. A banking institution's loans shall be considered excessive if the aggregate of such loans to public and private sector borrowers in a foreign country described in section 424 of such Act exceeded such banking institution's primary capital on June 30, 1983, or on any date thereafter until January 1, 1986.

"(d)(1) Except as provided in subsections (e) and (f), from the date of the enactment of this section until January 1, 1986, no banking institution having excessive loans under subsection (c) shall make any new loans to foreign countries described in section 404 of such Act if such loans shall cause the growth rate of such banking institution's aggregate loans to all such foreign countries to exceed one-half of the growth rate of such banking institution's aggregate loans to all such foreign countries during the period of January 1, 1980, through June 30, 1982.

"(2) Notwithstanding the provisions of this section, banking institutions may honor binding commitments, which were effective before July 30, 1983, to lend in such countries.

"(e)(1) Any banking institution having excessive loans under subsection (c) may exceed the limits set forth in subsection (d) if the annual rate of growth of such banking institution's domestic lending exceeds the limit so specified.

"(2) In such cases, the rate of growth of aggregate loans to all foreign countries described in section 404 of such Act shall not exceed the rate of growth of domestic lending.

"(f) This section shall not be enforced if—

"(1) the Secretary of the Treasury and the Chairman of the Board of Governors of the Federal Reserve System find that such enforcement would adversely affect the domestic economy; or

"(2) the President determines that enforcement of this section would be detrimental to the national interest."

PROHIBITION OF FRONT END FEES

SEC. 309. (a) In order to avoid excessive debt service burdens on debtor countries, no banking institution shall charge, in connection with the restructuring of an international loan, any fee exceeding the administrative cost of the restructuring unless it amortizes such fee over the effective life of each such loan.

(b) The requirement of subsection (a) shall take effect on the date of the enactment of this section. Each appropriate Federal banking agency shall promulgate such regulations as are necessary to further carry out the provisions of this section.

OPPOSING FUND BAILOUTS OF BANKS

SEC. 310. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"OPPOSING FUND BAILOUTS OF BANKS

"SEC. 49. Except as provided in section 47 (a section entitled 'Sustaining Economic Growth'), the Secretary of the Treasury shall instruct the United States Executive Director of the Fund—

"(1) to oppose and vote against any Fund drawing by a member country where, in his judgment, the Fund resources would be drawn principally for the purpose of repaying loans which have been imprudently made by banking institutions to the member country; and

"(2) to work to insure that the Fund encourages borrowing countries and banking institutions to negotiate, where appropriate, a rescheduling of debt which is consistent with safe and sound banking practices and the country's ability to pay.".

FLOATING EXCHANGE RATES

SEC. 311. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"FLOATING EXCHANGE RATES

"SEC. 52. (a) The Secretary of the Treasury shall, in consultation with the Secretary of State and the United States Trade Representative, initiate discussions with other countries regarding the economic dislocations which result from structural exchange rate imbalances.

"(b) Not later than 180 days after the date of the enactment of this section, the Secretary of the Treasury shall transmit a report to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives regarding proposals to reform the floating exchange rate system. Such report shall contain such recommendations for legislative or administrative actions as the Secretary of the Treasury considers advisable.".

SURPLUS COMMODITIES REPORT

SEC. 312. (a) Section 4(b) of the Bretton Woods Agreement Act (22 U.S.C. 286b) is amended—

(1) in paragraph (5)—

(A) by inserting "(A)" after "(5)"; and

(B) by adding at the end thereof the following:

"(B) Beginning 180 days after the date of the enactment of this paragraph, and at intervals of 180 days thereafter for the next three years, the Council shall prepare and transmit to the President and to the Congress a report listing all applications which have been filed during the preceding 180 days with the Fund for project assistance which would establish or enhance the capacity of any country to produce a commodity for export, if—

"(i) such commodity is in surplus on world markets or is likely to be in surplus on world markets at the time the resulting productive capacity is expected to become operative; and

"(ii) such project assistance will cause substantial injury to the United States producers of the same, similar, or competing commodity."; and

(2) by adding at the end thereof the following:

"(8) The general policy objectives for the guidance of the United States Executive Director of the Fund shall take into account the effect that country adjustment programs have upon individual industry sectors and international commodity markets—

"(A) to minimize projected adverse impacts; and

"(B) to avoid, wherever possible, government subsidization of production and exports of international commodities without regard to economic conditions in the markets for such commodities.".

HUMAN NEEDS REPORT

SEC. 313. Section 33 of the Bretton Woods Agreement Act (22 U.S.C. 286s) is amended by adding at the end thereof the following:

"(d) Not later than 180 days after the date of the enactment of this subsection, the Secretary of the Treasury shall transmit a report to the Committee on Banking, Housing, and Urban Affairs and the Committee on Foreign Relations of the Senate and the Committee on Banking, Finance, and Urban Affairs of the House of Representatives specifying the actions which have been taken to carry out the provisions of this section.".

NON-PROLIFERATION OF NUCLEAR WEAPONS

SEC. 314. The Bretton Woods Agreements Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"NON-PROLIFERATION OF NUCLEAR WEAPONS

"SEC. 51. The United States Executive Director of the Fund shall consider, if appropriate, in carrying out his duties, whether a recipient country has detonated a nuclear device, whether the country is not a State Party to the Treaty on Non-Proliferation of Nuclear Weapons, and whether the country is not a State Party to the Treaty Banning Nuclear Weapon Tests in the Atmosphere, in outer space, and under water.".

Mr. ST GERMAIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

Mr. ST GERMAIN. Mr. Chairman, debate on this bill began last Friday on the rule, with general debate occurring on Monday, followed by over 6 hours under the 5-minute rule on Tuesday. From the beginning we knew this bill would be controversial, and for this reason, I and my committee colleagues have encouraged an open debate with ample opportunity for Members to voice their doubts and misgivings in an effort to assure a thorough amendatory process.

Taking into account the legitimate concerns voiced by a number of Members on both sides of the aisle concerning this legislation, the ranking minority member of the Banking Committee, CHALMERS WYLIE, and I are offering a compromise perfecting amendment supported by the House leadership and the administration.

Our amendment in summarized form responds to the concerns expressed

during extensive debate to this point as follows:

First. The amendment provides for controls over the release of U.S. funds to the IMF by requiring that the $2.61 billion requested by the administration for increases in the general agreements to borrow (GAB) funds can only be released after the Secretary of the Treasury has certified the necessity for supplemental resource to forestall an impairment of the international monetary system and that the IMF has explored all other means of financing.

Second. Responding to the legitimate concerns related to a possible diverting of resources from U.S. domestic needs, we incorporated the perfecting amendments adopted by the House on Tuesday as well as a number of other proposals to title III which address this concern. In addition, the amendment changes the Bretton Woods Agreement Act to establish without doubt the priority of the health of the U.S. economy and requires the Federal Reserve, Comptroller of the Currency, and FDIC, to identify excessive foreign lending, prevent further excess foreign lending, encourage domestic lending, and to require the Treasury Secretary and Federal Reserve Chairman to implement the Bretton Woods Act in such a way that U.S. economic well-being has the highest priority.

Third. An antibailout provision is provided to instruct the U.S. Executive Director to, in the words of the amendment:

> To oppose and vote against any fund drawing by a member country where, in his judgment, the Fund resources would be drawn principally for the purpose of repaying loans which have been imprudently made by banking institutions to the member country.

Fourth. The concerns expressed that repayment requirements are too stringent thereby cutting off any import capability is met by requiring the U.S. Executive Director to:

> Work to insure that the Fund encourages borrowing countries and banking institutions to negotiate, where appropriate, a rescheduling of debt which is consistent with safe and sound banking practices and the country's ability to pay.

Fifth. An absolute prohibition of upfront rescheduling fees by U.S. banks is contained in the amendment except for administrative fees covering actual costs.

Sixth. A limitation is placed upon further lending by U.S. banks which have engaged in excessive loans to U.S. countries. Excessive loans are identified as those which exceed a bank's primary capital.

I ask my colleagues on both sides of the aisle to review carefully this amendment and give due weight to the need for compromise and enactment of this legislation.

My colleagues, all I can say to you is that a great deal of work was put into this compromise. There are those who will continue to criticize it, but very frankly, it would be impossible to satisfy everyone's objections to this legislation, because the minute you satisfy the objection of one group, you then find that you have another group that is upset with that which you have done to satisfy the objections of the other group.

So, we really and truly worked in a bipartisan manner—and I reiterate bipartisan—with the administration, with the Secretary of the Treasury, with the Federal Reserve Board, and with the approbation and approval and assistance of the White House to come up with this compromise.

The time is short. There are very bad messages going out into the international economic community. We all have a very deep responsibility here. To those who oppose the legislation, again I say, I respect you, but let us take this legislation up this morning, let us address it in a manner that is not dilatory but addresses the amendments that are up before us for consideration, and let us come to a conclusion on this legislation and, I hope, a conclusion, as a result of this compromise, that will meet the favor of the House through adoption of the legislation.

Mr. WYLIE. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, I rise in strong support of the committee perfecting amendment to title III. This amendment was drafted jointly yesterday by some of those who had strong objections to certain parts of the bill, but agreed in principle, and by some of its strongest supporters.

It was drafted out of a realization that the general perception of the House was that the committee package was politically difficult for some Members to swallow, given seeming widespread public misunderstanding of the IMF and the need to respond to pressing domestic problems.

□ 1010

I continue to believe strongly that there is no measure Congress could enact this year that is more important to our domestic economy, to lower interest rates, to jobs and to growth than this bill. But I also realize that we must recognize political realities. This amendment will not make the bill acceptable to everyone, but I think it is fair to say the amendment will make the bill acceptable to more Members and adoption will improve the bill.

May I add my explanation as to what this amendment does. First, it takes the committee-passed language for title III and the amendments agreed to in the Committee of the Whole on Tuesday. To this it adds the following new provisions:

It places tough new conditions of the use of the general arrangements to borrow authority. It makes the authority conditional on a certification by the Secretary of the Treasury. It limits use of the GAB resources to those instances where absolutely necessary to forestall a serious threat to the international financial system.

This addresses a concern which was expressed by our minority whip, the gentleman from Mississippi (Mr. LOTT).

It requires the United States to oppose any IMF loan which appears likely to "bailout banks." While I would continue to argue that the IMF does not and cannot bail out banks, I know that some of my colleagues are not convinced and want specific language; and the language in this amendment is very specific in this regard and was alluded to by the chairman in his remarks.

The perfecting amendment includes the McNulty amendment requiring reports every 180 days on IMF loans and commodities in surplus. It was offered by the gentleman from Arizona and is designed to prevent the IMF from exacerbating the problem of surplus production of commodities which end up competing with United States produced commodities. We agree with its purpose and have included it in our substitute.

In conjunction with the committee leadership and the Treasury and the Federal Reserve Chairman, we have worked out a revision to the stretchout language proposed by the gentleman from New York (Mr. SCHUMER). I know the gentleman from New York made very significant concessions to please those who questioned the workability of the original language, and I bow to the gentleman for his willingness to be helpful in this regard.

The amendment strikes directly at the highly questionable practice of some big banks, that of charging very high, front-end fees for rescheduling commercial loans and showing these fees as profits in the quarter in which they were paid.

We have moved decisively to force commercial banks to allocate more credit domestically and less to foreign borrowers.

As in the original committee language, we require prior congressional approval before any new SDR allocations.

We also require the U.S. Executive Director to insure that member countries using Fund resources eliminate all import restrictions and unfair export subsidies, both on agricultural and manufactured exports.

The substitute incorporates the amendment offered in committee by

the gentleman from Florida (Mr. MCCOLLUM).

We have included the new language offered by Mr. LEACH and Mrs. MARTIN expressing the sense of the Congress that the IMF should promote conditions for economic growth and exchange rate stability.

In reponse to a concern of the gentleman from Texas (Mr. PAUL), we have included another new provision requiring prior congressional consultation in a timely fashion before any future IMF quota increase can be made by the United States.

In reponse to the very serious concern expressed by the gentleman from Iowa (Mr. HARKIN) and the gentleman from California (Mr. PATTERSON), the committee has included a provision that requires the Secretary of the Treasury to report to Congress what action has been taken to promote human needs under section 33 of the Bretton Woods Act.

We have included in this the perfecting amendment of Mr. PANETTA and Mr. STARK.

In total, Mr. Chairman, this amendment should make the bill far more palatable for any Member who genuinely seeks to improve this legislation. It is a careful blend of new restraints on banks and reasonable limits on the administration's authority to use the funds which the bill provides. I strongly support this carefully crafted compromise and urge its adoption.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. WYLIE) has expired.

(On request of Mr. CORCORAN and by unanimous consent, Mr. WYLIE was allowed to proceed for 2 additional minutes.)

Mr. CORCORAN. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Illinois.

Mr. CORCORAN. I thank the gentleman for yielding.

Mr. Chairman, I would like to ask, first of all, the parliamentary situation in which we find ourselves.

The gentleman from Ohio has described this during the course of his discussion while I was in attendance on the floor as a substitute.

Mr. WYLIE. No. It is a perfecting amendment.

Mr. CORCORAN. It is a perfecting amendment?

Mr. WYLIE, Yes. It is amendable.

Mr. CORCORAN. My second inquiry, Mr. Chairman, to my good friend and colleague from Ohio, is relative to the major provision, as least as I would understand the perfecting amendment, and that is the stipulation that, with respect to the general arrangements to borrow funds, the $2.6 billion could only be released, as it were, to the International Monetary Fund on the certification of the Treasury Secretary or his designee.

My question is this: Does the gentleman think that the Secretary of the Treasury would so designate today?

Mr. WYLIE. Would he so designate today?

Mr. CORCORAN. Yes.

Mr. WYLIE. I do not think he would today, no.

Mr. CORCORAN. Has he testified to the fact?

Mr. WYLIE. As a matter of fact, I discussed that with him, and today he would not make such a designation, that is correct.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from California (Mr. PANETTA) would like to address a question to me, so perhaps the gentleman will be kind enough to yield to him and then yield to me again so that I can answer the question.

Mr. WYLIE. I yield to the gentleman.

Mr. PANETTA. I thank the gentleman for yielding, and I thank the chairman for including the amendment that we had offered.

There is the language "if appropriate" that has been added, and I want to make clear that this was intended merely to emphasize the discretion of the Director and not intended to create an exception in the consideration of the provisions of my amendment as they apply to any recipient country.

Mr. ST GERMAIN. If the gentleman will yield, I would reply by saying to the gentleman from California that he is absolutely correct.

Mr. PANETTA. I thank the chairman and I thank the gentleman from Ohio.

Mr. LAFALCE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am a strong proponent of the legislation to increase the U.S. contribution to the International Monetary Fund (IMF). My support reflects careful consideration of the President's request for additional funding, and reflects, as well, my understanding of the nature of the global financial system.

When the IMF was created in the tense atmosphere of 1944, the world was entering a phase of profound economic transition. The dire and miscast energies of the war years were poised to spur renewal, development, and invention. World leaders designed the IMF to help direct these energies by accommodating the postwar reopening of channels of international commerce. The IMF's job, providing temporary economic assistance for countries facing problems in their balance of payments, is one that for over 30 years has made possible a more even distribution of growth and has encouraged the powerful and productive forces of global enterprise.

The development of a system of global trade and changes in international economic arrangements have required modernization of the IMF. Abundant growth in world trade has necessitated increased IMF funding for the purposes of smoothing balance-of-payments difficulties. Recently, efforts worldwide to conquer the inflationary syndrome have brought parts of the developing world to the edge of default. Recession has increased pressures for protectionism that could reverse the gains made in global economic interaction, and we still face the prospect of unemployed millions both here and abroad.

The needs that were present when the IMF was conceived are precedents for today. Recovery and trade growth promise to be uneven; the international adjustment process requires balance-of-payments assistance; protectionism must be resisted. Federal Reserve Chairman Paul Volcker has recently said that "Failure to manage and diffuse these strains could deal a serious blow to the United States and the world recovery." It is in this context that I support the IMF as a workable institution which can aid consistent and well-managed growth as we enter a new phase of global economic development and interdependence.

THE PROPER PERSPECTIVE

Mr. Chairman, in this and other contexts I have argued in favor of U.S. support for multilateral institutions and of the IMF in particular. In most instances I have been impressed by the intellectual depth and sincere commitment of those who debate the nature and extent of U.S. involvement in such institutions. In the instance of this particular legislation, however, I am deeply disturbed by the misleading debate and blatant statement of error and misinformation that has characterized the arguments about the IMF.

I am dismayed that much of our discussion on the quota proposal will be devoted to belabored rhetoric trying to counter the unreasonable arguments of ideologues, yet I believe that it is imperative that we clarify the record on several important points. I would like to take a few minutes of the House's time to address some of the charges that have been made against the proposal for increased IMF funding.

CHARGE NO 1: THE IMF QUOTA INCREASES A BANK BAIL-OUT

The most notorious statement about approving the IMF legislation is that the U.S. taxpayer would, in effect, be bailing out large American banks who have overextended themselves in the developing world. Opponents of the quota increase have used this argu-

ment to create a public relations scam equal to the bank's own efforts on the 10-percent withholding measure.

Not 1 penny of IMF money will be paid to banks. IMF participation in any debt settlement negotiation is, in fact, practically guaranteed to result in further loan commitments by international banks. Commercial banks are now lending on average $4 to debtor countries for every $1 the IMF lends.

The reason for this is that developing countries need continued capital inflows to support economic activity as world recovery begins to generate needed export sales and improved income. The IMF works with lenders—both national governments and commercial banks—to insure that the flow of funds is sustained.

Besides, the IMF could not possibly bail out the banks. The total resources of the IMF represent only a fraction of debt in the Third World, and it is just not possible for the IMF to pay that debt—even if it were warranted economically or mandated legally.

CHARGE NO. 2: THE DEBTOR NATIONS ARE "INCAPABLE OF PAYING THEIR DEBTS AND WE ARE THROWING GOOD MONEY AFTER BAD"

The statement that Third World nations are incapable of paying their debts is a misleading and uninformed assessment of current world conditions.

The LDC's—lesser developed countries—are working to get out of a world recession which had a profound effect on their earnings position as well as on the level of debt they carried. At the same time that the demand and price for LDC commodities fell, monetary policy actions in the United States and abroad caused record high interest rates. The combined low earnings and high debt service costs have placed the developing countries in a temporary debt bind.

World recovery promises to increase LDC earnings, and the moderation in interest rates has already improved LDC balance sheets. There remains further work to do, and the IMF will play a key role in managing economic recovery and long-term stability. Yet, IMF Managing Director Jacques de Larosiere has said, should economic recovery continue, "the financing needs of the nonoil developing countries should prove to be manageable over the medium term."

Frankly, the poignant issue to be addressed is how LDC debt repayment will be accomplished. Without the involvement of the IMF in providing sound economic discipline, improved credit flows, and funding assistance, debt repayment will be financed through a drastic reduction in LDC imports over the long term. Such a retrenchment is virtually guaranteed to cost the United States in lost exports and lost jobs far more than the $8.4 billion this quota legislation represents.

Let me emphasize that in support of the developing economies through cooperation with international efforts to get through this rough economic transition, we are investing in the long-term growth potential of these countries. Remember, Mexico's domestic product has increased by a factor of six since 1950, and per capita output has almost tripled. The average purchasing power per person now stands at the same level as Japan's in 1960. Mexico, and other developing economies, are vibrant and growth oriented. In a growing world market, we can trust that our investment in the LDC's will grow also.

CHARGE NO. 3: THE IMF SHOULD SELL ITS GOLD

Mr. Chairman, Under Secretary of the Treasury Beryl Sprinkel recently did an excellent job countering proposals that the IMF be forced into selling its gold holdings. I recommend that my colleagues refer to Mr. Sprinkel's Senate testimony of June 6 because it so clearly states the understanding of this administration which is that the sale of IMF gold is both unworkable and ill-advised.

The IMF currently holds 103 million ounces of gold. Under the articles of agreement, the Fund can sell that gold in one of two ways if 85 percent of the voting power in the IMF approves such a sale. First, the IMF can sell its gold at open market prices or, second, it can sell to members in proportion to their quotas as of August 31, 1975, at a price of SDR $35 per ounce (now about $38).

As Mr. Sprinkel points out, sale of IMF gold would disturb the highly volatile gold markets and could cause a major reduction in the world price of gold. Even a small price drop would reduce the potential value of our own gold holdings, and chances are that we would see a price plunge that would immediately wipe out any savings from a refusal to approve an IMF quota increase.

Similarly, the effects of selling gold through the restitution process outlined in the IMF articles of agreement would result in a nonproductive transfer of wealth. Selling gold to member countries at a below market price would represent, according to Sprinkel, "a get-rich scheme" for the wealther nations while providing no assistance to the developing world. As Sprinkel says:

> The point is that the amounts individual developing countries might be able to receive through restitution would be far less than they would be eligible to borrow from the IMF—on a conditional basis—if the IMF continues to function and if they continue to meet the economic adjustment objectives set out in their IMF programs.

Aside from these market consequences, there is very little likelihood that IMF creditors would be willing to approve a gold sale that would have the effect of reducing the available collateral for their loans. Borrowing against IMF gold would have the same effect of subordinating creditors' claims on the gold. It is in the interest of IMF creditors—including the United States—that gold remain in the institution as security for loans outstanding.

Mr. Chairman, I believe these arguments are convincing. Requiring the IMF to sell its gold would weaken the institution itself, weaken the claims of IMF creditors, and do nothing for the developing countries and the world economy. The costs of such action are potentially enormous, and, to my eyes and the eyes of this administration, the benefits are nonexistent.

CHARGE NO. 4: WORLD RECOVERY ELIMINATES THE NEED FOR ADDITIONAL IMF RESOURCE

The view that the IMF's role should be reduced as the global economy begins to grow overlooks the objectives of the Fund. In 1944 the IMF was designed to facilitate expansion of international trade; that is precisely the role it should play today.

The IMF serves several functions which promote stability and even the expansion of trade. First, the institution is responsible for the surveillance of the global exchange rate system. The goal of such surveillance is the promotion of exchange rate stability and the avoidance of competitive exchange rate depreciation.

Second, the IMF helps to insure a steady sustainable growth in trade by providing countries which have balance-of-payments problems an alternative to extreme and destructive economic retrenchment. Trade growth often occurs at the temporary expense of individual countries' balance of payments. Developing countries, particularly, tend to find internal demand increasing suddenly in periods of rapid economic growth, and balance-of-payments assistance allows continued import financing while export markets develop.

Additionally, the IMF serves an increasingly important function in its promotion of international cooperation in monetary affairs. In an important contribution to the workings of the floating exchange system, the IMF has assumed responsibility for monitoring the underlying economic stability of Fund participants. The IMF's role in the collection and dissemination of information regarding global trends and monetary conditions is invaluable in a world of increasingly interconnected economies. In fact, agreement of world leaders at Williamsburg to seek greater convergence of economic policies was predicated, in part, on the information and participation of the IMF.

Some critics of the IMF have charged that in fulfilling these roles of surveillance, balance-of-payments assistance, and promotion of monetary

cooperation, the institution is "operating outside of its charter." These critics imply that the deterioration of the fixed exchange system left the Fund without a mandate, and that the current activities of the IMF are being carried out independently of the instructions and desires of Fund members.

Mr. Chairman this charge is ridiculous. The problems of global economic adjustment are present with or without a fixed system of exchange. The IMF as an institution has not developed in competition, but in tandem with the evolution of the world economy. This fact was recognized by Fund members, including the United States, when charter amendments were devised in 1976. As many of us here well remember, the Congress discussed and approved those amendments after long and careful consideration at the IMF, in the President's offices, and within the appropriate congressional committees. To charge that the IMF is operating outside of its charter overlooks the fact that there has been no change in the goals of the Fund, even though developments in the world economy have meant that the Fund works in a different historical context. The IMF is today more useful—more essential to a changing world economy—than at any time since its inception.

CHARGE NO. 5: IMF IMPOSED AUSTERITY REDUCES GROWTH AND TRADE

Perhaps one of the most serious and difficult questions to be debated in consideration of the IMF quota increase is that of IMF conditionality. Many opponents of the quota increase are charging that the IMF imposes austerity on borrowers who are forced to reduce the level of imports, thus reducing world trade and cutting off purchases of U.S. goods.

Mr. Chairman, these critics utilize misleading language in making this charge. First, the IMF does not force anyone to do anything. Countries facing debt problems go to the IMF to request assistance. Negotiations concerning the amount of necessary funding also consider needed economic adjustments. In most instances, the borrowing country provides its own plan for improving its international credit position.

Second, austerity is not a matter of choice by the time a country goes to the IMF. In order to promote stable, long-term economic growth it is essential that the borrowing country improve its balance-of-payments position. While temporary import reductions often go along with other measures taken by a borrower to improve its economy, the goal and long-range effect of such policies is to allow improved credit flows and resumption of growth in trade. Without IMF assistance, many borrowers would not just reduce imports to a sustainable level commensurate with sound economic development, but would be forced into drastic reductions in international purchases.

The fact of the matter is, IMF programs do not necessarily result in import restrictions. Sometimes such restrictions are needed, but a recent study found that 19 of 26 countries recently working with the IMF found imports and GNP growing in the first year after an IMF agreement.

Mexico provides a good case in point. One year ago Mexico was close to default on $80 billion in foreign debt. In negotiations with the IMF, Mexico received a $3.8 billion loan and agreed to take strong action to right its economy. There is no question that the measures taken by the Mexican Government were stringent and demanding, both economically and politically.

The result, however, is that Mexico now appears to be positioned for renewed growth—both internally and in terms of trade. Problems remain, of course, but Mexico is doing well enough to have recently announced that it wanted to delay additional loans because its recovery is progressing ahead of schedule.

The impact on the U.S. economy of such a turn around is going to be enormously beneficial. The U.S. Treasury has estimated that our exports to Mexico for 1983 will approach $11.9 billion. Without IMF assistance and its so-called imposed austerity the levels of U.S. products exported to Mexico would be closer to $4.9 billion.

Mr. Chairman, the IMF does not force economic retrenchment. It provides an opportunity for countries in trouble to plan and execute an affordable austerity—an austerity that is an investment in the future. And as the Mexican case demonstrates, IMF capital and advice can be good for the United States.

THE NEED FOR A STRONG IMF

I have intended, in these few moments, to offer some imperative and sensible reasons to support an IMF quota increase. The IMF is a practical, effective mechanism for dealing with the problem of international debt. Moreover, while approving a quota increase will not in itself solve the problems of the world financial system, rejecting the quota legislation will most certainly make them far worse.

The Fund has nothing more to prove, especially in the light of its usefulness in the recent crisis atmosphere. It has forged an iron-work of success in its well-girded support of the developing world economy. Failure of the Congress to offer its support to the IMF would have serious and potentially frightening consequences.

Failure of the U.S. Congress to vote in favor of an increased IMF quota will send shocks of uncertainty through the world financial system. At the minimum, market perceptions of increased risk will push interest rates higher here and abroad.

Failure of the House to approve the quota legislation would bring to a halt negotiations regarding privately financed projects in the developing world, thus slowing the process of development and, in many instances, hurting American suppliers and financiers.

Failure to pass legislation in the House will signal the unwillingness of the United States to commit itself to international economic cooperation and will undermine the position of our negotiators in future international transactions.

Most importantly, if we fail to increase the U.S. subscription to the IMF, and the IMF runs short of funds, we in Congress are practically guaranteeing that any advances made this year in the world economy will be eroded as some countries are forced into unworkable and dangerous austerity. Stringent import restrictions, potential defaults, protectionism and international loan losses will interrupt trade flows, reduce the market for our exports, and thereafter deflect economic recovery and jobs in the United States. Chairman of the Council of Economic Advisors Martin Feldstein recently quoted Benjamin Franklin in saying, we must all hang together or we shall all hang separately. If we choose to believe in the efficacy of economic gallows, let me invoke the corollary warning: Today's victims may turn out to be our eventual hangman.

The interdependence of the world financial system and the delicacy of the U.S. recovery demand that we now share most vitally in the global economy. International cooperation is no longer a matter of useful ideals, but is a matter of essential policy. The dictates of reason and the wisdom of commonsense demand our strong support for the IMF.

Mr. BETHUNE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to begin by complimenting the chairman of the full committee and the subcommittee for giving members of the Banking Committee every opportunity to hear witnesses and offer amendments throughout the committee process. I thought it was a good series of hearings and certainly much was learned by those who are in favor of the bill and those who are opposed to the bill.

Today I objected to the unanimous consent request to limit time to 12 o'clock today because the fact of the matter is that, while those of us on the Banking Committee have had considerable opportunity to debate the issues and to hear witnesses, other Members of the House have not had a comparable opportunity. We had a

debate on this a couple of days ago, and many Members were present and participated. But the fact of the matter is, the Schumer amendment consumed most of that time, and it dealtith a rather narrow proposition.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. BETHUNE. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. Mr. Chairman, if the gentleman will check the debate on the Schumer amendment, I would say that, out of 3½ hours to almost 4 hours on the Schumer amendment, perhaps 25 minutes of debate was devoted to the Schumer amendment. The balance was devoted to the legislation.

Mr. BETHUNE. Perhaps the RECORD would reflect that we did venture into larger concepts. My point would be this: that Mr. SCHUMER, a member of the committee, had an opportunity to offer his amendment. Two other amendments were offered. They were relatively noncontroversial. But other Members who are not on the committee—and there are some 30 or 35 amendments pending, having been printed in the RECORD—have not had an opportunity. And had we limited the debate to 12 o'clock today and then the chairman being recognized to offer this perfecting amendment and members of the committee having the prerogative to be recognized ahead of those other Members, would simply consume all of that time and thus foreclose the Members who have serious amendments that they have worked on very long and hard the opportunity to come here and be heard.

Now, I know that it is important to rush this matter through today because a fig leaf has been constructed for those Members who wish now to honor their loyalty to the administration and vote for the bill or for those Members who are concerned about some proposition in the bill politically and want to vote for it; for God knows what reason, we have constructed the fig leaf.

□ 1020

When you have fig leaf like this one, it is important to get it on the floor and get it voted on and get it out of here in a hurry, because if you do not, pretty soon people begin to see through the fig leaf and then it is not any good any more; it becomes transparent.

I think that is precisely what will happen if we continue our debate here.

I want to make a larger point and I principally would like to speak primarily to my colleagues on the Republican side of the aisle who tell me over and over again, in the privacy of the cloak room, that they bemoan and are concerned by the fact that we are considered to be the party of the rich. They wonder how could anybody come to such a conclusion.

We worry about that. We take polls about it. We spend a great amount of money trying to figure out how to get rid of this image that we are the party of the rich.

The fact of the matter is that we put inordinate pressure here, through our legislative activities, on the smallest people in the society, the little people, the poor people. We will whack away at food stamps. We will whack away at student loans. We will put all kinds of pressure on those people, but when it comes to the big banks, or when it comes to corporate America, we do not do anything. We just stand by and let them pass through this Congress anything that they come in here and ask for.

If you are wondering why you are regarded as the party of the rich, maybe you better look at that a little bit.

Now, on the other side of the aisle, it seems to me they are more consistent because they enlarge the safety net for everyone, poor and rich alike. Just keep building a bigger safety net, take the risk out of life, take the risk out of business, take the risk out of everything for everyone.

We contend that ultimately that will collapse and it will not work. I say to my colleagues on the Republican side of the aisle that you are being hoodwinked on this particular bill. The big banks are getting a bailout and they are going to line their pockets with money.

The CHAIRMAN. The time of the gentleman from Arkansas (Mr. BETHUNE) has expired.

(On request of Mr. BARNARD and by unanimous consent, Mr. BETHUNE was allowed to proceed for 2 additional minutes.)

Mr. BARNARD. Mr. Chairman, will the gentleman yield?

Mr. BETHUNE. I yield to my friend, the gentleman from Georgia.

Mr. BARNARD. I thank the gentleman for yielding.

Mr. Chairman, I want to say that likewise, the gentlemen on this side are known for understanding the system. They are business acclimated and they understand the system. They understand the system of banks clearing checks between one another. This is nothing more than that.

We are not talking about the great economies that have been brought into this discussion. We are talking about nothing but a system that was calculated to help us with a settlement problem of currencies between nations.

This has been debated time and time again. This is not foreign aid, this is not bailing out the banks. What we are dealing with is a system. If there are faults in the system, and I will certainly give credit to different ideas about how the system should work, whether or not we should use gold or not use gold, but if we need to change the system, I am willing to have that come to a forum and be discussed. But what we do here, we have a system of currency exchanges throughout the world that comes about because of normal business activity, because of exports and imports among nations. The fact that countries have imbalances in their balance of payments, this is a mechanism, only a mechanism.

I would remind the gentleman from Arkansas this is a mechanism and it has worked for 40 years. Now, I do not say that it should be there for an eternity, but if we want to change the mechanism, let us come back to the Congress with a resolution. Let us come back to the people with hearings and with consultation. If we want to change the Bretton Woods Agreement, well and good. But now this is not the time and this is not the place to bring all of those things into discussion.

We can get back into that system at another time. I find no fault with the philosophies that are being brought into this discussion, but they are extraneous to the issue. If we are doing something wrong, it is fine, but at this time and place it is not right.

The CHAIRMAN. The time of the gentleman from Arkansas (Mr. BETHUNE) has again expired.

Mr. PATMAN. Mr. Chairman, I ask unanimous consent that the gentleman be given 2 additional minutes.

Mr. ST GERMAIN. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

For what purpose does the gentleman from Rhode Island (Mr. ST GERMAIN) rise?

Mr. ST GERMAIN. I have a motion, Mr. Chairman.

On Monday we had 4 hours of general debate. On Tuesday we debated this for approximately 6 hours, not on the Schumer amendment but on the bill itself. We are now under a time constraint on this legislation given us by the leadership.

Under the circumstances, I have no alternative but to do something that I do not like to do but I must do because of the importance of this legislation.

I now move that all debate on the bill, H.R. 2957, and all amendments thereto, cease at 12 noon.

The CHAIRMAN. The question is on the motion offered by the gentleman from Rhode Island (Mr. ST GERMAIN).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. BETHUNE. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic devise, and there were—ayes 242, noes 145, not voting 46, as follows:

[Roll No. 289]

□ 1040

Mr. PACKARD and Mr. SUNDQUIST changed their votes from "aye" to "no."

Mrs. HALL of Indiana changed her vote from "no" to "aye."

So the motion was agreed to.

The result of the vote was announced as above recorded.

Mr. GEKAS. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. GEKAS) is recognized for 5 minutes.

Mr. BETHUNE. Mr. Chairman, a parliamentary inquiry.

Mr. HAWKINS. Mr. Chairman, a parliamentary inquiry.

Mr. NEAL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The Chair has recognized the gentleman from Pennsylvania (Mr. GEKAS) for 5 minutes. Does the gentleman care to yield for a parliamentary inquiry?

Mr. GEKAS. I yield to the gentleman from Arkansas (Mr. BETHUNE).

PARLIAMENTARY INQUIRIES

Mr. BETHUNE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BETHUNE. Mr. Chairman, the parliamentary inquiry is for the Chair to please state the process by which we will do our business from now until the time is cut off.

The CHAIRMAN. For the time being, the Chair intends to proceed under the 5-minute rule.

Mr. NEAL. Mr. Chairman, will the gentleman yield for a parliamentary inquiry?

Mr. GEKAS. I will yield, if the gentleman will guarantee to ask for more time for me later.

Mr. NEAL. Mr. Chairman, I appreciate the gentleman's yielding.

Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. NEAL. Mr. Chairman, would it not be in order at this time to ask that the time be divided between the proponents and the opponents of this measure, since there is a limitation on the time?

The CHAIRMAN. The Chair believes not, because the time has been limited on the entire bill. It would be very difficult to allocate time to any one particular party or two parties when the Chair has no knowledge of the amendments that will be offered.

Mr. NEAL. Mr. Chairman, a further parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. NEAL. Mr. Chairman, is it not true that members of the committee should be given preference in terms of recognition?

The CHAIRMAN. That is true. At the time the gentleman from Pennsylvania was recognized, he was the only one seeking recognition.

Mr. GEKAS. Mr. Chairman, I would like to reclaim my time.

Mr. Chairman, there has been one element that has been noticeably missing in the debate on this very important subject. The missing element, Mr. Chairman, in the deliberations thus far taking place on this important issue is the Williamsburg Declaration on Economic Recovery. This is a document which was fashioned at the recent high level chiefs of state conference that was held very near the capital of the United States in which the heads of states of our cooperative partners on international trade and on politics and defense, I might add, those leaders came together and crafted a final agreement which we must take cognizance of in our deliberations here, in my judgment.

□ 1050

Listen to what the language was of one of the important phrases having to do with the IMF, the very subject of our deliberation. In the final communique where the set of policies was set out for the Williamsburg Declaration on Economic Recovery, in No. 4, among other things, it states: "We will seek early ratification of the increases in resources for the International Monetary Fund and the general arrangements to borrow."

Now, that goes without saying that is what they agreed to do. But what is important for us in the U.S. House of Representatives is that the President of the United States became a signatory to the Williamsburg Declaration on Economic Recovery. His sole purpose in doing so was to join in the worldwide, as it were, effort to bring about the economic recovery which each one of us heartily endorses and wants to see come about.

It seems to me that the Williamsburg Declaration on Economic Recovery is just as much a part of American foreign policy as is any other subject upon which this body debates on a day-to-day, hour-to-hour basis.

Now is the time, then, to come to the aid of the President of the United States who signed the declaration in Williamsburg and is leading the world, not just this Nation, leading the world in the cause of economic recovery.

We must support that cause.

Mr. JACOBS. Mr. Chairman, will the gentleman yield?

Mr. GEKAS. I yield to the gentleman.

Mr. JACOBS. The gentleman just read that at that conference the declaration was that the signatories would seek an increase.

Mr. GEKAS. That is correct.

Mr. JACOBS. I hope that they will seek and find out that they cannot get it from the taxpayers of the United States.

Mr. GEKAS. If I might say, when the President of the United States seeks it, it is incumbent upon him and the people who support the Government of the United States, because he is the leader in the world recovery of this economy, and the leader of the world in every other criterion we can place, that when he says he will seek, all of us should follow in this particular instance.

Mr. NEAL. Mr. Chairman, I move to strike the requisite number of words.

Mr. GIBBONS. Mr. Chairman, will the gentleman yield?

Mr. NEAL. I yield to the gentleman from Florida.

Mr. GIBBONS. I appreciate the gentleman yielding. I will be so brief, I hope, that everyone will listen so that I will not have to repeat it.

Much of our trouble is caused by our success, not our failures.

Let me give you this picture. Twelve years ago, the exports of the United States were about $25 billion a year. Do my colleagues know what they are today? Today they are $250 billion a year. That is where most of our illiquidity originates.

Eighty percent of all of the new jobs that have been created in the U.S. economy in the last 12 years have been created because of these exports—exports, jobs. That is our problem.

The well-meaning people who would collapse this economy, and they do not understand what they are about to do, do not understand that picture. You have to have cash. You have to have credit, or these jobs will disappear from our society.

Our success, not our few failures, have put us in this dilemma.

Mr. TORRES. Mr. Chairman, will the gentleman yield?

Mr. NEAL. I yield to the gentleman from California.

Mr. TORRES. I thank the gentleman for yielding. I rise in support of the chairman's amendment and the bill and to ask the distinguished gentleman from Rhode Island, chairman of our committee, a question.

Your amendment, which in part amends section 46 of the Bretton Woods Act, calls for the establishment and the fostering of democratic institutions. This phrase in the section certainly would be defined to include democratic trade unions; am I correct?

Mr. ST GERMAIN. Will the gentleman yield?

Mr. NEAL. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. The gentleman is absolutely correct.

Mr. TORRES. They would be included within that?

Mr. ST GERMAIN. Very definitely, most appropriately.

Mr. TORRES. I thank the gentleman.

I am particularly concerned about the fact that several countries now going through IMF-supervised adjustment programs are going down the same path as Poland. We are all familiar with Poland's efforts to destroy the independent trade union Solidarity during Poland's debt crisis. In the last few months, both Brazil and Chile have been carrying out a similar crackdown on democratic and peaceful trade unions. This trampling of the rights of trade unionists is undermining the long-term goals stated in the preamble of the IMF charter to maintain economic growth with high levels of employment and real income.

Poland has demonstrated the long-term economic as well as social and political costs of repressing independent trade unions. On the other hand, experience in this country and elsewhere shows that a healthy and active trade union movement can be maintained during difficult economic times and can contribute to the solution of economic problems. When governments intervene to destroy trade union organizations, the opportunity for a creative and cooperative role for workers is also destroyed. Not only is the economic structure of the country rigidified, but workers are forced to make an inordinate economic sacrifice. An independent and democratic trade union movement is essential for workers to achieve anything close to equity.

Two weeks ago the Government of Brazil threw out the elected leaders of the metalworkers union in an industrial suburb of Sao Paulo. This union has over 100,000 members and includes most of the country's auto workers. The leadership of this union, just as those of Polish Solidarity, had decided to peacefully protest its opposition to the inequitable effect of the Government's austerity measures on the workers of Brazil. Several other unions have also been taken over by the Brazilian Government. The IMF should not turn its head from Brazil's destruction of these unions.

In judging whether a country should receive IMF credits, the IMF now requires that a country propose a plan to reverse its balance-of-payments difficulties. The measures approved by the IMF often affect sensitive domestic issues. The priorities of the Fund are badly distorted when it puts so much scrutiny on the climate for foreign investor organizations and none at all on the climate for domestic worker organizations.

In light of recent experience, the IMF should add a new yardstick in judging whether a country is adopting appropriate domestic policies for long-term growth. It should examine whether that country is preserving the basic rights of workers to organize freely, to bargain collectively through representatives of their own choosing, and to engage in peaceful collective action to obtain better wages and working conditions. The IMF should not grant credit to support—and thereby sanction—a government's headlong rush to improve financial figures when trade union rights are trampled in the process.

If this interpretation of the directions to be given to the U.S. Director to the IMF is accepted, the IMF policy and practice would seek a commitment by a credit-seeking country to provide a basic framework of trade union rights. Thus, in addition to the standard financial measures, the IMF would consider a country's human rights, especially its treatment of trade unions. This would put all potential future borrowers on notice that the IMF will consider its respect for domestic trade unions. It does not require anyone to form or join a union, but defends the

freedom of workers to do so if they choose.

While this interpretation defends the role of democratic and independent trade unions during the implementation of an IMF sponsored adjustment program, it does not prejudge either the type or degree of economic sacrifice that a government may impose. If required to do so, all governments can meet this condition. Thus, it should not prevent any country from receiving needed IMF assistance nor getting its economic house in order.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. NEAL. I will be happy to yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Chairman, I supported the original bill. I have written to my colleagues on the subject. The IMF is a vital international agency which helps to promote world stability.

I support the amendment of the gentleman from Rhode Island. I would prefer the original bill, but the St Germain is acceptable. Our problem is that it is going to cost us more not to increase IMF funding than it is going to cost us to pass this bill.

We must keep our system of international financial discipline in good working order. The IMF is the international vehicle which all of the nations of the free world have devised and supported to maintain economic stability and prevent disruptions.

If we do not pass this bill, we will be forced to pay the costs of disruption in some other ways. As they say in the ads, "We can pay now or we can pay later." This bill is the best, most effective, and cheapest way to absorb measurable costs. It is far better to pay now, along with other countries of the free world.

If bankruptcies occur because of our failure to fund IMF, there are likely to be massive bailouts. Those of us who, like me, voted against New York, Lockheed, and Chrysler, are not likely to support those bailouts, but they will be passed. It is far better to guarantee stability the easy way, with other nations helping, by passing this bill.

All that is at stake is American jobs, agriculture, growth, investment, and exports. If they are important to you, I suggest you vote for this bill.

Mr. NEAL. Mr. Chairman, I ask unanimous consent for an additional 3 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

Mr. BETHUNE. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. NEAL. Mr. Chairman, while we have a number of distinguished members of the minority party on the floor I would like to quote to them several comments made by the President, the Secretary of the Treasury, and some others. I think they will find these comments of great interest.

This is not a simple little political issue. What we are talking about here is the future of the international economy. It is a most important matter, and I hope that minority Members will pay some attention to these words from leaders of their party.

Let me say to my Democractic friends, if there were a Democrat in the White House today and we had a Democratic Secretary of the Treasury those Democratic officials would be saying exactly the same things about the IMF. The IMF has been supported by every Democratic and every Republican administration since 1944, when the IMF was organized under President Roosevelt. It has had the backing of every President through President Reagan because it is in our national interest, my friends.

Listen to what President Reagan says:

> We cannot afford to become complacent and leave unaddressed the very serious threat to our recovery posed by the strains in the international financial system.
>
> The IMF is at the center of the strategy, but must have adequate resources to fulfill its important responsibilities successfully.

He goes on to say:

> Failure of the Congress to provide the U.S. share of the agreed increase in IMF resources would seriously erode confidence in our leadership and jeopardize the stable financial framework needed for an open, growing U.S. and world economy.

Mr. Chairman, I ask unanimous consent to proceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

Mr. CORCORAN. Mr. Chairman, reserving the right to object, and speaking on my reservation, and I certainly do not want to be critical or appear to be critical of my good friend from North Carolina, but if you review the debate on this legislation the members of the Committee on Banking, Finance and Urban Affairs, pursuant to the rules, and properly so, of this House, have been able to dominate the debate with their amendments and their evaluation of the pending business before the Committee of the Whole.

□ 1100

But there are a number of other Members of this House, Mr. Chairman, who are deeply concerned and have a lot of unanswered questions that they would like to raise and I would hope that we be given opportunity not only to offer our amendments but to participate in the debate.

I withdraw my reservation.

Mr. PATMAN. Mr. Chairman, reserving the right to object.

The CHAIRMAN. The gentleman from Texas reserves the right to object.

Mr. PATMAN. And I would like to ask the distinguished subcommittee chairman, are there any plans or possibilities for the opposition to this bill to speak before the time runs out at 12 o'clock? So far, we have had only the proponents speaking for the legislation and I do believe in fairness that the opposition should have an opportunity to speak. I am not going to begrudge the gentleman his time, reading his statements which have already been read, if I may say so, into the RECORD.

Mr. CORCORAN. Mr. Chairman, would the gentleman from Texas yield on reservation?

Mr. PATMAN. I yield to the gentleman.

Mr. CORCORAN. I thank my colleague for yielding on his reservation.

I would be willing and I hope the gentleman from Texas would be willing to grant the opportunity for our friend from North Carolina to have an additional minute or two if he would answer this question, and that is with respect to the stipulation in the St Germain substitute, would the Secretary of the Treasury today acknowledge that stipulation, would he grant, as he has testified repeatedly, as he has said in trying to twist arms here in the House of Representatives, that if we do not pass the IMF, if we do not grant the 2.6 additional to the GAB, that there would be some impairment to the international banking system, would he say that today or not?

Mr. NEAL. Would the gentleman yield to me for a response?

Mr. PATMAN. I would have to speak on my reservation.

The CHAIRMAN. The gentleman from Texas has the time under a reservation.

Mr. PATMAN. I would like to ask the gentleman a question.

Mr. ST GERMAIN. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard. The time of the gentleman has expired.

Mr. McKINNEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will try not to take this 5 minutes.

I understand the opponents of this bill would like to be heard. I have obviously spoken at least four times on it in the process.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman.

Mr. CONABLE. I thank the gentleman for yielding.

Mr. Chairman, I support this measure and urge my colleagues also to support it.

Mr. Chairman, the current debate on the IMF funding bill provides an excellent opportunity to focus attention on the misalinement of exchange rates between the U.S. dollar and other major currencies—especially the Japanese yen. The misalinement of the dollar has a serious impact on three interrelated factors—U.S. competitiveness abroad, the U.S. trade balance, and ultimately on U.S. unemployment levels.

As the dollar has strengthened and other currencies weakened, the competitiveness of U.S. exports has declined. At the same time, the misalinement of exchange rates makes imports artifically cheap in the U.S. market.

As U.S. companies find their products increasingly uncompetitive in international markets, the U.S. trade balance will deteriorate. According to C. Fred Bergsten, director of the Institute for International Economics, the overvaluation of the dollar caused the U.S. trade balance to deteriorate by $60 billion to $80 billion between the first quarter of 1981 and the fourth quarter of 1982. In May, the U.S. trade deficit reached a record $6.9 billion and is forecast to climb to a staggering $70 billion for 1983. A study by Data Resources Inc. shows that if the dollar had not climbed above its 1980 level, net exports—the difference between imports and exports—would have been $24.4 billion higher during the first quarter of 1983.

Some estimates indicate that the overvalued dollar is costing the country $100 billion in lost gross national product and almost 1.6 million jobs. Is it any wonder that misalined exchange rates are fueling protectionist pressures? Protectionist solutions, however, would have far more extensive adverse effects. Therefore, we need to recognize the integral relationship between trade and financial markets and take the initiative in seeking multilateral discussions of appropriate responses to the causes rather than the symptoms of the existing currency dilemma.

The devastating effect of the misalinement of currencies is compounded by the fact that the impact is so long term. Japanese and European rivals have now seized the opportunity to grab U.S. market shares, both at home and abroad. It will be difficult or impossible for U.S. companies to recapture these markets. Even if the dollar should decline substantially today, it would take years for the U.S. economy to begin to recover from the impact of the currency misalinement. The serious nature of this problem is highlighted in a 1982 report by the Group of Thirty, which is made up of American and foreign experts in international finance. The report pointed out how an overvalued currency can cause deindustrialization over an extended period. Thus, we must take immediate action to remedy the misalinement of currencies.

Finally, we cannot escape the fact that the misalinement of exchange rates is adding problems to those developing countries which are struggling to repay $700 billion of debt, 90 percent of which is dollar denominated. This excessive debt is forcing LDC's, which have been the fastest growing markets for U.S. exports, to curtail imports. Mexico, for example, has reduced its imports from the United States by almost 50 percent.

The IMF is in a unique position to address the existing misalinement of currencies. The IMF is explicitly charged with surveillance of the exchange rate arrangements of its member nations and it has considerable expertise and experience in exchange rate management. Furthermore, the present misalinement in exchange rates is a multilateral problem, requiring international cooperation for its resolution. Thus, the IMF is both a uniquely suited and a logical forum in which to address this issue.

I thank the gentleman.

Mr. McKINNEY. Mr. Chairman, I would yield 30 seconds to the gentleman from North Carolina (Mr. NEAL) to answer the question asked earlier.

Mr. NEAL. I thank the gentleman for yielding.

Let me quote from the Secretary of the Treasury. He says nearly 20 percent of total U.S. manufactured goods are exported. The jobs of millions of Americans, the health of our banking system and the prospects for a sustained U.S. economic recovery all depend, on the IMF's success in maintaining a stable financial framework for world trade. I think that is very clear.

Mr. McKINNEY. I thank the chairman for his comments.

Mr. Chairman, I am not going to go through all the basic arguments on this bill. My good friend, Mr. BARNARD, said something that is very important earlier and I hope you listened to it. There are those of you here on this floor who are great believers in gold and a solid value for currency; there are those of you here on the floor who are very upset like I am over the misalignment of currencies such as the yen; there are all of us who have some sort of concern about the international monetary system and with very good reason.

But, as Mr. BARNARD said earlier, we are dealing with order. If we do not have the IMF, we do not have order, and if we do not have order in the international financial markets we are going to deal from crisis.

The final payor will be the U.S. Treasury, the U.S. taxpayer, the men and women who are losing their jobs and we will have no semblance of order in which to construct recovery.

If in fact you want a new Bretton Woods or you want to discuss the gold standard or you want any of those good things, you can only discuss them within the structure of order. If, in fact, our international financial system collapses and we have to react to that chaos, we are going to pay and pay and pay, as my friend, Mr. FRENZEL said earlier.

I congratulate the chairman of this committee and the ranking member and I am delighted that Treasury came down from the mountain and sat down with us.

I think that those gentlemen, together, have tried to answer every reasonable doubt that has been expressed during the general debate and the discussion of this bill.

We have tried to bring back to you a bill that does not bail out the banks, a bill that has cut back the financial limits, a bill that has safeguards before this further borrowing, a bill that aims for international stability and new agreements and new meetings together.

Mr. Chairman, every newspaper, every economist, the President, past Presidents, Secretaries of the Treasury, everyone has said that if we do not do this, the world faces international financial calamity.

Let us not bring our political arguments, our rights or our lefts, into something that colors the entire western world's well-being.

If in fact we want to bring about that political change, remember, there is never constructive political change in a revolution. It takes a body that is organized like this one and we have to have the IMF to keep that order.

Mr. Chairman, I yield back the balance of my time.

Mr. GONZALEZ. Mr. Chairman, let me say that I am impelled to speak because I think some of the statements and utterances made here are not only mischievous, they are just absolutely incorrect.

This bill is being pawned off as a jobs bill. Let me say categorically, not only is it not going to produce one job for Americans, it is going to continue to lose jobs in view of the use of the IMF that has been made in the last 3 years.

Let me give you one example: Mexico, where we have had a 7-to-1 ratio of favorable balance of trade dealings. In the last 11 months, since the IMF infusion plus our Treasury, to the tune of better than $5 billion all combined, Mexico has curtailed 80 percent of its imports. The overwhelming proportion of that is American products, services and the like.

I invite my colleague to make a trip up and down the Mexican border and you will see an average of 23 percent unemployment. For us to continue means that these other countries, and

Mexico continuing, though Mexico's case, contrary to what has been said here is not affected by this vote of this additional $8.4 billion. But this $8.4 billion infusion will compel the other countries to do the same as Mexico to our exports. This will lose American jobs.

Now, I think that we should discharge our obligation, especially in the last 3 years in this Congress, to review the whole policy of IMF and its continuation, and our nature of participation in it, because it now has been perverted, as I said earlier. The IMF is now being looked upon by these banks as a sort of a last bank of resort, or as I said specifically, a super global FDIC.

□ 1110

And that is not at all the purposes of the IMF, never have been, and it cannot function in that capacity without grievous adverse impact on our monetary system, our economic system.

For example, the reason the banks are desperate for this is that they have already exhausted their avenues of access to American tax funds. As of this year our Treasury, through the Department of Agriculture alone, will ante up three-quarters of a billion dollars to these banks, these same banks already at the trough, because of the default of Poland—not free Third World countries—on the guarantees.

The same administration that is saying now that they have got to have this for IMF, 1 year ago was adamantly swearing that over their dead body would the United States add 1 penny to these contributions. Why?

Now I realize the importance of this institution and in the past, but the nature of the world, but the nature of our relationship, the nature of our dependence on these banks to control our destiny has to be reviewed by this Congress, and I say that all of these scare tactics are to be deplored.

There is not one bank that is going to be saved. The banking system is not going to depend on this. It is doomed. I do not care what we do, it is doomed for other reasons. Some of us have been trying to say this for 15 years and some of us have been especially speaking out on the need to review this, as well as the Federal Reserve, because of Congress primary obligation in this area.

What I am saying is, it is a shame to pawn this off as a jobs bill.

Mr. PAUL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this amendment because this amendment really does not improve the bill. It is designed only to deduce a few more Members into voting for it on final passage. And I think it would be a mistake to vote for the amendment, as it would be a mistake to vote for final passage of this bill.

This bill, now that we have closed out debate rather rapidly, will prevent me from presenting four amendments, which I have worked on for quite a few years. I will be able to discuss them on a very short-time basis. I may get 5 minutes, but the debate will be closed out here in less than 1 hour, which I think is quite unfair.

This new version of the bill was described as a fig leaf. I would like to think it is more like a cactus bush. And if you are opposed to this bill on principle, or if you are opposed to it because of the political heat back home, the vote is "no" on this amendment and the vote is still "no' on final passage.

This is one time the political atmosphere in your home districts is identical with correct principles. The correct principles and the right economic view is not to subsidize the banks. This is corporate banking elitist welfarism, nothing more, nothing less.

This entire bill has $30 billion in it. The IMF, of course, is $8.4 billion. And there is no way we can go home and justify voting for this as our people become unemployed and as the suffering is expanded in this country at the same time we are off spending money to help the bankers.

Now they are going to tell you that with this amendment they have taken care of this. That no longer will this money be used to continue the repayment to the banks. They claim that the bill will not help the bankers.

Well, that is a bit naive to think that you can give money to a nation that might be $25 or $50 or $80 billion in debt and say, "Don't use it to pay interest," and "Don't let it go to the bankers." There is absolutely no way that can be accomplished. And anybody who would believe that is just being foolish or naive. This is not possible. There is no way that you can trace this money.

One of my amendments I have proposed—if it were passed—would mean we the Congress would assume the proper role by saying to the President that he could not make international commitments, for funding for the IMF.

Earlier we had a Member state that it is because the President has made this commitment, which is practically like writing a treaty, that we support the President because he has already made the promise we would comply.

Well, that is terrible.

Mr. BETHUNE. Mr. Chairman, will the gentleman yield?

Mr. PAUL. I yield to the gentleman from Arkansas.

Mr. BETHUNE. I thank the gentleman for yielding.

I was intrigued by that point and I hope that it will have some persuasive influence on the Members who last night rushed to the support of the President for the commitments that he has made in Central America.

If that thesis is enough to carry a bill through this House, well, then this thing ought to sail right through now that the President has extended himself throughout the world.

And I was wondering if the gentleman, who was making that very point, supported the President down in Central America.

Mr. PAUL. I think the gentleman makes a very good point. And my amendment, if it were adopted, would mean that the President must have consent from Congress and allow us control over the pursestrings once again.

Some have described the IMF as necessary to maintain stability and order. The IMF is the cause of the instability and the disorder. We are trying to address an international banking crisis because we no longer have a money of account. Nobody knows what the money is in this country. It is called a Federal Reserve note. A piece of paper that is printed out of thin air.

Internationally we create credit and funds out of thin air through the IMF. That is all it is. It is a fancy organization to create credit to steal wealth from one country and transfer it to another country in a very, very sinister way.

So for the IMF to create SDR's out of thin air is doing nothing but creating international inflation.

We cannot expect in the long run that the IMF will restore order under today's circumstances. We cannot correct a disease of the unit of account by coming up with some fancy banking regulations and more inflation. The disease in this country, the disease internationally, is inflation. And inflation is the increase in the supply of money and credit for political reasons. You cannot solve that problem by more inflation, more regulations, more gimmickry. That is what this is all about, it is gimmickry in order to avoid the real issue. And the real issue is: Do the politicians have the moral right to create money out of thin air? And until we address that issue we will never solve the serious problems the international financial community faces. A commodity money standard, such as gold, is the only solution available to us if we expect to achieve long term stability. Continuing to prop up a massive pyramid of debt with more debt and more credit creation may temporarily help but ultimately it will contribute to the seriousness of the international banking crises that is sure to come. I cannot, nor do I believe that any Member can, turn stones into bread. The power to create wealth, or real money, out of nothing is not available to us. We are deceived into believ-

ing we can achieve a positive good by perpetuating the fraudulent scheme of fiat money, whether it is in our domestic or the international monetary system. For this reason the IMF bill must be defeated.

Mr. PATTERSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman I believe this debate has been a healthy and a good one. As a matter of fact, we have had more than 9 hours of debate. It will be 11 hours before we are through.

The compromise amendment to title III is a productive one and should bring about great support on both sides of the aisle.

I want to point out a few items for some of my colleagues that they might be interested in. First of all, I should point out that the United States Chamber of Commerce—and I am on the Democratic side of the aisle—supports this bill.

And for my colleagues from southern California, the Los Angeles Chamber of Commerce has sent to me a letter saying:

LOS ANGELES
CHAMBER OF COMMERCE,
LOS ANGELES, CALIF., *July 22, 1983.*

Hon. JERRY PATTERSON,
House of Representatives,
Washington D.C.

DEAR CONGRESSMAN PATTERSON: The LA area Chamber of Commerce strongly supports H.R. 2957. International trade is crucial to the California economy, and jobs depend upon the strength of that trade. We do not consider this strictly a banking bill because roughly 30,000 jobs result from every billion dollars generated from trade. For this reason we respectfully urge your yes vote.

Sincerely,

THEODORE A. BRUINSMA,
President.

Second, Mr. Chairman, from the State Senate of California, the president pro tempore and the Republican minority leader, sent to me a joint letter in support of the bill, which letter states:

STATE OF CALIFORNIA SENATE,
Sacramento, Calif., July 21, 1983.

Hon. JERRY M. PATTERSON,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. PATTERSON: On behalf of the California State Senate, we would like to urge your support for H.R. 2957, legislation authorizing funding for the International Monetary Fund (IMF), which is scheduled to be considered by the House of Representatives in the next few days.

The IMF is vitally important to California exports, offering assistance to its 146 member countries during periods in which they import more goods and services than they export. For example, the Bank of America reports that five of the six largest importers of California products were developing countries, for whom the IMF has been an important source of economic and technical assistance during the recent worldwide recession. The five were: Korea, Singapore, Taiwan, Mexico and Malaysia. They accounted for $8.4 billion in purchases from California—almost 30 per cent of the $28.6 billion in exports from California in 1982. The Bank of America further estimates that 720,000 jobs result in California from these exports.

We realize that some concerns have been raised with the level of U.S. commitment to the IMF. However, we understand that the manner in which the U.S. Government participates in funding the IMF does not add to the Federal budget deficit. On the contrary, this financial commitment to the IMF contributes to international financial stability and helps promote economic growth in developing nations.

Most importantly, participation in the IMF enhances our own national economic recovery and California's contribution to that revival. President Reagan has recently characterized the issue as being of "the utmost importance to the world economy, to the strength of the recovery and to the U.S. position of leadership in world affairs." We agree, and we therefore hope you will vote in favor of H.R. 2957 when it considered by the House.

Sincerely,

DAVID ROBERTI.
RAY JOHNSON.

I hope Californians, all 45, vote for the bill.

I have another letter, and I think an important one in regard to interest rates, which has been an issue raised over and over.

□ 1120

Statements that interest rates might go up are irrefutably opposed by the Chairman of the Federal Home Loan Bank Board who has the expertise to know, Mr. Edwin J. Gray.

His letter reads as follows:

FEDERAL HOME LOAN BANK BOARD,
Washington, D.C., July 20, 1983.

DEAR MEMBER: This is to urge your support for pending legislation to authorize and appropriate the U.S. contribution to an increase in the resources of the International Monetary Fund.

I make this request because I believe that if the legislation fails there will be strong upward pressures on interest rates. This would be devastating for much of the savings and loan industry which, because of the recent rise in rates, has slipped back into the red. This is a critical period for the savings and loan business which remains in a very fragile state. The kind of increase in rates which I fear could occur—if the legislation does not pass—would represent a very significant setback for savings and loan institutions in their quest for recovery. Clearly, the recovery of the entire homebuilding and real estate industry in this country may be at stake as a direct consequence of increases in interest rates.

Again, I strongly urge your support for the legislation which is scheduled to be voted on tomorrow, Thursday, July 21.

Sincerely,

EDWIN J. GRAY,
Chairman.

We also have a letter from the Coalition for Employment Through Exports, Inc., a national business and labor organization, and their letter is as follows:

COALITION FOR EMPLOYMENT
THROUGH EXPORTS, INC.,
Washington, D.C., July 19, 1983.

To Members of the U.S. House of Representatives.

On behalf of the Coalition for Employment Through Exports (a group of 48 business organizations, 14 labor unions and 14 governors organized to foster U.S. export competitiveness), I want to strongly encourage your support of the Recovery and Financial Stability Act (H.R. 2957). Two aspects of the bill, in particular, deserve your attention, since they affect U.S. export competitiveness, economic growth, and job creation.

Our country's export competitiveness has been critically affected by the increasingly predatory practices of many official export credit agencies. U.S. exporters cannot compete with foreign governments which are providing government backed financial subsidies to potential purchasers of their products. The Export-Import Bank provisions of H.R. 2957 go a long way toward assuring U.S. exporters the institutional support they need to maintain markets overseas and jobs here at home. H.R. 2957 contains a number of improvements in the Eximbank charter: it provides clear priority to the Bank's primary function of expanding U.S. exports through fully competitive financing; section 1912 is modified to serve as a more useful deterrent to unfair foreign subsidized credit into our U.S. home market; and, the Bank's advisory committee is reconstituted and broadened.

The provisions relating to the International Monetary Fund (IMF) quota increase also have an important bearing on our economy and on U.S. jobs. The IMF is the keystone to resolving the current global economic crisis and restoring health to the world trading system. Twenty percent of U.S. production is now exported, and 5 million workers are directly dependent upon these exports. In recent years world trade has generated the most dynamic part of our economic growth and created the largest share of new jobs.

Forty percent of our export sales flow to Lesser Developed Countries, those countries the IMF is committed to help. Should the IMF be unable to give temporary monetary assistance and policy advice to countries with balance of payment difficulties, we will see fewer markets for our exports and more domestic unemployment.

Our coalition would appreciate your support of H.R. 2957 when it comes to the floor of the House. It is vital to our future and our country's long-term economic welfare.

Sincerely,

WILLARD M. BERRY.

We have other letters that may have been referred to in earlier debate. Some have been printed in the RECORD. One such letter is from Paul A. Volcker, Chairman of the Federal Reserve System. He supports the amendment that is on the floor now, as well as this entire bill, and his letter is as follows:

BOARD OF GOVERNORS OF THE
FEDERAL RESERVE SYSTEM,
Washington, D.C., July 20, 1983.

Hon. FERNAND J. ST GERMAIN,
Chairman, Committee on Banking, Finance and Urban Affairs, House of Representatives, Washington, D.C.

DEAR CHAIRMAN ST GERMAIN. As the House of Representatives prepares to take

up the International Recovery and Financial Stability Act, H.R. 2957, I would like to underline the importance of prompt and favorable action by the Congress on the proposed increase in the U.S. quota in the International Monetary Fund (IMF) and in the U.S. commitment to the IMF's General Arrangements to Borrow. I believe U.S. support for this increase in IMF resources is essential to maintain stability and confidence in the international financial system at this critical time.

As you know, an extraordinary cooperative effort is underway to deal with the strains arising out of the heavy indebtedness of many developing countries. That effort involves continuing action by debtors and creditors, and by the governments and central banks of leading countries. But the IMF is the linchpin for the entire effort, providing, as part of its leadership role, a critically needed margin of financing.

Current and prospective demands on the Fund growing out of this process could well exhaust its usable present resources. To strengthen its ability to deal with this situation and to maintain a stable international financial system, these resources must be increased.

I cannot emphasize too strongly that failure of the U.S. to participate in providing the IMF with adequate resources to do its job, as an essential part of an international effort joined by virtually every country of the Western World, would deal a devastating blow to the effort to manage the international financial situation, with clearly adverse consequences for U.S. credit markets and our own economic growth.

Sincerely,

PAUL A. VOLCKER.

And you have all received a letter from the President of the United States in strong support of this bill, which follows:

THE WHITE HOUSE,
Washington, D.C., July 13, 1983.

Hon. JERRY M. PATTERSON,
House of Representatives,
Washington, D.C.

DEAR JERRY: The House of Representatives will soon consider my request for increased United States participation in the International Monetary Fund (IMF). In my letter transmitting this request, I explained that the IMF plays the central role in a comprehensive strategy to resolve current world debt and financial problems. Since then, I have met with leaders of the other industrialized nations at Williamsburg where we affirmed the correctness of this strategy and pledged to secure early ratification of the increase in IMF resources. I would now like to emphasize the major importance I attach to this request.

The world economy is currently facing a number of serious strains, including a heavy international debt burden which threatens to stifle growth in the developing countries and, if not handled properly, thwart economic recovery in the United States and other industrialized nations. To assure orderly resolution of current global economic problems, there must be better coordination of policies in developed countries to promote sustainable, noninflationary growth; appropriate policies in LDCs to set their economies on a path to sustainable growth; continued official and private financing at adequate levels to maintain a viable international trading system; and reduction of protectionist barriers to trade.

The IMF is the centerpiece of these efforts, and it must have adequate resources to do its job. Those resources are now nearly exhausted. If they are not augmented in the very near future, as agreed to by all member countries, the IMF will be unable to provide financial support and policy advice to countries facing balance of payments problems. Without this, commercial lending will dry up, and economic conditions in developing countries will deteriorate, forcing severe contractions in imports and possible defaults.

The U.S. economy could not escape the after-effects of such events. The legislation I have requested to fulfill our share of the increase in IMF resources is necessary to protect our own interests in a stable financial system, a growing world economy, and sustained economic recovery and higher employment levels. It is also necessary to help protect U.S. foreign policy and security interests overseas.

Because of the importance of early ratification of the proposed increase to help stabilize the international financial system, I have pledged to other world leaders my full efforts to ensure prompt enactment of the legislation to authorize and appropriate the proposed U.S. share. I believe this legislation is in our Nation's best interests and warrants, as it has in the past, the broadest bipartisan support in the Congress. I therefore urge its prompt approval by the House of Representatives.

Sincerely,

RONALD REAGAN.

Mr. Chairman, let me say to my fellow colleagues, this is an important piece of legislation. Many of your constituents do not understand it fully because it is complex, but you are doing the best thing for them, the best thing for your country and the best thing you can possibly do this year for American jobs by supporting the compromise, and by supporting this IMF legislation.

Mr. LEACH of Iowa. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, a cloud over this vote today is whether we are dealing with a banking bailout. Actually, this is a bailout of the monetary system, not the banking system.

Prior Congresses have voted contingency legislation that had the potential of bailing out the banking system. That is what the Federal Reserve Act, that is what the FDIC are all about. Hopefully, no bailout of banks will ever be necessary, but if so, it should be stressed that in this legislation 82 percent of the money comes from foreign countries. Only 18 percent is that of the United States.

If we ever have to bail out the banks through our other contingency legislation, 100 percent will come from the U.S. taxpayer, directly or indirectly.

In addition, it has to be stressed that the countries that are in trouble are anchors to the Free World, countries like Brazil, Mexico, Argentina, Nigeria, Indonesia.

Just as no American President is ever going to allow our banks to go under, no American President can afford to allow our principal allies in the world to go under.

The alternative is far more money spent through foreign aid and, frankly, far more money devoted to military spending. It will be far more costly to vote against this legislation than for this legislation.

The issue, in a fundamental way, is whether trade or aid has the best chance to pull us out of this recession and the mess that we are in that the banks are partly responsible for causing.

Finally, let me stress to my Democratic colleagues that a vote to turn our back on the IMF has more implications for causing war than the whole effort last night relating to the Boland amendment. A vote for international economic stability is a vote against an increased likelihood of war and an increased likelihood of a commitment of American troops abroad.

And to my Republican colleagues, let me stress that the word of the President of the United States of America is at issue. Our President has worked for 2 years to defer and restrain the U.S. financial obligation to the IMF. He has struck a very prudent deal involving the lowest percentage U.S. contribution ever negotiated by any American President to an analogous financial or international institution. We are to contribute 18 percent of the funds to the International Monetary System. Over the last 40 years we have averaged contributing almost 30 percent to all analogous institutions. This contribution represents the lowest we have ever negotiated. It also represents a lower percentage of contribution than our GNP is to the world economy. It is a very conservative deal to conserve the world economic order. It should be supported.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. LEACH of Iowa. I yield to the gentleman from Ohio.

Mr. REGULA. What portion of the 80 percent of the contributions from other nations will be hard currencies?

Mr. LEACH of Iowa. Because the United States contribution is somewhat higher in proportion of hard currencies, the equivalent could come to more than 18 percent. But I would stress, in this legislation before us we are now cutting back our contribution unless the Secretary of the Treasury affirms to this body—and I stress, the Secretary of the Treasury, appointed by President Ronald Reagan, asserts to this body that an international calamity would in effect occur unless we contributed our full 18 percent.

Mr. REGULA. But of the balance, what portion will be hard currencies?

Mr. LEACH of Iowa. Of hard currencies we rise to almost a third. But I would stress here again, in terms of contingencies, that is not all that bad

a deal, and I would also stress and this body should understand that we rank second in the world in borrowing from the IMF. Only one other country has borrowed more than we have. That is Great Britain.

So the two principal beneficiaries today in the whole history of the IMF are the United States and Great Britain.

Mr. REGULA. I thank the gentleman.

Mr. BETHUNE. Mr. Chairman, will the gentleman yield?

Mr. LEACH of Iowa. I yield to the gentleman from Arkansas.

Mr. BETHUNE. In this morning's paper alone, there are two other bailouts that are now beginning to move; one is for the timber industry, and the President signed off on that.

Mr. LEACH of Iowa. And I think it was perhaps a mistake.

Mr. BETHUNE. And also the National Public Radio, $600,000 forgiveness for debt.

I just wonder, how long can we go on bailing out everyone who comes here and says that the whole world is going to collapse around our ears if we do not?

Is the gentleman not concerned about the fact that we are taking over the allocation of credit in this country and that pretty soon, when we do enough of these, there is really not going to be any more credit to allocate, we will have taken over the entire matter.

Mr. LEACH of Iowa. I think the gentleman makes a very fair point. All I would say in return is: Your President and my President, my political party and your political party negotiated the most prudent international monetary deal ever negotiated in history. Our President has staked his word on this deal. I hope that we can support him.

Mr. BETHUNE. If the gentleman will let me make one more point on that, when the bill was here 2 days ago we ran it off the floor, and now they come back saying that we have got a better deal. I say if we defeat it we will get an even better deal. We will get some of that money back from the banks.

Mr. LUNDINE. Mr. Chairman, I move to strike the requisite number of words.

Mr. NEAL. Mr. Chairman, will the gentleman yield?

Mr. LUNDINE. I yield to the gentleman from North Carolina.

Mr. NEAL. Mr. Chairman, some Congressmen are balking at legislation to increase our lending to the International Monetary Fund (IMF). They fear that strengthening the IMF means bailing out banks, indulging spendthrift foreigners, or squandering money abroad that could relieve suffering at home.

Mr. Chairman, they have it all wrong. The issue in the IMF bill is jobs. American jobs. No measure now before Congress would do more to protect and create jobs.

Our economic recovery depends, in part, on reviving world demand for our goods and services. If we want to sell more abroad, however, we must insure that our best customers get the temporary IMF assistance needed to weather the recession.

Mr. Chairman, under the bill before the House of Representatives, the United States would lend the IMF up to $8.4 billion—an interest-earning investment—over several years. Our quota share is about 19.5 percent of what the IMF needs; the rest would come from the other 145-member nations.

Our IMF participation, which has had bipartisan support from Congress and from every President from Franklin Roosevelt through Ronald Reagan, is a bargain. At little cost, we get the benefits of a more stable and open world trading system.

Some Americans refuse to acknowledge our stake in an interdependent world economy. But look at the numbers: One of every seven U.S. manufacturing jobs produces for export; 1 of every 3 farm acres here grows crops for export; $1 of every $3 of corporate profits is earned through exports or overseas. In the late 1970's, three-fourths of the increase in gross national product and 80 percent of our new jobs were generated by world trade.

Developing countries, which most need IMF help, are among our best customers. They buy more than one-third of our exports. They need our technology—machinery, powerplants, aircraft, and so forth—and our farm products. When they stop buying, we suffer. Last year, about one-third of the drop of U.S. production was because of lost export sales.

Mr. Chairman, because of the recession and high interest rates, many developing countries cannot repay on schedule the debts they acquired in better times. If forced to default, they could no longer borrow or trade on normal terms: they would buy little from the industrial countries. Such defaults would also unsettle our financial markets, forcing some U.S. banks to reduce lending here, as well as abroad. This would further jeopardize our recovery.

It is strongly in our interest that the IMF—now near the bottom of its resources—be able to help debtor countries recover. IMF loans help countries manage temporary balance-of-payments deficits. In return, borrowing countries must adopt economic adjustment programs to get their finances in order.

Mexico is a good case study. A year ago, Mexico faced bankruptcy, with $80 billion in foreign debt and with its income reduced by sagging oil exports. The IMF agreed to lend Mexico $3.8 billion; private banks, another $5 billion. Mexico agreed to devalue the peso, cut spending, and further tighten its belt. As a result, Mexico's recovery now appears to be ahead of schedule; it does not need all the loans promised for this year. For us, this means that our southern neighbor and third largest customer is being nursed back to economic health. When Mexico reduced purchases from us by some $6 billion in 1982, about 145,000 American jobs were lost as a result.

A few myths about the IMF should be corrected:

First, it is not a bailout operation for banks. IMF loans are a tiny percentage of a country's debt; in Mexico's case, about 5 percent. Total IMF resources, in fact, are but a fraction of the $700 billion of developing country debt. The IMF could not bail out the banks if it wanted to. More often, the IMF presses banks to lend more to sustain trade. Big banks are more interested in the IMF adjustment programs, which help borrowers discipline themselves. Granted, some U.S. banks have shown bad judgment in foreign lending; but the IMF bill has tough new regulations to foster greater prudence.

Second, our IMF investment is not a giveaway. It is a loan, to be repaid with interest. The IMF is like an international credit union: Members deposit and members may borrow. Our deposits are safe; no country has ever defaulted on an IMF loan.

Third, the IMF does not impose austerity on debtor countries. IMF borrowers are at the end of their ropes, essentially bankrupt; for them, austerity is inevitable. IMF-approved adjustment programs are often bitter medicine, but the alternative may be economic and social chaos. Many times the IMF is scapegoated; governments lacking political will for belt tightening use IMF requirements as an excuse for doing what must be done. Blaming the IMF is a good way to evade political responsibility.

Fourth, our IMF investments do not add to the Federal budget deficit. Our IMF account constitutes an asset that, in budget accounting, offsets any outlays.

Fifth, not only the small, developing countries benefit. IMF programs helped Great Britain restore economic stability, and now are helping U.S. allies such as Turkey and Italy. The United States, in fact, has been the second largest user of the IMF—behind Britain—having drawn 24 times since 1947 for a total of $6.2 billion in foreign currencies to stabilize the dollar on exchange markets. This use of IMF funds did not require an adjustment program.

Mr. Chairman, the IMF has a remarkable record of success. It cannot solve all the world's economic prob-

lems, nor can it handle all the social and political roles that some would assign it. But we may be certain of one thing: Without a strong IMF, the problems would be a lot worse, and might be of crisis proportions. It would be dangerously shortsighted of us to take the risk of denying the IMF the resources it needs.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. LUNDINE. I yield to the gentleman from Oregon.

Mr. AuCOIN. I thank the gentleman for yielding.

Mr. Chairman, I rise today in support of the committee substitute. I am particularly pleased to note that the committee has incorporated my amendment on exchange rate imbalances.

I am also pleased that my colleagues on the right side of the aisle as well as the left side of the aisle have come to recognize the severe economic hardship which exchange rate imbalances have caused—and more importantly have agreed to this amendment as a rational first step in addressing a very serious problem

The U.S. balance of trade has been declining at an alarming rate over the past several years. Between 1980 and 1982, our balance of trade declined steadily by a total of $22.5 billion. This year our trade deficit is expected to top out at $80 billion, and unless our competitive posture is improved some analysts have predicted that our trade deficit could hit $100 billion before 1985.

This deterioration in our competitive trade position is not just a disaster for those involved in the export/import business. The entire U.S. economy is being ground down by the burden of our balance-of-payments deficit. It is estimated that our trade deficit has knocked 1.5 percent off our GNP at a cost of $100 billion and from 1 to 2 million jobs.

Now I realize that there are a number of reasons for the fact that the dollar has risen in value by about 30 percent against that of the currencies of our trading partners.

One problem has been the fact that the fiscal/monetary policy mix of the United States has been at odds with the economic policies followed by many of our trading partners. For example, in recent years the United States has followed a loose fiscal policy—with large deficits—and a tight monetary policy. The result has been very high real rates of interest. In contrast, one of our major trading partners, the Japanese, have followed a tight fiscal policy coupled with a less restrictive monetary policy. The result has been fairly low real rates of interest in Japan. Because of the high relative rates of interest, the demand for dollars in the international marketplace has been strong which has tended to keep the dollar overvalued.

Interest rates alone do not explain the behavior of the exchange rates however. For example, in April of this year—with the prime running between 10.5 to 10.8 percent—the yen stood at 238 to 1—yen to dollar ratio. As of July 20 of this year, the prime had dropped to 10.2 percent but the yen had risen to 246.05 to 1. While there may be some unknown factors at work, it is disturbing to see the dollar continue to gain in strength while interest rates continue to fall.

There is no question that the policies which are producing record deficits and high interest rates in this country must be changed. That alone will have a beneficial impact on the overvaluation of the dollar. In the meantime, there are steps which can be taken by the administration to combat exchange rate imbalances, some of which may have been created by the internal financial practices of our trading partners. Such practices are unfair and add to the overvaluation of the dollar.

My amendment does not seek to find villains, or assess blame for what clearly has become a major problem for the United States. Instead it simply directs the administration to begin, in earnest, discussions which will lead to the resolution of some of these exchange rate problems.

In fact my amendment is really a followup to last May's Williamsburg declaration which stated that the industrialized Nations were, "Willing to undertake coordinated intervention in exchange markets in instances where it is agreed that such intervention would be helpful."

The second part of my amendment directs the administration to come forward with legislative recommendations regarding reform of the floating exchange rate system now in use. It does not presume to favor any particular structure—some have argued for a return to a more rigid, structured system, while others have argued for the establishment of a semifixed system which would keep currency values within target ranges.

Regardless of the solution arrived at, we should at least recognize that there is an enormous problem facing this country which is costing us in terms of sales of goods abroad and in terms of jobs. My amendment simply provides the flexibility for the administration to move ahead at the earliest possible moment.

Mr. LUNDINE. Mr. Chairman, I believe that this is a trade bill, and it means jobs for American workers. During the last part of the 1970's, we created 3 million new jobs in this country, and 85 percent of those jobs can be directly attributable to the gain in exports.

Today we face a world economy that is very fragile. The International Monetary Fund is a part of trying to provide some stability to that fragile situation.

□ 1130

Mr. Chairman, I rise in support of the committee amendment, which I believe is a reasonable compromise. I believe that it addresses the issues of those who are concerned with putting reasonable restrictions on the banks. I believe that it gives some attempt to look to the assets, including gold, of the International Monetary Fund in raising the ample funds so that they can perform the function of stability in international financial markets.

I think that it addresses the point raised by the gentleman from New York (Mr. SCHUMER) that these borrowing countries do not just have a liquidity crisis; that they do need some stretchout and that our representatives should work for readjustment along those lines.

I believe that it also addresses the point raised by the gentleman from Oregon (Mr. AuCOIN) about exchange rates. If we are going to get exchange rates into a more proper balance in this world, we are going to have to have more stability of these borrowing and debtor nations.

A great American, Mark Twain, spent a great deal of his lifetime in my district, in Elmira, N.Y., and he said one time, "I do not mind getting older when I think about the alternative." To those who are undecided about this bill, I ask you to think about the alternative. It really could be the death of the worldwide trading system. I am not saying it will be; I do not think anyone knows that. I am saying it could be.

I am saying the alternative of passing this measure, the alternative of allowing the IMF to perform its role of providing partial credit is better. They do not go in and bail out countries. They go in where there is a large infusion of private capital. They provide the necessary conditions for the possible restructuring and repayment.

I think that the IMF's small role is nevertheless catalytic, and is very important.

Finally, I would like to mention that this is a voluntary decision on the part of the debtor countries. If they want to look elsewhere, if they want to take other means to try to refinance their situation, there is nothing preventing it.

Mr. Chairman, I urge your support of the committee amendment because I think the alternatives indeed could be awful, awful for small towns all over this country, awful for workers whose jobs depend on exports. I think the measure is reasonable, particularly as amended by the committee amend-

ment, and I urge the passage of this bill designed for international financial stability.

Mr. McCOLLUM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as we started discussing this measure last Friday, I had the privilege in the rule discussion to open up the questions and the debate, and at that time I made the point that I would like to make again today: that the sky is not going to fall if we do not pass a quota increase, as some people have advocated here.

I, today, reluctantly—and I say that because it is in opposition to my administration, on my side of the aisle—stand in opposition to the quota increase even with the passage of the perfecting amendment which is now pending. I do that even though I also have great respect for the gentleman from Rhode Island, the chairman of the full Banking Committee, and his position, the ranking member on my side of the aisle, the gentleman from Ohio, the chairman of my subcommittee on this issue, the gentleman from North Carolina, and the gentleman from Iowa, my ranking member.

I do it because the perfecting amendment is merely cosmetic when it comes to the quota increase question. In fact, it does not touch the issue of the quota increase itself at all, and that is why, in a few minutes, I am going to offer an amendment, which may very well not be debatable unless there is a unanimous-consent request granted, which would strike a very limited portion of this bill which deals with strictly the $5.3 billion to $5.4 billion quota increase.

Now, what does the perfecting amendment do, first of all? It does a number of things that I would have to support in terms of the bank restrictions. That portion of the bill, though there are quibbles and quabbles about it and some of the banking interests do not care for it, I am not arguing about. I think that the amendment is fine in that area and I think the amendment is fine as it goes to the GAB, the General Agreements on Borrowing. Although I do not particularly want to see even the $2.8 billion in GAB used, and I think there are a lot of changes that need to be made in the GAB, the amendment I am going to offer will go not to that but will go strictly to the quota increase.

Now, let me for a moment take the time to explain to my colleagues once more that there are three alternatives, at least, that the International Monetary Fund has if it does not get this quota increase granted, so we do not have the world economy falling off the table somewhere.

First, the International Monetary Fund has the power right now, with no more changes in its charter, to go out on the world market itself, like the World Bank, and borrow. It can go out and borrow whatever it needs to.

Second, the International Monetary Fund has a large supply of gold. I do not advocate selling that gold, but there are those who say it could be done. But I do know that that gold could be used as collateral in many different ways in order to solve particular problems the IMF has in directing resources to one troubled country or another.

The third thing that could happen, which this administration has not been willing to do in any discussions with this Member, or even to seriously consider, is for the $5.4 billion or so in the quota increase, instead of making it a quota increase, to temporarily, with a maturity date, loan that amount of money to the IMF if things are that bad. The Saudis loaned, with a specific maturity date of 2 years, about $8 billion not long ago to the International Monetary Fund.

Our biggest problem is the fact that this a permanent quota increase that is in this bill. It is something that comes about every so often, regardless of the excuses, and we have not had a check on it. Literally billions of dollars over the last 10 years have gone out of this country on a permanent transfer basis because we have received very little back in return on that during that time.

We must have an opportunity to get this money situation under control. We must have an opportunity to bargain for a position so that we no longer have this outflow going on, change the nature of the U.S. participation in the permanent quota increase, and change the manner in which the International Monetary Fund does its dealings in terms of foreign countries and in its requirements as it goes about its business.

Now, I am not opposed to the International Monetary Fund. I supported the Caribbean Basin Initiative. I support the appropriate economic aid to some of our neighbors. But this bill gives us the only opportunity to say to our administration and to the world that we will no longer put up with this permanent type of quota increase in billions of dollars year after year. I hope that when the appropriate time comes on the McCollum amendment that my colleagues will join with me in striking that small portion, but very significant portion, that deals with the $5.3 billion or $5.4 billion that authorizes the permanent quota increase.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. McCOLLUM. I yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman for yielding.

Mr. Chairman, I would like to congratulate the gentleman from Florida for his statement. It is well reasoned and quite articulate in making the point known on this floor that there is something in between total support for the so-called compromise and what would prevail or transpire if, in fact, it did not carry.

Mr. SCHUMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. LEHMAN of California. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield briefly to the gentleman from California.

Mr. LEHMAN of California. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the compromise perfected by the distinguished gentleman from Rhode Island.

In addition to the other reasons proffered this morning by my colleagues, there are two additional substantive reasons why we should approve this allocation to the International Monetary Fund.

First, this is one of the few international programs in which other nations actively participate. The burden of providing the capital for these loans is broadly shared. Less than 20 percent of the funding is provided by the United States. Should we not be encouraging those other countries to continue doing their share? How can we do that if we are unwilling to live up to our own responsibilities? In the IMF many nations with different people and philosophies work together to keep the international economy moving. Whether we like it or not we are all tied to the international economy.

Second, it is ironic to me that we are debating this issue today following the extensive debate on stabilizing Central America which took place yesterday. How much clearer it is to me to vote to make loans to needy countries through an international agency than it is to provide massive amounts of direct aid when they are on the verge of collapse and/or military assistance as their governments destabilize.

I cannot help but think that the message to Latin America that will resound with defeat of this bill will be that the United States is ready to send its guns, and its ships, and troops when its neighbors are on the verge of collapse, but not willing to loan a few dollars to prevent that from occurring. To defeat the IMF would be penny-wise and pound foolish.

Mr. SCHUMER. Mr. Chairman, for the last several months many of us have really been guided by two principles in seeking to deal with the IMF crisis that is upon us, the principle of internationalism and the principle of balance.

In terms of internationalism, ladies and gentlemen, I think most of the Members of this House realize that we cannot turn our back on the Third World. We cannot turn our back on

the rest of the world. America in 1960 perhaps could. America in the 1980's cannot.

We depend on those countries not only for raw materials, but for markets. That is a new phenomenon. I think we must all be aware that unemployment in Pittsburgh and Detroit is related to prosperity in Brazil and Nigeria.

□ 1140

That is a new condition for those of us in this House, and that is a condition we will have to live with for the next several years.

The initial bill, even without the amendment, dealt with that concept of internationalism, but it had a fatal flaw in my opinion and, I believe, in the opinion of many in this House. It did not address the problem of balance. We all realized a problem existed, a problem caused by Third World countries that were too eager to borrow and banks too eager to lend, but a problem we had to deal with.

It was my opinion and, I believe, the opinion of many others in this House that the initial method by which the IMF went about doing its job was not in balance. It put too much of the burden for getting us out of this crisis on Third World countries and again on American workers and too little on the banks.

We did not seek to punish the banks. That would be a futile exercise that would not solve the problem. Instead, we sought to restore the balances for the benefit of the world economy.

I believe that the St Germain amendment, which was worked on feverishly by so many of us yesterday, addresses the problem of balance. It says to the banks, "Yes, we will help you with the problem, but do not charge excessive rates of interest in short term. Stretch out your loans at lower rates of interest." Yet it says to the world economy, "We will not turn our backs on you."

The St Germain amendment avoids a very painful choice for me, and that would have been perhaps to vote against the bill to speak up for balance to the detriment of internationalism. I am now proud to support this amendment and, should it be adopted, the bill.

Mr. Chairman, I urge my colleagues and this House to do the same. It is fair, it is balanced, and it takes into account the principles of internationalism.

Mr. BONKER. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from Washington for a brief statement.

Mr. BONKER. Mr. Chairman, I thank the gentleman for yielding.

There has been a lot said here about international trade, but I think the gentleman from Florida made a valid point when he reminded us that our export trade now amounts to $250 billion, and when one considers that for every billion dollars of exports we generate 25,000 to 30,000 new jobs, one can translate very easily our export trade to job creation at home.

The fact is that our domestic economy is no longer sufficient to meet our growth needs in the future, and at the same time we are in a seriously competitive world economy. International trade is our economic destiny, and that depends in large measure on a stable financial system. The fact is that 40 percent of our export trade goes to Third World countries, many of which are debtor nations that may be impacted by this legislation.

It is not an easy choice for many Members here, but I believe it is the right choice. Time magazine recently pointed out that this was a time bomb about to go off. That certainly would not bring stability. It certainly would not help our exporters, and in turn that would bring great instability into our own domestic economy.

Mr. Chairman, I think the committee chairman has come forward with a practical measure, and I urge my colleague to support it.

Mr. WORTLEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the substitute amendment.

The substitute is a carefully crafted compromise designed to meet the genuine concerns raised by many Members about the International Monetary Fund. Because of this, it is something that most of us will be able to support.

The compromise is not just another example of blue smoke and mirrors. Rather, it is a good faith attempt to address some of the major objections raised by many Members during the course of debate.

For months, those opposed to this legislation said it is nothing more than a big bank bailout. Well, the substitute satisfies those who feel that way. This is tough language that requires the U.S. Executive Director to oppose and vote against any IMF loan used principally for the purpose of repaying banks. Sanctions are included that preserve and promote the expansion of domestic industries. Foreign loans may not grow at a rate to exceed domestic lending. Banks will not be able to charge rescheduling fees in excess of administrative costs. This is not cosmetic.

Every man and woman who serves in this body knows that preserving and promoting job opportunities is one of our foremost responsibilities. Approving the quota increase for the IMF is one of the most effective means of doing that. We would do a grave disservice to our constituents if we fail to support this legislation.

I do not want the workers in my district to be laid off because orders for their goods from overseas customers suddenly stop. I do not want to face my farmers who are confronted with financial hardship because they cannot sell their products. The American people are not stupid. They recognize that we live in an economically interdependent world. They recognize that free and open trade between nations is the most effective means available for maintaining a stable world.

The IMF is not perfect. But is one of the best vehicles we have for ensuring financial stability abroad and prosperity at home. H.R. 2957 has been thoroughly debated and discussed. Each of us has had ample opportunity to hear and be heard on this legislation. Now it is time to be counted.

I urge every one to do the responsible thing and vote for the substitute amendment to title III. It is a vote that you will not regret.

Mr. REGULA. Mr. Chairman, will the gentleman yield to me for the purpose of asking a few questions of the gentleman from Ohio (Mr. WYLIE)?

Mr. WORTLEY. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, I thank the gentleman for yielding.

I would like to ask the ranking minority member a couple of questions.

First of all, it is my understanding that financial institutions will restructure existing loans in addition to making new loans as a result of the passage of this bill. As the gentleman knows, I have expressed to him strong opposition to the institutions receiving fees for restructuring existing loans I would ask the gentleman, does the substitute amendment address this concern, and if so, how?

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. WORTLEY. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I would say, in direct response to the concerns of the gentleman from Ohio (Mr. REGULA) that we have a provision in the amendment which has now been offered, something which goes directly to this questionable practice of some big banks charging very high front-end fees for rescheduling commercial loans. What we have done is suggest new language which specifically prohibits the practice unless it is fully amortized over the life of the loan.

Mr. REGULA. Mr. Chairman, I have a second question.

Ohio, of course, as the gentleman well knows, is No. 4 in export volume in the United States among all 50 States. What will be the likely impact of the passage of this bill on Ohio in terms of jobs? And, as pointed out by the gentleman from New York, will the possible better exchange rates between currencies also have value to Ohio, and could that result from the passage of this bill?

Mr. WYLIE. Mr. Chairman, will the gentleman yield further?

Mr. WORTLEY. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I thank the gentleman for yielding.

I received statistics from the U.S. Department of Commerce that said Ohio has 300,000 jobs which directly depend on exports. That is about 8 percent of all the jobs in our home State.

I also have a telegram here from 3-M Co. in my district that says 3-M exports 40 percent of its $6 billion yearly business, much to South American countries. I also have information here from Kinnear, Ranco, Avco, Dennison Engineering, Ashland Chemical, Ingersoll-Rand, National Electric Co., Xerox, and Dresser Industries, all with a presence in my district, that they are all exporting to other countries, and that this bill is desirable from their viewpoint to continue the export trade.

Mr. Chairman, I thank the gentleman for raising these questions.

Mr. REGULA. Mr. Chairman, I thank the gentleman from New York for yielding.

Mrs. ROUKEMA. Mr. Chairman, will the gentleman yield?

Mr. WORTLEY. I yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. Mr. Chairman, I want to commend the ranking minority member and the gentleman from Ohio for that colloquy. I think they have focused on precisely the issues in this debate, and those are the issues on which we should direct our attention.

Mr. Chairman, throughout the debate on the IMF, numerous concerns and problems have been raised. There may be other alternatives to this current debt problem, but today we are faced with a situation that requires immediate attention. The legislation before us today along with the perfecting amendment represents the only viable alternative.

This legislation is as much an investment in American jobs and the health of the American economy as almost any other legislation we are likely to consider this year.

Trade has become an increasingly important sector of the American economy. World trade depends on the continued availability of credit. There is no doubt but that international flows of credit and money have a critical effect on the U.S. economy and unemployment. Our failure to pass this legislation will have severe adverse effects on United States and international credit markets. My colleagues and I on the Banking Committee have worked hard to craft this perfecting amendment in an effort to address the many concerns that were expressed during debate on Monday. It includes the necessary conditionalities on both the banks and the lending countries and deserves my colleagues support.

First, this amendment includes provisions that would first prohibit upfront fees by U.S. banks in rescheduling debt to lesser developed countries, limiting charges to administrative fees covering actual costs.

Second, for those of us who are concerned that this money would go to bail out the big banks, this amendment includes an antibailout provision requiring that the IMF Executive Director vote against loans where the funds would be used primarily to repay loans from commercial banks imprudently incurred by the member country.

Third and most importantly, this amendment has a provision to encourage domestic lending by U.S. banks at affordable rates.

This is a bill that does not bail out the banks. It is a bill that seeks to stabilize the structure of trade and finance throughout the world. This bill seeks to manage the fragile nature of our global economy. I submit to my colleagues that past experiences have taught us that crises can rarely be predicted and that prevention is less expensive than a cure. Consequently, I strongly believe that it would be foolish indeed to be without the contingency arrangements agreed upon by the members of the IMF.

I urge my colleagues' support.

Mr. LIVINGSTON. Mr. Chairman, will the gentleman yield?

Mr. WORTLEY. I yield to the gentleman from Louisiana.

Mr. LIVINGSTON. Mr. Chairman, it's hard to find common ground with anyone on the IMF—it is a very complex issue. But I have devoted a great deal of time and effort to the IMF issue, since it comes largely under the jurisdiction of the Appropriations Subcommittee on Foreign Operations on which I have the privilege to serve. In connection with my duties on that subcommittee, this past March a number of our colleagues and I accompanied a Treasury Department delegation on a fact-finding trip to Mexico, Peru, and Brazil, which are three of the countries most prominently involved in the current debt and balance-of-payment negotiations with the IMF.

I have followed the debate appearing in the country's leading financial journals for at least the last 7 months. And, most recently, I had a meeting with Secretary Regan during which we addressed almost every major criticism of the quota increase.

In all of this, I have learned that there are few if any hard and fast "truths"; and that this is a very close call.

We are charged with the duty of studying and voting on the issues that confront us and our constituents, whether or not they lend themselves to easy or clear-cut analysis. Having done so, I have decided to support the President by voting for H.R. 2957, despite some misgivings that remain, because I believe that, on balance, we play too dangerous a game if we fail to join our industrialized allies in helping to bolster the world economy, and by risking international defaults on loans due creditors within the United States.

The plain truth is, Mr. Speaker, that I simply cannot find a satisfactory alternative to providing the additional funding sought by the IMF. For months, I have wrestled with this problem, and to this date, no opponent of the funding that I have met, or whose writings I have read, is in any way certain that in failing to supply the IMF with this additional infusion of capital, we will be able to avoid a potential collapse of the economy in the Western economic world. On the contrary, some of the foremost opponents of IMF funding have admitted that "Yes, one or two countries may default on their obligations," but they proceed to discount the effect of such an occurrence.

Well, I cannot discount such an occurrence. This Nation has just emerged from one of the most lethal recessions of this century; certainly the most onerous since the Great Depression. Our people have suffered under exorbitantly high interest rates—21.5 percent in January 1981, when the new administration took office.

Subsequently, one business after another, worse still, one industry after another, knuckled under the pressure of high interest rates, and doors began to close. Unemployment rose from a low of 6.9 percent unemployment in 1976 to almost 11 percent in early 1982.

Nevertheless, under the fiscal and tax policies adopted by Congress under the leadership of the Reagan administration, we have brought inflation down from an annual rate of almost 13 percent to below 3 percent. Interest rates have declined from a high of 21.5 percent to the lowest rate in 6 years, currently 10.5 percent. Businesses are going back to work, and unemployment is now about to hit single digits for the first time in far too long.

So what is the risk if we fail to provide the funding for IMF, that this administration, the same administration that once opposed an increase in our contributions to the IMF, has requested?

Well, let one country default on its obligations; let one sole nation fail to make its scheduled payments to its creditors; then first and foremost, it will have no credit extended to it to buy goods from abroad. All of its imports will be immediately curtailed. Thus, the markets previously prosper-

ing on sales to this defaulting country, whether in the United States or elsewhere, will be immediately terminated. The businesses, the production, and the employees necessary to bring about that production will no longer be employed. In turn, the markets for supplies and consumer goods required by those nations, businesses, and employees will be likewise diminished. We will have a chain reaction which no doubt will fly in the face of the often touted economic recovery we are all anticipating so fervently.

And what of the so-called bank bailout? Well, maybe that is what it is. Perhaps the banks have been too lax in their past performance in the international field. But stopping funding for the IMF is hardly the way to remedy that situation.

Under the Reagan administration, the Comptroller, C.T. Conover, has already issued severe regulations which seek to tighten the screws on the banks in the future, and hopefully, his action will help prevent a reoccurrence of this admittedly sour state of affairs.

In addition, this bill contains some very strong restrictions to force banks into a clear departure from their present ways of doing international business. That is:

First. Presently, banks do not have to disclose their foreign loans; so they are not required to disclose the extent of their exposure to potential defaults. H.R. 2957 would require banks to disclose their foreign loans.

Second. It would also require banks to amortize over the life of the loan the front-end fees they receive for placing it. This will tend to more accurately reflect and reduce the immediate profitability of foreign loans and thus reduce, to some extent, the incentive to make overly risky loans.

Third. H.R. 2957 will also require banks to begin establishing reserves to protect themselves as soon as it becomes apparent that a debtor country is in a potential situation of default.

And the bipartisan amendment before us today has made significant additional improvements to the bill, addressing almost every reasonable criticism that has arisen in the course of debate earlier this week.

First. The general agreement-to-borrow increase cannot go into effect unless the Secretary of the Treasury certifies that the IMF cannot otherwise come up with the funds by other means, including use of its gold reserves;

Second. A cap is placed on excessive foreign lending by banks;

Third. Excessive bank fees are prohibited;

Fourth. Our representative to the IMF will be required to oppose new loans used strictly to repay the banks;

Fifth. He must seek implementation of progrowth policies under IMF auspices;

Sixth. He must also seek to assure all reasonable means of stretching out the terms of loans;

Seventh. And, finally, the amendment makes clear that there can be no IMF quota negotiations, much less agreements, without prior executive consultation with Congress.

As I said, the changes embodied in this bipartisan amendment should make the bill palatable to everyone. The bill, with these amendments, puts enough restrictions on the banks to force them to clean up their acts, and at the same time, it provides our international financial system with the cushion it needs to avoid a potential major crisis.

Because if we fail to keep the IMF capable of extending credit to troubled nations, and there are 40 of them, including at least 4 in severe jeopardy right now, we may well find that any one of them, and the catastrophic possibility is that because of curtailed markets previously noted, perhaps all of them, might call it quits on their repayment schedules.

Now, I do not like this scenario, but it could happen. If it does, it will mean that each creditor bank, here and around the world, will be obligated to write off major portions of its loan portfolios. In order to adequately secure its own obligations, a bank will then have to raise its own reserve level, and the only way to do this is to call in other loans to other debtors. The unexpected calling of loans outstanding to innocent individuals and businesses is sure to wreak havoc in the financial community—causing wholesale bankruptcies and collapse of the financial markets. The result—quite possibly—worldwide depression.

Fearmongering, possibly. But I am a conservative. If I had my way, we would not have been placed in this situation. I would most certainly recommend dealing sternly with banks who over extended themselves for short-term profit.

But this situation frightens me. It is not one to play games with, or to gamble on. I did not create it, and I do not like it. But unless someone can show me that the scenario as I have outlined it cannot happen, then I am going to buy time.

And I want to make one more point as well. The situation exists. We can choose to deal with it now, or we can deal with it later. If we act now, we have the option of using the relatively efficient means of the IMF—to which we contribute roughly only one-fifth to help avert crisis.

If we choose to wait, we will not have that option; 60 percent of the total LDC debt is borne by Mexico, Brazil, Argentina, and Chile, each of which has already had to defer payment of the principal on their loans. These are countries that are among our major trading partners, among our allies and in our hemisphere. The United States simply could not allow any one of those countries to go bankrupt. We would have to come to their aid and bail them out—and this time we could bear all of the costs.

So we can contribute part of the costs of insuring a stable international finance system now—or the U.S. taxpayers might bear all of the costs of a crisis in the future.

All things considered, Mr. Chairman, I am going to vote for this IMF funding with the clear message it contains for the creditor banks. Get your house in order. Clean up this situation and get us over the hump. This is your last chance, because as I told Secretary Regan last week, I am not voting for any more IMF increases. Let us make this one count.

AMENDMENT OFFERED BY MR. PATTERSON TO THE AMENDMENT OFFERED BY MR. ST GERMAIN

Mr. PATTERSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PATTERSON to the amendment offered by Mr. ST GERMAIN: On page 15, line 14, insert "and with the Bank" immediately following "Fund".

On page 16, line 1, insert "and the Bank" immediately following "Fund".

Mr. PATTERSON. Mr. Chairman, this amendment was originally offered and printed in the RECORD by my colleague, the gentleman from Arizona (Mr. MCNULTY). It is known as the McNulty amendment, and I understand it will be accepted by the committee.

Mr. ST GERMAIN. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON. I yield to the chairman of the committee.

Mr. ST GERMAIN. Mr. Chairman, this is a perfecting amendment to the amendment that we had included in the perfecting amendment now pending, and I am very happy to support the amendment.

Mr. PATTERSON. Mr. Chairman, I thank the gentleman.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON. I am happy to yield to the gentleman from Ohio.

□ 1150

Mr. WYLIE. Mr. Chairman, we are very happy to accept the amendment. It was in the original bill and somehow was inadvertently left out in the amendment which was offered; so we accept it also.

Mr. LOWRY of Washington. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON. I yield to the gentleman from Washington.

Mr. LOWRY of Washington. Mr. Chairman, I also rise in support of the McNulty amendment and in support of the St Germain amendment, which I think is very important, and in support of the bill.

I rise really to engage in a short colloquy with the chairman of the subcommittee on which we serve, where we have been taking up the consideration of multilateral development bank projects on the environment and the health and side effects of the project, where we have learned and gathered much information that many times the effects of these projects on the environment, the indigenous people, the health of the area around the projects, are not really taken into consideration.

Because of the leadership of the subcommittee chairman and the ranking minority member of that subcommittee, we have now gotten into a set of hearings that have been very revealing, that frankly speaking have only scratched the surface.

I would like to ask the chairman if it is his intention to continue hearings on the subject of the side effects of these large MDB projects.

Mr. PATTERSON. Yes; I would be delighted to answer the question of the gentleman from Washington. I want to thank the gentleman for raising that question on the floor.

The subcommittee does intend to hold further hearings on the environmental effects of MDB projects and we will do so.

I thank the gentleman from Washington for having first raised this matter and brought it to our attention and the ranking minority member, the gentleman from Nebraska (Mr. BEREUTER) joins me in that. We thank the gentleman for raising the question.

Mr. LOWRY of Washington. Mr. Chairman, I thank the gentleman. His leadership on this has been very important on this subject.

Mr. HILER. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the bill.

Mr. Chairman, I rise in opposition to the bill for several reasons. This is the first time I have spoken to the bill.

The argument that somehow the International Monetary System is going to collapse if we do not approve this fund "increase," I think is dead wrong.

The fact of the matter is that the International Monetary System is in chaos today and all we are going to do is to put the day of reckoning off 1 or 2 years. Until we have systemic reform in the International Monetary System, we cannot hope to bring order out of the chaos that we currently have.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. HILER. I yield to the gentleman from New York.

Mr. KEMP. Mr. Chairman, I thank my colleague for yielding. I appreciate the gentleman's extraordinary generosity, as a member of the committee, taking his time to yield to me.

I am frankly disappointed that there is not more time. I know we spent a lot of time debating the IMF and these issues; but as we come down to the time in which we want to perhaps amend the legislation, it has of course shortened that timeframe and left the debate, I think, in short shrift. From that standpoint, I want to again thank my colleague from Indiana.

Mr. Chairman, let me rise and say as sincerely as I possibly can that I congratulate the gentleman from Ohio and the chairman, the gentleman from Rhode Island (Mr. ST GERMAIN) for their efforts.

I think there is no disagreement on this floor, either by the proponents or the opponents, on the need for world economic growth and exports. In fact, if there is anything upon which there is total unanimity in America today, it is on the necessity for expanding our economy and expanding the economies of the world. That is a good sign for the world that America finally is recognizing that it cannot go it alone, that we not only have a stake in the rest of the world, but the rest of the world has a stake in our economy.

I appreciate that because, frankly, there has been too much acrimony between the proponents and opponents on the basis that those who are against this particular legislation somehow are against trade, against exports.

Frankly, I would say to my colleagues that I got on the subcommittee of the gentleman from Maryland, the Appropriations Subcommittee on Foreign Aid, because I wanted to play a role in developing, along with the gentleman from Maryland, an approach to foreign assistance which would put an end to foreign aid based simply, on the transfer of resources and establish a mechanism for exporting those ideas which are absolutely critical to getting other countries in the world to grow in the way our own Nation has grown in these 200 years plus.

So from that standpoint, let me just speak on behalf of those who are as sincere proponents of international trade and exports and jobs and economic growth as those who favor this IMF quota increase.

Second, let me say that I also appreciate the fact that the President of the United States, with whom I so reluctantly find myself in opposition on this issue, is the most progrowth President of the United States since President Kennedy in the early 1960's. He has committed himself to some rather radical ideas to change the boom and bust cycles of the late sixties and seventies in order to restore noninflationary economic growth. President Reagan is committed to economic growth as the best means to bring down the deficit, bring down unemployment, and to help the world grow again by taking steps that I want to applaud, that I have supported—and I stand second to no one on behalf of supporting those policies.

President Reagan has moved dramatically and courageously to remove the tax, regulatory, and monetary impediments to economic expansion. More needs to be done but he started this revolution.

The compromise does put forth, or the attempt to compromise puts forth, some outstanding language. I want to say that the gentleman from Ohio and the gentleman from Rhode Island have also participated in the language compromise and I appreciate their efforts to seek consensus. I only wish they had moved earlier on our concerns.

I worked with the Secretary of the Treasury to try to get policy changes and some language dealing with these concerns into the bill, despite his valiant efforts there were limits unfortunately on how far he could go.

Frankly, let me say to my colleagues, however, that my biggest disappointment in this whole debate is that not enough attention has been placed on the systemic problem brought up by the gentleman from Indiana.

There is a systemic problem in the world. The United States is going to have a trade imbalance of about $70 billion this year. I do not think we can have a true recovery in the United States, western New York, or throughout this country, unless we start to export more.

The gentleman from Indiana has raised an issue that unfortunately has not gotten enough attention, which is that there is a systemic problem.

There are those who have raised on the floor of the House the issue of the Japanese yen in comparison or juxtaposition with the U.S. dollar.

The failure of the administration and the governments of our allies, as well as the failure of the committee which has presented us with this legislation, to come to terms with the systemic flaws in the international monetary system forces me to oppose adoption of title III. We should not be considering a permanent increase in the size of the IMF when we have virtually no idea of its appropriate role in the monetary system and when there are major questions as to the policies which it has been pursuing. Moreover, it is inappropriate for us to consider major changes in the regulation of international lending by domestic commercial banks when we have not considered the system under which they are operating.

The IMF was created to assist member nations in maintaining fixed exchange rates. By evening out short-term deficits and surpluses in national currencies, it served to keep the system steady. But, in the absence of fixed exchange rates, what is its role?

Most supporters of the quota increase claim that the IMF is now to act as a lender of last resort and a financial policeman for debtor nations. Further, they argue that to fulfill this function, the IMF quota should grow at the same rate as world trade. Let us examine these.

First, the problems of debtor nations are not short term. They are the result of systemic flaws which cannot be corrected by increased borrowing or by adjustment within particular countries. Correcting the systemic flaws would reduce interest rates and restore commodity prices such that IMF or other official intervention would not be necessary. Without such corrections, there is nothing the IMF can do other than put off the evil day of judgment.

The first step in reestablishing a monetary standard is to call an international conference similar to Bretton Woods to investigate the flaws in the system and propose remedies for these flaws. This is absolutely necessary to restoring economic growth and maintaining a liberal economic order.

The process of reordering the monetary system will be a lengthy and difficult one. The goals, however, are straightforward and, I believe, shared by the President and the Members on both sides of the current debate.

First, in order to maintain the trading system which developed over a period of stable exchange rates and liberal trading relations, we must restore stability. The current environment of extreme fluctuations in exchange rates and the growing tendency to use currency values as a weapon in international trade can result only in a deterioration of trade, a reduction in economic growth, and a decline in employment.

Second, international financial relations must be structured so that they encourage the free flow of capital, both equity and lending. The allocation of productive resources by the free play of market forces is the real source of increased opportunity for all peoples.

These goals will be difficult to achieve. In the current international economic climate, there are tremendous pressures for increased protectionism and isolation. This Congress and the President whose goals for growth we all support must provide the leaderships to begin the process.

In the meantime, there are many alternatives to a permanent increase in the size of the IMF.

Let us look for a minute at what would happen without the IMF quota increase.

First, as has been pointed out by Fred Smith, of the Council for a Competitive Economy, the IMF does not require funding to act as financial arbitrator between the private banks and the debtor nations. It can easily take the role of Moody's or Standard and Poor, providing guidance and evaluations.

Second, the banks continue to have the same incentives to restructure loans and avoid defaults whether the IMF has additional lending authority or not. Working through the Bank for International Settlements, the Paris Club, and through their own individual channels, the international banks will continue to seek solutions to the problems they share with the debtors.

It should also be remembered that our Government is not impotent to act if some of these efforts fall short. The Federal Reserve System stands ready to assist as it did in Mexico by making additional exchange available in support of the banking system. The Exchange Stabilization Fund at Treasury is similarly available to help those who are in real danger.

I am sure that supporters of the legislation will respond that this is too much for us to do alone, that we must leverage other nations to support our efforts and that we can only do that through the IMF. But other nations have the same incentives we have to seek solutions. These are not dependent on the IMF any more than the incentives of the banks are dependent on outside forces. Moreover, we should keep in mind that the only usable resources which flow into the IMF or any international institution are those of the industrialized nations, basically the G-10. There is not a member of this group which would fail to support its trading partners in an effort to maintain trade relationships and avoid crisis.

I believe that these mechanisms will forestall any panics, failures, or crises. But, for the sake of debate, let us ask the question, "What would happen in the event of a default by a major debtor?"

The dire warnings from proponents indicate that U.S. banks would fail, that a major deflation would occur, and that interest rates would skyrocket. Where is the truth?

To begin with, a major default, or even writing off the bad loans being held by some banks, will indeed cause problems for those banks. Their stockholders will probably lose money. But that is the risk which they accepted in making capital available for adventurous foreign lending. It is not the responsibility of the taxpayer.

We should keep in mind that it is the stockholders who are at risk, not the depositors. The Federal Deposit Insurance Corporation stands ready to protect depositors. Even if this requires additional funding, it results in the economic damage being placed on the appropriate risk takers.

Just as the FDIC protects depositors, the Federal Reserve System has the authority to prevent any spread of defaults or a deflation. If bank assets are wiped out by default to such a degree that the banking system itself is endangered, the Fed can step in with additional reserves in an amount identical to the lost assets. This injection of reserves would protect the system without bailing out irresponsible bankers. Moreover, since the Fed can replace the exact amount of assets lost, there is no domestic deflationary or inflationary impact.

The notion that interest rates would rise is simply a ruse. The Chairman of the Federal Reserve Board scored the Congress recently for high deficits, increased borrowing, and the pressures these bring on interest rates. He now tells us that if we do not borrow additional funds for the IMF, rates will rise. I have been told by some supporters of this legislation that funding the IMF will not cause rates to fall but not funding it will cause them to rise. What logic is this?

Interest rates in international lending are set, as those for domestic lending, based on risk and inflation. The only possible increase in rates if we do not fund the IMF will be due to making banks responsible for their risks, that is, if the bankers perceive that a Government guarantee of their loans has been withdrawn. What effect would this have domestically? It is very simple. Domestic lending opportunities—unguaranteed loans for houses, automobiles, college educations, and small businesses—will move up the list of desirable risks as the Government subsidy to foreign lending is removed.

As I have shown above, the Fed can forestall any inflationary or deflationary effects of defaults, so there is no pressure on interest rates from that source.

Interest rates will rise because the Fed says they will rise.

The tactics being used are unfortunate. The horrifying consequences of not approving the IMF are without substance.

Therefore, Mr. Chairman, I would like to reiterate the program which I believe provides an opportunity to address the systemic flaws of the monetary system while providing for short-term difficulties at home and abroad.

I do this rather than offer amendments, because the IMF's approach to the international monetary and financial situation is too flawed to be corrected piecemeal by floor amendments in the House. This has become clear to me after months of debate on H.R. 2957. For that reason, I will support the amendment to strike title III, the section containing the IMF quota increase as prepared by Mr. McCollum and Mr. Patman of Texas and Mr. Roemer of Louisiana.

First, the international monetary and financial system suffers from a number of systemic problems which

have made it prone in the past decade to cycles of inflation, speculation, overborrowing, and crisis. These problems have to do with the instability of exchange rates and the absence of a stable, internationally accepted money since the breakdown of the Bretton Woods system around 1971. The effects of floating exchange rates on our trade balance, for example, are painfully evident.

In proposing yet another increase in the permanent quota of the International Monetary Fund, amounting to almost 50 percent, the administration has not adequately addressed these systemic problems, which could lead to a new crisis within a few years. Indeed, far from correcting the problem, the United States is now contributing to the pressures for protectionism which have resulted from these systemic problems.

In addition, the IMF appears to be inadequately concerned with the adverse effects of its own role and lending policies upon the borrowing countries. I believe we must be sympathetic to the plight of the developing nations. But IMF conditions have tended, on the one hand, to encourage incorrect economic policies in developing countries, and on the other, to diminish rather than improve the prospects for long-run economic growth and ability to repay debts when these countries try to extricate themselves from their problems.

The IMF also appears to have large uncommitted resources, exceeding the requested quota increase, which could be employed as collateral in its lending. Such uncommitted resources should be used before any further contributions from American taxpayers can be justified.

Further, if the current financial difficulties of some borrowing countries are temporary and nonsystemic, as IMF and Treasury officials say, any new U.S. resources should be made available on a temporary basis, not as a permanent increase in IMF resources.

Commercial banks should also be required to take responsibility for their past lending decisions, by writing off portions of loans upon which interest is not being paid. This necessary process can be facilitated without disruption by increasing the size of loan loss reserves which are deductible for tax purposes. I might add that this would affect only the timing, not the size, of the banks' tax payments, since losses are already deductible as a business expense.

Finally, the worldwide economic recovery which is now underway has significantly improved the economic situation for both industrial and developing nations. The outlook is for further improvement. The notion that the IMF quota increase will advance, and that failing to increase the quota will retard, long-term economic growth is neo-Keynesian nonsense. Piling debt upon debt does not produce growth. In fact, by the very reasoning, IMF austerity policies will have a negative effect on U.S. exports, since they involve import restriction and import substitution in borrowing countries.

All of the alternative policies which I have outlined must be considered before any increase in IMF resources is justified. Despite lengthy discussion of these concerns, the legislation before us does almost nothing—zero—in a positive direction. All the discussions we have had with the backers of this legislation have resulted in nothing but cosmetic changes in boilerplate language.

I, therefore, suggest that a vote to strike the IMF quota is not antitrade or antijobs or antigrowth, but an honest and sincere attempt to tell the administration and the Congress go back and work on the manifold shortcomings in the world monetary system and help restore an IMF facility that can truly help encourage world economic expansion and trade.

The CHAIRMAN. The time of the gentleman from New York has expired.

The question is on the amendment offered by the gentleman from California (Mr. PATTERSON) to the amendment offered by the gentleman from Rhode Island (Mr. ST GERMAIN).

The amendment to the amendment was agreed to.

PREFERENTIAL MOTION OFFERED BY MR. LOTT

Mr. LOTT. Mr. Chairman, I offer a preferential motion.

The CHAIRMAN. The Clerk will report the preferential motion.

The Clerk read as follows:

Mr. LOTT moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

The CHAIRMAN. The gentleman under the terms of the prior agreement is recognized for 1 minute.

Mr. LOTT. One minute? Well, I will be extremely brief then.

I want to emphasize the point, Mr. Chairman, that the gentleman from New York (Mr. KEMP) made in his remarks just a moment ago.

This substitute was not developed just by the committee, just by the gentleman that is offering it, the gentleman from Rhode Island (Mr. ST GERMAIN), but with the cooperation of the gentleman from Ohio (Mr. WYLIE), with representatives from the Treasury Department and, as a matter of fact, with the gentleman from New York and myself. This is a bipartisan effort to try to improve some on what is in this bill with regard to IMF. It is marginal. It is not enough, but it is positive in the movement that it makes toward some restrictions, some limitations on the banks, some positive language that I think is important.

I want to emphasize to my colleagues that they should vote for this substitute amendment, even if you are against IMF, because this improves the IMF provisions. It is some additional language and it is a positive step.

I do not think my colleagues would want to be in the position of being against these improvements, these five or six steps in the right direction.

I urge that you vote for the substitute.

The CHAIRMAN. The time of the gentleman from Mississippi (Mr. LOTT) has expired.

Mr. BETHUNE. Mr. Chairman, I ask unanimous consent that the gentleman from Mississippi (Mr. LOTT) may proceed for 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

Mr. ST GERMAIN. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 1 minute.

Mr. ST GERMAIN. Mr. Chairman, I just want to concur with the gentleman from Mississippi that this was a tremendous effort by a great many people.

Second, as the gentleman from New York stated, if you will check the record, in each and every instance I have expressed profound respect for everyone who has debated this topic on both sides of the issue, because I feel that everybody is very sincere in this area.

Mr. Chairman, I yield to the gentleman from Mississippi (Mr. LOTT).

□ 1200

Mr. LOTT. I just want to emphasize again the importance of voting for this substitute language.

I urge my colleagues to read it. It is a very clear message to the banks and to the IMF that we are not satisfied with what is being done with these loans and that we want some changes.

I would like for it to go even further. There will be an opportunity to offer some additional amendments, but I would ask you to support this substitute.

Mr. BETHUNE. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Arkansas.

Mr. BETHUNE. I thank the gentleman for yielding.

My question is earlier in the day we had——

The CHAIRMAN. The time of the gentleman from Rhode Island (Mr. ST GERMAIN) has expired.

Mr. BETHUNE. Mr. Chairman, I ask unanimous consent the gentleman be recognized for 5 additional minutes.

The CHAIRMAN. All time has expired.

PARLIAMENTARY INQUIRIES

Mr. BETHUNE. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. BETHUNE. Earlier today, Mr. Chairman, a request was made for unanimous consent to limit debate to 12 o'clock. That was defeated. Later it was put in the form of a motion and that carried, limiting the debate to 12 o'clock today. That, therefore, closed debate past the hour of 12 o'clock.

Now, a motion to rise is being made by the minority whip. Does that foreclose now the offering of further amendments should that motion to rise carry?

The CHAIRMAN. If the preferential motion to strike the enacting clause carries, further amendments would not be in order.

Mr. BETHUNE. As I understand it, it was a motion to rise.

The CHAIRMAN. The preferential motion is to rise and report with the recommendation that the House strike the enacting clause.

Mr. LOTT. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. LOTT. If this should carry, as the Chairman stated, that would now cut off additional amendments after the 12 o'clock cutoff hour?

The CHAIRMAN. If the preferential motion carries the Committee rises.

Mr. LOTT. I would like to say as part of my parliamentary inquiry, my effort was to have a brief opportunity to speak.

I would urge the defeat of the preferential motion.

Mr. BETHUNE. Mr. Chairman, is the motion to strike the enacting clause pending?

The CHAIRMAN. Yes. The question is on the preferential motion.

Mr. PATMAN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. PATMAN. Would a motion to table the gentleman's preferential motion be in order at this time?

The CHAIRMAN. A motion to table is not in order at this time.

Mr. LOTT. Mr. Chairman, it would be in order to withdraw the motion, I believe, would it not?

The CHAIRMAN. The gentleman may do so by unanimous consent.

Mr. LOTT. Mr. Chairman, I ask unanimous consent to withdraw the preferential motion.

The CHAIRMAN. Is there objection to the request of the gentleman from Mississippi?

Mr. BETHUNE. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. PAUL. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. PAUL. Mr. Chairman, if this motion were to fail, whose amendments will be protected? Only those who have amendments printed in the RECORD, or anybody who has an amendment?

The CHAIRMAN. Under the rule, if this motion is defeated, any amendment printed in the RECORD could be offered and debated for 5 minutes on each side. Any other germane amendment could also be offered but no debate would be allowed.

Mr. LEWIS of California. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. LEWIS of California. I am sorry to take your time, Mr. Chairman, but am I correct in understanding if this motion passes, in spite of the fact that all of the debate was held on Monday when nobody was here, that Members who have amendments in the RECORD would not have a chance to present those amendments; they could not be debated; and the serious questions involved in this bill could not be heard if the motion passes?

The CHAIRMAN. If the preferential motion carries, in the House that would be the case.

The question is on the preferential motion offered by the gentleman from Mississippi (Mr. LOTT).

The preferential motion was rejected.

Mr. PATMAN. Mr. Chairman, I have an amendment printed in the RECORD and at the desk. Would that amendment be in order at this time?

The CHAIRMAN. Is this an amendment to the St Germain amendment? If not, it is not in order at this time.

The Chair rules that no timely request was made for a recorded vote on the preferential motion.

Are there any amendments to the pending amendment of the gentleman from Rhode Island?

If not, the question is on the amendment offered by the gentleman from Rhode Island (Mr. ST GERMAIN), as amended.

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. PAUL. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 332, noes 76, not voting 25, as follows:

[Roll No. 290]

□ 1220

The Clerk announced the following pair:

On the vote:

Mr. McDade for, with Mr. Dannemeyer against.

Messrs. SUNDQUIST, GRAMM, WILLIAMS of Ohio, MOORHEAD, LONG of Maryland, Mrs. LLOYD, and Ms. FIEDLER changed their votes from "aye" to "no."

Mr. HANCE changed his vote from "no" to "aye."

So the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The Chair would advise the Committee that under the rule debate is in order for those amendments that are printed in the RECORD. Five minutes of debate will be allowed on each side.

Amendments which are not printed in the RECORD, to the bill or to amendments, are nonetheless in order, if germane, and those amendments will be voted on without debate.

AMENDMENT OFFERED BY MR. M'COLLUM

Mr. McCOLLUM. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCOLLUM: Page 19, strike out line 16 and all that follows through line 20.

The CHAIRMAN. The Chair will inquire, has the amendment been printed in the RECORD.

Mr. McCOLLUM. Mr. Chairman, the amendment has not been printed, but this gentleman requests unanimous consent that the rule be waived as to this amendment only and that each side be given 5 minutes to debate this amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

Mr. BARNARD. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. PATMAN. Mr. Chairman, I have an amendment which was printed in the RECORD.

The CHAIRMAN. The Chair would advise the gentleman that the amendment is not in order at this point.

The question is on the amendment offered by the gentleman from Florida (Mr. McCOLLUM).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. McCOLLUM. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 181, noes 226, not voting 26, as follows:

[Roll No. 291]

□ 1240

The Clerk announced the following pair:

On this vote:

Mr. Dannemeyer for, with Mr. McDade against.

Mr. FEIGHAN changed his vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. PATMAN

Mr. PATMAN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is the amendment printed in the RECORD?

Mr. PATMAN. Yes, it is.

The Clerk read as follows:

Amendment offered by Mr. PATMAN: Strike line 13 on page 18 and all that follows through line 8 on page 28.

The CHAIRMAN. Under the rule, the gentleman is entitled to 5 minutes in support of his amendment.

Mr. NEAL. Mr. Chairman, we do not have a copy of the amendment.

Mr. PATMAN. Mr. Chairman, I will explain it. This amendment simply strikes title III of the bill, the IMF portion.

Mr. NEAL. Is the amendment printed in the RECORD?

Mr. PATMAN. It is printed in the RECORD.

Mr. Chairman, it is important that we realize that the measure we have under consideration today not only will obligate this Nation to come up with $8.4 billion this year, and perhaps the next few years, but will likely start a new and expensive program of continually increasing periodic commitments of large additional amounts.

Mr. ST GERMAIN. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman from Texas has the time. He would have to yield to you for that purpose.

Mr. ST GERMAIN. Would the gentleman yield for a parliamentary inquiry?

Mr. PATMAN. Not at this time, Mr. Chairman. I will toward the end of my remarks.

Mr. ST GERMAIN. I want to know where in the RECORD this amendment is printed. Our staff cannot locate it. On what day was it submitted and on what page in the RECORD is it printed?

Mr. PATMAN. It was printed the day before yesterday, as I recall, but I saw the wording myself, Mr. Chairman. In fact, I offered another amendment similar to this. It was printed in today's RECORD.

Mr. ST GERMAIN. Is this the actual amendment that was printed in the RECORD?

Mr. PATMAN. Both of them were printed in the RECORD, Mr. Chairman.

The CHAIRMAN. The gentleman from Texas may proceed.

Mr. PATMAN. Mr. Chairman, I ask for your vote for my amendment to strike the IMF portions of this bill. We are indirectly approving a new process of the International Monetary Fund's loaning money in the long term.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from Texas and I both serve on the Banking Committee, and I would like to make one point that the gentleman from Texas made so eloquently on the floor in the last 48 hours, and that is that those of us who are opposed to this bill, and the gentleman from Texas and I are two of those numbers, are not opposed to world trade, are not opposed to world growth, are not opposed to jobs in America, Nigeria, or Venezuela. What we are opposed to is taking our once-every-5-years opportunity to look at IMF and refuse to look at it.

What we are opposed to is to pass this legislation that does not deal with any of our six major complaints about IMF, the major one of which is the IMF practice of austerity rather than growth. If you are jobs, you are against the IMF bill.

Mr. PATMAN. I thank the gentleman.

Mr. Chairman, I would say to the Members of this House that what we are doing, in effect, by endorsing the policies of the IMF, with the new program that the IMF has embarked upon, is to export the policies of the Federal Reserve System to other countries. We have already seen what those policies have done to this United States, to this country.

Testimony was presented before our subcommittee to the effect that the last recession imposed by the Federal Reserve System cost the United States $1 trillion.

□ 1250

Mr. PAUL. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield briefly to the gentleman from Texas.

Mr. PAUL. Mr. Chairman, am I correct in stating that the gentleman's amendment would strike the IMF? In other words, this vote is going to be the only time we have a clean vote on the IMF?

Mr. PATMAN. It is.

Mr. PAUL. Otherwise, we would have to be dealing with the Eximbank.

Mr. PATMAN. I thank the gentleman from Texas (Mr. PAUL).

Mr. Chairman, if I may reclaim my time, I have some brief comments that I would like to make about the IMF and my objections to this portion of the bill.

During the 40 years that have elapsed since the Bretton Woods Agreement the IMF served for 30 years as a remedy for situations of temporary illiquidity that nations experienced on the world market. In recent years that has changed. Now we have new policies of the IMF to go to these countries and extend what is in effect long-term credits, not only the credit of the IMF, but that of our banks in the United States. The IMF has insisted that banks in the United States "bail themselves in," as they call it, in order to provide additional credits needed by foreign countries.

The situation will never change from here on out. There will be a continual rollover of debt, and the United States will finance a major portion of that. Our country funds a portion estimated to be up to 40 percent of the hard currency credit the IMF extends. We have a dangerous situation here which we must stop at this point.

Beginning about 10 years ago, our banks in this country started extending credit to foreign nations for the first time. The nine largest banks in America today have lent money equal to 222 percent of their total capital to the non-oil-producing, developing nations. The IMF in the future will be loaning money from the United States to the same debtors or bank customers. Were they good ones, the banks doubtless would complain of socialized banking competition. We need new approaches that offer promise of solutions, not debt piled upon debt.

The CHAIRMAN. The time of the gentleman from Texas (Mr. PATMAN) has expired.

Mr. PATMAN. Mr. Chairman, I ask unanimous consent that I be permitted to speak for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. NEAL. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. ST GERMAIN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I say to the Members of the House that we have indeed been debating this legislation at length. This is the third day that we have engaged in this debate.

The amendment now pending before us would strike title III, which indeed is IMF, containing the perfecting amendment that was adopted two votes ago by a very substantial margin. That is the compromise amendment that was agreed to by all parties on the minority and majority leadership,

and by the secretary of the Treasury, as well as by the Federal Reserve Board. We were successful in that, and I think that indeed answers the questions and the concerns of a great many people.

As I said when I offered that amendment, it would not answer everyone's concerns, nor would it satisfy all those who have legitimate problems with the legislation. But the fact still remains that this is the guts of the bill. If we were to adopt this amendment, we would have done away with and run away from our commitment to the other nations in this world in the IMF.

For that reason, Mr. Chairman, I ask for the defeat of this amendment.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I thank the gentleman for yielding.

I oppose the amendment also. There is no real difference between this amendment and the other amendment except that it also strikes the general agreements to borrow.

The gentleman from Louisiana said that the worst problem with the IMF is that it causes austerity, not growth. Exactly the opposite happens to be true.

I have a list here of 26 nations which have been benefited or helped through IMF programs, and following help from the IMF, 19 of those nations have increased real economic growth.

I have the list and the statistics, if anybody wants to see them, of the same 26 countries recently helped by IMF programs through 1982. Twenty of those nations have provided for increased imports in the very first year after an IMF program was instituted.

So, Mr. Chairman, the statistics do not bear out what the gentleman from Louisiana said.

Mr. ST GERMAIN. Mr. Chairman, I thank the gentleman for his contribution.

Once again, like the previous amendment that was defeated, this amendment would do in the legislation and would prevent us from keeping faith with the commitments to the administration and to our sister nations around the world.

Mr. Chairman, I urge the overwhelming defeat of the amendment.

PERFECTING AMENDMENT OFFERED BY MR. GONZALEZ

Mr. GONZALEZ. Mr. Chairman, I have a perfecting amendment to title III at the desk which I offer.

The Clerk read as follows:

Perfecting amendment offered by Mr. GONZALEZ: On line 18, page 19, strike out" 5,310.8 million Special Drawing Right" and insert in lieu thereof "1,750 million Special Drawing Rights".

Mr. CHAIRMAN. The Chair will inquire of the gentleman from Texas (Mr. GONZALEZ), has the amendment been printed in the RECORD?

Mr. GONZALEZ. Mr. Chairman, this is a perfecting amendment to the Patman amendment which strikes title III.

The CHAIRMAN. The Chair would inquire of the gentleman from Texas whether this perfecting amendment has been printed in the RECORD.

Mr. GONZALEZ. No, Mr. Chairman, it has not been printed in the RECORD.

POINT OF ORDER

Mr. ST GERMAIN. I have a point of order, Mr. Chairman. I think that the amendment is not in order.

The CHAIRMAN. The Chair would state that the amendment offered by the gentleman from Texas (Mr. GONZALEZ) is a perfecting amendment to title III. As such, it takes precedence over a motion to strike. It is in order.

PARLIAMENTARY INQUIRY

Mr. BETHUNE. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman from Arkansas will state his parliamentary inquiry.

Mr. BETHUNE. Mr. Chairman, is it not the case that when a Member offers a perfecting amendment to an amendment such as is the case before us now, he should be recognized for 5 minutes to explain his amendment?

The CHAIRMAN. The Chair will state that the rules do not provide for any debate after a limitation of time on any amendment which has not been previously printed in the RECORD.

Mr. GONZALEZ. Mr. Chairman, I ask unanimous consent that I may be permitted to explain my amendment.

Mr. BARNARD. Mr. Chairman, I object.

The CHAIRMAN. The Chair will inquire, does the gentleman request a specific amount of time?

Mr. GONZALEZ. Mr. Chairman, I ask unanimous consent, without pressing a disputation upon an interpretation of the rules, for an opportunity not to exceed 5 minutes to explain this perfecting amendment to the pending amendment, as well as on title III, which was printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. CONTE. Mr. Chairman, I reserve the right to object.

Mr. NEAL. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

PARLIAMENTARY INQUIRY

Mr. EDWARDS of Oklahoma. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. EDWARDS of Oklahoma. Mr. Chairman, it is my understanding the gentleman from Texas (Mr. GONZALEZ) is offering an amendment to an amendment, and if that is the case, does that, an amendment to an amendment, still have to be printed in the RECORD?

The CHAIRMAN. The Chair will state that the perfecting amendment offered by the gentleman from Texas (Mr. GONZALEZ) is an amendment to the bill, not to the amendment, but that it was not printed in the RECORD.

The question is on the perfecting amendment offered by the gentleman from Texas (Mr. GONZALEZ).

The perfecting amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Texas (Mr. PATMAN) to strike title III.

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. PATMAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 178, Noes 226, not voting 29, as follows:

[Roll No. 292]

Mr. DERRICK changed his vote from "aye" to "no."

Mr. HUGHES changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

● Mr. FAUNTROY. Mr. Chairman, I rise in support of H.R. 2957, the International Recovery and Financial Stability Act, and in particular title III which authorizes the Secretary of the Treasury to consent to an increase of the U.S. quota to the International Monetary Fund. This bill is one of the more important pieces of legislation in the international financial area that we will consider. It is crucial to the maintenance of a successful domestic economic recovery. It is essential to the developing nations of the world as they seek to cope with the severe strains of high-interest rates, an overly strong dollar, and weakening markets for raw materials, which have made their quest for development more difficult.

We all know what the basic problem is. Dozens of countries have accumulated billions of dollars in debts, much of it owed to U.S. banks. Some of these loans were for unwise and economically irresponsible projects, but most were for constructive and necessary development. We should not feel superior to these countries for borrowing like this, for a large part of our own economic development during the last century was financed by foreign loans. However, because of a combination of high-interest rates and worldwide recession, many of these countries find themselves unable to repay their loans on schedule. This threat of default not only threatens these countries with the loss of any ability to obtain credit in the future, it threatens us with the shutdown of our exports to these countries and with possible shocks to our financial system.

The IMF is one of the basic international institutions for coping with this threat of default, and the increase in the IMF quota is one of the essential acts which must be taken to prevent the breakdown of world trade and the disturbances to our financial system which would result from a debt default. The IMF acts as an intermediary and a broker between those in a position to lend and those who need to borrow. The IMF provides bridge financing for countries to help them continue to receive credit from private lenders, and in return it helps countries make the necessary economic reforms which will allow these countries to continue to service this debt. It is true that the terms of IMF assistance can be very stringent, and can include cutbacks in imports. However, bridge financing and economic restructuring allows many countries to avoid the even more restrictive and austere economic policies at home which would occur if private lenders abruptly and permanently cut off credit to these borrowers, as would happen in the absence of the IMF. The IMF's efforts will also help, in the long run, to restore these countries to financial solvency, which will keep their markets open to our exports and poised to resume growth once the world economic recovery begins.

Given the interdependence of the world economy, it is directly in our economic interests to support the IMF efforts through an increase in the IMF quota. From my tenure as chairman of the House Subcommittee on Domestic Monetary Policy, I am well aware of the feedback effects between the domestic and international financial markets. This interdependence results in benefits which will accrue to this country in the form of increased demand for our goods and services by borrowing countries. The borrowers, who have always been willing to import American goods and services, turn to the IMF to help reorganize their financial affairs so that they will, in the future, be able to make these purchases. With 20 percent of U.S. goods being sold in export markets, millions of jobs depend directly on the financial security of these countries. This legislative action to increase the IMF's pool of resources would be a decisive step in the journey toward worldwide economic stability. Indeed, the sustainment of an American economic recovery is inextricably bound to a revitalization of the world economy.

One of the fundamental premises of a stable world economy is efficiency in the marketplace. This bill seeks to impart stability in section 303, which addresses the inefficient, to say nothing of the abhorrent and inhuman, practice of apartheid. As a governmental policy, apartheid creates inefficient labor market rigidities and fosters balance-of-payments deficits. This provision directs the U.S. Executive Director of the IMF to actively oppose any credit drawings on the Fund or any of its facilities by any country which practices apartheid. The cogency of this directive lies in its prescription to the IMF to avoid funding of practices that would unnecessarily and artificially create destabilizing forces in the world economy. This provision alone warrants support for the bill.

In addition, both the bill and the St Germain amendment contain more than ample provisions that address the many stated concerns about irresponsible practices of the private banking institutions that precipitated the current world debt crisis. I call attention, first, to title IV of the bill and subsequently to the provisions of the amendment which mandates Federal

supervision on international lending by U.S. bank and nonbank institutions. The oversight by the appropriate Federal agencies will curtail the undertaking of too much risk exposure by these institutions. No longer will these institutions be allowed to engage in the heady practices of overly aggressive marketing of foreign loans that now place our domestic banking system in jeopardy. Under the provisions of the St Germain amendment, for example, no IMF funds can be used in a country to repay loans which were imprudently incurred. Federal regulatory agencies would be required to develop regulations that would prohibit excessive foreign lending so that our domestic institutions would be encouraged to do more local business at affordable rates. This bill generally, and now with the St Germain amendment in particular provides direct guidance and ultimately will provide more funds to the small local businesses whose needs have in the past been neglected because of the ease and profits that come from international lending. Improving international financial markets can help all of our business. That is the principle reason for this bill. Imposing direct lending limits—if you will, imposing credit controls on international lending—as this bill does will redirect credit resources back to our local communities. That is good for the banks, that is good for the safety and soundness of depositors, that is good for small business and consumers and these constitute good reasons—if more are really needed—to vote for the bill.

On an accompanying note, I would like to take this time to highlight another important thrust of this legislation. The thrust to restructure the short-term debt of the debtor countries into long-term debt schedules ought to receive considerable attention from the IMF despite its formal absence from this legislation. A schedule to retire debt over a longer period would allow for more realistic expectations of a borrowing country's growth. The U.S. Executive Director is required to work to insure that the IMF require borrowing countries to reschedule their commercial loans to aid in their economic recovery. As a part of that process, up-front fees charged by U.S. banks would be limited to administrative costs with any excess amortized over the life of the loan. This will better enable a country to cope with the unanticipated economic disturbances that have occurred with greater frequency. None of these things will, however, be done if we do not support this bill.

Therefore, it is my view that it is imperative we adopt this legislation. It will prescribe a consistent set of actions for the promotion of sustainable economic growth in developing countries and the enhancement of our domestic economy. It will assure orderly markets, it will protect our employment, and it will enhance employment opportunities abroad thereby encouraging peace and stability. Perhaps most important, it will proscribe support for racial policies that denigrate the human existence.

I have outlined the positive things which this legislation would do. I do not want nor do I intend to dwell upon the negative results that will undoubtedly occur if we fail to enact this legislation. Members ought to understand, however, that a failure to enact this legislation would negate all of the positive things I spoke about and most probably deal a highly devastating blow toward the efforts to manage the international financial crisis. Enormous losses to domestic financial institutions, foreign markets, suppliers, American jobs, and our nascent recovery would occur. Interest rates would probably rise, the dollar would probably plummet, and all kinds of markets would contract; in short, our recovery would end and a recession would probably begin. Perhaps not everyone shares that view; hopefully it is one which is overstated. I do not wish to find out. For those who are unemployed, particularly the 20.6 percent black unemployed, it seems to me that preservation of our economic system and of our financial markets which are so interrelated with the rest of the world, passage of this bill is important. I know it is hard to explain. It is even harder to explain and understand when viewed in the context of needed help for mortgages, jobs, and health insurance for the unemployed. It is, however, just as real and just as important when properly viewed. If my saying so helps, let me simply say that I know and can assure you that I would not have voted for the bill and the Banking Committee would not have reported it were it not so.●

● Mr. STARK. Mr. Chairman, I have discovered that on several occassions, the Eximbank has made taxpayer-supported loans in tax-haven countries to dummy corporations set up to insure that no tax is paid on profits from the sale of subsidized exports.

Just as one example, the Eximbank's fiscal year 1981 report lists a loan of $3,590,589 to Intairdrial, Ltd., of the Cayman Islands, which has long been a mecca for those who wish to escape legitimate taxes and one of the most financially uncooperative countries.

Intairdril used the money to buy a drilling rig constructed by the Pool Co. of San Angelo, Tex., which just happens to be the parent company of Intairdril, both of which are owned by the huge U.S. firm, Enserch, Corp. of Dallas.

I would be shocked if the profits on the 1981 Intairdril deal, or a subsequent $4.48 million Eximbank loan to the company, will ever be subject to U.S. taxation.

My question, Mr. Chairman, is whether you share this concern and would be willing to urge the Bank not to deal with dummy corporations in tax-haven and tax-shelter countries?

I understand that Mr. ST GERMAIN agrees with me that this situation is disturbing, given the Eximbank's limited resources and that the Bank will respond quickly to these concerns.●

● Mr. MARRIOTT. Mr. Chairman, I rise in support of section 409, to the International Recovery and Financial Stability Act, H.R. 2957. This section directs our attention to the losses the United States has had in competitive markets of copper, steel, and other metal and mineral industries due to subsidized foreign competition. U.S. mining industries have, over the past few years, been hit hard by record mine and plant closures and record unemployment. Clearly, the oversupply and production of these commodities by subsidized foreign companies has added to those staggering statistics.

Located in my district is Kennecott Copper which has consistently been a mainstay of the U.S. copper industry. During our last economic crisis Kennecott was on the verge of closing its doors—think of what this means in terms of people out of work alone. Fortunately, Kennecott was able to survive that crisis but unless we do something to help our mining industry, next time Kennecott, and all the people it employs, may not be so lucky. While I wholeheartedly support free trade, I feel it is equally important for us not to inadvertently subsidize our foreign competition, therefore, jeopardizing the stability and success of U.S. companies like Kennecott Copper.

Section 409 would require commercial banks to conduct an economic feasibility evaluation before extending a foreign project loan relating to a mining, processing or manufacturing operation in excess of $1 million. Specifically, the evaluation would include such factors as the profit potential of the project, its impact on world markets, and the inherent competitive advantage and disadvantage. The bank evaluation would also include the likely effect of the project on the country's long-term development and consideration of whether the loan could be repaid from revenues generated by the project.

The provision is not protectionist since economic, rather than uneconomic, Third World development will be encouraged. Moreover, it will not create a burden of additional paperwork on banks, since such projects are already routinely evaluated by banks. However, a new emphasis will be placed on the intrinsic economic merits of each foreign project, since

host country subsidies are to be discounted from the determination of creditworthiness.

This provision is carefully drafted so as to not prohibit a bank from making foreign project loans. It only asks the banks to evaluate the economic merits of the foreign project by gaining additional information to assess the risks of the project. Section 409 is designed to give banks guidance to be more prudent in their foreign lending. In the past, banks have overlooked careful scrutiny of project economies when it came to government guarantees or subsidies of projects.

Since compliance with the provision will be supervised by banks themselves, in the same manner as other actions are handled internally, the amendment is not Federal intrusion beyond the body of government regulations to which banks are subject.

Clearly, section 409 is vitally important to the International Recovery and Financial Stability Act, H.R. 2957, and I encourage the support of my colleagues to insure this provision is retained in the IMF bill.●

● Mr. STARK. Mr. Chairman, the vote today on H.R. 2957, the IMF bill, poses some very difficult questions. While I believe we ought to help those less fortunate in the world through bank loans and financial assistance, I believe the IMF has become just another political arm for this administration's regressive foreign policies.

Among the other reasons for voting against this IMF bill, which are very persuasive on their own, I believe the IMF has become, unfortunately for all of us, a political institution.

It has become clear recently that this administration, and other administrations that preceeded it, have had hit lists of countries to which the United States will oppose IMF loans. During the Allende government, this list included Chile, and the current list is said to include Nicaragua. To list any country in such a manner, prior to loan application, is certainly a political maneuver.

We have U.S. foreign aid as a way to reward our friends, and punish our enemies. The IMF is supposed to disregard such things. The IMF is supposed to help countries that need help regardless of their political persuasions. Recently, however, this has not been the case.

As I said before, there are many good reasons to vote against the IMF, but the basic reason is that it has strayed from its role as nonpolitical provider to those in the world that are facing difficult times. Most other things can be overlooked; this disregard for the role the IMF is to play in the world international financial market cannot be ignored. I will vote no on H.R. 2957.●

● Mr. MRAZEK. Mr. Chairman, I rise in support of the provision requiring the President to instruct U.S. representatives on the IMF Board to oppose IMF loans to nations practicing the dehumanizing policy of apartheid.

Mr. Chairman, the inhumanity of apartheid as practiced in South Africa is a matter of record. Often, too often, our response to the outrageous and flagrant violations of human rights characteristic of apartheid is to conveniently look away in the name of our so-called strategic interests in the region.

But, after years of neglecting our moral prerogatives, Mr. Chairman, it now appears that many among us have resolved to change our woeful record of implicit support of the apartheid policies of the South African Government. Members of this body are beginning to question our previous course, a healthy sign for our future dealings with a corrupt system.

Earlier this year, I introduced a resolution in this body which expressed the opposition of our Government to the homeland policy practiced in South Africa. A similar resolution was introduced in the other body by Senator GLENN. The racist homeland policy has uprooted millions of black South Africans from their ancestral lands and resettled them in isolated pockets of poverty, disease, starvation, and repression.

The homeland policy, rooted as it is in the stagnant murk of apartheid, stands as a monument to the bankruptcy of South Africa's political and ethical standards. A recent report characterized one such homeland as having the greatest population density of any place on Earth—more than 1,100 people per square mile, struggling to subsist without electricity, transportation, economic self-sufficiency or basic medical treatment.

Mr. Chairman, I offer this information for the purpose of illuminating for my colleagues a practice carried on in South Africa for decades. The homeland policy, like apartheid, seeks to reverse the evolution of human progress. I would suggest to my colleagues today, as Walter Lippmann once wrote, that "the American conscience is a reality. It will make hesitant and ineffectual, even if it does not prevent, an un-American policy."

I urge the support my colleagues for this provision, a true expression of American conscience.●

Mr. ST GERMAIN. Mr. Chairman, I move to strike the last word.

Mr. BARNES. Mr. Chairman, will the gentleman yield.

Mr. ST GERMAIN. I yield to the gentleman from Maryland.

Mr. BARNES. Mr. Chairman, I rise in strong support of H.R. 2957, the International Recovery and Financial Stability Act.

The legislation before us encompasses a series of crucial efforts on the part of the United States to fulfill its international commitments by promoting worldwide economic recovery. During the past few years we have been confronting the worst economic crisis since the Great Depression. It has become clear that in this interdependent world that we live in, we either all pull together to reach the shore or give up and suffer the consequences.

I strongly disagree with the critics of H.R. 2957 who argue that through this bill we are bailing out the banks, that we are providing handouts to governments that have shown their inability to manage their economies.

On the contrary, the measures contained in this legislation will serve to help countries that are at the mercy of external economic factors, including fluctuating oil prices, plunging commodity prices, and increasing interest rates. Furthermore, by promoting their development we guarantee markets for U.S. exports and promote economic recovery here at home.

I also disagree with the argument that we should not support the IMF and other multilateral financial institutions because they are not designed to alleviate poverty and that, in some instances, these institutions serve to aggravate this situation.

The Western Hemisphere Subcommittee, which I have the honor of chairing, recently completed a series of hearings on the debt crisis in Latin America. One of the main subjects of the hearings has been the effects of the economic crisis and of the IMF prescriptions on the people. We have received testimony from knowledgeable witnesses, including a missionary who has lived in a slum in Lima, Peru, for the last 14 years. None of our witnesses called for the termination of the IMF. They all agreed that the IMF has an important role to play during the present crisis, although most of them also felt that some changes were needed in order to ameliorate the negative effects of the IMF conditionality on the poorest sectors of society.

As demonstrated by the IMF reaction to last year's economic crises in Mexico and Brazil, this institution is crucial to the economic stability of our own hemisphere. Because after all, when we talk about the debt crisis we are mostly talking about a Latin American crisis. Brazil, Argentina, and Mexico alone account for over half of the non-OPEC LDC debt.

H.R. 2957 also contains authorizations for regional development banks and for the Export-Import Bank. In the case of the Inter-American Development Bank, the bill authorizes $5.16 billion for the hard loan program, and $380 million for the concessional window, the Fund for Special Operations, for fiscal years 1984 through 1988. I am more familiar with the IDB

than with the other regional banks, but they have all earned high marks for their funding programs. They clearly deserve our continued support.

I urge my colleagues to reaffirm today that we are willing to fulfill our international commitments and that we recognize that our own economic well-being depends largely on the stability of the international economic situation.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Chairman, I frankly do not care whether Members vote for or against this amendment by our colleague, Mr. ST GERMAIN. The amendment improves the bill but only marginally.

I do, however, strongly oppose the bill. It is not that I am opposed to the IMF or to trade or to jobs in Brazil. I support the IMF. But I oppose our missing the one opportunity we have for the next 5 years to improve the IMF. If we authorize and appropriate this money with no strings or conditions attached either to the IMF or the big banks, what chance do we have to make necessary changes? None.

I believe that we would strike a blow for creation of jobs and for fairness if we revised this bill to accomplish five goals:

First. We should direct the IMF to promote growth, not austerity. Growth as encouraged by tax relief and removal of trade barriers is the only answer to the world's economic difficulties. Austerity to control inflation can be an appropriate economic prescription for some nations during some economic cycles. But such austerity measures are not universally apropos and, in general, are secondary to the requirements for growth in the midst of a worldwide recession. We must not allow the IMF to continue exporting the high interest rate policies of the Fed. These policies have not fostered growth in the United States. They will not foster growth in lesser developed countries, either.

Second. We should require better utilization of IMF's current assets, thereby minimizing the cost to the taxpayers for supporting the IMF. This means requiring some disposition of the more than $40 billion of gold at IMF. Disposition does not necessarily mean sale of the gold. Depending upon market conditions and the temporary, rather than permanent, status of the economic crisis, the gold could be used as collateral for short-term IMF loans to achieve economic growth.

Third. We should require that the current practice of allowing banks to charge high front-end fees for renegotiating current loans be temporized by requiring that all such fees and administrative costs be amortized over the life of the loan rather than collected at the front end.

Fourth. We should require revised bank regulations which would reduce the opportunity of this financial fiasco from happening again. Do not be fooled by those who come to the floor and pretend that this bill does not bail out the big banks which made excessively lenient loans to the LDC's. This bill does represent a bailout of the big banks. That is why they are supporting the bill so vigorously.

Perhaps this bill will also help world trade. Perhaps not. That is what we are debating here today. What is not at issue is the question, "Does this bill bail out the big banks?" It does.

In return for this bailout, the least we should demand is a strengthened regulatory environment that would protect the American taxpayer in the future.

Such regulation should include increased capital and reserve requirements, limits on the amounts of loans to a single country, and a strong public disclosure requirement of transactions and profits.

And finally, five, we should demand that a new Bretton Woods conference on the international economic situation and on a stable exchange rate environment be called in 1984.

Let me emphasize, Mr. Chairman, that I do not join those who would scuttle the IMF. I do, however, join those who insist that we seize this opportunity to revise and improve the goals and operations of our worldwide economic system. It is important to us and to the world.

Mr. COYNE. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Pennsylvania.

Mr. COYNE. Mr. Chairman, I rise in support of H.R. 2957, the International Monetary and Financial Stability Act. In this bill title I, the Export-Import Bank Amendments of 1983, and title III, the International Monetary Fund, were reported out of the International Trade Subcommittee on which I serve.

This legislation is essential if the United States is to remain competitive in the area of international trade and, further, if the stability which is so essential to the orderly functioning of an international economy is to remain.

The committee, in this legislation, has changed the charter of the Export-Import Bank to make the Bank fully competitive. H.R. 2957 states that:

> It is further the policy of the United States that loans made by the Bank shall bear interest at rates determined by the Board of Directors of the Bank, taking into consideration, foremost, the Bank's mandate to support United States exports, in all of the Bank's programs, at rates and on terms which are competitive with exports of other countries, and, second, the average cost of money to the Bank.

Mr. Chairman, testimony before the subcommittee made very clear that American firms competing abroad for contracts are at a competitive disadvantage. Foreign companies are at a distinct advantage if they are able to borrow at rates which are below the prevailing interest rates in the United States. Further, American firms cannot compete internationally if foreign firms are subsidized by their own governments while the Export-Import Bank is concerned about its average cost of money to the Bank, rather than the objective of the Bank which is to support U.S. exports.

Mr. Chairman, while I fully support the Export-Import Bank's activities because these loans generate jobs in the United States, I am also concerned that some loans made by the Bank may place U.S. firms at a competitive disadvantage. For example, the Export-Import Bank has made: A loan in Algeria for $7,000,000 for two 32-ton open hearth furnaces; a loan in Argentina of $18,735,000 for equipment and services for a steel plant; a loan in Taiwan of $19,500,000 for a steel expansion project. In Mexico, the Export-Import Bank made the following loans: One for $151,393,500 for the expansion of a steel plant; a second loan for a steel pipe production facility for $58,500,000. In Nigeria the Export-Import Bank made a loan of $33,150,000 for the construction of a ministeel mill and a second loan in Nigeria for similar purposes for $32,925,000.

In 1978, the Congress amended the Export-Import Bank Act as follows:

> SEC. 1911. The Bank shall implement such regulations and procedures as may be appropriate to insure that full consideration is given to the extent to which any loan or financial guarantee is likely to have an adverse effect on industries, including agriculture, and employment in the United States, either by reducing demand for goods produced in the United States or by increasing imports to the United States. To carry out the purposes of this subsection, the Bank shall request, and the United States International Trade Commission shall furnish, a report assessing the impact of the Bank's activities on industries and employment in the United States. Such report shall include an assessment of previous loans or financial guarantees and shall provide recommendations concerning general areas which may adversely affect domestic industries, including agriculture, and employment.

The study by the International Trade Commission mandated by this section was not carried out because funds were never authorized. Consequently, I offered an amendment in subcommittee, which is section 110 of H.R. 2359. It is the subcommittee's intention that the International Trade Commission carry out the study required by section 1911 (12 U.S.C. 635a-2). While I fully support the Export-Import Bank policies to promote exports, we should be aware of the fact

that there is the possibility that such loans could adversely affect other industries in this country. And while Export-Import Bank officials have assured me that their policies and practices are such that this does not happen, I think it is important to have the International Trade Commission review the practices and loans of the Bank and make a report to the Congress.

I fully support title III of this bill, and I support section 303 of H.R. 2957 which requires the President to instruct the U.S. Executive Director to the International Monetary Fund to oppose actively any loans to South Africa. The subcommittee, in adopting this section, was of the opinion that the racially discriminatory practices of the Government of South Africa were so morally repugnant that the Congress should oppose any loans to that country. In so doing the subcommittee found that the practice of apartheid:

Resulted in severe constraints on labor mobility and other highly inefficient labor supply rigidities which contribute to balance of payments deficits in direct contradiction of the goals of the International Monetary Fund.

Because members of the subcommittee were not unmindful of the objections of some to this section, because it was viewed as introducing a political dimension into the proceedings of the International Monetary Fund, the subcommittee made an economic finding of fact and proceeded accordingly.

There has been some question raised as to the cost of this legislation to the taxpayers. I would direct the attention of my colleagues to the committee report:

The true cost of U.S. participation in the IMF is not the amount of money lent over any accounting period but the differential, if any, between the treasury's own cost of borrowing and the rate it earns on money lent to the IMF, plus any valuation losses that arise from an appreciation of the dollar vis-a-vis the SDR. Treasury estimates of such costs since 1969 put them at an average of about $111 million annually—a small cost to pay for the benefits the IMF brings to the U.S. by helping keep foreign markets to our exports.

Further, Mr. Chairman, there is a relationship between the financial difficulties which certain countries are experiencing and a decrease in United States imports. An editorial in the Washington Post on February 6, 1983, states that Mexico, until it started to experience financial difficulty last year, was buying $18 billion worth of American goods a year. The Post editorial continued:

If Mexico had been forced into default, all trade across the Mexican border would have stopped except for a trickle of barter. Without the normal lines of commercial credit and exchange, billions of dollars' worth of American sales to Mexico would have evaporated. When sales are lost, jobs are lost. Even with the rescue, Mexico's imports from this country dropped sharply over the summer. That was one reason, and not a minor one, why this country did not come out of its recession in the middle of last year as most forecasters had expected.

Congressional Quarterly on April 9, 1983 stated that:

When oil prices sagged in 1981 and interest rates soared, Mexico had to cut imports drastically in order to use hard earned export dollars to make payments on its huge debt. The result: Mexican imports from the United States dropped more than 60 percent between the fourth quarter of 1981 and 1982 alone." Secretary of State George Shultz, citing this situation stated "that drastic cut in Mexico's imports, if sustained, would represent a $10 billion loss in U.S. exports and the elimination of at least a quarter million American jobs.

Further, the Department of Commerce states that for the first 4 months of this year exports to the six high debt nations of Latin America were 40 percent below the level of 1981, $22.7 billion as against $31.6 billion. A. J. Kingon, Assistant Secretary for International Economic Policy for the Commerce Department stated that:

Using the accepted benchmark equivalent of 25,000 jobs for each $1 billion in U.S. exports, the almost $9 billion decline in Latin American exports occurred last year cost the United States about 225,000 jobs, and contributed to our global 1982 trade deficit of $32 billion.

Mr. Chairman, I fully support H.R. 2957 and urge its passage.

Mr. MICHEL. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Peoria.

Mr. MICHEL. Mr. Chairman, I have asked the gentleman to yield because I am assuming that he will be making a motion that the committee rise and the gentleman from Illinois agrees with that move. May I say to the Members on my side that the Speaker has been accommodating to the administration here that pressed hard for enactment of the IMF.

There were an awful lot of bodies that were put together to try to work out a compromise on title III, and that was agreed to. It was overwhelmingly passed by this body. We just reaffirmed that move again by the most recent of votes.

I am, however, cognizant of the fact that there are Members who have other amendments they would like to offer to the legislation. We probably were a little bit strained and restrained in our allotment of time earlier to get to this point because Members have been under the understanding that they would be out of here at 3, could catch planes, and we still have to do the urgent supplemental or we will run out of food stamps over the weekend.

So I just wanted the Members to be aware of the fact that we agree with the decision to rise at this point. It would then be the Speaker's decision when we would come back to finish up IMF. But, again, I want to say that I am appreciative for the Speaker rescheduling to accommodate the administration and this Member's desire to help the Secretary of the Treasury and the administration get as far as they could on this legislation.

So, having said that, Mr. Speaker, I think we ought to proceed as best we can to get the most we can out of the few hours left.

Mr. ST GERMAIN. Mr. Chairman, I, too, would like to say to the Speaker that we appreciate his assistance, his patience, and we hope that we can complete this legislation at an early date.

Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. PEASE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2957) to extend the authority of the Export-Import Bank of the United States, encourage balanced worldwide economic growth, provide for continued participation in the International Monetary Fund, strengthen the supervision of international lending by U.S. banks, and provide for continued U.S. participation in multilateral development banks, had come to no resolution thereon.

GENERAL LEAVE

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous material, on the bill just considered.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

PERSONAL EXPLANATION

Mr. SOLARZ. Mr. Speaker, I was not here last evening in the Chamber when we voted on rollcall No. 285. If I had been, I most emphatically would have voted "aye."

PERMISSION FOR COMMITTEE ON AGRICULTURE TO FILE REPORTS ON H.R. 2590 AND HOUSE CONCURRENT RESOLUTION 40

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may have until midnight tonight, Friday, July 29, 1983, to file reports on H.R. 2590 and House Concurrent Resolution 40.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PRIVILEGES OF THE HOUSE—RECORD OF PROCEEDINGS

Mr. WALKER. Mr. Speaker, I rise to a point of privilege.

The SPEAKER. The gentleman will state his privilege.

Mr. WALKER. Mr. Speaker, I offer a privileged resolution.

The SPEAKER. The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 289

Whereas the Clerk of the House is making an electronic recording of the official proceedings of the House of Representatives to produce a verbatim account of the proceedings of the House;

Whereas the remarks of Representative Walker of Pennsylvania were not printed in the Record of July 28, 1983, and instead a statement appears on page H5856 stating: "Mr. Walker addressed the Committee. His remarks will appear hereafter in the Extension of Remarks.";

Whereas said remarks of Representative Walker of Pennsylvania were discussed and debated at a point in the Record on pages H5866 to H5867 of the Record of July 28, 1983;

Whereas the Record does not accurately reflect the proceedings and statements of the House of Representatives for the date of July 28, 1983: Therefore be it

Resolved, That the Congressional Record of July 28, 1983, should be corrected to include the remarks of Representative Walker, and be it further

Resolved, That the Clerk of the House of Representatives report to the House not later than the close of business today, July 29, 1983, as to the circumstances surrounding this instance and report what actions will be taken in the future to prevent Member's remarks from being omitted from the Record.

□ 1320

The SPEAKER. The Chair has examined the resolution. The gentleman from Pennsylvania (Mr. WALKER) is correct; it does raise a question of the privileges of the House.

The Chair recognizes the gentleman (Mr. WALKER) on the resolution.

Mr. WALKER. I thank the Speaker.

Mr. Speaker, I realize that this resolution does interfere with today's House schedule. For that reason, I intend to make my case for it very succinctly and hopefully it will not take very much time of the Members.

Mr. Speaker, last night there was a rather acrimonious and unnecessary exchange that took place on the floor in which the gentleman from Wisconsin (Mr. OBEY) charged several Members with impugning the motives of the Members of this body.

He named me specifically and I objected strenuously to his characterization of my remarks.

In the course of that exchange the point was made that my speech earlier in the day would speak for itself. In fact, I regard that speech as my best defense against the emotion-laden, groundless charge that was made, and I did not revise one word of those remarks.

Lo and behold, when the RECORD was published this morning, my best defense did not appear.

An entire exchange involving the remarks of several Members was missing in its entirety.

I was concerned deeply by their deletion and I sought to find out how such a thing could have happened.

What I discovered is that another Member was given the transcripts in order to revise and extend his remarks and, inadvertently, failed to rush them to the Clerk for printing in today's RECORD.

That Member has apologized and I am assured that no harm was meant.

But some harm was done.

I publicly pointed to my remarks as my defense and yet those remarks are unavailable when one goes to the RECORD.

The RECORD ends up being an incomplete and inaccurate representation of yesterday's proceedings.

I certainly do not want any interpretation that I purposefully withheld the materials which, given the context of last night's debate, could be inferred by some.

In my opinion, we cannot afford to go on having incidents which call our documents into question and that is the reason for this resolution.

It asks for two things, two very simple things: First, it asks simply that the RECORD for yesterday be correct. Second, it asks the Clerk of the House to report to the House by the end of the day the circumstances surrounding the incident and to provide some direction about how such occurrences can be avoided in the future.

I can offer a suggestion. It seems to me that resolution introduced recently by our colleague from Illinois, Mr. DURBIN, may present us with a solution. That is to have verbatim transcripts of what takes place here. We adopted such a procedure in the Science and Technology Committee just the other day.

But the bottom line is the public deserves to know precisely what it is we do here. This incident shows that our processes prevent that from happening at times and should be changed.

I ask the adoption of the resolution.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. In view of the fact that there was a Member trying to get the gentleman to yield, when the Chair recognized Mr. WALKER, before he recognized him, it was agreed that we would dispense with his privileged matter and take a vote within a few minutes, which we did.

CONFERENCE REPORT ON H.R. 3069, SUPPLEMENTAL APPROPRIATIONS, 1983

The SPEAKER. The unfinished business is the consideration of the Senate amendments in the report in disagreement accompanying the conference report on the bill (H.R. 3069) making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes.

The Clerk read the title of the bill.

AMENDMENTS IN DISAGREEMENT

The SPEAKER. The Clerk will designate the first amendment in disagreement.

Senate amendment No. 1 reads as follows:

Senate amendment No. 1: Page 2, strike out lines 14 to 21, inclusive.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 1 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert:

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

PAYMENT-IN-KIND PROGRAM

All land rented or leased, and in production for crop year 1982, if now rented or leased by the same individual, partnership, or corporation, and eligible for acreage reduction shall qualify for designation under the payment-in-kind program for crop year 1983, the same as land owned by the producer.

Until such time as additional legislation to the contrary may be enacted, it is provided: That, notwithstanding any other provision of law, in order to acquire a sufficient amount of upland cotton to carry out the payment-in-kind program for the 1983 crop of upland cotton, the Secretary of Agriculture shall solicit bids from cotton producers, for sale to the Commodity Credit Corporation of 1980, 1981, and 1982 crop cotton pledged by such producers as security for nonrecourse loans made under section 103(g)(1) of the Agricultural Act of 1949 (7 U.S.C. 144(g)(1)). Until sufficient cotton to carry out the payment-in-kind program for the 1983 crop of upland cotton is acquired under this procedure, or until a reasonable bid period opportunity has been determined and made available by the Secretary, but in no event less than two weeks, no bid for 1982 crop cotton shall be rejected unless it exceeds (on a percentage basis) the amount of the highest bid received and accepted under the same procedure for feed grains. The Secretary shall also give any producer who has previously submitted a bid the opportunity to nullify such bid if the producer agrees to submit another bid under the provisions of this Act.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. WHITTEN. Mr. Speaker, I rise in support of the motion.

The SPEAKER. The gentleman from Mississippi (Mr. WHITTEN) is recognized for 30 minutes.

Mr. WHITTEN. Mr. Speaker, I would like to explain to my colleagues that I shall do my very best to move quickly in dealing with this subject matter.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would announce at this time that at the conclusion of the supplemental the business of the week will be over.

Mr. WHITTEN. Mr. Speaker, with the cooperation of my colleagues I think we can move expeditiously. We had 254 amendments added by the Senate. The conference resolved these amendments, except for four amendments here where there is a true difference of opinion. Those four amendments will have to be dealt with separately. We have some 43 amendments that can be handled en bloc. But I do want to say that we will do our best and hope you can go along with us so we can move ahead and finish this supplemental today. It is essential this bill be completed today.

Mr. Speaker, I regret that we are delayed as much as we are. We know there are many reasons for it.

But I do not want to say that the Committee on Appropriations tried to cooperate with the leadership and with the administration in the handling of this necessary supplemental bill.

Our bill has been ready since last Friday waiting for an opportunity to complete this action.

We are advised that food stamps will not be issued Monday unless we finish this bill today. May I say I think the House position is sound. I have stated, we have true disagreement on only four amendments and we have some 40-odd amendments that we can handle en bloc.

I yield at this time to the gentleman from Texas, the distinguished chairman of the Committee on Agriculture to deal with the subject of amendment No. 1.

I yield at this time to my colleague from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. I thank the distinguished chairman for yielding to me.

Mr. Speaker and Members of the House, this is a rare and exceptional circumstance in which we find ourselves. The House has already spoken on this issue 312 to 97. It is trying to bring fairness and equity to a group of farmers that were enticed by the Department of Agriculture, to join a program called payment-in-kind.

Unfortunately, the assurances they received from the administration did not prove to be correct, and this is an attempt to bring fairness and equity into the situation. I am assured that this has no impact on the budget, inasmuch as our committee has previously passed legislation which reduces the budget more than the amount that this would cost. We have always taken a meticulous interest in trying to see that we do not impact on the budget beyond the figure that was allotted to us.

That is the intent and purpose of the legislation and what this amendment does, Mr. Speaker.

Mr. WHITTEN. May I add, Mr. Speaker, to the statement made by the distinguished chairman of the Committee on Agriculture that it is my information that the committee acted in order to correct an unfairness. That unfairness does not go to the PIK which they claim is authorized under existing law. The committee's recommendation goes only to the limited number of cotton farmers who were misled by the Department of Agriculture. I add further, this matter was reported by the Committee on Agriculture unanimously. Both sides supported it. May I also point out that the House voted on the exact text of this amendment on July 19 and it passed by a vote of 312 to 97. So the text of the amendment has already passed. Our purpose in going along with our colleagues on the Committee on Agriculture, and including the amendment here, is an effort to speed up the final consideration of this so the farmers will not be waiting until the end of September. It may be too late for many farmers if we have to deal with it in the fiscal year 1984 appropriation for the Department, which can take effect only after October 1, 1983.

□ 1330

So I trust that the Members will go along with us in that again this does not go to the major program about which you have been reading. That is done not under a statute that we passed, but under a general authority that the Department contends that it has. Whether it has it or not, I do not know.

The point I wish to make is that what we are doing here is trying to correct an unfairness, an inequity. We added it to this bill trying to expedite the final decision that would be made.

Mr. HUCKABY. Mr. Speaker, will the gentleman yield.

Mr. WHITTEN. I yield to the gentleman from Louisiana.

Mr. HUCKABY. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the chairman of the Appropriations Committee for using this vehicle to bring the legislation back to the floor and hope to get it passed in an expeditious manner. It will prevent chaos in the cotton industry and we certainly need this legislation.

Mr. WHITTEN. Mr. Speaker, I repeat again this is a corrective measure. The House has already voted 312 to 97 on this issue. We brought it here again for the purpose of speeding up the consideration and approval of it.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. CONTE) is recognized for 30 minutes.

Mr. CONTE. Mr. Speaker, I rise in opposition to the motion.

Simply put, the gentleman from Mississippi is asking the House to stretch the appropriations process beyond its proper limits. And the House should say "no."

The Appropriations Committee is often asked to solve urgent problems that cannot be addressed in the authorization process.

But we are given this power, and this responsibility, to be exercised on questions of great urgency by establishing levels and conditions for appropriated funds.

So long as we limit ourselves to our proper jurisdiction under the rules of the House, we can retain both our authority and the confidence of the House.

But if we violate those rules—waiver or no waiver—sooner or later we will lose both our authority and the confidence of the House.

And that is exactly what we will be doing if we agree to the amendment offered by the gentleman from Mississippi.

This is not an urgent matter. This is not an appropriation.

This is not a limitation or a condition on appropriated funds.

It is the text of an authorization bill, H.R. 3385, that passed the House on July 19.

It is a $100 million windfall for a select group of cotton producers.

I would remind the gentleman from Mississippi of our adventures with authorization legislation during the last session.

In the first continuing resolution for 1983, we amended the International Coffee Agreement and the duties on imported steam, provided permanent residence for two aliens, and made extensive changes in the existing law regarding the national stockpile and steel import licenses.

As a direct result of that adventure, the House rules for the 98th Congress were changed to prohibit revenue bills or amendments except those reported by the Committee on Ways and Means.

If that rule is interpreted to apply to limitations on appropriations, then the loss to our committee and to the House will be incalculable.

While such an interpretation is not justified by the language of the rule or

its legislative history, the point to be made here and now is that we went beyond the proper bounds of the appropriations process, and may pay a terrible price.

And the gentleman from Mississippi is asking the House to do the same thing today.

I say no, and I hope the House will say no.

The House should also say no on the issue itself.

There is no justification for this bailout. The Chrysler bailout was a real surprise to many of us. Congress never had any idea that our action would help get that outfit back on its feet so quickly. But there was a good reason for that bailout. We could see some prospect for success if everybody chipped in and did their part.

But this Senate amendment to bail out the cotton producers has no merit. What has happened with the cotton PIK program is that there is no cotton to "PIK." Events and the market have created a situation in which cotton prices are rising and there is no cotton to give to the farmers as a "PIK" payment. So now farmers are going to grow cotton for the Government in order to fulfill "PIK" requirements.

Those big brokers who "forward-contracted" in order to get the benefit from PIK now see that the market is better and they want to have an opportunity to take advantage of higher prices.

I do not mind that idea, but I do mind letting these guys have it both ways at the taxpayers' expense. They signed on the dotted line and now they want out of the obligation.

But Mr. Speaker, even if they are forced to honor their obligation, they will make money, though not as much. These are the big brokers in cotton and do not need this help to stay alive—they want it just to make more money.

I do not believe that we ought to be providing a profit "bailout" for these big speculators. Every dollar we can cut from the deficit will help sustain a long-term recovery. So we need to adhere to the original House language in the bill we sent over to the Senate. What has been done in conference is not only the wrong thing to do, it was the wrong way to do it. The Senate did not have any language in the bill and we went into new ground in the conference on this one.

Protect the rules of the House.

Protect the taxpayer.

Vote no.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. DE LA GARZA), chairman of the Committee on Agriculture.

Mr. DE LA GARZA. Mr. Speaker, I wish to assure my distinguished colleague from Massachusetts and friend that our committee is never one to impose on the Appropriations Committee and that this is a rare and unusual circumstance. I can assure the gentleman that it is not a common day occurrence.

The fact is that the House has already acted on this legislation, and this is the earliest possible vehicle for completing legislative action by the Congress. I do not believe that we have stretched the rule. We have secured from the Rules Committee the necessary waiver and the House has agreed to it.

I would like to say one further thing with relation to the subject matter. That it is not a windfall, as many believe, to wealthy ranchers. It is a need of the smaller farmer. The Department of Agriculture, rightly or wrongly, misjudged the amount of cotton that they had. For the bigger ones it makes no difference.

The smaller farmer is being asked to sell his cotton to the Government for use as PIK payments because the Department misjudged how many bales they had. Some of them had forward contracted their cotton with the assurances of the Department that no such request would be made of them. There was even a conference call with several small growers by the Secretary of Agriculture where the Secretary assured them to go ahead and forward contract, but join the PIK because their participation was needed for the welfare of the Nation and the welfare of the program. He stated that they should go ahead and sign up with the assurance that they would not be required to turn over their cotton to the Government for use as PIK payments.

Well, unfortunately, it did come to pass. And again, I repeat, it does not impose a burden on the budget. We have already passed and approved legislation that accommodates this amount. It is not an added burden on the budget.

But I can assure my distinguished chairman and my friend from Massachusetts that this is one of those very rare and few circumstances in which we ask your cooperation.

Mr. THOMAS of California. Mr. Speaker, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from California.

□ 1340

Mr. THOMAS of California. I thank the distinguished chairman of the Agriculture Committee for yielding.

Mr. Speaker, when one examines the various agricultural programs, one finds that the cotton program is the most market-oriented program, and it pains me to hear my colleagues talk about a windfall when in fact the legislation, H.R. 3385, was quite correctly called the Cotton Producers Equity Act, because the reason the Department does not have sufficient cotton is because it did not respond to the market conditions, and cotton has a market orientation. And all H.R. 3385 does is to require that the Department recognize that cotton is a market-oriented commodity. So it is not a windfall. It is an equity measure. In addition, I want to remind my colleagues that unless this program is put into effect soon, harvest for PIK will injure a major portion of the U.S. cotton industry. Without congressional action, cotton producers are going to have to use their 1983 crops to help satisfy the Government's obligation to them under the payment-in-kind program.

Without the open-bid program which the title provides, many cottongrowers will have to default on futures contracts covering their 1983 crop or their PIK entitlements. The industry would be mired in years of costly litigation as a result. Although the growers could buy contracts to provide the additional cotton, the vastly changed market for cotton has made that option economically untenable for many growers.

These growers should not be required to suffer for PIK when producers of other commodities such as wheat and feed grains have been taken care of by USDA under the 1983 PIK program. These other commodities were in similar short supply until USDA offered attractive bids to obtain sufficient stores of wheat and feed grains for PIK. Cottongrowers now face a very serious situation unless Congress requires USDA to go after surplus cotton with the same high bids with which it pursued wheat and feed grains. It is a matter of equity, Mr. Speaker, and I ask my colleagues to help deliver this equity to the Nation's cotton farmers. Otherwise, for them, PIK will not be godsend, it will be a nightmare.

Mr. DE LA GARZA. I thank the gentleman for his comments, and I thank my distinguished chairman.

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

May I say, Mr. Speaker, that I appreciate the statement that has been made here. I hope my record here shows that I am as conservative as the next person. The Secretary of Agriculture appeared before our committee three times. Never did he mention anything about a contract such as this. He was asked several times to keep us advised, because I have some grave doubts about this whole PIK program. I think the American farmer has to accept PIK because otherwise he is bankrupt. But the program has many, many problems. But my amendment is not a windfall; it is to keep the smaller operator from being penalized by the Department leading him on to commit himself to put his production into PIK and later coming up with a contract saying, "Do not worry about that; it will not be called on at all."

So I think the gentleman from Texas has clearly described it. And may I say, we hear about rules and rules. All the rules we have in the House are the rules. So we went before the Rules Committee, in view of the emergency that we have here, and asked their permission to bring this up. So we bring it up in proper order.

Again, our purpose on this committee was to expedite the handling of this matter, and it is 100 percent what my friend from Texas and his committee unanimously approved—not to give anybody a windfall, but to keep his government from penalizing him.

Now, they say this involves a forward sale. The forward sale has been promoted by the Department of Agriculture for years to add some stability to agriculture. So what he did was in line with what the Department has always preached. But it developed that when they led him to believe that there would be plenty of cotton to meet this, they guessed wrong. And now he is being penalized, through no fault of his own. I just hope, Mr. Speaker, that our colleagues will go along with us in this instance. It is most unusual, but the rule provides for the unusual, and that is the way this is being handled.

Mr. CONTE. Mr. Speaker, I yield 7 minutes to the gentleman from Illinois (Mr. MADIGAN).

Mr. MADIGAN. Mr. Speaker, I was one of the people who supported the passage of this cotton bill here a few days ago. I think that if some of us, just a very few of us, who had supported the passage of that bill, had chosen to oppose it, that it would not have received the necessary two-thirds vote, because it was a bill under suspension. But I did not want to hold up the passage of that bill because I understood that there was something being put together here to deal with a variety of subjects that were of interest not only to Members of this House and Members of the Senate, but also to people in the administration, most especially the Secretary of Agriculture.

It now seems that a scenario is developing where all of the things that are of interest to Members of the House and those things that are of interest to Members of the Senate may ultimately be incorporated in some kind of legislative package, but the things that were of interest to the Secretary of Agriculture and of special interest to me as the ranking minority member of the Agriculture Committee are never going to be considered. And one of the ways that we would have insured the consideration of the things in which I am interested would have been to have all of these things come together, as it appeared they were going to come together over in the Senate, in the other body, in these bills that we were sending over there under suspension.

But now it appears that that is not going to happen. And what is going to happen is that something that is of special interest to certain Members has been tacked on to this appropriations bill in a way that violates the rules of the House and requires a waiver from the Rules Committee, so that the entire legislative process that was developing is going to be frustrated. And what some people want, they are going to get; but what other people want who are concerned about the size of our deficit, is never going to occur and is never going to be voted on anywhere.

Now, when we started out a few months ago, before we began considering any of these things, we were talking about trying to save between $1½ billion and $2 billion in some of these agicultural programs. It looks like we are not going to get any of those savings at all and that we are instead going to spend roughly an additional $2 billion in total, so that the gap is going to be in the neighborhood of $4 billion. Instead of having $2 billion in savings, we are going to have no savings, and we are going to have $2 billion in additional expenditures.

Now, I am not opposed to the concept of moving this bill in the authorization process as we started out doing; but I think it needs to be pointed out that we are going to spend $6.4 billion for the 1983 cotton crop without this bill. $6.4 billion, just for cotton alone, of the taxpayers' money.

Now, if you want to spend another $100 million, I think the very least that the people who want to spend that money ought to do is to provide this legislative body with an opportunity to vote on some of the issues that would save some money in these agricultural expenditures. And we are being denied that opportunity and we are being end-run by this process that is taking place at this moment on the floor of the House. I think absent some guarantee, absent some guarantee, from the distinguished chairman of the Agriculture Committee that before we adjourn this House for the August recess we are going to have an opportunity right here on the floor to vote on all of these issues, absent that guarantee, I think this should be defeated.

Mr. JEFFORDS. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Speaker, I jut want to echo the comments of the gentleman in the well. I think it is important to realize, as the gentleman pointed out, that there are other important pieces of legislation. All of those are waiting action this next week on the Senate floor. A part of that, an important part—and I do not disagree with the cotton legislation—was the cotton bill. So it will be acted on next week in the Senate.

But also, along with it, are the items that the gentleman talked about. There is a dairy compromise, which will bring, fortunately, the surplus problem of dairy under control. It will save us a great deal of money. There are attempts at trying to do something in other areas. If you pick it apart—forgive the pun—if you do that and pass these that certain Members want and let it go out, there is not much incentive to do some of the important essential necessary things which are critical to the Agriculture Department and to all of us who want to see a more rational agriculture policy. Those may just get lost next week if we just allow these items—we already let part of the tobacco package get away, now we are going to let the cotton get away, and there is not going to be enthusiasm for doing any of these important issues.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from Texas.

Mr. DE LA GARZA. I appreciate my colleague yielding, and I want to assure my colleague, as well he knows, that it has never been the intention either of myself or the members of the committee to bypass the normal process. We, in cooperation and with the assistance of my distinguished colleague, the ranking minority Member, have already passed the tobacco bill and the long staple cotton bill that reduced Government costs approximately $100 million.

The reason is not because of any particular Member or area, but because of the specific crop. We needed to pass the tobacco bill before the auctions start this month. There was an emergency situation. The same applies to the cotton that they forward contracted. The harvest is upon us, and this legislation is needed to be passed now. But it never had been my intention nor will it be, to bypass the normal process. The problem is in the other body, wherein we pass legislation and they are holding it for various and sundry reasons. We have legislation affecting the dairy industry that we hope would bring some order and reduce cost and some of the surplus. As far as the gentleman from Texas is concerned, we are ready to move with it on Monday, but nothing is coming out of the other body. So I would submit to the gentleman that the cooperation asked is granted. But we need to combine our resources and our intellects to see if we can move our colleagues in the other body so they may assist us. But you have no problem from our side. We are ready to move, package or no package, individually or together. We have offered the forum for the Secretary and to anyone

else who wants to have a forum. There will not be an obstruction to any legislation at any time. I can say that as chairman of the committee.

Mr. MADIGAN. If the gentleman will allow me to reclaim my time, the issue in which I have paramount interest is the issue of the target price freeze.

□ 1350

That issue has not been able to be considered on the floor of the House because all the bills reported from the Committee on Agriculture have been reported dealing with only one subject, and it has been brought to the floor on the Suspension Calendar.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield to me?

Mr. MADIGAN. If the gentleman will allow me to continue my sentence, so at no time would I have been able to offer an amendment to allow this House to work its will on this question of target price freezes. Now, I voted for this cotton bill. I do not have any cotton in my district; I do not have any cotton in my State. But I voted for the cotton bill out of respect for those people who do have cotton and do have problems.

That bill has passed this House and it is pending in the other body where it can be considered next week, or it can be locked into this supplemental appropriation bill as an out-of-order amendment, a bill that we know has to be signed by the President because of the food stamp program.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. MADIGAN) has expired.

Mr. CONTE. I yield 2 additional minutes to the gentleman from Illinois.

Mr. MADIGAN. We know the President has to sign this bill, so here we have taken care of cotton, now we have cotton up to $6.5 billion this year, we have taken care of it, but we have never had an opportunity to vote on the issue that would save the taxpayers some money at a time when we face a $200 billion deficit.

I think I am being denied my opportunity to be a legislator, and the House is being denied its opportunity to work its will on probably the most important agriculture issue of this period.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. MADIGAN. I will be glad to yield to the gentleman from Texas.

Mr. DE LA GARZA. I appreciate the gentleman yielding.

The gentleman has had an opportunity. I offered the Secretary of Agriculture the forum. The fact is that the committee did not approve the target price freeze. The gentleman or I have no control over that. I fulfilled my promise to the Secretary to offer him a forum. He got the forum. The Secretary came in an unusual circumstance to address the committee while we were deliberating, so the gentleman has not been denied the right. The committee did not approve his request for the target price freeze.

Mr. MADIGAN. Mr. Chairman, if the gentleman will allow me to reclaim my time, I am not talking about that action before the committee. To make the record complete, the distinguished chairman advised the Secretary not to bring the issue to a vote, and advised me not to bring the issue to a vote, and I accepted his advice as being good-faith advice, and I will accept it.

I am talking about the procedure here on the floor of the House, where everything that is coming out of that committee is coming out on a single subject. It is coming out to the Suspension Calendar. So I have no opportunity to propose a target price freeze on the floor of this House.

Now, because I was under the impression that all these things were coming together over in the Senate, and we were going to get some opportunity to have that issue heard in the two Houses of Congress, I have not objected to this slippery procedure of coming here with one thing at a time when all these things could have been in the same bill. I have not objected. I have not objected to all these things going on the Suspension Calendar.

But now, Mr. Chairman, I object to an out-of-order procedure that takes care of one problem for one crop in an out-of-order amendment to a supplemental appropriation bill that has to be signed. I object to that because it is part of a plot, if you will, to deny the opportunity to vote on the target price freeze, to maybe let the tobacco thing collapse over on the other side, to maybe let the dairy thing collapse, to the embarrassment of everybody.

I object to the procedure. I am not going to vote for this.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. MADIGAN) has again expired.

Mr. CONTE. Mr. Speaker, I yield 2 additional minutes to the gentleman from Illinois.

Mr. MADIGAN. I voted for cotton as a bill. I would again.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield to me?

Mr. MADIGAN. In just a moment I will be happy to yield to the distinguished chairman.

Mr. Speaker, I voted for cotton as a bill. I voted for these other things as a bill. I am not going to vote for this, and I have to tell my chairman that if something comes over from the Senate next week, I am going to tie the process up. We are going to go home for the August recess with all these issues up in the air because of the manner in which this is being done today. I am tying up the rest of the agriculture bills from now until the August recess starts.

I do not have any opportunity to do any thing else because I feel that I am being frustrated as a legislator, and so I am going to use the tools that are available to me to deal with that frustration.

Mr. Speaker, I yield to the chairman of the Committee on Appropriations.

Mr. WHITTEN. May I say to my colleague from Illinois, I do not know of anyone here who is stronger for giving attention to the agricultural situation than I am. With less than 4 percent of our population providing food, clothing, and shelter for the rest of us, most people do not realize that agriculture, as an industry, is bigger than the auto, steel, and housing industries combined. Agriculture is our chief earner of foreign exchange.

I think the mistake was made when we failed to use the authority of the Commodity Credit Corporation to sell in world trade those commodities we have and did not need. Every country in the world offers their commodities at the world price, but when we do that our competitors argue that we are subsidizing exports. We are not. Our price support is to offset the high cost the American farmer pays for his equipment and supplies.

The gentleman from Illinois would know this. The farmer's costs in the last 30 years have gone up 1,100 percent, but his prices have gone up only 300 percent. Not only that, the farmer now is getting only 31 percent of the consumer dollar; 30 years ago he was getting 51 percent. Industry and labor today are getting 69 percent; 30 years ago they were getting 39 percent.

So with the farmer getting less and less of the consumer dollar, he cannot stay in business. But neither can the Government stand the farmer not selling commodities in world trade. The dollars earned by agriculture are essential to our economy. Today companies in the fertilizer and farm equipment business are going down.

So I hope the gentleman will rewrite the agriculture bill, and I am for it. But we have an emergency here. May I call to the attention of my colleague that this does not treat cotton differently; this says treat cotton like feed grains. So you are putting cotton where you have all the rest of them. So this is not special. It says cotton will be treated like feed grain.

A fellow having been lulled into signing a contract of this kind, we think he is entitled to some relief, and we think any one commodity is entitled to be treated as fairly as the others.

Mr. MADIGAN. Mr. Chairman, if you will allow me to reclaim my time, I would not argue world economics with you. You have been here several years longer than I have. And I would not

argue cotton programs with you. It is undoubtedly a crop about which you have much more knowledge than I do, as we do not grow any of it in my State.

I have not taken the well to raise those kinds of objections. I object to the procedure here where one crop is being set aside in a legislative way to receive this special legislative consideration while we are not considering the other things that might save us some money. We have a $200 billion deficit, which I know the chairman is very familiar with.

As I said at the outset, we began this process talking about ways to save between $1½ billion and $2 billion. That is out of the question now, and we are going to spend $2 billion more, a $4 billion gap. I am very much concerned about that.

As a legislator, I want the opportunity to vote on all of these issues. I voted with the distinguished chairman on this cotton bill here when it passed as a piece of legislation and was sent to the other body, but I am not going to vote for it as an amendment to an appropriation bill.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. MADIGAN) has again expired.

Mr. WHITTEN. Mr. Speaker, I yield myself 1 minute.

I do not know of any person in Congress who stands any better with all of us than the gentleman from Illinois. I do not believe you would penalize a particular group by refusing to let them be treated the same as feed grains producers are treated while you work these things out. You would hold this particular group captive until you get all farmers to take a reduced price. Now listen to this—the income of the farmer is not meeting his costs. His income is volume times price less cost. His costs are skyrocketing. Under PIK, you are cutting off his exports, so you are cutting down his volume.

□ 1400

Cutting down his volume, reducing his price and reducing his volume by not exporting—they cannot live with it. Let us not hold this particular commodity captive while the gentleman tries to get these other things done.

I beg the gentleman, let us go ahead.

There is no violation of the rules. We call this a special emergency situation. We followed the rules, for the rules say go to the Rules Committee and get a waiver. We did that. That is a part of the rules, too.

So I hope the gentleman will not insist on this. Let us go ahead and I will cooperate with the gentleman in writing a new program.

The SPEAKER. The time of the gentleman from Illinois has again expired.

Mr. CONTE. Mr. Speaker, I yield 1 additional minute to the gentleman from Illinois.

Mr. MADIGAN. Mr. Speaker, I thank the gentleman for yielding.

I assure the distinguished chairman of the Appropriations Committee that I want everyone treated equally, whether they are producing cotton in the gentleman's State or corn in my State or horseradish someplace else, I want them all treated the same.

I think the way they get treated the same is if all these legislative issues relating to these crops that are important to these individual groups have the same opportunity for hearing in this, the people's House. That has not been the case and what we have is a supplemental appropriation bill dealing with only this one crop.

As I said to the chairman, I voted for this cotton bill when it passed here and was sent to the other body. I will vote for it as part of the conference report, but I believe that we should have the opportunity to work our will on all these issues. I feel that I am being denied that opportunity to even offer amendments dealing with the things that are important to the agricultural concerns in my area.

I thank the gentleman for his attention.

Mr. WHITTEN. Mr. Speaker, I yield myself 1 addition minute.

I make only one statement, Mr. Speaker. I said earlier how high the gentleman from Illinois stands. I would respectfully urge the gentleman, give us the same consideration as feed grains. That is what the amendment says.

Mr. Speaker, I yield to the gentleman from California (Mr. LEHMAN).

Mr. LEHMAN of California. Mr. Speaker, I rise today to speak in support of this supplemental appropriations bill. H.R. 3069 provides for the continued funding of such vital services as the Federal food stamp program, child nutrition programs, and black lung benefits for America's miners.

The bill also contains provisions for funding payments to America's cotton growers under the President's payment-in-kind program. This provision will put America's cotton growers on an equal footing with our wheat farmers, rice growers, and others who chose to participate in PIK.

While I am convinced that this appropriaton is necessary to put cotton growers on an equal footing with other farmers, I feel that the need for this provision is another indication of the Reagan administration's failure to foresee the many problems and shortcomings of PIK. If the administration had thoroughly thought out the PIK program before offering it to the House as the cure-all for America's agricultural surplus, problems such as this one would not have arisen.

Other problems with PIK have led the program to balloon from a $1 billion farm program, to a $13 billion nightmare. I believe that the PIK program should be thoroughly overhauled, before inclusion in next years budget. We owe America's farmers and consumers a much more coherent and defensible farm policy than the administration is currently providing.

The SPEAKER pro tempore (Mr. BROWN of California). If there are no further requests for time, the question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MADIGAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. The Chair will count.

One hundred three Members are present, not a quorum.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 204, nays 191, answered "present" 1, not voting 37, as follows:

□ 1410

Messrs. BILIRAKIS, WYDEN, BERMAN, BENNETT, CLAY, MOODY, DOWNEY of New York, GINGRICH, MAVROULES, CROCKETT, MACKAY and HOWARD changed their votes from "yea" to "nay."

Mr. BOLAND changed his vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1420

The SPEAKER. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 2 reads as follows:

Senate amendment No. 2: Page 2, line 25, after "$50,000,000" insert "; and for insured real estate loans, $100,000,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 2 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment insert "$25,000,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 4 reads as follows:

Senate amendment No. 4: Page 2, after line 25, insert:

RURAL WATER AND WASTE DISPOSAL GRANTS

For additional grants pursuant to sections 306(a)(2) and 306(a)(6) of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 1926), $75,000,000, to remain available until expended, pursuant to section 306(d) of the above Act.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 4 and concur therein with an amendment, as follows:

In lieu of the sum named in said amendment insert "$25,000,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the Senate amendments numbered 5, 14, 16, 19, 20, 21, 22, 23, 26, 27, 28, 29, 30, 31, 35, 41, 43, 48, 50, 51, 56, 57, 67, 76, 78, 79, 80, 88, 126, 133, 139, 143, 149, 153, 162, 171, 182, 183, 218, 230, 239, 248, 249 be considered en bloc and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Senate amendment No. 5 reads as follows:

Page 2, after line 25, insert:

GENERAL PROVISION

None of the funds appropriated by this or any other Act may be used to relocate the Hawaii State office of the Farmers Home Administration from Hilo, Hawaii, to Honolulu, Hawaii.

Senate amendment No. 14 reads as follows:

Page 4, after line 17, insert:

STANDARD LEVEL USER CHARGES

(TRANSFER OF FUNDS)

For an additional amount for payment of standard level user charges of the Food and Drug Administration, $500,000, which shall be derived by transfer from "Salaries and expenses".

Senate amendment No. 16 reads as follows:

Page 4, after line 25, insert:

WHITE HOUSE CONFERENCE ON PRODUCTIVITY

In the appropriation language of section 158 in Public Law 97-377, insert "to remain available until January 31, 1984" immediately after "$1,500,000".

Senate amendment No. 19 reads as follows:

Page 5, line 13, after "expended" insert ", of which $20,000,000 shall be for the establishment of a fund for the residents of the Pribilof Islands: *Provided*, That such sum shall be available only upon the enactment into law of authorizing legislation: *Provided further*, That no additional Federal funds shall be made available for this purpose".

Senate amendment No. 20 reads as follows:

Page 5, after line 19, insert:

SMALL BUSINESS ADMINISTRATION

BUSINESS LOAN AND INVESTMENT FUND

For additional captial for the "Business loan and investment fund", authorized by the Small Business Act, as amended, $152,000,000, to remain available without fiscal year limitation.

Senate amendment No. 21 reads as follows:

Page 5, after line 19, insert:

DEPARTMENT OF JUSTICE

Senate amendment No. 22 reads as follows:

Page 5, after line 19, insert:

GENERAL ADMINISTRATION

WORKING CAPTIAL FUND

For additional requirements of the "Working captial fund", $900,000, to be derived from current operating income.

Senate amendment No. 23 reads as follows:

Page 5, after line 19, insert:

LEGAL ACTIVITIES

Senate amendment No. 26 reads as follows:

Page 5, after line 19, insert:

SUPPORT OF UNITED STATES PRISONERS

For an additional amount for "Support of United States Prisoners", $1,500,000.

Senate amendment No. 27 reads as follows:

Page 5, after line 19, insert:

SALARIES AND EXPENSES, COMMUNITY RELATIONS SERVICE

Funds advanced to "Salaries and expenses, Community Relations Service" shall be made available until expended to make payments in advance for grants, contracts, and reimbursable agreements and other expenses necessary under section 501(c) of the Refugee Education Assistance Act of 1980, Public Law 96-422, for the processing, care, maintenance, security, transportation and reception and placement in the United States of Cuban and Haitian entrants.

Senate amendment No. 28 reads as follows:

Page 5, after line 19, insert:

INTERAGENCY LAW ENFORCEMENT

ORGANIZED CRIME DRUG ENFORCEMENT

Of funds available under the above heading, $9,619,000, for undercover operations, and $14,000,000 for purchase of automated data processing and telecommunications equipment shall remain available until September 30, 1984.

Senate amendment No. 29 reads as follows:

Page 5, after line 19, insert:

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses", $1,000,000: *Provided*, That during fiscal year 1983 there is authorized to be purchased for police-type use (not to exceed one thousand six hundred and twenty of which thirteen hundred are for replacement only) passenger motor vehicles.

Senate amendment No. 30 reads as follows:

Page 5, after line 19, insert:

IMMIGRATION AND NATURALIZATION SERVICE

SALARIES AND EXPENSES

Of funds available under this heading, $27,177,000, for work under section 501(c) of the Refugee Education Assistance Act shall remain available until expended.

Senate amendment No. 31 reads as follows:

Page 5, after line 19, insert:

FEDERAL PRISON SYSTEM

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses, Federal Prison System", $3,734,000.

Senate amendment No. 35 reads as follows:

Page 6, after line 6, insert:

COMMISSION ON WARTIME RELOCATION AND INTERNMENT OF CIVILIANS

SALARIES AND EXPENSES

Funds appropriated under the heading of Commission on Wartime Relocation and Internment of Civilians in Public Law 97-377 (96 Stat. 1877) shall remain available until September 30, 1983.

Senate amendment No. 41 reads as follows:

Page 8, after line 3, insert:

Obligations incurred or to be incurred hereafter for termination liability in connection with the TAKX and T-5 programs, for which the Navy has already entered into agreements to charter (including conversion or construction related to such agreements or charters) shall, so long as the Government remains liable for termination costs, be considered as obligations in the current Operation and Maintenance, Navy, appropriation account, to be held in reserve in the event such termination liability is incurred, for the purposes of title 31, United States Code, in an amount equal to 10 percent of the outstanding gross termination liability.

Senate amendment No. 43 reads as follows:

Page 8, line 19, after "1985" insert ": *Provided*, That funds available under this heading in Public Law 97-377 may be used for the purchase of six vehicles for physical security of overseas personnel, notwithstanding price limitations applicable to passenger vehicles, but not to exceed $100,000 per vehicle".

Senate amendment No. 48 reads as follows:

Page 10, after line 3 insert:

No funds available to the Department of Defense during the current fiscal year may be used to enter into any contract with a term of three years or more, inclusive of any option for contract extension or renewal, for any vessels, aircraft or vehicles, through a lease, charter, or similar agreement, that imposes an estimated termination liability (excluding the estimated value of the leased item at the time of termination) of the Government exceeding 50 percent of the original purchase value of the vessel, aircraft, or vehicle involved for which the Congress has not specifically provided authority in an appropriation Act for the obligation of 10 percent of such termination liability.

Senate amendment No. 50 reads as follows:

Page 10, after line 3 insert:

The amount that may be transferred pursuant to section 732 of the Department of Defense Appropriation Act, 1983, is hereby increased to $1,700,000,000.

Senate amendment No. 51 reads as follows:

Page 10, after line 3 insert:

None of the funds appropriated in this Act may be obligated or expended in any way for the purpose of the sale, lease, rental, or excessing of any portion of land currently identified as Fort DeRussy, Honolulu, Hawaii.

Senate amendment No. 56 reads as follows:

Page 17, after line 9, insert:

To assure adequate flood protection for developed areas in the vicinity of the Cowlitz and Toutle Rivers, Washington, and to improve navigation in the Columbia River, the navigation project on the Cowlitz River, Washington, authorized by the first section of the Act entitled "An Act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved June 25, 1910 (36 Stat. 665), is hereby modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to implement and maintain flood control measures on the Cowlitz and Toutle Rivers by dredging or other means determined by the Secretary to be necessary to assure flood protection for developed areas in the vicinity of such rivers against a one-hundred-year flood on the lower Cowlitz River and to reduce sedimentation flow and the chance of blockage on the Columbia River. The authorization provided in this paragraph shall remain in effect until such time as permanent solutions and measures for flood control and navigation as identified in the Chief of Engineers' Cowlitz and Toutle Rivers final feasibility report, to be submitted to the President and the Congress by the Secretary of the Army, are fully implemented.

Senate amendment No. 57 reads as follows:

Page 17, after line 9, insert:

The project for Cooper River, Charleston Harbor, South Carolina, authorized by the River and Harbor Act of 1968, Public Law 90-483, approved August 13, 1968, is hereby modified to authorize and direct the Secretary of the Army, acting through the Chief of Engineers, to install a closure structure in the diversion canal between Lake Marion and Lake Moultrie and to construct such measures as the Chief of Engineers determines necessary to improve the seismic stability of the Pinopolis West Dam on the Cooper River, at an estimated cost of $22,000,000: *Provided*, That nothing in this paragraph shall waive any requirements under the Federal Power Act of 1935 (49 Stat. 847): *Provided further*, That in addition to such sums as are otherwise appropriated by this Act there are appropriated an additional $2,000,000, to remain available until expended, for "Construction, general, Corps of Engineers—Civil", for engineering and design studies in connection with the project authorized by this paragraph.

Senate amendment No. 67 reads as follows:

Page 23, after line 3, insert:

AGRICULTURE, RURAL DEVELOPMENT, AND NUTRITION

For an additional amount for "Agriculture, rural development, and nutrition, Development Assistance", $5,000,000: *Provided*,

That these funds are available only for Belize.

Senate amendment No. 76 reads as follows:

Page 27, line 16, after "rescind" insert ": *Provided further*, That notwithstanding any other provision of law the 90 per centum limitation contained in the third proviso shall be implemented on October 1, 1983 and remain in effect thereafter".

Senate amendment No. 78 reads as follows:

Page 28, line 9, after "1984" insert ": *Provided*, That funds heretofore provided under this heading in Public Law 97-272 shall remain available for obligation for the fiscal year ending September 30, 1984, and shall be used by the Secretary for fiscal year 1984 requirements in accordance with section 9(d) of the United States Housing Act of 1937, as amended".

Senate amendment No. 79 reads as follows:

Page 28, after line 9, insert:

FEDERAL HOUSING ADMINISTRATION FUND

For an additional amount for commitments to guarantee loans to carry out the purposes of the National Housing Act, as amended, $5,000,000,000.

Senate amendment No. 80 reads as follows:

Page 28, after line 9, insert:

SECTION 203(h) LIMIT

Section 203(h) of the National Housing Act is amended by striking out "$14,400" and inserting in lieu thereof "the applicable maximum dollar limit under subsection (b)".

Senate amendment No. 88 reads as follows:

Page 30, after line 13, insert:

PAYMENTS IN LIEU OF TAXES

Notwithstanding any other provision of law: (1) 31 U.S.C. 6901(2) is amended to read as follows:

"(2) 'unit of general local government' means:

"(A) a county (or parish), township, borough existing in Alaska on October 20, 1976, or city where the city is independent of any other unit of general local government, that: (i) is within the class or classes of such political subdivisions in a State that the Secretary of the Interior, in his discretion, determines to be the principal provider or providers of governmental services within the States; and (ii) is a unit of general government as determined by the Secretary of the Interior on the basis of the same principles as were used on January 1, 1983, by the Secretary of Commerce for general statistical purposes. The term 'governmental services' includes, but is not limited to, those services that relate to public safety, environment, housing, social services, transportation, and governmental administration;

"(B) the District of Columbia;

"(C) the Commonwealth of Puerto Rico;

"(D) Guam; and

"(E) the Virgin Islands.".

(2) Section 6903(a)(4) is repealed.

(3) The United States shall not be subject to any cause of action or any liability for distribution of payments made prior to January 1, 1983, under the Act of October 20, 1976 (90 Stat. 2662), as amended, or regulations pursuant thereto.

Senate amendment No. 126 reads as follows:

Page 38, after line 12 insert:

EMPLOYMENT AND TRAINING ASSISTANCE

Funds appropriated under the heading Employment and Training Assistance in Public Law 97-257 shall remain available for obligation until September 30, 1984.

Senate amendment No. 133 reads as follows:

Page 40, after line 5, insert:

ASSISTANT SECRETARY FOR HEALTH

HEALTH MAINTENANCE ORGANIZATION LOAN AND LOAN GUARANTEE FUND

For an additional amount for "Health Maintenance Organization Loan and Loan Guarantee fund", $2,650,000 to be used solely for obligations resulting from defaulted loans guaranteed by this fund.

Senate amendment No. 139 reads as follows:

Page 40, after line 5, insert:

Sums appropriated under section 101(e)(2) of Public Law 97-377 for health planning activities may be used for carrying out such activities for fiscal year 1983 under section 935(b) of the Omnibus Reconciliation Act of 1981.

Senate amendment No. 143 reads as follows:

Page 40, after line 6, insert:

For additional amount for centers for independent living under part B of title VII of the Rehabilitation Act of 1973, $2,120,000: *Provided*, That the amount appropriated under this paragraph shall be available for special projects under the Rehabilitation Act of 1973 that were reduced by reason of the first proviso under the heading "Rehabilitation Services and Handicapped Research, Department of Education", contained in Public Law 93-377, if the condition of that proviso has been met.

Senate amendment No. 149 reads as follows:

Page 40, after line 20, insert:

SENATE

EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, AND MAJORITY AND MINORITY WHIPS

For an additional amount for "Expense Allowances of the Vice President, the President Pro Tempore, Majority and Minority Leaders, and Majority and Minority Whips", $2,500 for the Majority Whip and $2,500 for the Minority Whip; in all $5,000: *Provided*, That, effective with the fiscal year 1983 and each fiscal year thereafter, the expense allowance of the Majority and Minority Whips of the Senate shall not exceed $5,000 each fiscal year for each Whip.

SALARIES, OFFICERS AND EMPLOYEES

ADMINISTRATIVE, CLERICAL, AND LEGISLATIVE ASSISTANCE TO SENATORS

For an additional amount for "Administrative, clerical, and legislative assistance to Senators", $197,000.

CONFERENCE COMMITTEES

For an additional amount for the Conference of the Majority and Conference of the Minority, $50,000 for each such committee; in all $100,000.

EXPENSE ALLOWANCES OF THE SECRETARY OF THE SENATE, SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE, AND SECRETARIES FOR THE MAJORITY AND MINORITY OF THE SENATE

For an additional amount for "Expense allowances of the Secretary of the Senate, Sergeant at Arms and Doorkeeper of the Senate, and Secretaries for the Majority and Minority of the Senate", $1,000 for each such officer; in all $4,000: *Provided*, That, effective in the case of fiscal years beginning on or after October 1, 1982, the first sentence of section 119(a) of Public Law 97-51 (2 U.S.C. 65c) is amended by striking out "$2,000" and inserting in lieu thereof "$3,000".

CONTINGENT EXPENSES OF THE SENATE

MISCELLANEOUS ITEMS

For an additional amount for "Miscellaneous Items", $240,000.

Senate amendment No. 153 reads as follows:

Page 42, after line 7, insert:

SEC. 901. (a) Effective October 1, 1982, the allowance for administrative and clerical assistance of each Senator from the State of Texas is increased to that allowed to Senators from States having a population of fifteen million but less than seventeen million, the population of said State having exceeded fifteen million inhabitants.

(b) Effective October 1, 1982, the allowance for administrative and clerical assistance of each Senator from the State of Colorado is increased to that allowed to Senators from States having a population of three million but less than four million, the population of said State having exceeded three million inhabitants.

SEC. 902. The Secretary of the Senate is authorized to withhold from the salary of each Senate page who resides in the page residence hall an amount equal to the charge imposed for lodgings, meals, and related services, furnished to such page in such hall. The amounts so withheld shall be transferred by the Secretary of the Senate to the Clerk of the House of Representatives for deposit by such Clerk in the revolving fund, within the contingent fund of the House of Representatives, for the page residence hall and page meal plan, as established by H. Res. 64, Ninety-eighth Congress.

SEC. 903. (a) Notwithstanding any provision to the contrary in any contract which is entered into by any person and either the Administrator of General Services or a contracting officer of any executive agency and under which such person agrees to sell or lease to the Federal Government (or any one or more entities thereof) any unit of property, supplies, or services at a specified price or under specified terms and conditions (or both), such person may sell or lease to the Congress the same type of such property, supplies, or services at a unit price or under terms and conditions (or both) which are different from those specified in such contract; and any such sale or lease of any unit or units of such property, supplies, or services to the Congress shall not be taken into account for the purpose of determining the price at which, or the terms and conditions under which, such person is obligated under such contract to sell or lease any unit of such property, supplies, or services to any entity of the Federal Government other than the Congress. For purposes of the preceding sentence, any sale or lease of property, supplies, or services to the Senate (or any office or instrumentality thereof) or to the House of Representatives (or any office or instrumentality thereof) shall be deemed to be a sale or lease of such property, supplies, or services to the Congress.

(b) The provisions of this section shall take effect with respect to sales or leases of

property, supplies, or services to the Congress after the date of enactment of this section.

SEC. 904. (a) Subject to subsection (b) of this section and notwithstanding any other provision of law—

(1) the compensation of the Librarian of Congress shall be at an annual rate which is equal to the annual rate of basic pay payable for positions at level III of the Executive Schedule under section 5314 of title 5, United States Code, and

(2) the compensation of the Deputy Librarian of Congress shall be at an annual rate which is equal to the annual rate of basic pay payable for positions at level IV of the Executive Schedule under section 5315 of title 5, United States Code.

(b) The limitations contained in section 306 of S. 2939, Ninety-seventh Congress, as made applicable by section 101(e) of Public Law 97-276 (as amended by section 128(a) of Public Law 97-377) shall, after application of section 128(b) of Public Law 97-377, be applicable to the compensation of the Librarian of Congress and the Deputy Librarian of Congress, as fixed by subsection (a) of this section.

(c) The provisions of subsection (a) shall take effect on the first day of the first applicable pay period commencing on or after the date of the enactment of this Act.

Senate amendment No. 162 reads as follows:

Page 45, after line 23, insert:

FACILITIES AND EQUIPMENT

Of the funds available under this heading, $5,000,000 shall be available from existing appropriations for the Secretary of Transportation to enter into grant agreements with two universities or colleges to conduct demonstration projects in the development, advancement, or expansion of an airway science curriculum and such money, which shall remain available until expended, shall be made available, under such terms and conditions as the Secretary of Transportation may prescribe, to such universities or colleges for the purchase or lease of buildings and associated facilities, instructional materials, or equipment to be used in conjunction with the airway science curriculum.

Senate amendment No. 171 reads as follows:

Page 49, after line 20, insert:

MOTOR CARRIER RATEMAKING STUDY COMMISSION

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

Of the funds made available under the heading of Department of Transportation, Office of the Secretary, Salaries and Expenses, for Fiscal Year 1983 for the Motor Carrier Ratemaking Study Commission, unobligated balances available as of September 30, 1983, shall remain available until expended.

Senate amendment No. 182 reads as follows:

Page 53, after line 17, insert:

SENATE

"Salaries, officers and employees", $7,027,000;

"Office of the Legislative Counsel of the Senate", $47,000;

"Office of Senate Legal Counsel", $12,000;

"Senate Policy Committees", $78,000;

"Inquiries and investigations", $1,764,000;

Senate amendment No. 183 reads as follows:

Page 54, after line 11, insert:

"Senate office buildings", $480,000;

Senate amendment No. 218 reads as follows:

Page 68, line 20, after "$2,650,000" insert ", to be derived by transfer from "Retired pay" ".

Senate amendment No. 230 reads as follows:

Page 71, after line 25, insert:

OFFICE OF REVENUE SHARING

"Salaries and expenses", $255,000: *Provided*, That of the funds heretofore provided under this heading in Public Law 97-272, $400,000 shall remain available until September 30, 1984;

Senate amendment No. 239 reads as follows:

Page 76, line 14, after "management)" insert ", to remain available until September 30, 1984".

Senate amendment No. 248 reads as follows:

Page 79, after line 10, insert:

SEC. 404. The Secretary of the Treasury shall instruct the United States executive director of the International Monetary Fund to use the voice and vote of the United States to oppose any assistance by the International Monetary Fund, using funds appropriated or made available pursuant to this Act, for the production of any commodity for export, if it is in surplus on world markets and if the assistance will cause substantial injury to United States producers of the same, similar, or competing commodity.

Senate amendment No. 249 reads as follows:

Page 79, after line 10, insert:

SEC. 405. It is the sense of Congress that the Secretary of Agriculture should announce the 1984 annual commodity programs for wheat, feed grains, upland cotton, and rice by the dates specified in the following schedule:

(1) For wheat, July 1, 1983;

(2) For feed grains, September 1, 1983;

(3) For upland cotton, November 1, 1983; and

(4) For rice, December 15, 1983.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendments of the Senate numbered, 5, 14, 16, 19, 20, 21, 22, 23, 26, 27, 28, 29, 30, 31, 35, 41, 43, 48, 50, 51, 56, 57, 67, 76, 78, 79, 80, 88, 126, 133, 139, 143, 149, 153, 162, 171, 182, 183, 218, 230, 239, 248, 249 and concur therein.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 8 reads as follows:

Senate amendment No. 8; Page 4, after line 2, insert:

GENERAL PROVISIONS

(a) The Congress finds that—

(1) Federal nutrition programs, including the food stamp program, school lunch program, school breakfast program, child care food program, summer food program, special supplemental food program for women, infants, and children (WIC), the commodity supplemental food program, special milk program, and elderly feeding programs, have been effective in reducing hunger and malnutrition in the United States;

(2) the Congress has closely scrutinized and made significant changes in both child nutrition and food stamps over the past two years in an effort to achieve budgetary savings;

(3) current levels of unemployment have greatly increased dependency on Federal, State, and local programs;

(4) churches and other volunteer organizations in the United States are having difficulty meeting the growing need for food created by poor economic conditions;

(5) the food stamp program provides nutrition benefits to those without the means to obtain a nutritionally adequate diet and is often the only form of Federal assistance available to many unemployed workers;

(6) nutrition benefits to mothers and children at critical periods of growth represent a cost-effective way to reduce infant mortality, low birthweight, and promote long-term health;

(7) nutrition benefits through the school lunch program and other child nutrition programs significantly contribute to the health maintenance and learning potential of our Nation's children;

(8) nutrition programs for elderly people, including the food stamp program, can prolong health, allow for independent living, and preserve the dignity of our Nation's senior citizens;

(9) a Federal role in meeting the nutritional needs of low-income Americans is appropriate since the costs of obtaining an adequate diet do not vary significantly throughout this country; and

(10) a reduction in the Federal Government's commitment to provide adequate nutrition to the needy would cause increasing hardship and hunger to those least able to survive in our society.

(b) It is the sense of the Congress that—

(1) the Federal nutrition programs, including the food stamp, child nutrition, and elderly feeding programs, should be protected from budget cuts that would prevent them from responding effectively to nutritional needs in the United States;

(2) the special supplemental food program for women, infants, and children (WIC) should continue to be funded at the full level authorized by law; and

(3) the Federal Government should maintain primary responsibility for nutrition programs.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 8 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

CHILD NUTRITION PROGRAMS

For an additional amount for the "Child nutrition programs", $118,000,000.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 11 reads as follows:

Senate amendment No. 11: Page 4, after line 10, insert:

For an additional amount for emergency measures to repair flood damage as authorized by sections 403-405 of the Agricultural Credit Act of 1978 (16 U.S.C. 2203-2205), $10,000,000, to remain available until expended.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 11 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment insert "$5,000,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 13 reads as follows:

Senate amendment No. 13: Page 4, line 17, strike out "$1,000,000" and insert "$5,000,000, to remain available until expended, to become available only to the extent necessary to meet unanticipated costs of emergency activities not provided for in budget estimates".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 13 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment insert "$1,000,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 24 reads as follows:

Senate amendment No. 24: Page 5, after line 19, insert:

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES

For an additional amount for "Salaries and expenses, General Legal Activities", $5,211,000, of which not to exceed $3,800,000 for asbestos litigation support contracts shall remain available until September 30, 1984.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES

For an additional amount for "Salaries and expenses, General Legal Activities", $4,600,000, of which not to exceed $3,800,000 for asbestos litigation support contracts shall remain available until September 30, 1984.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 25 reads as follows:

Senate amendment No. 25: Page 5, after line 19, insert:

SALARIES AND EXPENSES, UNITED STATES ATTORNEYS AND MARSHALS

For an additional amount for "Salaries and expenses, United States Attorneys and Marshals", $5,992,000.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 25 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert the following: "$5,800,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 38 reads as follows:

Senate amendment No. 38: Page 6, line 24, strike out all after "$9,000,000" over to and including $15,000,000 in line 2 on page 7.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 38 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert the following: ", and, in addition there shall be available the sum of $4,000,000".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 40 reads as follows:

Senate amendment No. 40: Page 7, after line 17, insert:

GENERAL PROVISIONS

Notwithstanding any other provision of law, the Administrative Office of the United States Courts, or any other agency or instrumentality of the United States, is prohibited from restricting solely to staff of the Clerks of United States Bankruptcy Courts the issuance of notices to creditors and other interested parties. The Administrative Office shall permit and encourage the preparation and mailing of such notices to be performed by or at the expense of the debtors, trustees or such other interested parties as the Court may direct and approve. The Administrator of the United States Courts shall make appropriate provisions for the use of and accounting for any postage required pursuant to such directives.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 40 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

GENERAL PROVISIONS

Notwithstanding any other provision of law, the Administrative Office of the United States Courts, or any other agency or instrumentality of the United States, is prohibited from restricting solely to staff of the Clerks of United States Bankruptcy Courts the issuance of notices to creditors and other interested parties. The Administrative Office shall permit and encourage the preparation and mailing of such notices to be performed by or at the expense of the debtors, trustees or such other interested parties as the Court may direct and approve. The Administrator of the United States Courts shall make appropriate provisions for the use of and accounting for any postage required pursuant to such directives. The provisions of this paragraph shall terminate on October 1, 1983.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 42 reads as follows:

Senate amendment No. 42: Page 8, after line 15, insert:

AIRCRAFT PROCUREMENT, AIR FORCE

For an additional amount for "Aircraft procurement, Air Force", $185,000,000 to be available until September 30, 1985, for B-1B multiyear procurement pursuant to section 2301, title 10, U.S.C. as amended: *Provided*, That $185,000,000 appropriated under this head in Public Law 97-377 is rescinded.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 42 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

AIRCRAFT PROCUREMENT, AIR FORCE

For an additional amount for "Aircraft Procurement, Air Force", $185,000,000, to be available until September 30, 1985, for long lead procurement of engine, defensive and offensive avionics, and airframe components, in quantities which will be required if Congress approves multiyear procurement of the B-1B pursuant to section 2306(h), title 10, U.S.C.: *Provided*, That $185,000,000 appropriated under this head for the B-1B in Public Law 97-377 is rescinded: *Provided further*, That nothing in this paragraph shall be deemed to approve multiyear procurement of the B-1B.

Mr. CONTE (during the reading). Mr. Speaker I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 49 reads as follows:

Senate amendment No. 49: Page 10, after line 3, insert:

None of the funds appropriated by this Act may be obligated or expended to formulate or carry out any requirement that, in order to be eligible to bid on a Department of Defense contract for the supply of commercial products or services, an individual or firm that is a small business concern (as defined in section 3 of the Small Business Act) must (1) be in the business of selling to the general public the products or services for which bids are being solicited and maintain a ready supply of such products or services for sale to the general public, or (2) submit a bid sample of the products or services as a precondition to submitting a bid on the contract.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 49 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

None of the funds appropriated by this Act may be obligated or expended to formulate or carry out any requirement that, in order to be eligible to submit a bid or an offer on a Department of Defense contract to be let for the supply of commercial or commercial-type products, a small business concern (as defined pursuant to section 3 of the Small Business Act) must (1) demonstrate that its product is accepted in the commercial market (except to the extent that may be required to evidence compliance with the Walsh-Healey Public Contracts Act), or (2) satisfy any other pre-qualification to submitting a bid or an offer for the supply of any such product.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

□ 1430

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 53 reads as follows:

Senate amendment No. 53: Page 10, strike out all after line 15 over to and including line 9 on page 17 and insert:

Section 107 of Public Law 97-88 pertaining to maintenance and operation of the Chicago Sanitary and Ship Canal of the Illinois Waterway in the interest of navigation includes the Control Structure and Lock in the Chicago River, and other facilities as are necessary to sustain through navigation from Chicago Harbor on Lake Michigan to Lockport on the Des Plaines River.

Not to exceed $500,000 shall be available for channel clearing of Bayou Rigolette as determined advisable by the Chief of Engineers in the project Aloha-Rigolette Area, Grant and Rapides Parish, Louisiana, authorized by the Flood Control Act approved August 18, 1941.

The Wallisville Reservoir, Texas, project, authorized by section 101 of the River and Harbor Act of 1962 (Public Law 87-874), is hereby modified with respect to its physical elements and planned operation as recommended in the Wallisville Lake, Texas, Post-Authorization Change Report, July 1981, as supplemented, July 1982. Notwithstanding the above modifications, provisions of the Contract for Water Storage, Salinity Control, and Recreation in Wallisville Reservoir (Contract Numbered DACW64-67-C-0108 signed by the Secretary of the Army, 2 February 1968) between the United States Government and the city of Houston, the Trinity River Authority of Texas, and the Chambers-Liberty Counties Navigation District, shall govern non-Federal participation: *Provided*, That total project cost as cited in said contract shall be understood to consist of (1) costs, exclusive of land costs, actually incurred by the United States in connection with construction of elements currently in place and to be used in the modified plan, including interest during construction; (2) the actual cost of lands used in the modified plan; and (3) completion costs of the modified plan, including interest during construction.

The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to prepare and submit to Congress a feasibility report on the water resource needs in the vicinity of the Homochitto and Buffalo Rivers, Saint Catherine and Coles Creeks, Bayou Pierre, and other major tributaries draining into the Mississippi River between Bayou Pierre and the Buffalo River, Mississippi, to recommend remedial measures for flood control, bank stabilization, sedimentation, and related purposes.

The Secretary of the Army is authorized, notwithstanding any other provision of law, to widen, as necessary for safe passage, the navigation opening of Franklin Ferry Bridge, Jefferson County, Alabama. The work herein authorized shall be accomplished at Federal expense; however, no construction to widen the navigation opening shall begin nor contract for alteration of the bridge may be awarded until the owner shall agree that upon completion of the alteration to thereafter operate and maintain the Franklin Ferry Bridge as altered. There is hereby authorized to be appropriated not to exceed $4,000,000, which includes

$1,000,000 previously appropriated, to carry out this section. Amounts authorized by this subsection shall be available until expended.

The Columbia River at the mouth, Oregon and Washington, project authorized by the River and Harbor Act of July 5, 1984, as amended, is modified to provide for deepening of the northernmost 2,000 feet of the channel cross section to 55 feet at Federal expense: *Provided*, That $5,300,000 of "Construction, general" funds shall be made available to undertake this project modification.

The Ventura Marina project authorized by section 101 of the River and Harbor Act of 1968 (Public Law 90-483), as modified, is hereby amended to authorize the Secretary of the Army, acting through the Chief of Engineers to reimburse the Ventura Port District from available Operation and Maintenance, General, funds for work performed by the Port just prior to February 25, 1983, in the area normally maintained by the Corps of Engineers. None of the funds appropriated in this or any future Act for the Ventura Marina, California, project may be used to reimburse local interests for any work performed unless such work has the prior approval of the United States Army Corps of Engineers and the Appropriations Committees.

The Secretary of the Army, acting through the Chief of Engineers, is directed to reimburse to local and State interests those sums of monies (in total not to exceed $3,500,000) expended by them in construction of Flat River Channel improvements to the extent that such construction is incorporated into the Bayou Bodcau and Tributaries project authorized by Public Law 89-298, approved October 27, 1965.

Section 164 of the Water Resources Development Act of 1976 (Public Law 94-587) as amemded by section 3 of Public Law 97-140, is further amended—

(1) by inserting the following after the first sentence: "The Secretary of the Army, acting through the Chief of Engineers, shall construct an approach roadway from the end of the Washington State Route 129 overpass of such bridge to Sixteenth Avenue in the city of Clarkston, Asotin County, Washington,"; and

(2) in the last sentence, by striking out "$23,200,000" and inserting in lieu thereof "$24,000,000".

Contracts for architect and engineering services, and surveying and mapping services, shall be awarded in accordance with title IX of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 451 et seq.).

Section 1114 of title 18, United States Code, is amended by inserting "any civilian official or employee of the Army Corps of Engineers assigned to perform investigations, inspections, law or regulatory enforcement functions, or field-level real estate functions," immediately after "National Park Service,".

Notwithstanding subsection 5901(a) of title 5, United States Code (80 Stat. 508), as amended, the uniform allowance for uniformed civilian employees of the United States Army Corps of Engineers may be up to $400 annually.

The United States Army Chief of Engineers may accept the services of volunteers and provide for their incidental expenses to carry out any activity of the Army Corps of Engineers except policy making or law or regulatory enforcement. Such volunteers shall not be employees of the United States Government except for the purposes of (1) chapter 171 of title 28 of the United States Code, relating to tort claims, and (2) chapter 81 of title 5 of the United States Code, relating to compensation for work injuries.

The project for navigation at Moriches and Shinnecock Inlets, New York, authorized in section 101 of the River and Harbor Act of 1960 (Public Law 86-645), and the items of local cooperation pertaining thereto, are hereby modified to the extent necessary to require the Secretary of the Army, acting through the Chief of Engineers, to provide for the construction of the Navigation feature independent of other features.

Section 104(b) of the River and Harbor Act of 1958, Public Law 85-500, as amended by section 302 of the River and Harbor Act of 1965, Public Law 98-298, is further amended by striking out "$5,000,000" and inserting in lieu thereof "$10,000,000".

The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to design and construct and undertake measures necessary to provide a level of protection as the Chief of Engineers determines necessary to prevent recurring flood damages along the Pearl River in the vicinity of Jackson, Mississippi, substantially in accordance with preliminary plans developed by the Mobile District Engineer, at a currently estimated cost of $26,500,000, including $2,300,000 made available in this appropriation for advanced engineering and design. Expenditures by the Pearl River Basin Development District in constructing improvements at the Mississippi Highway 25 Bridge, an integral part of the plan authorized herein, shall be credited toward the local share of the project costs. Prior to implementation of the work authorized herein, non-Federal interests must agree to provide the requirements prescribed in section 3 of the Flood Control Act of 1936, as amended.

The Secretary of the Army acting through the Chief of Engineers is directed to start construction of the Crater Lake phase of the Snettisham hydroelectric project authorized by the 1962 Flood Control Act with funds appropriated in fiscal years 1982 and 1983.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 53 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

The project for flood protection on the Lower San Joaquin River, California, authorized by the Flood Control Act approved December 22, 1944, as amended, is hereby further modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to perform clearing and snagging on the San Joaquin River from Stockton, California, to Friant Dam, at an estimated cost of $5,000,000. Prior to initiation of construction, a non-Federal entity shall provide adequate assurance for providing all lands, easements, rights-of-way and utility relocations at no expense to the Federal Government; execute a written agreement pursuant to section 221 of Public Law 91-611; agree to operate and maintain the project works upon completion of construction in accordance with rules and regulations prescribed by the Department of the Army; and hold and save the United States free from damages due to construction, operation, and maintenance of the project, not including damages due to the fault or negligence of the United States or its contractors.

Funds for the Wister Lake project, Oklahoma, authorized pursuant to the Flood Control Act of 1938 (52 Stat. 1218) shall be used to reduce sedimentation impacts by raising the level of the conservation pool permanently by 3 feet and seasonably by an additional 3.4 feet and the Secretary of the Army, acting through the Chief of Engineers, is hereby authorized to take such measures as are necessary to carry out this directive.

Contracts for architect and engineering services, and surveying and mapping services, shall be awarded in accordance with title IX of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 541 et seq.).

The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to include in the survey report on Threemile Creek, Mobile, Alabama, the costs and benefits of local improvements initiated subsequent to January 1, 1982, by the city of Mobile for flood damage reduction measures which the Chief of Engineers determines are compatible with and constitute an integral part of his recommended plan. In determining the appropriate non-Federal share for such plan, the Chief of Engineers shall give recognition to costs incurred by non-Federal interests in carrying out such local improvements.

The Secretary of the Army, acting through the Chief of Engineers, is hereby authorized to prepare a comprehensive study and recommendations for the development and efficient utilization of the water and related resources of southcentral and southeast Oklahoma and to prepare a similar comprehensive study and recommendations for the Red River and its tributaries in Arkansas, Texas, Louisiana, and Oklahoma.

Funds herein or hereafter provided for the Beverly Shores, Indiana, project may be used to operate and maintain the emergency shore protection measures constructed pursuant to section 103 of the Energy and Water Development Appropriations Act, 1982 (95 Stat. 1137).

Not to exceed $500,000 shall be available for removal of obstructive shoals within the project limits of the Kawkawlin River, MI, project.

Section 107 of Public Law 97-88 pertaining to maintenance and operation of the Chicago Sanitary and Ship Canal of the Illinois Waterway in the interest of navigation includes the Control Structure and Lock in the Chicago River, and other facilities as are necessary to sustain through navigation from Chicago Harbor on Lake Michigan to Lockport on the Des Plaines River.

Not to exceed $500,000 shall be available for channel clearing of Bayou Rigolette as determined advisable by the Chief of Engineers in the Project Aloha-Rigolette Area, Grant and Rapides Parish, Louisiana, authorized by the Flood Control Act approved August 18, 1941.

The Wallisville Reservoir, Texas, project, authorized by section 101 of the River and Harbor Act of 1962 (Public Law 87-874), is hereby modified with respect to its physical elements and planned operation as recommended in the Wallisville Lake, Texas, Post-Authorization Change Report, July 1981, as supplemented, July 1982. Notwithstanding the above modifications, provisions of the Contract for Water Storage, Salinity Control, and Recreation in Wallisville Reservoir

(Contract Numbered DACW64-67-C-0108 signed by the Secretary of the Army, 2 February 1968) between the United States Government and the city of Houston, the Trinity River Authority of Texas, and the Chambers Liberty Counties Navigation District, shall govern non-Federal participation: *Provided*, That total project cost as cited in said contract shall be understood to consist of (1) costs, exclusive of land costs, actually incurred by the United States in connection with construction of elements currently in place and to be used in the modified plan, including interest during construction; (2) the actual cost of lands used in the modified plan; and (3) completion costs of the modified plan, including interest during construction.

The Secretary of the Army is authorized, notwithstanding any other provision of law, to widen, as necessary for safe passage, the navigation opening of Franklin Ferry Bridge, Jefferson County, Alabama. The work herein authorized shall be accomplished at Federal expense; however, no construction to widen the navigation opening shall begin nor contract for alteration of the bridge may be awarded until the owner shall agree that upon completion of the alteration to thereafter operate and maintain the Franklin Ferry Bridge as altered. There is hereby authorized to be appropriated not to exceed $4,000,000, which includes $1,000,000 previously appropriated, to carry out this section. Amounts authorized by this subsection shall be available until expended.

The Ventura Marina project authorized by section 101 of the River and Harbor Act of 1968 (Public Law 90-483), as modified, is hereby amended to authorize the Secretary of the Army, acting through the Chief of Engineers to reimburse the Ventura Port District from available Operation and Maintenance, General funds for work performed by the Port just prior to February 25, 1983, in the area normally maintained by the Corps of Engineers. None of the funds appropriated in this or any future Act for the Ventura Marina, California, project may be used to reimburse local interests for any work performed unless such work has the prior approval of the United States Army Corps of Engineers and the Appropriations Committees.

Section 164 of the Water Resources Development Act of 1976 (Public Law 94-587) as amended by Section 3 of Public Law 97-140, is further amended—

(1) by inserting the following after the first sentence: "The Secretary of the Army, acting through the Chief of Engineers, shall construct an approach roadway from the end of the Washington State Route 129 overpass of such bridge to Sixteenth Avenue in the city of Clarkston, Asotin County, Washington,"; and

(2) in the last sentence, by striking out "$23,200,000" and inserting in lieu thereof "$24,000,000".

The authorization for the Sardis Lake project contained in section 203 of the Flood Control Act of 1962 (Public Law 87-874) as amended by section 108 of the Energy and Water Development Appropriation Act of 1982 (Public Law 97-88) is hereby amended to authorize the Secretary of the Army, acting through the Chief of Engineers, to plan, design, and construct a water intake structure at an estimated Federal cost of $500,000.

The project for navigation at Moriches and Shinnecock Inlets, New York, authorized in section 101 of the River and Harbor Act of 1960 (Public Law 86-645), and the items of local cooperation pertaining thereto, are hereby modified to the extent necessary to require the Secretary of the Army, acting through the Chief of Engineers, to provide for the construction of the Navigation feature independent of other features.

Notwithstanding subsection 5901(a) of title 5, United States Code (80 Stat. 508), as amended, the uniform allowance for uniformed civilian employees of the United States Army Corps of Engineers may be up to $400 annually.

The United States Army Chief of Engineers may accept the services of volunteers and provide for their incidental expenses to carry out any activity of the Army Corps of Engineers except policy making or law or regulatory enforcement. Such volunteers shall not be employees of the United States Government except for the purposes of (1) chapter 171 of title 28 of the United States Code, relating to tort claims, and (2) chapter 81 of title 5 of the United States Code, relating to compensation for work injuries.

Hereafter, notwithstanding any other provisions of law or of this Act, appropriations for the Yatesville Lake construction project made available by Public Law 97-257, chapter V and Public Law 97-377, title I, section 140 (96 Stat. 1916) shall be obligated to construct the Yatesville Lake project.

Section 104(b) of the River and Harbor Act of 1958, Public Law 85-500, as amended by section 302 of the River and Harbor Act of 1965, Public Law 89-298, is further amended by striking out "$5,000,000" and inserting in lieu thereof "$10,000,000".

The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to prepare and submit to Congress a feasibility report on the water resource needs in the vicinity of the Homochitto and Buffalo Rivers, Saint Catherine and Coles Creeks, Bayou Pierre, and other major tributaries draining into the Mississippi River between Bayou Pierre and the Buffalo River, Mississippi, to recommend remedial measures for flood control, bank stabilization, sedimentation, and related purposes.

The Columbia River at the mouth, Oregon and Washington, project authorized by the River and Harbor Act of July 5, 1884, as amended, is modified to provide for deepening of the northernmost 2,000 feet of the channel cross section to 55 feet at Federal expense: *Provided*, That $5,300,000 of "Construction, general" funds shall be made available to undertake this project.

Section 1114 of title 18, United States Code, is amended by inserting "any civilian official or employee of the Army Corps of Engineers assigned to perform investigations, inspections, law or regulatory enforcement functions, or field-level real estate functions," immediately after "National Park Service,".

The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to design and construct and undertake measures necessary to provide a level of protection as the Chief of Engineers determines necessary to prevent recurring flood damages along the Pearl River in the vicinity of Jackson, Mississippi, substantially in accordance with preliminary plans developed by the Mobile District Engineer, at a currently estimated cost of $26,500,000, including $2,300,000 made available in this appropriation for advanced engineering and design. Expenditures by the Pearl River Basin Development District in constructing improvements at the Mississippi Highway 25 Bridge, an integral part of the plan authorized herein, shall be credited toward the local share of the project costs. Prior to implementation of the work authorized herein, non-Federal interests must agree to provide the requirements prescribed in section 3 of the Flood Control Act of 1936, as amended.

The Secretary of Army acting through the Chief of Eingineers is directed to start construction of the Crater Lake phase of the Snettisham hydroelectric project authorized by the 1962 Flood Control Act with funds appropriated in fiscal years 1982 and 1983.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 58, reads as follows:

Senate Amendment No. 58: Page 17, strike out all after line 20 over to and including line 11 on page 20 and insert:

The Secretary of the Interior is hereby authorized to engage in feasibility studies of the following proposals:

(1) Pilot Butte powerplant, Riverton unit, located in Fremont County, Wyoming;

(2) Northwest Oklahoma Water Supply project, located in Cimarron, Texas, Beaver, Harper, Woods, Ellis, Woodward, and Dewey Counties, Oklahoma;

(3) Siletz River Basin project, located in Lincoln and Polk Counties, Oregon;

(4) Water conservation and efficient use program, All-American canal relocation project, located in Imperial County, California; and

(5) Gibson Dam powerplant, located on the Sun River in Lewis and Clark Counties, Montana.

The interest rate used for computing interest during construction, and interest on the unpaid balance of the interest-bearing reimbursable costs of the WEB pipeline project shall be no more than 5 percent per year.

Appropriations for the Bureau of Reclamation shall be available for purchase of one aircraft.

The Secretary of the Interior shall, under the general investigations authority, engage in a joint, State-led study with the State of Nebraska of cost effective alternatives to the Norden Dam, O'Neill unit of the Pick-Sloan Missouri River Basin program, Nebraska; and shall use available funds to initiate such study. The study period shall not exceed 18 months. No funds shall be expended for any construction activity for the Norden Dam, O'Neill unit prior to the completion of this study.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amend-

ment of the Senate numbered 58 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

The Secretary of the Interior is hereby authorized to engage in a feasibility study for the Prairie Bend unit, Pick-Sloan Missouri River Basin program, located in Dawson, Buffalo, and Hall Counties in Nebraska for irrigation, stabilization of ground-water levels, enhancement of water quality, small community and rural domestic water supplies, management of fish and wildlife habitat, public outdoor recreation, flood control, and other purposes determined to be appropriate. Such feasibility study shall include a detailed report on any effects the proposed project may have on wildlife habitat, including habitat of the sandhill crane and the endangered whooping crane. Such feasibility study shall also develop alternative water management plans that are consistent with the Endangered Species Act and the Migratory Bird Treaty Act. Before funds are expended for the feasibility study, the State of Nebraska, or other non-Federal entity, shall agree to participate in the study and to share in the cost of the study. The non-Federal share of the costs may be partly or wholly in the form of services directly related to the conduct of the study.

In accordance with the repayment contract for the Dallas Creek participating project of the Upper Colorado River storage project, entered into January 14, 1977, and entitled "Repayment Contract Between the United States of America and the Tri-County Water Conservancy District", the portion of the costs of such project, including interest on construction costs, allocated to municipal and industrial use which exceeds $38,000,000 shall not be reimbursable.

To provide adequate access to the McGee Creek recreation areas, Wildlife Management Area, and Natural Scenic Recreation Area for use and enjoyment by the general public of those facilities, the Secretary of the Interior is authorized to secure right-of-way, design and construct or otherwise improve two existing county access roads (1) westside road beginning at the existing county road extending from Oklahoma State Highway 3 near the community of Lane, Oklahoma, and extending adjacent to the McGee Creek Reservoir and termination at the existing county road extending from Oklahoma State Highway 43 in the vicinity of Stringtown, Oklahoma, a distance of some 19 miles; (2) eastside road beginning at State Highway 3 and 7 near Center Point, Oklahoma, and extending northward to the upper end of McGee Creek Reservoir, a distance of some 11 miles. The westside road will be constructed with a 24-foot berm and 20-foot paved surface and the eastside constructed with a 28-foot berm and 24-foot paved surface. Both roads will have a minimun 6-inch gravel base and be paved with all weather asphaltic surface. The cost for the facilities authorized by this Act shall be nonreimbursable.

The Secretary of the Interior is authorized, when he deems it appropriate, to defer over the remaining term of any repayment contract or for a period of five years, whichever is less, the 1983 water service and repayment contract obligations for capital and operation and maintenance costs associated with federally constructed or federally assisted projects to reflect the percentage of acreage removed from cultivation pursuant to the "Special program for Corn, Grain, Sorghum, Upland Cotton, and Rice" under title 7 of the Code of Federal Regulation part 770, and any regulations supplementary thereto or amendatory thereof. Such deferment of payments shall not be deemed a "supplemental or additional benefit" within the meaning of section 203(a)(2) of the Reclamation Reform Act of 1982.

The Secretary of the Interior is hereby authorized to engage in feasibility studies of the following proposals:

(1) Pilot Butte powerplant, Riverton unit, located in Fremont County, Wyoming;

(2) Siletz River Basin project, located in Lincoln and Polk Counties, Oregon;

(3) Water conservation and efficient use program, All-American Canal relocation project, located in Imperial County, California; and

(4) Gibson Dam powerplant, located on the Sun River in Lewis and Clark Counties, Montana.

The Secretary of the Interior shall, under the general investigations authority, engage in a joint, State-led study with the State of Nebraska, which will consult with its appropriate subdivisions, of cost-effective alternatives to the Norden Dam, O'Neill unit of the Pick-Sloan Missouri River Basin program, Nebraska; and shall use available funds to initiate such study. The study period shall not exceed 18 months, starting with enactment of this Act. No funds shall be expended for any construction activity for the Norden Dam, O'Neill unit prior to the completion of this study.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement:

Senate amendment No. 65 reads as follows:

Senate Amendment No. 65: Page 22, after line 19, insert:

INTERNATIONAL MONETARY FUND

INCREASE IN UNITED STATES QUOTA

For an increase in the United States quota in the International Monetary Fund, the dollar equivalent of 5,310,800,000 Special Drawings Rights, to remain available until expended: *Provided*, That such funds may be made available for obligation only upon enactment of authorizing legislation.

GENERAL ARRANGEMENTS TO BORROW

For an increase in loans to the International Monetary Fund under the General Arrangements to Borrow, the dollar equivalent of 4,250,000,000 Special Drawing Rights less $2,000,000,000 previously appropriated by the Act of October 23, 1962 (Public Law 87-872, 76 Stat. 1163), pursuant to the authorization contained in section 17 of the Bretton Woods Agreements Act and merged with this appropriation, to remain available until expended: *Provided*, That such funds may be made available for obligation only upon enactment of authorizing legislation: *Provided further*, That official United States Government debt reschedulings of debtor countries shall be submitted to the Appropriations Committees of both Houses of Congress.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House insist on its disagreement to the amendment of the Senate numbered 65.

PREFERENTIAL MOTION OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. CONTE moves that the House recede from its disagreement to the amendment of the Senate numbered 65 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert:

INTERNATIONAL MONETARY FUND

INCREASE IN UNITED STATES QUOTA

For an increase in the United States quota in the International Monetary Fund, the dollar equivalent of $5,310,800,000 Special Drawings Rights, to remain available until expended: *Provided*, That such funds may be made available for obligation only upon enactment of authorizing legislation.

GENERAL ARRANGEMENTS TO BORROW

For an increase in loans to the International Monetary Fund under the General Arrangements to Borrow, the dollar equivalent of $4,212,000,000 Special Drawing Rights less $2,000,000,000 previously appropriated by the Act of October 23, 1962 (Public Law 87-872, 76 Stat. 1163), pursuant to the authorization contained in section 17 of the Bretton Woods Agreements Act and merged with this appropriation, to remain available until expended: *Provided*, That such funds may be made available for obligation only upon enactment of authorizing legislation: *Provided further*, That official United States Government debt reschedulings of debtor countries shall be submitted to the Appropriations Committees of both Houses of Congress.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the preferential motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) will be recognized for 30 minutes, and the gentleman from Massachusetts (Mr. CONTE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, on the House side may I say that I shall not discuss the merits involved, for regardless of the merits or demerits, I oppose bringing up the IMF at this time as a matter of procedure.

I had earlier, and I say so frankly, assured the Secretary of the Treasury that I would see that in the event the

authorization had been approved in the House that he got a vote on receding and concurring in the Senate amendment which included money for the IMF.

However, I did not agree that I would make such a motion. So I am not surprised at the motion being made by my colleague, with whom I have worked so well through the years.

I do think that this major step is not one which should be made in a supplemental appropriation bill without authorization and without hearings before the Committee on Appropriations. For that reason, I have made my motion to further insist on the House position of not funding the International Monetary Fund in this bill.

Let it come up in the regular way. I hope you will support the position of the House.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, at the outset I want to thank the chairman for his cooperation, not only in this matter, but in all matters pertaining to this supplemental.

It was a very, very difficult supplemental. We reported it out way back in May, I believe.

Mr. WHITTEN. If the gentleman will yield, may I thank the gentleman for his comment and assure him that it is a pleasure to work with him. We have many problems. We cannot agree on everything, but we do realize we have got one country and we try our best to work together and succeed nearly all the time.

Mr. CONTE. Well, we are almost like Ivory Soap, 99$^{44}/_{100}$ percent of the time we are together.

Mr. Speaker, I strongly urge the House recede to the Senate on amendment 65, and concur therein with an amendment. The Senate amendment provides for an increase in the U.S. participation in the International Monetary Fund in the approximate amount of $8.5 billion, subject to the enactment of authorizing legislation. My amendment to the Senate amendment makes a technical reduction in the amount provided for the general arrangements to borrow.

It is important, perhaps of primary importance, that you remember this provision denies increased U.S. participation in the IMF unless Congress completes action on the authorization bill and the President signs it. All of the questions and reservations which have been raised about this increase should be dealt with in the normal, or at least, correct manner—that is in the authorization process. Only when that is done can these funds be used.

The Senate passed the IMF authorization bill on June 8 by a vote of 55 to 34. The House has been debating its version of the authorization this week. This supplemental appropriations bill is the best available vehicle for providing the actual funding of this increase, subject to whatever action is finally taken on the authorization.

Look at the schedule. Both the House and Senate are planning recesses for most of August and much of September. As usual, we do not know if or when we will ever get a regular fiscal 1984 foreign assistance bill enacted. The House subcommittee markup has been postponed twice already and no new markup date has been announced. Even when that bill is finally marked up and reported, its fate on the House and Senate floors will be questionable at best. In any event, it is clear to anyone who has been around here for awhile that the foreign aid bill will not be enacted by October 1.

So then you might argue that we can put the IMF funding in the continuing resolution. The only problem with that is the continuing resolution funds programs in fiscal 1984, and that funding is governed by the fiscal 1984 budget resolution. The 1984 budget resolution does not include room for the $8.5 billion IMF contribution; it is only included in the 1983 resolution. How do you write a continuing resolution which goes into effect at midnight September 30 to provide $8.5 billion in funding authority for the previous fiscal year? This funding must be provided in fiscal 1983, not fiscal 1984.

Let us not get bogged down in all kinds of monetary philosophies and development theories here while the last train pulls out of the station. Our own economic recovery is at stake.

For those on this side of the aisle, what does our Republican President say about this IMF increase? In a letter to Members of this body, President Reagan has stated:

The IMF is the centerpiece of the efforts to maintain a healthy and open trading system in the world. IMF resources are necessary to protect our own interests in a stable financial system, a growing world economy, and sustained economic recovery and higher employment levels.

"Sustained economic recovery and higher employment levels," that is what this IMF increase is all about. A letter from Secretary of State Shultz and Secretary of the Treasury Regan continues this theme:

Nearly 20 percent of total U.S. goods are exported. The jobs of millions of Americans, the health of our banking system, and the prospects for a sustained U.S. economic recovery all depend on the IMF's success in maintaining the stable financial framework essential for world trade to prosper. Failure of the United States to participate in the increase of IMF resources would thus have serious consequences for our own economic recovery and the preservation of American jobs.

One final quote: The President summed up the situation earlier this month when he stated:

No legislation now before the Congress is more important to a healthy world economy and to a continuing economic recovery here in the United Statess.

It is no secret that this particular President's political career is closely tied to continued economic recovery, as are possibly the career of many here in Congress who have supported his economic and fiscal policies. If you want to continue to support his policies on this side of the asile, vote for this motion.

And for my friends on the other side of the aisle, a vote for this motion is a vote for all those workers in your districts who are critical to your own political survival. As the only surviving Republican in the House from the State of Massachusetts, I would observe that out of 600,000 jobs in my State, more than 100,000 are export related. More than 10 percent of the total dollar value of Massachusetts products are exported and are therefore dependent on a healthy and growing world economy. The IMF is the key institution in the promotion of world economic health and growth which will lead to future exports of products from Massachusetts as well as all of your other States.

Recovery and jobs, recovery and jobs. That is what this vote is all about. For only 20 percent of the tab, we can get other members of the IMF to put up 80 percent of the resources needed to assist our own economic recovery. That is a deal we should not turn down. I urge you to support this motion.

Mr. JONES of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to address the Budget Act or budget resolution here.

The Senate IMF amendment, coupled with the other parts of the supplemental appropriations, would have violated the budget resolution which we passed just a few weeks ago.

However, the gentleman's amendment reduces the Senate IMF appropriation to the required amount so that if the gentleman's amendment passes, or preferential motion passes, there would be no Budget Act violation and the remaining legislation that we anticipate for fiscal year 1983 could be accommodated.

Obviously that would be the case if Chairman WHITTEN's position were prevailed upon also, but in either instance, there would be no Budget Act violation, thanks to the gentleman correcting this problem.

Mr. CONTE. In answer to the gentleman from Oklahoma, he is absolutely right. And I might say to the Members of this body, that just about

30 seconds before I took this floor, I was asked by an official of the administration not to do this.

□ 1440

I said I would not offer the amendment if that were the case. We are staying within the budget. We are $40 million in budget authority below the Senate figure, to make ample room to take care of the legislation that will be coming down the pipe next week.

Mr. WHITTEN. Mr. Speaker, I yield 5 minutes to the gentleman from Maryland (Mr. LONG).

Mr. LONG of Maryland. Mr. Speaker, I rise in strong support of the motion of the gentleman from Mississippi, Chairman WHITTEN, to insist on the House position and not to provide any funding at this time for the International Monetary Fund. The Conte motion should be defeated and the Whitten motion supported.

To appropriate funds for the IMF in this supplemental would be wrong, wrong, wrong. On an issue of such magnitude and complexity, it is essential that there be an authorization bill first. We have not even had the opportunity for hearings in our appropriations subcommittee. Before we consider providing $8.5 billion: What kind of conditions are attached to the IMF? What is being done to improve the banking system so that there will not be a repeat of the present international financial crisis?

For example, in the House-reported authorization bill, there are several significant provisions that will cause major changes in the way banks make loans to foreign countries. These provisions are not contained in the Senate bill. If these provisions were deleted in the conference process, I personally would not even want to consider providing funds for the IMF. It would be wrong to provide additional IMF funding without major improvements in the system by which U.S. banks make loans to foreign countries. We cannot determine if this has been done until there has been a completed authorization bill.

Additionally, there are a number of major documents that will be offered to the authorization bill in the House that could have a major impact on the IMF. The disposition of these amendments should be known before we consider funding.

My subcommittee, as I have said, has had no opportunity to hold hearings. To pass the $8.5 billion appropriation for the IMF at this time is to attach a very large animal to a very small tail.

I would say this to the House: When the chairman of the Appropriations Committee and the chairman and ranking minority member of the Appropriations Subcommittee responsible for the IMF all are united in their opposition to providing funds at this time, I believe it is a clear indication of the grave mistake that would be committed if the Conte motion were approved.

I urge its defeat.

Mr. LEWIS of California. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from California.

Mr. LEWIS of California. Mr. Speaker, I was not sure I heard the gentleman correctly. I do serve as a member of the gentleman's subcommittee, but I thought perhaps I had been absent sometime. Is the gentleman telling me that our subcommittee has never had even the opportunity to have a hearing on this major appropriation?

Mr. LONG of Maryland. Absolutely none.

Mr. LEWIS of California. Well, that is incredible. How can the Appropriations Committee do that to themselves?

Mr. LONG of Maryland. I could not agree with the gentleman more.

Mr. LEWIS of California. Mr. Speaker, I would like to associate myself with my chairman's remarks, and I agree with his position.

Mr. TRAXLER. Mr. Speaker, will the gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Michigan.

Mr. TRAXLER. Mr. Speaker, I want to join the distinguished gentleman in his statement. I wish to speak and address myself to those Members of the House who serve on the authorizing committees and who come to the members of the Appropriations Committee and say, "Why is it that you always accept those Senate amendments which we have never had an opportunity to consider and discuss on the floor of this House? You fellows on the Appropriations Committee are nasty for doing that."

Now, the chairman of the full Appropriations Committee has brought this matter back in disagreement. His recommendation is that you not accept it. The chairman of the subcommittee has recommended that you not accept it. We implore you fellows on the authorizing committee, please be consistent, please stand with the Appropriations Committee, please do not appropriate $8.5 billion before you have one line of authorization, even though they are trying to sneak it through on the basis that you do not spend it unless we get an authorization.

Mr. McKINNEY. Mr. Speaker, will the gentlman yield?

Mr LONG of Maryland. I yield to the gentleman from Connecticut.

Mr. McKINNEY. Mr. Speaker, I would just like to ask the gentleman who has just spoken: As ranking member of the Housing Authorization Committee, how much concern was paid to the attention that you came in and appropriated money for housing and never even consulted with us who were authorizing one of the most complicated Federal programs in the United States of America?

Mr. TRAXLER. Mr. Speaker, will the distinguished gentleman yield?

Mr. LONG of Maryland. I yield to the gentleman from Michigan.

Mr. TRAXLER. As a member of the subcommittee which handles that matter, let me say to the gentleman that we are anxious for you to put a housing bill on this floor. And what year was it you last did that?

Mr. McKINNEY. We have one, I will say to the gentleman, and we voted for it, and it passed. But you bothered to go ahead of us without consulting with my chairman, who is standing, and I will now let the gentleman from Rhode Island (Mr. ST GERMAIN) take over.

Mr. TRAXLER. Mr. Speaker, if the gentleman will further yield, the point is that that is the first housing bill we have had in some time. In the absence of the appropriation, you would have not have had any money for housing.

I thank the gentleman for yielding.

Mr. LONG of Maryland. Mr. Speaker, let me say that if we were to pass this thing, we would be in a very weak position, and I think the authorizing committee would be in a very weak position when they come to us in the future and say, "Please do not pass an appropriation because there is no authorization."

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr. MORRISON).

Mr. MORRISON of Connecticut. I thank the gentleman for yielding.

Mr. Speaker, I am sorry that I have to disagree with my friend and chairman, the gentleman from Rhode Island, and my friend, the gentleman from Connecticut. Two wrongs do not make a right. It is true that the fiscal year 1984 housing appropriations bill was taken up and approved by this body and the Congress before the housing authorization bill was even considered by the House. However, that does not justify moving an appropriation for IMF before the IMF authorization is passed.

I think the IMF is very important. I am a supporter of efforts to authorize and appropriate increased funds for the IMF, especially given the amendment we adopted today to greatly strengthen controls on lending practices. But I think we ought to follow the proper procedure and pass the IMF authorization bill in the House, and it ought to be passed by the Senate before we move ahead to appropriate funds.

Mr. CONTE. Mr. Speaker, I have some further requests for time, but let me say this, in regard to the gentleman from Michigan (Mr. TRAXLER). The gentleman from Connecticut (Mr. McKINNEY) was absolutely right. The

housing bill came out of the committee of the gentleman from Michigan (Mr. TRAXLER), and he was up here speaking for it. There was no authorization bill.

Just a few minutes ago the gentleman voted for PIK. There is no authorization bill.

It all depends on whose pocket is being PIKed, let us be fair about it.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to my good friend, the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Speaker, when this bill came to the floor, the rule contained 20 separate waivers for rules for legislating on an appropriations bill.

When in heaven's name did we suddenly get legitimate around here? The committee has lined off waivers. No one even worried about unauthorized spending here.

I urge support for the Conte motion. Our votes this noon indicated preliminary support for the IMF funding. We should endorse it now.

Mr. CONTE. Mr. Speaker, I yield 5 minutes to my good friend, the gentleman from New York (Mr. KEMP).

Mr. KEMP. I appreciate my colleague yielding.

Mr. Speaker, I am sorry that the debate is deteriorating into a struggle over turf between the authorizing and the appropriation process for there are substantial issues at stake. Despite the comments of my good friend from Minnesota, many Members of the minority as well as several in the majority had legitimate and thoughtful amendments to offer and ideas to contribute in this debate. These Members felt very much aggrieved this morning when, within 5 minutes of convening of the House, the majority moved to shut off debate with unanimous consent. I think it was a tragic mistake to shut off debate and preclude many thoughtful contributions to our deliberations. It would have been far easier, far more responsible, far more fitting in the tradition of this great House to have allowed the debate to have taken place, and I think we could have come to an orderly resolution and everybody could have had their say and made their contribution. I cannot understand why Members of the Republican Party would vote to limit those of us who deeply care about this administration, our President and the world economy.

Second—and I want to make the point again—on behalf of those who are opposed to the appropriation, we are not against the IMF, we are not against an orderly and open trading system, we are not opposed to exports. We simply believe that if you are for growth and against austerity as the gentleman from Louisiana pointed out this morning, you might very well have some opposition to an amendment to a bill which funds programs that literally impose upon other countries of the world no-growth policies for a number of years.

The one thing upon which we all agree—and I tried to mention this this morning and then lost my time because of the debate limitation—is that all of us for the first time in a long time in this body agree that what the world needs the most right now is an expansion of the world and U.S. economy.

□ 1450

That would do more to help Mexico and Brazil and Third World countries than any transfer of resources or any subsidized lending. The chairman of the committee, Dr. LONG, at least my subcommittee, has been working long and hard to promote policies of development and growth, and we take a back seat to no one. We supported the IDA compromise, we supported the Caribbean Basin Institative, we supported foreign assistance, and support all efforts to encourage economic development. We support policies that would lead toward economic growth in the belief that social and political progress toward democracy, justice, and freedom is inextricably, linked to hope, opportunity, and prosperity.

I just wanted to slow the debate down a little bit and simply say this to my colleagues: This IMF bill has not been authorized yet and I understand the movement and impatience on both sides of the issue, I understand why there is pressure to get it through, why they would like to make sure that this is resolved before 3 o'clock this afternoon.

But please, please, give the benefit of the doubt to those of us who have sincere doubts about the systemic problems in world trade climate and world monetary system. It is falling apart not because of the lack of money in the IMF but because there has been introduced into the world trade system a sence of anarchy that has not yet been dealt with, and that is the floating exchange rates and the breakdown in international monetary stability. Countries are using their currencies to gain short-term trade advantages against other countries in order to boost exports and it is causing poison throughout the world.

Those systemic problems have not yet been dealt with, and those of us who are opposed to the IMF are not opposed to an open trade system or liberalizing the world trade system. We are opposed to the idea that we should impose upon Third World countries austerity and zero sum solutions that will only lead to further problems in the future.

Mr. DICKS. Mr. Speaker, will the gentleman yield?

Mr. KEMP. I am glad to yield to my friend, the gentleman from Washington.

Mr. DICKS. I thank the gentleman for yielding.

Mr. Speaker, the gentleman from New York, as usual, has made a very intelligent statement on a very difficult subject, but let me ask him, as the ranking member of this subcommittee: As I understand this amendment, it is contingent upon an authorization bill being enacted, so what we are doing here is appropriating the money, but we are saying it cannot be spent until there is an authorization bill enacted.

That, I think, gives us the safeguard that we need. It seems to me that we are wasting a lot of time when we should be moving ahead and getting this done, and then we go back to the authorization bill. Am I right on this subject?

Mr. LONG of Maryland. Mr. Speaker, will the gentleman yield?

Mr. KEMP. I yield to the chairman of the subcommittee, the gentleman from Maryland.

Mr. LONG of Maryland. I thank the gentleman for yielding.

The gentleman well knows that the key is not whether we get an authorization, but what kind of an authorization we get. There are a tremendous number of factors here.

Mr. DICKS. That is something the House will decide.

Mr. LONG of Maryland. Exactly, but if you only consider an authorization, they can come in with an authorization which would be totally the wrong kind. We have a right to pass on this in Appropriations.

Mr. KEMP. I only have a couple seconds left, because the gentleman from Massachusetts was gracious in giving me the 5 minutes I could not get this morning.

Mr. Speaker, I just want to say that I understand the forces at work. I hope the House will join some of us, the gentleman from Louisiana and others, in moving toward true reform, stabilizing exchange rates and pushing through an international monetary system such as we had under Bretton Woods, to encourage world growth. I know the President believes in these goals and I think he should be further encouraged by the Congress.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Rhode Island (Mr. ST GERMAIN).

Mr. ST GERMAIN. I thank the distinguished chairman for yielding this time to me.

Mr. Speaker, I must say that I, too, was amused, and I am sorry the gentleman from Michigan (Mr. TRAXLER) has absented himself, but for him to get up and give the remarks he gave as a member of the HUD subcommittee that handles housing as well—there he is—is absolutely unbelievable. You

rolled us so badly that it was not funny.

In this instance, as of 1 o'clock or 1:15 today, we have disposed of the major amendments to the IMF legislation. I had written the chairman of the Committee on Appropriations, as well as the subcommittee, asking that we hold off any action on IMF appropriations. However, in view of the actions of the House, we have a number of amendments pending, it is true, but those are for the most part very minor amendments. The major amendments to that legislation have been disposed of.

The substitute was adopted by an overwhelming vote and we are indeed on the right track. It is important legislation. We want to conclude it, but we cannot conclude it. Even if the authorizing committee were to conclude it, we still have to have the appropriation.

One further thought. You are going to have two more shots at this legislation, final passage by the authorizing committee, hopefully next week, then once the conference has concluded its actions, we will have to come back to you from the conference committee with the legislation.

We have had hearings like have never been held before on IMF. We do not want to delay it any longer. I plead with those on the minority side to understand that we have worked very closely with the administration on this, and you should be supporting the administration.

To those on the majority side, as chairman of an authorizing committee, I do not like to ask that the procedures be rolled over, but in this instance, at least we are 90 percent complete with the authorizing legislation.

The SPEAKER pro tempore. The time of the gentleman from Rhode Island (Mr. ST GERMAIN) has expired.

Mr. CONTE. I yield 2 additional minutes to the gentleman from Rhode Island.

Mr. ST GERMAIN. I want to say this: Contrary to what happened to the authorizing committee on the housing legislation, which incidently passed this House, in this instance we are asking for cooperation from the Committee on Appropriations in accepting this particular amendment so we can conclude the authorizing next week and go forward.

Mr. DICKS. Mr. Speaker, will the gentleman yield just briefly?

Mr. ST GERMAIN. I yield to the gentleman from Washington.

Mr. DICKS. I thank the gentleman for yielding.

The gentleman's understanding is that none of this money can be spent until your authorization bill is passed.

Mr. ST GERMAIN. That is correct. That is why I say you have two more shots at it, final passage here and the return of the conference report.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Massachusetts.

Mr. CONTE. I thank the gentleman for yielding.

Mr. Speaker, I want to first of all commend the gentleman from Rhode Island. He has had a very, very difficult task with this particular bill and he has handled it well. He has steered it through here.

As the gentleman said, some of the major issues were passed here today on rollcall votes. The gentleman from Maryland keeps on saying, "Yes, but there may be other amendments." If other amendments come along, they will govern if they become law. This will not be an infringement on any then that become law.

Second, let me say this: This bill was acted upon in the House on May 25. We came out of the conference, I think it was, July 20. We have been waiting here, the chairman and I have been waiting every day to have the IMF bill passed. It is not our fault. We have been very patient. We have been very, very deliberative on this issue here. We have never wanted to infringe upon your committee. Now we have total agreement between the chairman of the Committee on Banking and Currency, the chairman and the ranking Republican on the Committee on Appropriations, and some outsiders are coming in here and saying that we should not do this.

Mr. ST GERMAIN. If I may reclaim my time for half a second—I want to vote, too. I wanted to vote on IMF's final passage last week. We did not get around to it.

I want to thank the chairman of the Committee on Appropriations, as well as the members of the Committee on Appropriations, and the subcommittee chairman and ranking minority on that subcommittee for their patience. Yes, indeed. You waited around. You held it off. We have for the most part completed the legislation, and for that we are grateful.

Now I say, let us go forward.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from North Carolina (Mr. NEAL).

Mr. NEAL. I thank the gentleman for yielding this time to me.

Mr. Speaker, let me just make one other point, if I may. That is that because we brought up the authorizing legislation today, the eyes of the world are upon us.

It was not our choice that this amendment be in disagreement. It would have been better, possibly, if we had not had to vote on this, but I would just like to say now that a vote is required; that is very important in this context of the IMF and for our own future in the world economy to follow the advice of this motion and approve funding for this bill.

□ 1500

Mr. ROEMER. Mr. Speaker, will the gentleman yield for one question?

Mr. NEAL. I yield for one question.

Mr. ROEMER. Mr. Speaker, we were told this morning in discussing the IMF bill that the compromise that the chairman of our committee worked so hard on and so well on lowered the amount of the authorization from $8.4 billion to I think $5.8 billion, taking the GAB $2.6 billion out of the bill; but yet this appropriation has $8.4 billion in it.

Mr. NEAL. Yes.

Mr. ROEMER. While the bill we amended this morning now only has $5.8 billion. Not only do we have appropriations before authorizations, we have numbers that do not even match.

Mr. NEAL. Let me respond to the gentleman.

Mr. ROEMER. Please.

Mr. NEAL. The authorizing legislation prevails. This motion says that these funds are available for obligation only upon enactment of authorizing legislation. The authorizing legislation lays down very clearly the conditions under which this money can be used, so the gentleman can rest assured that the authorizing legislation controls.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland (Mr. LONG).

Mr. LONG of Maryland. Mr. Speaker, let me point out, to pass this motion at this time would make a mockery not only of the authorization process, but of the appropriation process.

We have had no authorization. We have had no hearings. We are asked to add an appropriation 17 times the size of the existing foreign operations chapter of the supplemental, $8½ billion to be added to the half a billion already in this chapter. I think if we do this, we will go down as one of the most irresponsible bodies this world has ever seen.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. BURTON).

Mr. BURTON of Indiana. Mr. Chairman, I think it is inappropriate to pass an appropriation bill before you pass the authorization bill, because some of us might change our minds when we hear the rest of the amendments.

You know, I have heard that the major amendments to the authorization bill have been decided.

Well, some of us think our amendments are major. The gentleman from Indiana (Mr. JACOBS) has an amendment that I think is very important on the other side of the aisle.

His amendment points out that 20 percent of the employees of the IMF are making more than $100,000 a year, and with fringe benefits some of them are making about $154,000 a year.

They are getting 5-percent mortgage loans for homes in Washington, D.C.—5 percent. Can you believe that, when other Americans must pay 12 percent, 13 percent, 14 percent, and more.

Mr. JACOBS' amendment affects that problem. I submit that amendment might change some people's minds toward the IMF.

I have an amendment which would help American businessmen. Right now, Communist and Third World countries are getting loans at interest rates 6 percent, 7 percent, and 8 percent below what small businessmen in this country can get. Why should Communist and Third World countries get that kind of break when American businessmen cannot. I think we ought to address those amendments before we go to an appropriations bill.

Mr. CONTE. Mr. speaker, I have requests for other speakers, but I think the time has come for a vote right here, and I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the preferential motion.

There was no objection.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from Massachusetts (Mr. CONTE).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. CONTE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 165, nays 213, not voting 55, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Addabbo for, with Mr. Nichols against.

Mr. Cooper for, with Mr. Erdreich against.

Mr. Hatcher for, with Mr. Dorgan against.

Mr. MacKay for, with Mr. Annunzio against.

Mr. Frost for, with Mr. Fuqua against.

Mr. Boehlert for, with Mr. Lott against.

Mr. Horton for, with Mr. Taylor against.

Mr. McDade for, with Mr. Dannemeyer against.

Mr. Garcia for, with Mr. Franklin against.

Mr. STOKES changed his vote from "yea" to "nay."

Messrs. FORSYTHE, JONES of North Carolina, McHUGH, GLICKMAN, GUARINI, and YATES changed their votes from "nay" to "yea."

So the preferential motion was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 66 reads as follows:

Senate amendment No. 66: Page 22, lines 22 and 23, strike out "for payment to the International Atomic Energy Agency, $4,500,000" and insert "$22,186,000, of which $4,500,000 is available only for payment to the International Atomic Energy Agency, $16,000,000 is available only for payment to the International Fund for Agricultural Development, and $1,686,000 is available only for payment to the Expanded Program on Immunization Revolving Fund of the Pan American Health Organization.".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 66 and concur therein with an amendment, as follows: In lieu of

the matter stricken and inserted by said amendment, insert the following: "$20,500,000, of which $4,500,000 is available only for payment to the International Atomic Energy Agency and $16,000,000 is available only for payment to the International Fund for Agricultural Development.".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 69 reads as follows:

Senate amendment No. 69: Page 23, after line 15, insert:

OVERSEAS PRIVATE INVESTMENT CORPORATION

The Overseas Private Investment Corporation is authorized to make such expenditures within the limits of funds available to it and in accordance with law (including not to exceed $30,000 for official reception and representation expenses), and to make such contracts and commitments without regard to fiscal year limitation, as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 9104), as may be necessary in carrying out the program set forth in the budget for fiscal year 1983.

During fiscal year 1983 and within the resources and authority available, gross obligations for the amount of direct loans for the Direct Investment Fund shall not exceed $15,000,000.

During the fiscal year 1983, total commitments to guarantee loans shall not exceed $120,000,000 of contingent liability for loan principal.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 69 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

OVERSEAS PRIVATE INVESTMENT CORPORATION

The Overseas Private Investment Corporation is authorized to make such expenditure within the limits of funds available to it and in accordance with law (including not to exceed $30,000 for official reception and representation expenses), and to make such contracts and commitments without regard to fiscal year limitations, as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 9104), as may be necessary in carrying out the program set forth in the budget for fiscal year 1983.

The managers on the part of the Senate will move to recede and concur in the amendment of the House to the amendment of the Senate.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 70 reads as follows:

Senate amendment No. 70: Page 23, strike out lines 16 to 24, inclusive.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 70 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert the following:

DEPARTMENT OF STATE

MIGRATION AND REFUGEE ASSISTANCE

For an additional amount for "International disaster assistance", $15,000,000, to remain available until September 30, 1984, which shall be derived by transfer from "Migration and Refugee Assistance": *Provided*, That this sum shall be available only for resettlement services and facilities for refugees and displaced persons in Africa.

For an additional amount for the "Economic Support Fund", $5,000,000, to remain available until September 30, 1984, which shall be derived by transfer from "Migration and Refugee Assistance": *Provided*, That this sum shall be available only for assistance to combat piracy in the Gulf of Thailand.

The managers on the part of the Senate will offer a motion to concur in the amendment of the House to the amendment of the Senate.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 74 reads as follows:

Senate amendment No. 74: Page 24, after line 22, insert:

Funds in this chapter may be made available for obligation only upon enactment of authorizing legislation. Funds in this chapter shall remain available until expended.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 74 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

Notwithstanding section 10 of Public Law 91-672 funds in this chapter may not be obligated until the enactment of authorizing legislation or until September 30, 1983, whichever comes first.

The managers on the part of the Senate will offer a motion to concur in the amendment of the House to the amendment of the Senate.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. For what purpose does the gentleman from Wisconsin (Mr. ZABLOCKI) rise?

Mr. ZABLOCKI. Mr. Speaker, is this 74, the amendment before the House, amendment 74?

The SPEAKER pro tempore. That amendment has just been agreed to. Is the gentleman seeking recognition on that?

Mr. ZABLOCKI. I am seeking recognition.

The SPEAKER pro tempore. Without objection the proceedings will be vacated.

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi is recognized for 30 minutes.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin.

Mr. ZABLOCKI. Mr. Speaker, I rise in support of the pending motion. I had intended to offer a preferential motion at this point in order to require that the supplemental funds for foreign assistance in this bill could not be obligated until an authorization is enacted.

However, in order to expedite passage of this important appropriation bill, the gentleman from Maryland, the subcommittee chairman, Mr. LONG, and Chairman WHITTEN have agreed to amend the motion so as to extend the deadline for authorization action from September 15 to September 30, 1983.

When the conferees agreed to the September 15 deadline on the authorization, it appeared that the authorization bill was not moving expeditiously

in the House because of the legislative veto provisions which were included in the bill prior to the recent Supreme Court decision. Since the conferees met, however, the situation has changed. The Foreign Affairs Committee has resolved the legislative veto problem in the bill and the Rules Committee will meet to grant a rule on the authorization next Tuesday, August 2, so that it can be moved expeditiously. The Senate has also placed its version on the authorization on its floor schedule.

It is my understanding that, in the event that the authorization bill is not enacted by September 30, 1983, the gentleman from Maryland would consider extending the September 30 deadline in the continuing resolution if the authorization is making progress toward enactment. Is that the intention of the gentleman from Maryland?

Mr. LONG of Maryland. Mr. Speaker, if the gentleman would yield, this amendment provides that funds in the bill shall be available for obligation only upon enactment of authorization or September 30, 1983, whichever comes first.

This is a change in the original amendment from September 15 to September 30. The change has been made in order to accommodate a request from the authorizing committee headed by the gentleman from Wisconsin (Mr. ZABLOCKI). It has been cleared with the minority and the Senate.

The effect of this change will be to allow the authorizing committee 2 additional weeks to pass its authorization.

I appreciate Chairman WHITTEN's assistance in this matter.

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the motion be amended as suggested by the gentleman from Wisconsin (Mr. ZABLOCKI).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 75 reads as follows:

Senate amendment No. 75: Page 25, line 18, after "17)" insert ": *Provided*, That notwithstanding the above the Department shall carry out the budget program in accordance with the following under this heading: (A) the budget program set forth in the first proviso under the heading Annual Contributions for Assisted Housing (Disapproval of Deferral) in Public Law 98-8 (97 Stat. 13, 16, 17) is hereby amended to provide for assistance under section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), for additional section 8 housing of up to six thousand units under loan management, up to seven thousand units under property disposition, and up to nine hundred new or substantial rehabilitation units to be made available to satisfy an existing consent decree, settlement agreement, and set-aside pursuant to court order, respectively, in litigation in which the Department of Housing and Urban Development is a party; for up to one hundred additional public housing units for conversions from assistance under section 23 of such Act as it existed immediately before enactment of Public Law 93-383 (88 Stat. 633); and for amendments, $24,500,000 of contract authority and $245,000,000 of budget authority for existing units; (B) that the Secretary of Housing and Urban Development is authorized to deviate from the values set forth in such budget program and to adjust such values, other than the totals of contract authority and budget authority set forth in Public Law 98-8 (97 Stat. 13, 17), as may be necessary to reflect the foregoing amendment; and (C) that notwithstanding the limitation on the use of recaptured budget authority in the third proviso under this heading in Public Law 97-377 (96 Stat. 1830, 1907), the Secretary of Housing and Urban Development shall have the authority to use such recaptured budget authority to the extent necessary to provide the additional section 8 units under loan management and the additional public housing units reflected by the foregoing amendment".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 75 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ": *Provided*, That in addition to the above, the budget program set forth in the first proviso under the heading Annual Contributions for Assisted Housing (Disapproval of Deferral) in Public Law 98-8 (97 Stat. 13, 16, 17) is hereby amended to provide for assistance under section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), for additional section 8 housing of up to six thousand units under loan management, up to seven thousand units under property disposition, and up to nine hundred new or substantial rehabilitation units to be made available to satisfy an existing consent decree, settlement agreement, and set-aside pursuant to court order, respectively, in litigation in which the Department of Housing and Urban Development is a party; for up to one hundred additional public housing units for conversions from assistance under section 23 of such Act as it existed immediately before enactment of Public Law 93-383 (88 Stat. 633); and for amendments, $24,500,000 of contract authority and $245,000,000 of budget authority for existing units: *Provided further*, That such budget program is hereby amended further to reduce the budget authority to be made available for interest rate adjustments by $340,000,000, section 23 conversions by $63,450,000, public housing amendments by $62,000,000, and amendments for section 8 new construction/substantial rehabilitation by $198,000,000, and the budget authority made available by the foregoing reductions shall be used for the purposes and up to the amounts set forth in the immediately preceding proviso: *Provided further*, That notwithstanding the limitation on the use of recaptured budget authority in the third proviso under this heading in Public Law 97-377 (96 Stat. 1830, 1907), any budget authority authorized by such section 5 which is recaptured in fiscal year 1983 and exceeds $2,400,000,000 shall also, with the amounts of budget authority which become available as a result of the reductions set forth in the preceding proviso, be made available to satisfy the budget authority requirements of the amendments to such budget program set forth in the first proviso hereof, and such recaptured amounts exceeding the amount of the budget authority necessary to satisfy the requirements of such first proviso shall then be used in accordance with the third proviso under this heading in Public Law 97-377 (96 Stat. 1830, 1907)".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 83 reads as follows:

Senate amendment No. 83: Page 29, line 16, strike out "$6,800,000" and insert "$11,128,400".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 83 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "$9,000,000, of which $2,000,000 shall be transferred to "Reaserch and development" to remain available until September 30, 1984 and shall only be used for establishing a center for hazardous waste management".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 84 reads as follows:

Senate amendment No. 84: Page 29, after line 22, insert:

CONSUMER INFORMATION CENTER

Notwithstanding any other provisions of law, there is hereby established in the Treasury of the United States a Consumer Information Center Fund, General Services Administration, for the purpose of disseminating Federal Government consumer information to the public and for other related purposes. There shall be deposited into the fund for fiscal year 1983 and subsequent fiscal years: (A) Annual appropriations from the general funds of the Treasury for Consumer Information Center activities; (B) User fees from the public; (C) Reimbursements from other Federal agencies for costs of distributing their publications; and (D) Any other income incident to Consumer Information Center activities. Moneys deposited into the fund shall be available for expenditure for Consumer Information Center activities in such aggregate amounts as are specified in annual appropriations Acts. Any unobligated balances at the end of a fiscal year shall remain in the fund and shall be available for authorization in appropriation Acts for subsequent fiscal years. This fund shall assume all the liabilities, obligations, and commitments of the said Salaries and Expenses, Consumer Information Center account. The revenues and collections deposited into the fund shall be available for necessary expenses of Consumer Information Center activities in the aggregate amount of $6,797,000 during fiscal year 1983: *Provided*, That revenues and collections accruing to this fund during fiscal year 1983 in excess of $6,797,000 shall remain in the fund and shall not be available for expenditure except as authorized in appropriation Acts.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 84 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

CONSUMER INFORMATION CENTER FUND

Notwithstanding any other provision of law, there is hereby established in the Treasury of the United States a Consumer Information Center Fund, General Services Administration, for the purpose of disseminating Federal Government consumer information to the public and for other related purposes. There shall be deposited into the fund for fiscal year 1983 and subsequent fiscal years: (A) Appropriations from the general funds of the Treasury for Consumer Information Center activities; (B) User fees from the public; (C) Reimbursements from other Federal agencies for costs of distributing publications; and (D) Any other income incident to Consumer Information Center activities. Moneys deposited into the fund shall be available for expenditure for Consumer Information Center activities in such amounts as are specified in appropriation Acts. Any unobligated balances at the end of the fiscal year shall remain in the fund and shall be available for authorization in appropriation Acts for subsequent fiscal years. This fund shall assume all the liabilities, obligations, and commitments of the said Consumer Information Center account. The revenues and collections deposited into the fund shall be available for necessary expenses of Consumer Information Center activities in the amount of $5,415,000 during fiscal year 1983. Administrative expenses of the Consumer Information Center in fiscal year 1983 shall not exceed $1,382,000. For the purposes of the fund, administrative expenses shall be defined as those expenses previously paid from appropriations to the Consumer Information Center. Revenues and collections accruing to this fund during fiscal year 1983 in excess of $6,797,000 shall remain in the fund and shall not be available for expenditure except as authorized in appropriation Acts. The Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1984 (Public Law 98-45), is hereby amended by deleting "other than administrative expenses" from the first proviso under the heading "General Services Administration, Consumer Information Center".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 85 reads as follows:

Senate amendment No. 85: Page 30, after line 7, insert:

GENERAL PROVISIONS

SECTION 1. (a) Subject to valid existing rights, administration of the following described lands is hereby transferred to the Veterans Administration for use as an addition to the Sitka National Cemetery: That tract of unimproved land lying easterly of existing structures which is a portion of the lands described in Public Land Order numbered 1707 of August 6, 1958, provided that the actual description of the lands to be administered by the Veterans Administration shall be determined by a survey made and approved by the Secretary of the Interior, after consultation with the Secretary of Agriculture. The actual description shall be published in the Federal Register by the Secretary of the Interior as a Public Land Order.

(b) The lands described in subsection (a) of this section are a portion of the lands reserved by Executive Order numbered 8854 of August 16, 1941, for use of the United States Coast and Geodetic Survey as a magnetic and seismological observatory site. Subsequently, a portion of the lands described in Executive Order numbered 8854 was transferred by Public Land Order numbered 1707 of August 6, 1958, to the jurisdiction of the Forest Service, Department of Agriculture for use as an administrative site in connection with the administration of the Tongass National Forest. Lands described in subsection (a) of this section are hereby deleted from Executive Order numbered 8854 and Public Land numbered 1707.

SEC. 2. (a) Subject to valid existing rights and the provisions of subsections (c) and (d) of this section, administration of the following described public lands is hereby transferred to the Veterans Administration for use as an addition to the Sitka National Cemetery: That tract of land lying southerly of existing structures which is a portion of the lands described as tract numbered 2 of Presidential Proclamation 2965 of February 25, 1952, provided that the actual description of the lands to be administered by the Veterans Administration shall be determined by a survey made and approved by the Secretary of the Interior. The actual description shall be published in the Federal Register as a Public Land Order.

(b) The lands described in subsection (a) of this section are a portion of the lands described as tract numbered 2 which was reserved by Presidential Proclamation 2965 on February 25, 1952, as an administrative site for the Sitka National Monument. Lands described in subsection (a) of this section are hereby deleted from Presidential Proclamation 2965.

(c) A right-of-way for a road across the lands described in subsection (a) of this section to the residence located on the lands described in section 3 of this Act shall be provided and maintained by the Veterans Administration.

(d) In the event that the Administrator of the Veterans Administration determines that all or any part of the lands described in subsection (a) of this section are no longer needed for National Cemetery purposes, those lands no longer needed shall be returned to the jurisdiction of the Secretary of the Interior.

SEC. 3. Tract numbered 2 of Presidential Proclamation 2965 is hereby modified to include the following described lands: That tract of land containing the existing structures which is all the remaining portion of the lands described as tract numbered 2 of Presidential Proclamation 2965 of February 25, 1952, not transferred by subsection 2(a) of this Act, and lands lying northerly of the existing structures to the southerly boundary line of Public Land Order numbered 1707, provided that the actual description of these lands shall be determined by a survey made and approved by the Secretary of the Interior. The actual description shall be published in the Federal Register as a Public Land Order.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 85 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

GENERAL PROVISION

SEC. 1. (a) Subject to valid existing rights, administration of the following described lands is hereby transferred to the Veterans Administration for use as an addition to the Sitka National Cemetery: That tract of unimproved land lying easterly of existing structures which is a portion of the lands described in Public Land Order numbered 1707 of August 6, 1958, provided that the actual description of the lands to be administered by the Veterans Administration shall be determined by a survey made and approved by the Secretary of the Interior, after consultation with the Secretary of Agriculture. The actual description shall be published in the Federal Register by the Secretary of the Interior as a Public Land Order.

(b) The lands described in subsection (a) of this section are a portion of the lands by Executive Order numbered 8854 of August 16, 1941, for use of the United States Coast

and Geodetic Survey as a magnetic and seismological observatory site. Subsequently, a portion of the lands described in Executive Order numbered 8854 was transferred by Public Land Order numbered 1707 of August 6, 1958, to the jurisdiction of the Forest Service, Department of Agriculture for use as an administrative site in connection with the administration of the Tongass National Forest. Lands described in subsection (a) of this section are hereby deleted from Executive Order numbered 8854 and Public Land Order numbered 1707.

SEC. 2. (a) Subject to valid existing rights and subsection (c) of this section and provided that the National Park Service shall be permitted to continue to use the residence and other improvements on the lands described in this section for a period of not less than three years from the date of enactment of this Act in accordance with terms mutually agreed to by the Secretary of the Interior and the Administrator of the Veterans Administration, and provided further that the National Park Service shall pay no more for the use of the residence and other improvements than the money actually expended to maintain the same by the Veterans Administration, administration of the following described public lands is hereby transferred to the Veterans Administration for use as an addition to the Sitka National Cemetery: The lands described as tract numbered 2 of Presidential Proclamation 2965 of February 25, 1952, provided that the actual description of the lands to be administered by the Veterans Administration shall be determined by a survey made and approved by the Secretary of the Interior. The actual description shall be published in the Federal Register as a Public Land Order.

(b) The lands described in subsection (a) of this section were reserved by Presidential Proclamation 2965 on February 25, 1952, as an administrative site for the Sitka National Monument. Lands described in subsection (a) of this section are hereby deleted from Presidential Proclamation 2965.

(c) In the event that the Administrator of the Veterans Administration determines that all or any part of the lands described in subsection (a) of this section are no longer needed for National Cemetery purposes, those lands no longer needed shall be returned to the jurisdiction of the Secretary of the Interior.

SEC. 3. These provisions may be cited as the "Sitka National Cemetery Transfer Act of 1983".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 89 reads as follows:

Senate amendment No. 89: Page 30, after line 13, insert;

(4) A new section 6907 is added as follows:

"(a) Notwithstanding any other provision of this chapter, a State may enact legislation which requires that any payments which would be made to units of general local government pursuant to this chapter be reallocated and redistributed in whole or part to other smaller units of general purpose government that provide general governmental services and contain the entitlement lands within their boundaries.

"(b) Upon enactment of legislation by a State, described in subsection (a), the Secretary shall make one payment to such State equalling the aggregate amount of payments which he otherwise would have made to units of general local government within such State pursuant to this chapter. It shall be the responsibility of such State to make any further distribution of the payment pursuant to subsection (a).".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion. The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 89 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

(4) a new section 6907 is added as follows:

(a) Notwithstanding any other provision of this chapter, a State may enact legislation which requires that any payments which would be made to units of general local government pursuant to this chapter be reallocated and redistributed in whole or part to other smaller units of general purpose government which (1) are located within the boundaries of the larger unit of general local government, (2) provide general governmental services and (3) contain entitlement lands within their boundaries.

Such reallocation or redistribution shall generally reflect the level of services provided by, and the number of entitlement acres within, the smaller unit of general local government.

(b) Upon enactment of legislation by a State, described in subsection (a), the Secretary shall make one payment to such State equaling the aggregate amount of payments which he otherwise would have made to units of general local government within such State pursuant to this chapter. It shall be the responsibility of such State to make any further distribution of the payment pursuant to subsection (a).

Such redistribution shall be made within 30 days after receipt of such payment. No payment, or portion thereof, made by the Secretary shall be used by any State for the administration of this subsection or subsection (a).

(c) Appropriations made for payments in lieu of taxes for a fiscal year may be used to correct underpayments in the previous fiscal year to achieve equity among all qualified recipients.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) is recognized for 30 minutes.

Mr. WHITTEN. I yield to the gentleman from Kentucky (Mr. ROGERS).

Mr. ROGERS. Mr. Speaker, I wonder if I might enter a colloquy with the chairman in relation to that amendment proposed in order to clarify the intent of the amendment.

I wonder if the gentleman might help me understand it. This is the "payment in lieu of taxes" feature of the law presently, whereby the U.S. Government pays to local government moneys in lieu of taxes for federally owned lands in that territory, or that region, generally to counties or cities. This amendment, if I understand it correctly, would change that so that the moneys would instead be paid to the State government which in turn then if it so chose by legislation would then pay that money, itself, to those local communities below the county level, even, townships, municipalities, school districts, and the like.

Is that a correct understanding of it?

Mr. WHITTEN. Mr. Speaker, may I direct that question to my colleague from Illinois (Mr. YATES) to answer this question?

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman.

Mr. YATES. The gentleman is correct.

Mr. ROGERS. Let me ask this: Suppose a State legislature or State government does not so act, what happens then with the moneys that are now paid directly to the local units of government?

□ 1530

Mr. YATES. The present regulation would prevail and the money would be paid to the county. The present regulation provides for payment of the money to counties as the lowest governmental unit. And that would continue.

Mr. ROGERS. And if a State so chooses to enact legislation to change the procedure, the amendment says that the State shall receive no moneys for administation costs; is that the understanding correctly of this amendment?

Mr. YATES. The gentleman is correct.

Mr. ROGERS. The amendment provides that appropriations made for payment in lieu of taxes may be "used to correct underpayments in the previous fiscal year to achieve equity," among all qualified recipients.

Could the gentleman enlighten me about what is intended by that amendment?

Mr. YATES. The purpose of that amendment is to make correction for any errors that may have occurred in previous years. And there are errors that have occurred. This gives the legislative authority to the Bureau of Land Management to make appropriate corrections.

Mr. ROGERS. Am I correct in understanding the intent and spirit of this amendment would not permit either the Federal or State government to reallocate or redistribute moneys that are presently entitled by a county or a city to another county or city? Is that correct?

Mr. YATES. That is correct.

Mr. ROGERS. So that if a unit of local government is not receiving moneys under the present law, under its entitlement based on acreage of Federal lands within that county, the county in total would not receive less than it presently receives; is that correct.

Mr. YATES. That is correct. The county would not receive less and if the State passed a law that provided for payment to small governmental units than counties within the counties the amount that would be made available to all units within the counties would not be greater or less than the amount that would have been made available to the county.

Mr. ROGERS. I wonder if the gentleman might finally give us the benefit of the intent of this amendment in changing the present law.

Mr. YATES. The purpose of the amendment was to carry out the wishes of a number of States and the governmental units within those States to provide the opportunity for funds under this program to be paid to such governmental units as townships and cities and other governmental units that actually provided the local services. The present regulations provides for payment to the counties. This change would provide for a new system of payment.

Mr. ROGERS. So it is only an administrative change.

Mr. YATES. That is correct.

Mr. ROGERS. And there will be no change in the allocation of funds to a local area?

Mr. YATES. That is correct, unless the State by legislation provides for an appropriate change.

Mr. ROGERS. I thank the gentleman.

Mr. WHITTEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. EARLY).

Mr. EARLY. Mr. Speaker, I wish to engage the distinguished chairman of the Transportation Subcommittee and the ranking minority member in a brief colloquy on funding provided in this bill for section 152 of the Surface Transportation Assistance Act of 1982.

First, I would like to commend the conferees for the manner in which they represented the will of this House in the conference. As the Members of the House may know, the conferees added $1.75 million to carry out the provisions of section 152 of the Surface Transportation Assistance Act of 1982. Is my understanding correct that this appropriation is made to supplement available funds to enable the Department of Transportation to have the required section 152 study performed by a contractor team experienced both in low pressure, single stream methanol production from natural gas and in waterborne transportation of gas-derived energy products?

Mr. LEHMAN of Florida. Mr. Speaker, will the gentleman yield?

Mr. EARLY. I yield to the gentleman from Florida.

Mr. LEHMAN of Florida. The gentleman from Massachusetts is correct.

The House report on the supplemental appropriations bill contains such guidance to the Department of Transportation.

Mr. COUGHLIN. Mr. Speaker, will the gentleman yield?

Mr. EARLY. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. I thank the gentleman for yielding.

That language was in the House report. The gentleman is correct.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 90 reads as follows:

Senate amendment No. 93: Page 31, after line 5, insert:

Of the funds appropriated under this head in the Department of the Interior and Related Agencies Appropriation Act, 1983 (Public Law 97-394) and proposed for rescission as R83-16, $63,600,000 is hereby deferred and shall not become available for obligation until enactment of the Department of the Interior and Related Agencies Appropriation Act, 1984: Provided, That for payment of obligations incurred for engineering services, roadway and bridge access and pilot tunnel bore work for the Cumberland Gap Tunnel, as authorized by section 160 of Public Law 93-87, $14,000,000 to be derived from the Highway Trust Fund and to remain available until expended to liquidate contract authority provided under section 104(a)(8) of Public Law 95-599.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House insist on its disagreement to the amendment of the Senate numbered 93.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) is recognized for 30 minutes.

Mr. ROGERS. Mr. Speaker, will the gentleman yield?

Mr WHITTEN. I yield to the gentleman from Kentucky.

Mr. ROGERS. I thank the gentleman for yielding. I rise in disagreement to this disagreement because this deals with a tunnel project in my district.

I realize the severe financial and fiscal restraints which exist now in the country. I regret the chairman has not seen his way clear to support this project.

The reason the project is needed is to permit the improvement of a seriously hazardous road. Two hundred accidents and 19 fatalities in the past decade on this stretch of road which is over twice the national average. It is called now "Massacre Mountain."

It has great economic impact in that region, in a very depressed area of the country, which has 20-percent unemployment.

It has great tourism potential, if it should be completed.

For the record, it should be pointed out that funding for this project has been mandated by the Congress as one of four parkways and park highways listed as priority items in the Surface Transportation Act passed by Congress last year and the money will come from the Highway Trust Fund.

I hope to work with the chairman of the committee and the subcommittee over the coming months to urge him and his colleagues to support the Senate provision in the fiscal 1984 bill.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate Amendment No. 94 reads as follows:

Senate amendment No. 94: Page 31 line 12, strike our "$30,000,000" and insert "$64,000,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 94 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$68,200,000".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 102 reads as follows:

Senate amendment No. 102: Page 32, line 14, strike out "$15,800,000" and insert "$51,350,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 102 and concur therein with an amendment as follows: In lieu of the sum proposed by said amendment insert "$53,150,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 103 reads as follows:

Senate amendment No. 103: Page 32, line 14, after "$15,800,000" insert: "*Provided*, That $33,350,000 of such amount shall be available until expended for transfer to the State of Alaska to assist in the basic operation and maintenance of Bureau-owned schools which are transferred to the State, such sum to be in addition to assistance otherwise available under the Act of April 16, 1934 (48 Stat. 596), as amended (25 U.S.C. 452 et seq.), or any other Act to such schools on the same basis as other public schools: *Provided further*, That after June 30, 1984, the Bureau of Indian Affairs shall operate no more than ten day schools in Alaska: *Provided further*, That the Bureau of Indian Affairs shall not operate any day school in Alaska after June 30, 1985, *Provided further*, That notwithstanding the provisions of Public Law 97-394, the Bureau of Indian Affairs shall operate the Mount Edgecumbe boarding school in Alaska until June 30, 1983".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 103 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ": *Provided*, That $22,000,000 of such amount shall be available until expended for transfer to the State of Alaska on the condition that the State use the funds for the benefit of Alaska Native secondary students by either renovating the former Bureau of Indian Affairs Mount Edgecumbe Boarding School or constucting another non-Federal boarding school facility and the Bureau of Indian Affairs shall not expend any other funds for the operation of any secondary education program or facility in the State after June 30, 1983: *Provided further*, That while consultation concerning day school transfers to the State of Alaska will continue with affected villages, local concurrence is not required in this continuing effort to establish a single system of education envisioned by the State's constitution: *Provided further*, That after June 30, 1984, the Bureau of Indian Affairs shall fund no more than ten day schools in Alaska: *Provided further*, That the Bureau of Indian Affairs shall not fund any schools in Alaska after June 30, 1985: *Provided further*, That $9,350,000 of such amount shall be available until expended for transfer to the State of Alaska to assist in the rehabilitation or reconstruction of Bureau-owned schools which are transferred to the State: *Provided further*, That the $9,350,000 appropriated in Public Law 97-394 available to the State of Alaska to assist in the rehabilitation of Bureau-owned schools which are transferred to the State may also be used for reconstruction: *Provided further*, That when any Alaska day school operated by contract is transferred, the State shall assume any existing contract pertaining to the operation or maintenance of such school for a minimum of two years or until the expiration of the negotiated contract, whichever comes first: *Provided further*, That nothing in the foregoing shall preclude assistance otherwise available under the Act of April 16, 1934 (48 Stat. 596) as amended (25 U.S.C. 452 et seq.), or any other Act to such schools on the same basis as other public schools: *Provided further*, That the Secretary of the Interior shall prepare within one year after the date of this Act, an official survey by supplemental plat and convey to the State of Alaska all right, title, and interest of the United States, including all improvements situated thereon, in the following described lands:

That portion of Japonski Island (U.S. Survey No. 1496, within protracted sections 34 and 35, T. 55 S., R. 63 E., sections 2 and 3, T. 56 S., R. 63 E., Copper River Meridian, State of Alaska), withdrawn from the public domain of the United States by Public Law 79-478 and Public Law 83-568 for use of the Bureau of Indian Affairs and the Indian Health Service, except the smallest practicable tract, as determined by the Secretary of Interior, enclosing land actually used in connection with the administration of the Indian Health Service hospital on the date of this Act (this IHS-used land comprising no more than 15.25 acres, excluding roads). The southwesterly boundary of these lands is common with lands withdrawn for use of the United States Coast Guard by public land order and with lands held by the State of Alaska, Division of Aviation.

Such conveyance is conditioned upon the execution by the State of Alaska of an agreement to begin operating a Mt. Edgecumbe school facility no later than September 1, 1984. The above-described lands reserved for the use of the Indian Health Service shall also be conveyed to the State of Alaska if at any time the Indian Health Service or any successor organization or agency ceases to operate a health care facility on said lands.

Enactment of this statute has the full force and effect of an interim conveyance, as defined in the Alaska National Interest Lands Conservation Act, to the State of Alaska, subject to the above condition. The force and effect of such an interim conveyance is to convey to and vest in the State of Alaska exactly the same right, title, and interest in and to the lands as the State would have received had it been issued a patent by the United States. Upon survey of lands covered by the interim conveyance a patent thereto shall be issued to the State of Alaska. The lands conveyed by this statute are not subject to acreage adjustment under section 6 of the Alaska Statehood Act.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 105 reads as follows:

Senate amendment No. 105: Page 33, strike out lines 2 to 9, inclusive, and insert:

For deposit into the Papago Trust Fund established pursuant to Public Law 97-293 (96 Stat. 1283), $15,000,000, to remain available until expended.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 105 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

For payment to the authorized governing body of the Papago Tribe of Indians, $15,000,000 to remain available until expended, for deposit in the Papago Trust Fund established by said governing body pursuant to Public Law 97-293 (96 Stat. 1283) which fund shall be held in trust for the benefit of such tribe pursuant to section 309 of that law.

□ 1540

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. CONTE) is recognized for 30 minutes.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, today we are considering the conference report for H.R. 3069, the supplemental appropriation. Although I know supplementals are sometimes necessary, I dislike them, and believe that most of them are the result of intentional underfunding. After the House version passed on May 25, I was hoping the bill would somehow magically disappear, or be reduced in the other body, or in conference. Unfortunately, H.R. 3069 has returned.

In case anyone has forgotten, the supplemental passed the House with 41 of its 77 pages covered by waivers. I have not checked the Guiness book, but that must be close to a new record for the Rules Committee. Its two page rule granted 20 separate waivers of rules for legislating on appropriation bills. It called for five separate waivers against clause 6 of rule XXI, against reappropriations. Basically, it waived the entire Budget Act for the whole bill.

Section 311(a), prohibiting the consideration of any bill, resolution, or amendment providing additional new BA in excess of the ceiling set in the most recently adopted concurrent resolution of the budget was waived. Sec-

tion 402(a) prohibiting the consideration of authorizing legislation if that measure is not reported by May 15 of the calendar year preceding the fiscal year in which it is to be effective was also waived.

Budget waivers, especially against sections 311(a) and 402(a), are becoming more and more commonplace. We spend the first half of the year on the budget, and then throw it out. We may as well forget all the work we do in this House on budgets. The Budget Act provides a framework for budgetary discipline, yet we waiver that discipline out of our lines, merely because it is inconvenient.

When the supplemental first passed the House it contained $4.8 billion in new budget authority. In conference it picked up another $2.2 billion for a total increase of 46 percent. We sent excessive spending to conference, and we got even more spending back. I do not see how I can support such excesses.

There is no doubt that programs such as food stamps, education assistance for the handicapped, military assistance, and payments to the social security trust funds need to be provided. But the practice of depending on supplementals to provide these funds rather than including all the necessary funding in the initial appropriation bills is irresponsible and misleading to the public.

Congress needs to practice and improve its budgetary discipline. We do not follow our own rules whenever they get in our way. We fail over and over again to show fiscal restraint. There is a lack of willingness to make the difficult but essential decisions needed to keep control of the Federal purse.

This conference report should be defeated. It was too fat when it left the House the first time, now 46 percent fatter, it should be voted down.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 115 reads as follows:

Senate amendment No. 115: Page 34, after line 22, insert:

ADMINISTRATIVE PROVISIONS, DEPARTMENT OF ENERGY

Notwithstanding section 303(3) of Public Law 97-257, funds provided for Economic Regulatory Administration by this or any other Act shall be used: (1) to maintain not less than three hundred and eighty full-time permanent Federal employees, of which not less than forty employees shall be assigned to the Office of Fuels Conversion, for the fiscal year ending September 30, 1983; and (2) to maintain not less than three hundred and five full-time equivalent Federal employees, of which not less than twenty-seven employees shall be assigned to the Office of Fuels Conversion, for the fiscal year ending September 30, 1984.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 115 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

ADMINISTRATIVE PROVISIONS, DEPARTMENT OF ENERGY

Notwithstanding section 303(3) of Public Law 97-257, funds provided for Economic Regulatory Administration by this or any other Act shall be used: (1) to maintain not less than three hundred and eighty full-time permanent Federal employees, of which not less than forty employees shall be assigned to the Office of Fuels Conversion, for the fiscal year ending September 30, 1983; and (2) to maintain not less than three hundred and five full-time equivalent Federal employees, of which not less than twenty-seven employees shall be assigned to the Office of Fuels Conversion, for the fiscal year ending September 30, 1984: Provided further, That notwithstanding any other provision of law, the minimum employment level established in Public Law 97-257 for the Office of the Assistant Secretary for Fossil Energy is reduced to 715 with no further amendment to the suballocations therein.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 117 reads as follows:

Senate amendment No. 117: Page 35, strike out lines 7 to 11, inclusive.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 117 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert the following:

DEPARTMENT OF EDUCATION

INDIAN EDUCATION

For part C of the Indian Education Act and the General Education Provisions Act, an additional amount of $1,938,000, to remain available until expended.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 119 reads as follows:

Senate amendment No. 119: Page 35, strike out lines 17 to 21, inclusive.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 119 and concur therein with an amendment, as follows: In lieu of the matter stricken by said amendment, insert the following:

The Secretary shall appoint a Commission to review the Department's coal leasing procedures to ensure receipt of fair market value within 30 days after enactment of this Act, and said Commission shall make its recommendations within 6 months after enactment of this Act.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 121 reads as follows:

Senate amendment No. 121: Page 36, strike out lines 4 to 10, inclusive.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 121 and concur therein with an amendment as follows: In lieu of the matter stricken by said amendment, insert the following:

No funds provided in this or any other Act to agencies funded by the Interior and Related Agencies Appropriation Act, 1983 (Public Law 97-394) may be expended to take actions related to termination of programs or closure of facilities proposed to be terminated or closed in the budget for fiscal year 1984 until enactment of the Interior and Related Agencies Appropriation Act, 1984 or through approved reprogramming procedures.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent

that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 125 reads as follows:

Senate amendment No 125: Page 38, after line 9, insert:

The Senate finds that the Forest Service's proposal of March 15, 1983, to consider six million acres of the national forest for possible sale has met with considerable opposition; and the national forests are an important part of the national heritage of the United States; and the national forests provide and protect important resources; and the national forests provide unique opportunities for recreation; and it is inconsistent with past management practices to dispose of large portions of our national forests. It is, therefore, the sense of the Senate that it is not in the national interest to grant the authority to sell significant acreage of the national forest until such time as the Forest Service specifically identifies the tracts which are no longer needed by the Federal Government; inventories the tracts as to their public benefits values; provides opportunities for public review and discussion of the tracts; and completes all necessary environmental assessments of such sales.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 125 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

The Congress finds that the Forest Service's proposal of March 15, 1983, to consider six million acres of the national forest for possible sale has met with considerable opposition; and the national forests are an important part of the national heritage of the United States; and the national forests provide and protect important resources; and the national forests provide unique opportunities for recreation; and it is inconsistent with past management practices to dispose of large portions of our national forests. It is, therefore, the sense of the Congress that it is not in the national interest to grant the authority to sell significant acreage of the national forest until such time as the Forest Service specifically identifies the tracts which are no longer needed by the Federal Government; inventories the tracts as to their public benefit values; provides opportunities for public review and discussion of the tracts; and completes all necessary environmental assessments of such sales.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) is recognized for 30 minutes.

Mr. WHITLEY. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from North Carolina.

Mr. WHITLEY. Mr. Speaker, Mr. SEIBERLING, from the Committee on Interior and Insular Affairs, and I, as Representatives of committees having jurisdiction over matters involving the national forests, have a question concerning amendment 125.

That amendment expresses the sense of Congress that it is not in the national interest to grant authority to sell significant acreage of the national forests until the Forest Service takes various specified actions. Our question is whether it is the intent of the amendment that Congress is directing the Forest Service to take such actions.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. WHITLEY. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Speaker, I would respond to the gentleman that the amendment does not direct the Forest Service to take the administrative actions specified in the amendment. The thrust of the amendment is that Congress does not favor sale of national forest lands and would not consider authorizing any such sales unless and until the Forest Service identifies the tracts no longer needed, inventories the tracts for their public interest values, allows the public to review and discuss the tracts and completes necessary environmental assessments of the sales.

Mr. WHITLEY. I thank the gentleman.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 128 reads as follows:

Senate amendment No. 128: Page 39, line 10, "tute" " insert "for research into acquired immune deficiency syndrome".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 128 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "to remain available until September 30, 1984".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 129 reads as follows:

Senate amendment No. 129: Page 39, line 13, after "Institute" " insert "for research into acquired immune deficiency syndrome".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 129 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "to remain available until September 30, 1984".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 130 reads as follows:

Senate amendment No. 130: Page 39, line 17, after "Stroke" " insert "for research into acquired immune deficiency syndrome".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 130 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "to remain available until September 30, 1984".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by

the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 131 reads as follows:

Senate amendment No. 131: Page 39, line 22, after "Diseases" " insert "for research into acquired immune deficiency syndrome".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 131 and concur therein with an amendment as follows: In lieu of the matter proposed by said amendment, insert the following: "to remain available until September 30, 1984".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 132 reads as follows:

Senate amendment No. 132: Page 40, line 5, after "health" " insert "for research into acquired immune deficiency syndrome".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 132 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "to remain available until September 30, 1984".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 137 reads as follows:

Senate amendment No. 137: Page 40, after line 5, insert:

From the Rural Development Loan Fund under the Community Economic Development Act of 1981, $10,000,000 in available appropriations shall be obligated in the form of loans only by September 30, 1983, and $10,000,000 in available appropriations or the remaining balance of the fund, whichever is the lesser amount, shall be obligated in the form of loans only in each succeeding fiscal year. Loans shall be made to nonprofit organizations with previous experience in administering Rural Development Loan Fund loans and which had, by the end of fiscal year 1982, disbursed half or more of their available Rural Development Loan Funds.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 137 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following:

From the Rural Development Loan Fund under the Community Economic Development Act of 1981, $10,000,000 in available appropriations shall be obligated in the form of loans only by December 31, 1983.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 138 reads as follows:

Senate amendment No. 138: Page 40, after line 5, insert:

From the Community Development Credit Union Revolving Loan Fund, the entire remaining balance of the Fund as of September 30, 1983, shall be obligated on or before September 30, 1983. No such obligations shall be made in the form of loan guarantees.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 138 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

From the Community Development Credit Union Revolving Loan Fund, the entire remaining balance of the Fund as of September 30, 1983, shall be obligated on or before December 31, 1983. No such obligations shall be made in the form of loan guarantees.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 144 reads as follows:

Senate amendment No. 144; Page 40, after line 6, insert:

For an additional amount to the National Institute of Handicapped Research for the establishment and support of two research and training centers, $1,500,000, to remain available until expended, one-half of which shall be available for the establishment and support of a research and training center in pediatric rehabilitation at the University of Connecticut, Health Center in Farmington, Connecticut, pursuant to section 204(b)(1) of the Rehabilitation Act of 1973, and one-half of which shall be available for a research and training center on the rehabilitation needs of the Pacific Basin to be located at the University of Hawaii.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 144 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

For an additional amount to the National Institute of Handicapped Research for the establishment and support of two research and training centers, $1,500,000, to remain available until expended, one-half of which shall be available for the establishment and support of a research and training center in pediatric rehabilitation pursuant to section 204(b)(1) of the Rehabilitation Act of 1973, and one-half of which shall be available for a research and training center on the rehabilitation needs of the Pacific Basin.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 145 reads as follows:

Senate amendment No. 145: Page 40, after line 6, insert:

ELEMENTARY AND SECONDARY EDUCATION

For an additional amount for subpart 1 of part A of title I of the Elementary and Secondary Education Act of 1965, such sums as

may be necessary, but not to exceed $40,000,000 to be available for the payment of grants to local educational agencies located in a State in which the aggregate amount of grants determined for such agencies from amounts appropriated for fiscal year 1983 prior to the date of enactment of this Act is less than 95 percent of the amount of the grants for that State from amounts appropriated for fiscal year 1982 by reason of the application of the 1980 Census data in order to increase the amount for local educational agencies in each such State to the amount determined for that State for fiscal year 1982: *Provided*, That the amount of the increase in any grant which a local educational agency in any State shall be eligible to receive by reason of the application of this paragraph shall be determined on a pro rata basis.

It is the intention of the Congress that for each fiscal year ending prior to September 30, 1987, an additional amount will be appropriated, as necessary, for the payment of grants to local educational agencies in all States subject to the provisions of the previous paragraph in order to increase the amount for local educational agencies in each such State for each such fiscal year to the amount determined for that State for fiscal year 1982.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 145 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

ELEMENTARY AND SECONDARY EDUCATION

For an additional amount for subpart 1 of part A of title I of the Elementary and Secondary Education Act of 1965, such sums as may be necessary but not to exceed $40,000,000, to remain available until September 30, 1984, to be available for the payment of grants to local educational agencies located in a State in which the aggregate amount of grants determined for such agencies from amounts appropriated for fiscal year 1983 prior to the date of enactment of this Act is less than 95 percent of the amount of the grants for that State from amounts appropriated for fiscal year 1982 by reason of the application of the 1980 Census data in order to increase the amount for local educational agencies in each such State to the amount determined for that State for fiscal year 1982: *Provided*, That the amount of the increase in any grant which a local educational agency in any State shall be eligible to receive by reason of the application of this paragraph shall be determined on a pro rata basis.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 146 reads as follows:

Senate amendment No. 146: Page 40, after line 9, insert:

STUDENT FINANCIAL ASSISTANCE

For an additional amount for subpart 2 of part A of title IV of the Higher Education Act of 1965, relating to Supplemental Educational Opportunity Grants, $4,600,000: *Provided*, That, notwithstanding section 413D(b)(1)(B)(kk) of the Higher Education Act of 1965 and section 10 of the Student Financial Assistance Technical Amendments Act of 1982, funds appropriated under this heading and any funds appropriated for fiscal year 1983 for such subpart 2 that are not obligated or committed for the fiscal year 1983 shall be allocated in a manner designed to ensure that all eligible institutions receive a minimum funding level based upon a uniform State percentage for such fiscal year.

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 146 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

STUDENT FINANCIAL ASSISTANCE

Notwithstanding section 413 D(b)(1)(B)(ii) of the Higher Education Act of 1965 and section 10 of the Student Financial Assistance Technical Amendments Act of 1982, funds appropriated under this heading and any funds appropriated for fiscal year 1983 for subpart 2 of part A of title IV of the Higher Education Act of 1965 that are not obligated or committed for the fiscal year 1983 shall be allocated in a manner designed to ensure that all eligible institutions receive a minimum funding level based upon a uniform State percentage for such fiscal year.

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. CONTE. Mr. Speaker, I am concerned with the amendment offered by the gentleman from Illinois. What he addresses is indeed a serious problem. A district court judge has prohibited expenditure of discretionary funds in elementary and secondary education as a result of a finding that the Department has not complied with a 1980 consent decree in which the Government agreed to provide assistance to desegregation efforts in the city of Chicago. That freeze on expenditures is causing problems throughout the country for programs like title IV, "Civil Rights Training," where funds have been held up.

But what we are getting into here is a district court case, which has not yet had the appeal process completed, and on which the Department of Education has not yet communicated its position to Congress. More disturbing, the district court judge is said to be considering figures on the order of $250 million, not just $20 million as a final settlement. I would not want, by this action here, to have it said that Congress has taken a position, one way or another, on this case. I want the distinguished chairman of the Interior Committee to know that I will accept his amendment to relieve the situation created by the impoundment of funds but I do so on one condition. The Department of Education should release these funds only upon receiving assurance that the judicially imposed impoundment of discretionary funds for elementary and secondary education will be lifted. Otherwise, the States and cities affected by the judge's order will get no relief from this amendment, and it is my intention, in accepting this amendment, that they do get that relief concomitant with the relief provided to the Chicago school system.

I would also say to the gentleman that if this situation requires any further resolution, the way it should be resolved is through the reauthorization of the Emergency School Assistance Act. As the Members will recall, this reauthorization has passed the House, on suspension, and is pending in the Senate. Any further action on this situation in the Appropriations Committee should depend upon that reauthorization. There are many other cities whose desegregation plans have been thrown into disarray, and it is not fair that one city should receive special treatment, at least prior to a final disposition of this case.

Mr. YATES. Mr. Speaker, approving this amendment will be possible to begin carrying out the agreement between the board of education and the Federal Government in accordance with the order of the Court in the case of the *United States of America* v. *Board of Education for the City of Chicago*, No. 80 C 5124 (N.D. Ill.). The amendment provides funds to carryout that agreement. It is hoped and expected it will also free up funds for distribution from U.S. Department of Education sources, including the Secretary of Education's discretionary fund and the Department's special programs and populations fund, amounts which have not been obligated because of restrictions imposed on the Department by the Court.

This action will allow funds restricted by the Court to be distributed to school systems which would have received certain grants had the Court not acted. For example, Congressman BRUCE MORRISON of Connecticut has informed me that earlier this year, the U.S. Department of Education informally notified the New Haven, Conn.,

School Department that it would receive, for the 1983-84 school year, a Follow Through grant in the same amount—$173,713—as the previous year. Formal notification was to follow in June. However, because of the Court's actions, the Follow Through grant for New Haven has been cut to $21,714. Follow Through grants for 76 other school systems are similarly affected.

In addition, I am informed that certain State block grant program funds authorized under chapter 2 of the Education Consolidation and Improvement Act also are affected by the Court's decision. It is our intention that this amendment will persuade the Court to make available funds for use in local communities.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. YATES).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 148 reads as follows:

Senate amendment No. 148: Page 40, after line 18, insert:

FACILITIES DEVELOPMENT

HEALTH RESOURCES AND SERVICES ADMINISTRATION

HEALTH RESOURCES AND SERVICES

For an additional amount for "Health resources and services" for the remodeling and expansion of an existing academic health center library in the Pacific Northwest under section 720(A)(1) of the Public Health Service Act, $14,500,000, to remain available until expended; and notwithstanding any other provision of this or any other Act, such amount shall be made available without regard to the provisions of sections 702(b) and 722(a)(1) of the Public Health Service Act.

NATIONAL INSTITUTES OF HEALTH

NATIONAL LIBRARY OF MEDICINE

For an additional amount to carry out section 301 and parts I and J of title III of the Public Health Service Act with respect to conducting research, development, and demonstration projects at an existing academic health center in the Pacific Northwest $5,900,000 to remain available until expended.

GRANTS FOR CONSTRUCTION OF ACADEMIC FACILITIES

For part B of title VII of the Higher Education Act of 1965, $22,500,000, to remain available until expended, shall be available for two grants in New England except that the provisions of section 721(a)(2) and (b) shall not apply to the funds appropriated under this heading, and the amount of the grants paid from funds appropriated under this heading shall not be subject to any matching requirement contained in section 721(c) of such part and shall be used for two facilities of the type mentioned in section 713(g):

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 148 and concur therein with an amendment, as follows:

FACILITIES DEVELOPMENT

HEALTH RESOURCES AND SERVICES ADMINISTRATION

HEALTH RESOURCES AND SERVICES

For an additional amount for "Health resources and services" for the remodeling and expansion of an existing academic health center library under section 720(a)(1) of the Public Health Service Act, $14,500,000, to remain available until expended; and notwithstanding any other provision of this or any other Act, such amount shall be made available without regard to the provisions of sections 702(b) and 722(a)(1) of the Public Health Service Act.

NATIONAL INSTITUTES OF HEALTH

NATIONAL LIBRARY OF MEDICINE

For an additional amount to carry out section 301 and parts I and J of title III of the Public Health Service Act with respect to conducting research, development, and demonstration projects at an existing academic health center, $5,900,000 to remain available until expended.

GRANTS FOR CONSTRUCTION OF ACADEMIC FACILITIES

For part B of title VII of the Higher Education Act of 1965, $22,500,000, to remain available until expended.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 151 reads as follows:

Senate amendment No. 151: Page 41, after line 20, insert:

SENATE OFFICE BUILDINGS

For an additional amount for "Senate office buildings", $250,000, to remain available until expended.

An additional amount not to exceed $210,000 of the unobligated balance of the appropriation for Senate Office Buildings for the fiscal year 1983 shall remain available until expended.

MOTION BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 151, and concur therein.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

□ 1550

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 152 reads as follows:

Senate amendment No. 152: Page 42, strike out lines 1 to 6, inclusive, and insert:

Notwithstanding any other provision of law, to enable the Architect of the Capitol, under the direction of the Commission on the West Central Front of the United States Capitol, to restore the West Central Front of the United States Capitol (without change of location or change of the present architectural appearance thereof) in substantial accordance with the "Restoration of the West Central Facade" report dated March 1978, $48,000,000, to remain available until expended: *Provided*, That the architect of the Capitol, under the direction of such Commission and without regard to the provisions of section 3709 of the revised Statutes, as amended, is authorized and directed to enter into such contracts, incur such obligations, and make such expenditures for personal and other services and other expenses as may be necessary to carry out this paragraph: *Provided further*, That any general construction contracts entered into under authority of this paragraph shall be for a firm fixed price, supported by standard performance and payment bonds, and shall be awarded competitively among selected responsible general contractors approved by such Commission and upon the approval by such Commission of the amount of the firm fixed price contracts: *Provided further*, That, the Commission on the West Central Front of the United States Capitol shall appoint, from among private individuals who are qualified, by reason of education, training, and experience, a consulting architect who shall assist the Commission in directing the architect of the Capitol with respect to the restoration of the West Central Front of the United States Capitol: *Provided further*, That the Architect of the Capitol shall keep the consulting architect appointed under this paragraph fully and currently informed of the progress of the restoration of the West Central Front of the United States Capitol: *Provided further*, That the consulting architect for the restoration of the West Central Front of the United States Capitol appointed under this paragraph shall be paid for his services (out of the sum appropriated by this paragraph) at such rate of pay as the Commission considers appropriate, but not exceeding a rate equal to the daily equivalent of the rate of basic pay payable for grade GS-18 under the General Schedule under section 5332 of title 5, United States Code.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 152 and concur therein with an amendment, as follows: In lieu of

the sum named in said amendment, insert "$49,000,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 158 reads as follows:

Senate amendment No. 158: Page 44, after line 21, insert:

SEC. 908. (a) For the purposes of this section—

(1) "charitable organization" means an organization described in section 170(c) of the Internal Revenue Code of 1954;

(2) "honorarium" means a payment of money or anything of value to a Member for an appearance, speech, or article, by the Member; but there shall not be taken into account for the purposes of this section any actual and necessary travel expenses, incurred by the Member, and spouse or an aide to the extent that such expenses are paid or reimbursed by any other person, and the amount otherwise determined shall be reduced by the amount of any such expenses to the extent that such expenses are not paid or reimbursed;

(3) "Member" means a United States Senator, a Member of the House of Representatives, a Delegate to the House of Representatives, or the Resident Commissioner from Puerto Rico; and

(4) "travel expenses" means with respect to a Member, and spouse or an aide, the cost of transportation, and the cost of lodging and meals while away from his or her residence or the metropolitan area of Washington, District of Columbia.

(b)(1) Notwithstanding any other provision of law except as provided in paragraph (2), on and after January 1, 1984, a Member shall not accept honoraria which are attributable to any calendar year and total more than the amount that is equal to 30 percent of the aggregate salary paid to such Member for service as a Member during such calendar year.

(2) An individual who becomes a Member on a date after the first day of a calendar year shall not accept honoraria which are attributable to the remaining portion of that calendar year on and after the date such individual becomes a Member and total more than the amount that is equal to 30 percent of the aggregate salary paid to the Member for service as a Member during such calendar year.

(3) For the purposes of this subsection, an honorarium shall be attributable to the period or calendar year in which payment is received.

(c) Any honorarium, or any part thereof, paid by or on behalf of a Member to a charitable organization shall be deemed not to be accepted for the purposes of subsection (b).

(d) Notwithstanding any other provision of law, in the case of a Member who is serving in the office or position of Senator, president pro tempore of the Senate, Majority Leader of the Senate, or Minority Leader of the Senate during a calendar year, the annual rate of pay that is paid to such Member for such service shall not be less than the annual rate of pay payable for such position on December 17, 1982, increased by 15 percent and rounded in accordance with section 5318 of title 5, United States Code.

(e) The Commission on Executive, Legislative, and Judicial Salaries shall include in the first report required to be submitted by it after the date of the enactment of this Act a recommendation for an appropriate salary for Members, which recommendation shall assume a prohibition on the receipt of honoraria by Members.

(f) Subsection (d) of this section shall take effect with respect to service as a Member performed on or after July 1, 1983.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 158, and concur therein.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN) for 30 minutes.

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. Mr. Speaker, I would ask that the membership vote down the motion that has been offered by the gentleman from Mississippi (Mr. WHITTEN).

This motion not only concurs in the pay raise that the other body granted to itself, which I think is bad enough, but it also sets up the machinery to give a whopping big pay raise to Members of both Houses of Congress following the election.

On page 98 of the printed bill that is before us, there is a provision in it that says that the Commission on Executive, Legislative, and Judicial Salaries shall include in the first report required to be submitted by it after the date of enactment of this act a recommendation for an appropriate salary for Members, which recommendation shall assume a prohibition on the receipt of honoraria by Members.

Now, the last time the Quadrenniel Commission made its recommendation, it suggested that the salary of Members be increased from $60,000 to $85,000. As we all know, there has been a pay raise that has been given to Members of this body up to almost $70,000, and I think it is safe to assume that the Quadrenniel Commission that meets in 1984 will recommend a further substantial salary increase for Members of Congress.

What the clause that I have just read to the membership will insure is that that increase will increase by about $20,000 because that is the maximum amount of honoraria that we are presently allowed to receive, and if you assume that no honoraria and the fact that many of the Members of the other body are well over the maximum, we are going to see the increase of the full amount.

Under the previous law, the Quadrenniel Commission's recommendations, once approved by the President, came to the Congress for a veto, and in 1981 both this House and the other body did veto the Quadrenniel Commission's recommendations, so the $85,000 salary was not approved. However, as we all know, the Supreme Court of the United States has said that legislative vetoes are unconstitutional.

So I am afraid that without a legislative veto, with the Quadrenniel Commission recommendation, plus the extra $20,000 that this law will guarantee be added on, it will mean an unconscionably large pay raise granted to Members of the Congress following the 1984 election in a manner in which we cannot do anything about it.

For that reason, I would hope that the motion offered by the gentleman from Mississippi will be voted down; that we will insist upon our disagreement with the other body on this particular amendment, and hopefully get this matter stricken from the bill.

Mr. WHITTEN. Mr. Speaker, I support the motion to recede and concur and may I say my understanding of the situation is very different from the interpretation given by the gentleman.

Mr Speaker, I yield to the chairman of the Subcommittee on the Legislative, the gentleman from California, Mr. FAZIO.

Mr. FAZIO. I thank the gentleman for yielding.

Mr. Speaker, first of all, let me say that I think it is very unclear as to what the effect of the court decision on the legislative veto is in general. But specifically, I do not interpret the provisions of existing law that this body and the other body must deal with in regard to the Quadrenniel Commission report as legislative vetoes.

We are required to affirmatively approve in both Houses whatever Quadrenniel Commission recommendation is forwarded to us before it can be implemented.

Second, I would say the reason this language is here is not to preclude any other form of recommendation from the Quadrenniel Commission. We are simply asking them to consider what they might propose for appropriate congressional salary if Members of both bodies were to agree to do away with receiving honoraria income.

Outside income is a very controversial issue. Honoraria income has been roundly criticized in recent days as well as over the years by the media. We may wish, as a body, to attempt to do away with it. I think that issue really should not be dealt with at this time. It should be dealt with when the Quadrennial Commission reports to us.

All we are asking for is simply the advice of the Commission as to how we might proceed, if we so choose, at that time.

I think the gentleman's concern is misplaced. I think the Senate provi-

sion should be approved as it is, because it accomplishes a great deal of what we have been trying to do for a number of years, and that is to achieve uniformity between both bodies in both honoraria income limitations and salary. We have finally, statutorily accomplished that equity between the House and the Senate with this provision. I think this is an opportunity to ratify that action. I think that is so overridingly important that the expressed concerns of the gentleman from Wisconsin should be put aside and we should go ahead and recede to the Senate.

Mr. OBEY. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Wisconsin.

Mr. OBEY. I thank the gentleman for yielding.

Mr. Speaker, I would simply like to endorse every single word uttered by the gentleman from California, and to simply say in response to the point raised by my good friend from Wisconsin that this language is what Otto Passman used to describe as being here "for illustrative purposes." It is simply an effort to get the Commission to spell out what the range would be if, in fact, we decided, not they, but if we ever decided to go down the route of precluding all outside income.

It is simply an effort to get some outside judgment as so what the range of alternatives might be. There is nothing in here at all that I can see that is mandatory. I think the gentleman from California has described the situation accurately and in detail and I would urge support for the committee position.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, I would hope that we would go along with the action that the gentleman from Wisconsin proposes that we take.

As the Members know, we have provided an automatic appropriation for legislative salaries around here, and if, in fact, the scenario were to develop that the gentleman from Wisconsin sees as a possibility in this legislation, we could, in fact, have exactly the situation that he describes, an action that could not be reversed by this body.

I would hope that the gentleman would be supported.

Mr. FAZIO. Mr. Speaker, will the gentleman yield one more time?

Mr. WHITTEN. I yield to the gentleman from California.

Mr. FAZIO. I thank the gentleman for yielding.

Mr. Speaker, I would like to try to correct the record. There is no relationship between the action we would take following a recommendation from the Quadrenniel Commission and any other method of granting an increase in compensation to the Members. They are not related.

If the Quadrenniel Commission recommends an increase in pay based on existing rules or based on this provision, both bodies must agree to that by a record vote. Then the other provision the gentleman refers to may take effect. They are not related at this time, and there should be no confusion with our action today in adopting this provision. There is no automatic pay raise assumed in this language and I hope the Members are clear on that point.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

I hope the gentleman from Wisconsin does not prevail. This amendment, which was offered by me over here in the House in the subcommittee, places a statutory limitation on the amount of outside income from honoraria for House and Senate Members at 30 percent of congressional pay, or $20,940. It also raises Senators' pay from $60,662.50 to $69,800, a 15-percent increase to raise it to the level of House Members' pay.

This amendment essentially accomplishes what I have been trying to do for several years to bring us to a point of equal pay and outside income for Members of both bodies. House Members would still be restricted by House rules which limit all outside income, including honoraria and other sources, to 30 percent of our salaries.

□ 1600

So this amendment would, in effect, affect only Members of the other body. Their disclosures this year as to how much they have been raking in from honoraria have shocked us all. Unfortunately, our pristine House rules forbid me from identifying the biggest benefactors, but you can read it in the papers.

Altogether, Members of the Senate received $2.4 million last year in honoraria income, with individual Senators making as much as $134,000 apiece. This is on top of their congressional salary.

House Members know all too well that serving in this body and maintaining two homes is an expensive proposition, and we took the difficult but open and honorable step last year to raise our salaries while retaining our 30-percent limit on outside income.

The Senate chose another route. They refused to take the pay raise, but also refused to reinstate any limit on their outside income. We can see the results in the recent disclosures on honoraria.

We finally will reach equal treatment in this amendment.

I cannot tell you how pleased I feel, because I knew and I felt way down deep in my heart that they were worth as much as we were and they should be paid that.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. CONTE. Yes, I yield to my good friend, the gentleman from Wisconsin.

Mr. SENSENBRENNER. Mr. Speaker, I thank the gentleman from Massachusetts for yielding.

I will be the first one to concede that six of them are worth one of us.

I want the record to be clear that I very firmly support a limit on the honoraria that Members of both Houses receive; but I think that looking at the fine print is that the honoraria does not get imposed on Members of the other body until January 1, 1984. I think between now and New Year's Day, there is going to be a rush out of the other wing of the Capitol to go and claim land, like the Cherokee land grab back in the early part of this century, to fill up the honoraria until the limits get put on.

I would hope that since I cannot divide this question that we would vote down the proposal that the gentleman from Mississippi (Mr. WHITTEN) has offered so that you can go back to conference and put this cap on right away, because if it is good for January 1, 1984, it ought to be good for July 29, 1983.

Mr. CONTE. Mr. Speaker, I think the gentleman is right; but you know, a bird in the hand is worth two in the bush. It was not easy to get what we got.

Mr. FAZIO. Mr. Speaker, will the gentleman yield?

Mr. CONTE. Yes, I yield.

Mr. FAZIO. Mr. Speaker, I think we would miss a tremendous opportunity to take this gargantuan step forward if we do not act to recede to the Senate at this time. We were not happy with the 6-month gap between their pay increase and the end of their unlimited honoraria income, but we understood the practical political realities. Common Cause and others who have been very interested in this issue all agreed, however, that we should accept the Senate language. It may not be the perfect solution but we have come a long way and I think this is really the place to applaud the gentleman from Massachusetts (Mr. CONTE) and the gentleman from Wisconsin (Mr. OBEY) who have been the leaders in the House on putting this limitation on Senate honoraria income into the statutes.

I think we would be making an awfully bad mistake to try to be, as the gentleman from Massachusetts (Mr. CONTE) has said about our rules, pristine pure about these provisions. We have really accomplished our purpose

and I would hope the House would recede.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 225, nays 106, not voting 102, as follows:

□ 1610

Mr. SUNDQUIST changed his vote from "yea" to "nay."

Mrs. KENNELLY changed her vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 159 reads as follows:

Senate amendment No. 159: Page 44, after line 21, insert:

(g) Subsection (b) of section 323 of the Federal Election Campaign Act of 1971 (2 U.S.C. 441i(b)) is amended to read as follows:

"(b) Any honorarium, or any part thereof, paid by or on behalf of an elected or appointed officer or employee of any branch of the Federal Government to a charitable organization shall be deemed not to be accepted for the purposes of this section.".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 159, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 164 reads as follows:

Senate amendment No. 164: Page 47, after line 7, insert:

ACCESS HIGHWAYS TO PUBLIC RECREATION AREAS ON CERTAIN LAKES

Appropriations under this heading for fiscal year 1981 shall remain available until September 30, 1984.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 164 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

ACCESS HIGHWAYS TO PUBLIC RECREATION AREAS ON CERTAIN LAKES

Appropriations under this heading for fiscal year 1981 shall remain available until September 30, 1984.

HIGHWAYS CROSSING FEDERAL PROJECTS

The period of availability of approximately $400,000 appropriated in Public Laws 94-387, 95-29, 95-85, 95-335, and 96-131 is hereby extended through September 30, 1984.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

□ 1620

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 165 reads as follows:

Senate amendment No. 165: Page 47, after line 7, insert:

INTERCHANGE RECONSTRUCTION DEMONSTRATION PROJECT

The Secretary of Transportation is authorized to carry out a demonstration project for the purpose of demonstrating state-of-the-art methods which can be applied to the reconstruction of a substandard interchange at the intersection of Vista Boulevard and Interstate Route 80 near Sparks, Nevada. The project shall include the improvement to safe standards of an existing bridge within the interchange and crossing over the Interstate route; the elimination of an atgrade crossing of a railroad on an approach to, and in the immediate vicinity of, the interchange; the improvement of ramps to eliminate serious geometric deficiencies relating to truck turning movements; and other work as considered necessary to complete the project. There is authorized to be appropriated to carry out this project, out of the Highway Trust Fund, not to exceed $6,366,139 for the fiscal years beginning after September 30, 1982. Funds authorized for this project: (1) shall be available for obligation in the same manner and to the same extent as if such funds were appropriated under chapter 1 of title 23, United States Code, except that the Federal share of the cost of this project shall be 100 per centum of the total cost thereof and such funds shall remain available until expended, and (2) shall not be subject to any obligational limitations.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House insist on its disagreement to the amendment of the Senate numbered 165.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PREFERENTIAL MOTION OFFERED BY MRS. VUCANOVICH

Mrs. VUCANOVICH. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mrs. VUCANOVICH moves that the House recede from its disagreement to the amendment of the Senate numbered 165, and concur therein.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) is recognized for 30 minutes.

Mr. WHITTEN. Mr. Speaker, I strongly support the motion to insist on the House position. I strongly oppose the preferential motion to recede and concur in the Senate amendment.

I am joined in that by the chairman of the Committee on Public Works and Transportation, Mr. HOWARD. I yield now to the gentleman from Florida (Mr. LEHMAN), who is the chairman of the Appropriations Subcommittee on Transportation.

Mr. LEHMAN of Florida. I thank the gentleman.

I strongly support the chairman's statement that we must insist on the House position.

Mr. Speaker, I would like to read pertinent sections from a letter we received from the chairmen of the House and Senate authorizing committees on this subject:

"We are greatly concerned about provisions in H.R. 3069 which would authorize contract authority for new projects and which would change existing highway policies.

"We are particularly concerned about provisions in H.R. 3069 * * * would authorize $6 million for an interchange."

We believe legislation of this type on an Appropriations bill undermines the legislative jurisdiction of our Committees. We respectfully request that any legislative provisions with regard to the Federal-aid Highway Program be deleted during consideration of H.R. 3069.

Mr. WHITTEN. Mr. Speaker, I repeat again I hope our colleagues will vote "no" on the preferential motion and agree to the motion to insist.

Mr. REID. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman.

Mr. REID. Mr. Speaker, I rise in support of the motion offered by my distinguished colleague, the Honorable BARBARA VUCANOVICH, to recede and concur in Senate amendment No. 165 to the conference report on H.R. 3069, supplemental appropriations for fiscal year 1983.

Senate amendment No. 165 provides $6.4 million for the reconstruction or rehabilitation of Vista Bridge in Washoe County, Nev. Vista Bridge, constructed in 1964, provides one of the major access routes to Interstate 80. This area has experienced a 65-percent increase in population since 1970. The Washoe County School District operates 150 schoolbuses, many of which use the bridge. The bridge was not constructed for large vehicles and is unable to accommodate the heavy industrial traffic that also exists in the area. This imposes a very serious safety hazard.

Because Nevada receives only a small amount of highway funds for this type of construction, the resources for this necessary project are not available. The need for this supplemental appropriation is justified. I urge that this motion be adopted.

I thank the Chairman.

Mrs. VUCANOVICH. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentlewoman.

Mrs. VUCANOVICH. Mr. Speaker, I think the gentleman.

Mr. Speaker, today, I urge my colleagues to withdraw their objections to the Senate amendment which would fund repairs of the Vista Bridge in Sparks, Nev. I realize the other body did not follow the proper procedures when it funded this project in an appropriations bill. However, the safety considerations are so great regarding Vista Bridge that I ask the House to allow the project to proceed despite that fact.

Vista Bridge was constructed in 1964, when there was a small population and little traffic in the area. Since that time, there has been tremendous growth, with the construction of new residential subdivisions, new warehouses and commercial properties, a new hospital and the Washoe County School District bus yard. All this increased traffic must now use Vista to exit and enter Interstate 80.

The bridge was not constructed for such heavy use nor for the large vechicles that utilize the bridge. The long tractor trailer trucks and buses find it next to impossible to negotiate the 90 degree turn at the end of the offramp. Often they knock out the guardrail damaging both the vehicle and the bridge. This, in turn, could cause a vehicle to slip down into traffic on the freeway below, causing a needless tragedy.

The need is immediate. Unfortunately, even after passage of last year's gas tax bill, the State of Nevada receives a relatively small allocation of 4-R moneys, the account which would be used to repair Vista. This 4-R money must be used to repair and maintain Nevada's extensive highway system and build equally high priority roads. In short, traditional highway funds are not available.

Because of the need to move quickly to prevent a serious tragedy, the Senate added the funds to the first available bill before it. I acknowledge, as does the Senate, that adding money to the supplemental appropriations bill did not follow the correct procedures, but given the dangers involved, I urge my colleagues to allow the project to be funded by this measure.

Mr. ROBERT F. SMITH. Mr. Speaker, will the gentlewoman yield?

The SPEAKER pro tempore. The time is controlled by the gentleman from Massachusetts (Mr. CONTE) and the gentleman from Mississippi (Mr. WHITTEN.)

Mr. CONTE. Mr. Speaker, I yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. I thank the gentleman for yielding.

Mr. Speaker, I just want to say, Mr. Speaker, that I personally have been at this particular intersection, being a neighbor in the State of Oregon; I can attest to the fact that it is a very, very dangerous situation, particularly after you have been to Sparks, Nev., and

you are on you way home, your car is lighter, you are lighter, and I suggest to you that even as light as you may be, you are in great danger at this particular intersection. I would ask the House at this point to give particular attention to the gentlewoman's request and the gentleman from Nevada, and recognizing the fact that this may not be totally in line with all of the particular rules, the conference committee has acted and I assume a majority of both House and Senate have acted. I would ask then that the gentlewomen's request be given every possibility in the House.

Mr. CONTE. Mr. Speaker, I have no further requests for time.

Mr. WHITTEN. Mr. Speaker. I would like to say this if I may and I hope the gentlewoman from Nevada (Mrs. VUCANOVICH) can get her problem solved. But let me say this regarding the pending preferential motion: The authorizing committee, and its distinguished chairman are very much opposed to agreeing to the Senate amendment numbered 165 to this bill. The House conferees are opposed to it. The gentleman from Florida, chairman of the subcommittee on Transportation, is opposed to it. I certainly hope that you will vote down the preferential motion and support the House position. We will try to help the gentlewoman in the future.

Everybody who deals with this situation is sympathetic, and we will give it thought in the future. But now is not the time to deal with it.

I hope you will vote the woman's position down and try to work out something in the future.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentlewoman from Nevada (Mrs. VUCANOVICH).

The preferential motion was rejected.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 168 reads as follows:

Senate amendment No. 168: Page 49, strike out lines 14 to 19, inclusive.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 168 and concur therein with an amendment, as follows: Delete the matter stricken by said amendment, and insert in lieu thereof the following:

LIMITATION ON GENERAL OPERATING EXPENSES

The limitation on general operating expenses of the Federal Highway Administration is increased by $1,750,000 for necessary expenses to carry out the provisions of section 152 of the Surface Transportation Assistance Act of 1982 for a methane conversion study, to remain available until expended.

ACOSTA BRIDGE

Notwithstanding subsection (b) of section 142 of Public Law 97-377, the funds made available by such subsection for the Dodge Island Bridge project in Miami, Florida, shall be available for the Acosta Bridge project in Jacksonville, Florida, in accordance with the provisions of section 144 of title 23, United States Code, to remain available until expended: *Provided*, That, notwithstanding any other provisions of law, obligations incurred under this section shall not be subject to any limitation on obligations for Federal-aid highways.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

□ 1630

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 169 reads as follows:

Senate amendment No. 169: Page 49, after line 19, insert:

Notwithstanding section 144 of title 23, United States Code, and any other provision of law, the Secretary of Transportation shall make available, upon request of the State of Georgia, under such section 144, an amount not to exceed $5,000,000, from funds appropriated in this Act or previous Acts, such sum to initiate the design and engineering phase of the Eugene Talmadge Memorial Bridge replacement project in Savannah, Georgia.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 169, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 172 reads as follows:

Senate amendment No. 172: Page 50, after line 6, insert:

OFFICE OF THE SECRETARY

Of the sums appropriated for Office of the Secretary, Salaries and Expenses, not to exceed $22,000 may be used for official reception and representation functions.

Of the sums appropriated for International Affairs, not to exceed $73,000 may be used for official reception and representation functions.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate number 172 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

OFFICE OF THE SECRETARY

Of the sums appropriated for Office of the Secretary, Salaries and Expenses, not to exceed $18,500 may be used for official reception and representation functions.

Of the sums appropriated for International Affairs, not to exceed $66,500 may be used for official reception and representation functions.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 176 reads as follows:

Senate amendment No. 176: Page 52, after line 10, insert:

SALARIES AND EXPENSES

For necessary expenses to carry out functions of the Office of Personnel Management pursuant to Reorganization Plan Numbered 2 of 1978 and the Civil Service Reform Act of 1978, not to exceed $1,500 for official reception and representation funds.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate number 176 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert the following: "$1,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 180 reads as follows:

Senate amendment No. 180: Page 53, after line 11 insert:

For purposes of applying section 44C of the Internal Revenue Code of 1954, paragraph (10) of section 44C(c) of such Code (relating to property financed by subsidized energy financing) shall not apply with respect to any financing for energy conservation or renewable energy source expenditures which was provided—

(1) before January 1, 1983,

(2) under a State program in existence before 1978, and

(3) with respect to any residence the first mortgage on which is financed by the proceeds of any qualified veterans' mortgage bond (within the meaning of section 103A(c)(3) of such Code).

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 180, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 181 reads as follows:

Senate amendment No. 181: Page 53, after line 11, insert:

CHAPTER XII

DISTRICT OF COLUMBIA

DISTRICT OF COLUMBIA FUNDS

GOVERNMENTAL DIRECTION AND SUPPORT

GENERAL PROVISION

Title 11, section 11-1732(d) of the District of Columbia Code, is amended by striking out "1983" and inserting in lieu thereof "1984".

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Misissippi (Mr. WHITTEN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 205 reads as follows:

Senate amendment No. 205: Page 62, after line 23, insert:

"Alcohol, Drug Abuse, and Mental Health", $375,000;

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 205 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment insert "$1,388,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 231 reads as follows:

Senate amendment No. 231: Page 72, line 5, strike out "$181,445,000" and insert "$180,168,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 231 and concur therein with an agreement, as follows: In lieu of the sum proposed by said amendment, insert the following: "$180,168,000: *Provided*, That of the funds appropriated under this heading in the Department of Housing and Urban Development-Independent Agencies Appropriation Act, 1983 (Public Law 97-272), $4,200,000 shall be available only for three integrated hospital system projects and such funds shall remain available until September 30, 1984".

Mr. CONTE (during the reading) Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 247 reads as follows:

Senate amendment No. 247: Page 79, after line 10, insert:

SEC. 403. Amounts certified pursuant to section 1311 of the Supplemental Appropriations Act, 1955, as having been obligated against appropriations heretofore made under the authority of the Foreign Assistance Act of 1961, as amended, for the same general purpose as any of the subparagraphs under "Agency for International Development" in prior appropriations Acts, are, if deobligated, hereby continued available for the same period as the respective appropriations in such subparagraphs for the same general purpose and for the same country as originally obligated: Provided, That the Appropriations Committees of both Houses of the Congress are notified fifteen days in advance of the deobligation or reobligation of such funds.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 247 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SEC. 403. Amounts certified pursuant to section 1311 of the Supplemental Appropriations Act, 1955, as having been obligated against appropriations heretofore made under the authority of the Foreign Assistance Act of 1961, as amended, for the same general purpose as any of the subparagraphs under "Agency for International Development" in prior appropriations Acts, are, if deobligated, hereby continued available for the same period as the respective appropriations in such subparagraphs for the same general purpose and for the same country as originally obligated or for relief, rehabilitation, and reconstruction activities in the Andean region: Provided, That the Appropriations Committees of both Houses of the Congress are notified fifteen days in advance of the deobligation or reobligation of such funds.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 251 reads as follows:

Senate amendment No. 251: Page 79, after line 10, insert:

SEC. 407. Upon request of the city of Pine Bluff, Arkansas, the Secretary of Commerce shall authorize such city to lease to any person the banquet and kitchen facilities of the Pine Bluff Convention Center, without affecting the Federal assistance provided by a grant under the Public Works Employment Act of 1976 (project number 01-51-00020) or any other law, if such transfer documents provide for the operation of such facilities as kitchen and banquet facilities for at least 25 years after the date of such transfer.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 251 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment, insert "406".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

Senate amendment No. 253 reads as follows:

Senate amendment No. 253: Page 79, after line 10, insert:

SEC. 409. Upon request of the city of Oakland, California, the Secretary of Commerce shall authorize such city to sell or lease to any person the George P. Scotlan Memorial Convention Center building, without affecting the Federal assistance provided under the Public Works and Economic Development Act of 1965 (project numbered 07-01-02471), or any other law, if—

(1) such sale or lease provides, for the operation of such facilities as a Convention Center for at least sixty-five years after such transfer; and

(2) in the event of the sale of such building, the repayment of any grant made pursuant to the Public Works and Economic Development Act of 1965 shall—

(A) be made over a period of thirty years;

(B) provide that no payments shall be made for the first fifteen years of such period; and

(C) be made in equal annual installments over the last fifteen years of such period.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 253 and concur therein with an amendment, as follows: In lieu of the section named in said amendment, insert "407".

The motion was agreed to.

● Mr. DASCHLE. Mr. Speaker, I would like to make note of one item in the fiscal year 1983 supplemental appropriations bill, and that is the International Fund for Agricultural Development (IFAD). The supplemental appropriations bill contains $16 million for IFAD, a U.N. agency which is totally focused on improving the capability of small and landless farmers in developing nations to become self-sufficient. I strongly support IFAD, and only wish the bill contained more money for this worthy program.

There is always a great deal of criticism of our foreign aid, with many people, unfortunately, not distinguishing among various foreign assistance initiatives. There is, however, an enormous difference between guns for the Salvadoran military versus helping improve the productivity of Egyptian farmers who have about one acre each. And there is a big difference between funds for covert activities in Nicaragua versus credit to small farmers in Pakistan. Even with development aid, as opposed to military aid, we need to exercise discrimination. We have made mistakes in our food and development assistance programs—at times our Food for Peace aid has proved to be a disincentive for local food production in the recipient country. And a good case can be made that the International Monetary Fund is misdirected in its orientation toward export production rather than toward helping people meet their basic needs. We often hear talk of the need in this Nation for a constituency for foreign aid. I agree that we do need this type of constituency. And IFAD, which is properly focused, effective, and which is providing leadership by example to other development agencies regarding direct assistance to the poorest segments of populations, merits the support of the American public.

IFAD was formed in 1977 as an outgrowth of the World Food Conference. OPEC and Western nations cooperated in the founding of IFAD, and contributed equally to its initial funding. However, the U.S. pledge to pay $180 million over the years 1981-83 has not been paid. To our discredit, the United States is the only nation to not meet its pledge to IFAD. We have paid only $24 million of our pledge. And with the $16 million contained in the fiscal year 1983 supplemental bill which is on the floor today, we still will have paid only $40 million. Oddly enough, the administration opposed the inclusion of $16 million for IFAD in the supplemental, even though Congress appropriated only half of what the administration had requested for fiscal year 1983. The administration's less than active effort on behalf of IFAD, lipservice to the contrary not withstanding, is puzzling in light of the fact that 85 percent of IFAD's funding has been used for projects in nations for which the President is requesting fiscal year 1984 security assistance.

American representatives are just now returning from a conference in Geneva where IFAD funding was discussed—a conference at which the United States came under justifiable criticism. There is a good chance that some nations will refuse to pledge further money to IFAD until we pay, or at least give an indication that we will pay, our pledge.

I am apalled to see us—Congress and the administration—stymie a program which so directly helps those most in need. And I hate to see us so foolishly discourage, by defaulting on our payments, OPEC and other nations from

being actively involved in this development effort.

I will continue to work for funding for programs which effectively promote a better life for the world's poorest people. By passing the fiscal year 1983 supplemental bill, we are sending a message that the United States still supports the work of the Inernational Fund for Agricultural Development.●

● Mr. HAMMERSCHMIDT. Mr. Speaker, I note that the conference report deletes the House-passed language which earmarked $2 million of the funds provided under the jobs bill (Public Law 98-8) to be used for rehabilitation of Six-Mile Creek in Arkansas. I also note that the language agreed to by the conferees provides the same total program funding for SCS rehabilitation activities as was included in the amendment which I offered and was passed on the floor of the House. The conference report that we are considering here today makes the following statement "The conferees have been assured that within the $17 million available for rehabilitation of existing small watersheds, adequate funds are available to carry out the restoration of Six-Mile Creek." It is my understanding that nothing in the conference report is meant to change the intention of the House-passed language that the Six-Mile Creek project is meant to be funded under authority of the language agreed to by the conferees. It is also my understanding that this basic agreement is shared by the Senate conferees on this legislation and that this basic agreement is implicit in the conference report language that we have before us, and I am pleased to have personally received that assurance from the distinguished chairman, Mr. WHITTEN.●

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the consideration of the amendments reported in disagreement to the conference report on H.R. 3069, and that I may include extraneous and tabular material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C., *July 25, 1983.*

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: I notified you on July 11, 1983 that Robert McGuire of my office had received a subpoena duces tecum from the Superior Court of the District of Columbia.

After consultation with counsel, I have determined that the subpoena is consistent with the rights and privileges of the House and will therefore comply with the subpoena.

Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1984

Mr. PRICE. Mr. Speaker, I call up from the Speaker's table the Senate bill (S. 675), to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. LEVITAS. Mr. Speaker, reserving the right to object, and I do not intend to object, but I do this for purposes of inquiring whether the distinguished Speaker pro tempore or someone in the leadership can advise the Members as to the schedule for the remainder of the day, it now being almost 2 hours after the anticipated adjournment time.

Could we just have some sense so we could make our plans accordingly.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Speaker, the next item of business is to swear the Speaker pro tempore.

Following that there will be a vote on the concurrent resolution relating to adjournment, which is mandatory, and which will complete the schedule of business for the week.

Mr. LEVITAS. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

MOTION OFFERED BY MR. PRICE

Mr. PRICE. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. PRICE moves to strike out all after the enacting clause of the Senate bill, S. 675, and to insert in lieu thereof the provisions of H.R. 2969, as passed by the House, as follows:

That this Act may be cited as the "Department of Defense Authorization Act, 1984".

TITLE I—PROCUREMENT

AUTHORIZATION OF APPROPRIATIONS, ARMY

SEC. 101. Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement of aircraft, missiles, weapons and tracked combat vehicles, and ammunition and for other procurement for the Army as follows:

For aircraft, $3,331,800,000.

For missiles, $2,990,900,000.

For weapons and tracked combat vehicles, $4,738,400,000.

For ammunition, $2,157,900,000.

For other procurement, $5,045,700,000.

AUTHORIZATION OF APPROPRIATIONS, NAVY AND MARINE CORPS

SEC. 102. (a) AIRCRAFT.—Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement of aircraft for the Navy in the amount of $10,716,900,000.

(b) WEAPONS.—Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement of weapons (including missiles and torpedoes) for the Navy as follows:

For missile programs, $3,090,800,000.

For the MK-48 torpedo program, $124,600,000.

For the MK-46 torpedo program, $248,000,000.

For the MK-60 torpedo program, $105,400,000.

For the MK-30 mobile target program, $22,100,000.

For the MK-38 minimobile target program, $2,000,000.

For the antisubmarine rocket (ASROC) program, $17,300,000.

For the modification of torpedoes, $111,800,000.

For the torpedo support equipment program, $72,100,000.

For the MK-15 close-in weapons system program, $126,700,000.

For the 5-inch/54-caliber gun mount program, $16,100,000.

For the MK-75 76-millimeter gun mount program, $11,100,000.

For the MK-19 gun mount program, $900,000.

For the 25-millimeter gun mount program, $700,000.

For the 9-millimeter handgun, $500,000.

For small arms and weapons, $2,500,000.

For the modification of guns and gun mounts, $13,600,000.

For the guns and gun mounts support equipment program, $9,300,000.

(c) SHIPBUILDING AND CONVERSION.—Funds are hereby authorized to be appropriated for fiscal year 1984 for shipbuilding and conversion for the Navy as follows:

For the Trident submarine program, $1,759,000,000.

For the SSN-688 nuclear attack submarine program, $2,042,400,000.

For the aircraft carrier service life extension program (SLEP), $95,900,000.

For the CG-47 Aegis cruiser program, $3,435,000,000.

For the DDG-51 guided missile destroyer program, $79,000,000.

For the battleship reactivation program, $57,700,000.

For the LSD-41 landing ship dock program, $509,000,000.

For the LHD-1 amphibious assault ship program, $1,379,700,000.

For the LPD-4 amphibious ship service life extension program (SLEP), $13,800,000.

For the MCM-1 mine countermeasures ship program, $301,000,000.

For the MSH-1 minesweeper hunter program, $65,000,000.

For the TAGS ocean survey ship program, $34,500,000.

For the TAH hospital ship program, $260,000,000.

For the TAK(FBM) missile resupply ship program, $900,000.

For the TAFS combat stores ship program, $16,100,000.

For the TAO-187 fleet oiler program, $524,600,000.

For the TAKR fast logistic ship program, $246,500,000.

For the strategic sealift ready reserve program, $31,000,000.

For the LCAC landing craft air cushion program, $161,100,000.

For service craft and landing craft, $134,300,000.

For outfitting, post delivery, and cost growth, $1,003,100,000.

(d) OTHER.—Funds are hereby authorized to be appropriated for fiscal year 1984 for other procurement for the Navy in the amount of $4,583,500,000, of which—

(1) the sum of $684,500,000 is available only for the ship support equipment program;

(2) the sum of $1,600,500,000 is available only for the communications and electronics equipment program; and

(3) the sum of $930,300,000 is available only for the ordnance support equipment program.

(e) PROCUREMENT, MARINE CORPS.—Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement for the Marine Corps (including missiles, tracked combat vehicles, and other weapons) in the amount of $1,800,400,000.

AUTHORIZATION OF APPROPRIATIONS, AIR FORCE

SEC. 103. (a) Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement of aircraft and missiles and for other procurement for the Air Force as follows:

For aircraft, $21,051,300,000.

For missiles, $5,719,100,000.

For other procurement, $6,935,600,000.

(b) Of the funds authorized to be appropriated in this section for aircraft for the Air Force, the sum of $112,100,000 is available only for contribution by the United States as its share of the cost for fiscal year 1984 of acquisition by the North Atlantic Treaty Organization of the airborne Warning and Control System (AWACS).

(c) Of the funds authorized to be appropriated in this section for missiles for the Air Force, the sum of $464,000,000 is available for procurement of two hundred and forty missiles under the AGM-86B air-launched cruise missile program and the sum of $14,000,000 is available for advance procurement for such program.

(d) Notwithstanding any other provision of law, procurement of the B-1B aircraft program may be carried out under a multiyear procurement contract in accordance with section 2306(h) of title 10, United States Code.

AUTHORIZATION OF APPROPRIATIONS, DEFENSE AGENCIES

SEC. 104. Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement by the Defense agencies in the amount of $1,053,200,000.

EXTENSION OF AUTHORITY PROVIDED SECRETARY OF DEFENSE IN CONNECTION WITH THE NATO AIRBORNE WARNING AND CONTROL SYSTEM (AWACS) PROGRAM

SEC. 105. Effective on October 1, 1983, section 103(a) of the Department of Defense Authorization Act, 1982 (Public Law 97-86; 95 Stat. 1100), is amended by striking out "fiscal year 1983" both places it appears and inserting in lieu thereof "fiscal year 1984".

SECURE COMMUNICATIONS EQUIPMENT

SEC. 106. The Secretary of Defense is authorized to procure secure telephone communication systems, including equipment and related items, during fiscal year 1984 for the Department of Defense and other Government agencies and entities to support a national program to provide secure telephone service. Of the funds authorized to be appropriated pursuant to this title, not more than $60,000,000 may be used to provide secure telephone equipment and related items to the Department of Defense and other Government agencies and entities in support of such a national program. Equipment provided to Government agencies and entities outside the Department of Defense under the authority of this section and such related services as may be necessary may be furnished by the Secretary of Defense with or without reimbursement.

LIMITATION ON ARMY PROCUREMENT

SEC. 107. The Secretary of the Army may not make a contract for the purpose of establishing a second source for production of the engine for the M-1 tank.

LIMITATIONS ON NAVY PROCUREMENT

SEC. 108. (a)(1) None of the funds appropriated pursuant to the authorization of appropriations for the strategic sealift ready reserve program under section 102(c) (under Shipbuilding and Conversion for the Navy) may be obligated or expended for the acquisition of a specific vessel for that program until (A) the Secretary of the Navy has notified the Committees on Armed Services and on Appropriations of the Senate and House of Representatives of the proposed acquisition of that vessel for that program, and (B) a period of thirty days of continuous session of Congress has expired following the date on which that notice was received by those committees.

(2) For purposes of paragraph (1), the continuity of a session of Congress is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of such thirty-day period.

(b) None of the funds appropriated pursuant to the authorization of appropriations for the LCAC landing craft air cushion program under section 102(c) (under Shipbuilding and Conversion for the Navy) may be obligated or expended until the Secretary of the Navy has submitted a report to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives which—

(1) responds to the Comptroller General decision B-203652 of April 20, 1983;

(2) evaluates the feasibility of establishing a second source for the production of the landing craft air cushion;

(3) recommends a specific acquisition strategy for such program that ensures procurement of the best landing craft air cushion for the Navy and, to the extent feasible, provides that such procurement shall be competitive if practicable and appropriate; and

(4) describes a plan to conduct a new source- selection competition for the landing craft air cushion program and evaluates the feasibility of that competition.

PROHIBITION ON PROCUREMENT OF BINARY CHEMICAL MUNITIONS AND RELATED PRODUCTION FACILITIES, EQUIPMENT, AND PRECURSOR CHEMICALS

SEC. 109. None of the funds appropriated pursuant to the authorizations of appropriations in this title may be obligated or expended for procurement of binary chemical munitions or for production facilities, equipment, or precursor chemicals for such munitions.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. (a) Funds are hereby authorized to be appropriated for fiscal year 1984 for the use of the Armed Forces for research, development, test, and evaluation in amounts as follows:

For the Army, $4,204,552,000.

For the Navy (including the Marine Corps), $7,604,385,000.

For the Air Force, $9,730,141,000.

For the Defense Agencies, $3,048,422,000, of which $50,000,000 is authorized for the activities of the Director of Test and Evaluation, Defense.

(b) In addition to the funds authorized to be appropriated in subsection (a), there are authorized to be appropriated for fiscal year 1984 such additional sums as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law for civilian employees of the Department of Defense whose compensation is provided for by funds authorized to be appropriated in subsection (a).

LIMITATIONS ON FUNDS FOR THE ARMY

SEC. 202. (a) Of the amount authorized in section 201 for the Army—

(1) $7,650,000 is available only for 75-millimeter and 90-millimeter guns for light armored vehicles;

(2) $7,000,000 is available only for neutral particle beam research as part of the ballistic missile defense advanced technology program;

(3) $28,000,000 is available only for integration (including qualification) of the Hellfire missile on the UH-60 helicopter;

(4) $50,160,000 is available only for the Joint Tactical Missile System and for selection of either the Patriot T-16 or Lance T-22 as the delivery vehicle for such system; and

(5) $12,561,000 is available only for the Mobile Protected Gun System.

(b) None of the amount appropriated pursuant to the authorization in section 201 for the Army may be used for full-scale engineering development of the Military Computer Family System until the Secretary of Defense provides to the Committees on Armed Services of the Senate and House of Representatives a plan for the introduction and integration of advanced micro-electronic computers into weapons systems.

LIMITATIONS ON FUNDS FOR THE NAVY

SEC. 203. (a) Of the amount authorized in section 201 for the Navy (including the Marine Corps)—

(1) $24,000,000 is available only for continued development of the Rankine Cycle Energy Recovery (RACER) system for installation on the DDG-51 lead ship;

(2) $20,000,000 is available only for the antiradiation projectile program;

(3) $60,593,000 is available only for the Mark 92 fire control system;

(4) $18,000,000 is available only for a derivative of the Standard Missile II to be used for the Navy outer air battle mission; and

(5) $1,470,000 is available only for the evaluation of a wing-lift system for Navy utility craft.

(b)(1) None of the amount appropriated pursuant to the authorization in section 201 for the Navy may be used for full-scale engineering development of the AN/UYK-43 and AN/UYK-44 computers until the Secretary of Defense provides to the Committees on Armed Services of the Senate and House of Representatives a plan for the introduction and integration of advanced microelectronic computers into weapons systems.

(2) None of the amount appropriated pursuant to the authorization in section 201 for the Navy may be used for the Navy Mid-Infrared Advanced Chemical Laser program.

LIMITATIONS ON FUNDS FOR THE AIR FORCE

SEC. 204. (a) Of the amount authorized in section 201 for the Air Force—

(1) $80,000,000 is available for the Air Force Space Command only for the development of the visible/ultraviolet short wavelength laser with the objective of demonstrating as early as practicable an antisatellite capability against low-orbit satellites;

(2) $350,000,000 is available only for a competitive advanced fighter/attack aircraft program;

(3) at least $20,000,000 is available only for development of an Advanced Joint Tactical Information Distribution Derivative System that provides interoperability among Navy, (including and Marine Corps) and Air Force aircraft;

(4) $20,000,000 is available only for the development of terminally guided and sensor-fused submunitions for the Air Force deep strike mission; and

(5) $123,500,000 is available only for the development of the Air Force T-46 Next Generation Trainer aircraft.

(b) None of the amount appropriated pursuant to the authorization in section 201 for the Air Force may be used for the Airborne Laser Laboratory program or for the Low Altitude Navigation and Targeting Infrared, Night (LANTIRN) system.

LIMITATIONS ON FUNDS FOR THE DEFENSE AGENCIES

SEC. 205. (a) Of the amount authorized in section 201 for the Defense Agencies—

(1) not less than $65,000,000 is available only for research, development, test, and evaluation of free-electron and other short wavelength (including blue-green) lasers;

(2) $48,100,000 is available only for the particle-beam technology program, including modifications to the advanced test accelerator required for free-electron laser research;

(3) $20,000,000 is available only for a joint Defense Advanced Research Projects Agency and Department of Energy project for research, development, test, and evaluation of third-generation defensive weapons; and

(4) $30,000,000 is available only for the Defense Nuclear Agency for research, development, test, and evaluation of third-generation defensive weapons.

(b) None of the amount appropriated pursuant to the authorization in section 201 for the Defense Agencies may be used for research, development, test, and evaluation for the program for fifth-generation artificial intelligence computers until the Secretary of Defense submits to Congress a comprehensive plan for the manner in which such program will be carried out.

TITLE III—LAND-BASED STRATEGIC BALLISTIC MISSILE MODERNIZATION PROGRAM

PROCUREMENT OF MX MISSILE

SEC. 301. In addition to the amount authorized to be appropriated in section 103 for procurement of missiles for the Air Force, there is hereby authorized to be appropriated to the Air Force for fiscal year 1984 for procurement of missiles the sum of $2,200,000,000 to be available only for the MX missile program.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION FOR MX MISSILE AND SMALL MOBILE MISSILE SYSTEMS

SEC. 302. (a) In addition to the amount authorized to be appropriated in section 201 for research, development, test, and evaluation for the Air Force, there is hereby authorized to be appropriated to the Air Force for fiscal year 1984 for research, development, test, and evaluation for the land-based strategic ballistic missile modernization program—

(1) $1,980,389,000 to be available only for research, development, test, and evaluation for the MX missile program; and

(2) $250,000,000 to be available only for research, development, test, and evaluation for a small mobile missile system.

(b) In addition to the amount authorized to be appropriated in section 201 for research, development, test, and evaluation for the Defense Agencies, there is hereby authorized to be appropriated for the Defense Nuclear Agency for fiscal year 1984 for the land-based strategic ballistic missile modernization program the sum of $20,000,000 to be available only for research, development, test, and evaluation related to silo hardening technology.

LIMITATION ON EXPENDITURE OF FUNDS

SEC. 303. (a) None of the funds authorized by clause (2) of section 302(a) may be obligated or expended for research, development, test, or evaluation for an intercontinental-range mobile ballistic missile that would weigh more than 33,000 pounds or that would carry more than a single warhead.

(b) The Secretary of Defense may not deploy more than 10 MX missiles until—

(1) demonstration of subsystems and testing of components of the small mobile intercontinental ballistic missile system (including missile guidance and propulsion subsystems) have occurred; and

(2) nuclear effects tests on the components and subsystems of the prototype mobile transporter-launcher basing system and fixed basing system for the small missile have been carried out using full-scale tests, when practicable, and otherwise using scaled tests.

(c) The Secretary of Defense may not deploy more than 40 MX missiles until—

(1) the major elements (including the guidance and control subsystems) of a mobile missile weighing less than 33,000 pounds as a part of an intercontinental ballistic missile system have been flight tested;

(2) the major elements of the prototype small mobile intercontinental ballistic missile system (including the missile, the prototype mobile transporter-launcher basing system and fixed basing system, and the command, control, and communications system) have been designed and functionally integrated and the system has been validated;

(3) contractors for the full-scale engineering development of such a missile system have been selected and contracts have been awarded to those contractors; and

(4) full-scale engineering development of such a missile system has begun.

(d)(1) Not later than January 15 of each year from 1984 through 1988, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and House of Representatives a report—

(A) on the progress being made with respect to the development and deployment of the MX missile system;

(B) on the progress being made with respect to the development and testing of a small mobile intercontinental ballistic missile system; and

(C) on developments related to silo-hardening technology.

(2) In each report under paragraph (1), the Secretary shall certify whether the Department of Defense is developing a small mobile intercontinental ballistic missile system with a missile that weighs no more than 33,000 pounds and that is planned to carry no more than a single warhead.

(e) If at any time during the development of the small mobile intercontinental ballistic missile it appears that the weight of the missile when deployed will exceed 30,000 pounds, the Secretary of Defense shall submit a report to Congress stating the projected weight of the missile and providing an explanation of the reasons for the weight exceeding 30,000 pounds and the anticipated effects that weight could have on the mobility and blast resistance of the missile system.

TITLE IV—OPERATION AND MAINTENANCE

AUTHORIZATION OF APPROPRIATIONS

SEC. 401. (a) ARMY.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $17,588,890,000 for expenses, not otherwise provided for, for the operation and maintenance of the Army as follows:

(1) For general purpose forces, $6,359,187,000.

(2) For intelligence and communications, $1,034,389,000.

(3) For central supply and maintenance, $5,065,237,000.

(4) For training, medical, and other general personnel activities, $3,872,421,000.

(5) For administration, $1,148,958,000.

(6) For support of other nations, $108,698,000.

(b) NAVY.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $22,254,888,000 for expenses, not otherwise provided for, for the operation and maintenance of the Navy and the Marine Corps as follows:

(1) For strategic forces, $1,931,861,000.

(2) For general purpose forces, $10,582,807,000.

(3) For intelligence and communications, $1,063,889,000.

(4) For central supply and maintenance, $6,011,933,000.

(5) For training, medical, and other general personnel activities, $2,008,832,000.

(6) For administration, $652,566,000.

(7) For support of other nations, $3,000,000.

(c) MARINE CORPS.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $1,555,400,000 for expenses, not otherwise provided for, for the operation and maintenance of the Marine Corps as follows:

(1) For general purpose forces, $895,201,000.

(2) For central supply and maintenance, $353,123,000.

(3) For training, medical, and other general personnel activities, $211,073,000.

(4) For administration, $96,003,000.

(d) AIR FORCE.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $18,365,248,000 for expenses, not otherwise provided for, for the operation and maintenance of the Air Force as follows:

(1) For strategic forces, $3,093,181,000.

(2) For general purpose forces, $3,968,778,000.

(3) For intelligence and communications, $1,801,922,000.

(4) For airlift and sealift, $1,187,935,000.

(5) For central supply and maintenance, $5,750,311,000.

(6) For training, medical, and other general personnel activities, $2,019,042,000.

(7) For administration, $536,902,000.

(8) For support of other nations, $7,177,000.

(e) DEFENSE AGENCIES.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $6,636,835,000 for expenses, not otherwise provided for, for the operation and maintenance of activities and agencies of the Department of Defense (other than the military departments) as follows:

(1) For general purpose forces, $279,700,000.

(2) For intelligence and communications, $2,238,359,000.

(3) For central supply and maintenance, $1,536,966,000.

(4) For training, medical, and other general personnel activities, $2,164,599,000.

(5) For administration, $417,211,000.

(f) ARMY RESERVE.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $686,400,000 for expenses, not otherwise provided for, for the operation and maintenance of the Army Reserve as follows:

(1) For mission forces, $409,234,000.

(2) For depot maintenance, $8,810,000.

(3) For other support, $268,356,000.

(g) NAVY RESERVE.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $660,200,000 for expenses, not otherwise provided for, for the operation and maintenance of the Navy Reserve as follows:

(1) For mission forces, $370,648,000.

(2) For depot maintenance, $116,838,000.

(3) For other support, $172,714,000.

(h) MARINE CORPS RESERVE.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $53,229,000 for expenses, not otherwise provided for, for the operation and maintenance of the Marine Corps Reserve as follows:

(1) For mission forces, $27,453,000.

(2) For depot maintenance, $1,589,000.

(3) For other support, $24,187,000.

(i) AIR FORCE RESERVE.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $801,000,000 for expenses, not otherwise provided for, for the operation and maintenance of the Air Force Reserve as follows:

(1) For mission forces, $540,218,000.

(2) For depot maintenance, $127,749,000.

(3) For other support, $133,033,000.

(j) ARMY NATIONAL GUARD.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $1,181,600,000 for expenses, not otherwise provided for, for the operation and maintenance of the Army National Guard as follows:

(1) For training operations, $220,608,000.

(2) For logistical support, $865,662,000.

(3) For headquarters and command support, $84,828,000.

(4) For medical support, $10,502,000.

(k) AIR NATIONAL GUARD.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $1,778,900,000 for expenses, not otherwise provided for, for the operation and maintenance of the Air National Guard as follows:

(1) For mission forces, $1,335,413,000.

(2) For depot maintenance, $330,246,000

(3) For other support, $113,241,000.

(l) NATIONAL BOARD FOR THE PROMOTION OF RIFLE PRACTICE, ARMY.—There is hereby authorized to be appropriated for fiscal year 1984 the amount of $899,000 for the expenses of the Secretary of the Army, upon the recommendation of the National Board for the Promotion of Rifle Practice, under section 4308 of title 10, United States Code, and the expenses of the Secretary of the Army under sections 4309 and 4313 of such title.

(m) CLAIMS, DEFENSE.—There is hereby authorized to be appropriated for fiscal year 1984 the amount of $222,900,000 for payment, not otherwise provided for, of claims authorized by law to be paid by the Department of Defense (except for civil functions).

(n) COURT OF MILITARY APPEALS, DEFENSE.—There is hereby authorized to be appropriated for fiscal year 1984 the amount of $3,372,000 for salaries and expenses for the United States Court of Military Appeals.

GENERAL AUTHORIZATION OF APPROPRIATIONS FOR PAY RAISES, FUEL COSTS, AND INFLATION ADJUSTMENTS

SEC. 402. There are authorized to be appropriated for fiscal year 1984, in addition to the amounts authorized to be appropriated in section 401, such sums as may be necessary—

(1) for increases in salary, pay, retirement, and other employee benefits authorized by law for civilian employees of the Department of Defense whose compensation is provided for by funds authorized to be appropriated in section 401;

(2) for unbudgeted increases in fuel costs; and

(3) for increases as the result of inflation in the cost of activities authorized by section 401.

AUTHORIZATION OF APPROPRIATIONS FOR ASSISTANCE FOR 1984 GAMES OF THE XXIII OLYMPIAD

SEC. 403. (a) Notwithstanding any other provision of law, the Secretary of Defense is authorized—

(1) to provide logistical support and personnel services to the 1984 games of the XXIII Olympiad;

(2) to lend and provide equipment in support of the 1984 games of the XXIII Olympiad; and

(3) to provide such other services in support of the 1984 games of the XXIII Olympiad as the Secretary may consider advisable.

(b) There is authorized to be appropriated to the Department of Defense for fiscal 1984 such sums as may be necessary but not to exceed $50,000,000 for the purpose of carrying out subsection (a). Except for funds used for pay and nontravel related allowances for members of the Armed Forces (other than members of the reserve components called or ordered to active duty to provide support for the XXIII Olympiad), no funds may be obligated for such purpose unless specifically appropriated for such purpose. The costs for pay and nontravel related allowances of members of the Armed Forces (other than members of the reserve components called or ordered to active duty to provide support for the XXIII Olympiad) may not be charged to appropriations made pursuant to this authorization. None of the funds appropriated pursuant to the authorization contained in this section may be obligated until the President approves a justification submitted by the Olympic Law Enforcement Coordinating Council for Olympic arrangements to include security, medical support, and other related matters. Such justification shall delineate the general financial and operational responsibilities of each organization represented on the Council by functional area and identify the Department of Defense support that may be requested, in such level of detail as the Secretary of Defense deems necessary.

PROHIBITION OF USE OF VESSELS WITH FOREIGN-BUILT MAJOR COMPONENTS UNDER CERTAIN LEASES OR SERVICE CONTRACTS

SEC. 404. (a)(1) None of the funds appropriated pursuant to the authorizations of appropriations in section 401 may be obligated or expended for the lease of a vessel, or for the provision of a service through use by a contractor of a vessel, under a contract which will be for a long term or under which the United States will have a substantial termination liability and under which the vessel involved will have a main propulsion system or other major component not built in the United States.

(2) None of the funds appropriated pursuant to the authorizations of appropriations in section 401 may be obligated or expended for a contract that is an agreement to lease or an agreement to provide services and that is (or will be) accompanied by a contract for the actual lease or provision of services if the contract for the actual lease or provision of services is (or will be) a contract described in paragraph (1).

(b) For purposes of subsection (a)—

(1) a contract shall be considered to be for a long term if the term of the contract, including all options under the contract, is for more than 5 years or is for a period longer than one-half the useful life of the vessel; and

(2) the United States shall be considered to have a substantial termination liability under a contract if, as determined under regulations prescribed by the Secretary of Defense, the sum of—

(A) the present value of the amount of the termination liability of the United States under the contract as of the end of the term of the contract (exclusive of any option to extend the contract), and

(B) the present value of the total of the payments to be made by the United States under the contract (excluding any option to extend the contract) attributable to capital-hire,

is more than one-half the price of the vessel involved.

(c) Subsection (a) does not apply with respect to a contract entered into before the date of the enactment of this Act.

SHELTER FOR THE HOMELESS AT MILITARY INSTALLATIONS

SEC. 405. (a)(1) Chapter 151 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2546. Shelter for homeless; incidental services

"(a)(1) The Secretary of a military department may make military installations under his jurisdiction available for the furnishing of shelter to persons without adequate shelter. The Secretary may, incidental to the furnishing of such shelter, provide services as described in subsection (b). Shelter and incidental services provided under this section may be provided without reimbursement.

"(2) The Secretary concerned shall carry out this section in cooperation with appropriate State and local governmental entities and charitable organizations. The Secretary shall, to the maximum extent practicable, use the services and personnel of such entities and organizations in determining to whom and the circumstances under which shelter is furnished under this section.

"(b) Services that may be provided incident to the furnishing of shelter under this section are the following:

"(1) Utilities.

"(2) Bedding.

"(3) Security.

"(4) Transportation.

"(5) Renovation of facilities.

"(6) Minor repairs undertaken specifically to make suitable space available for shelter to be provided under this section.

"(7) Property liability insurance.

"(c) Shelter and incidental services may only be provided under this section to the extent that the Secretary concerned determines will not interfere with military preparedness or ongoing military functions.

"(d) The Secretary of Defense shall prescribe regulations for the administration of this section.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"2546. Shelter for homeless; incidental services.".

(b) Section 2546 of title 10, United States Code, as added by subsection (a), shall take effect on October 1, 1983.

LIMITATION ON CONTRACTING-OUT AT THE SERVICE ACADEMIES

SEC. 406. None of the funds appropriated pursuant to authorizations of appropriations in this title shall be available to carry out at the United States Military Academy, the United States Naval Academy, or the United States Air Force Academy the provisions of Office of Management and Budget Circular A-76 (or any successor circular, order, or other regulation of the executive branch relating to contracting-out commercial and industrial functions).

LOANS TO CERTAIN SCHOOL DISTRICTS IN SAN ANTONIO, TEXAS

SEC. 407. (a) The Secretary of the Army may make a loan to the Fort Sam Houston Independent School District of San Antonio, Texas, in an amount not to exceed $784,000, in order to assist that school district in meeting current expenditures. A loan under this subsection may be made from amounts available to the Army for operation and maintenance for fiscal year 1984. Any such loan shall bear interest at such a rate and be subject to such terms and conditions as the Secretary requires.

(b) The Secretary of the Air Force may make loans to the Randolph Field Independent School District and to the Lackland Independent School District of San Antonio, Texas, in a total amount not to exceed $657,000, in order to assist those school districts in meeting current expenditures. A loan under this subsection may be made from amounts available to the Air Force for operation and maintenance for fiscal year 1984. Any such loan shall bear interest at such a rate and be subject to such terms and conditions as the Secretary requires.

(c) If funds under the Act of September 30, 1950 (Public Law 874, 81st Congress; 20 U.S.C. 236 et seq.), are not provided for fiscal year 1984 to a school district receiving a loan under this section in the full amount that would have been provided to that school district for that fiscal year without regard to the Omnibus Budget Reconciliation Act of 1981, then such loan (including interest) shall be forgiven to the extent that the amount provided to that school district for that year under such Act is less than such full amount.

TITLE V—ACTIVE FORCES

AUTHORIZATION OF END STRENGTHS

SEC. 501. The Armed Forces are authorized strengths for active duty personnel as of September 30, 1984, as follows:

(1) The Army, 778,000.

(2) The Navy, 560,300.

(3) The Marine Corps, 194,600.

(4) The Air Force, 592,500.

QUALITY CONTROL ON ENLISTMENTS INTO THE ARMY FOR FISCAL YEAR 1984

SEC. 502. Effective on October 1, 1983, section 302(a) of the Department of Defense Authorization Act, 1981 (Public Law 96-342; 10 U.S.C. 520 note), is amended by striking out "October 1, 1982" and "September 30, 1983" and inserting in lieu thereof "October 1, 1983" and "September 30, 1984", respectively.

LIMIT ON FUNDS FOR PERMANENT CHANGE OF STATION (PCS) TRAVEL DURING FISCAL YEAR 1984

SEC. 503. (a) During fiscal year 1984, not more than $2,585,626,000 may be spent from funds available to the Department of Defense for permanent change of station travel (including all expenses of such travel for organizational movements). Assignments for temporary duty may not be increased in order to circumvent the limitation in the preceding sentence.

(b) The Secretary of Defense shall take such steps as are necessary, consistent with the requirements of military readiness, to reduce the number of permanent changes of station of members of the Armed Forces. Such steps shall include—

(1) reductions to the minimum essential level in the number of permanent changes of station required within the continental United States;

(2) extensions of the length of tours of duty overseas in locations other than locations that do not allow for accompanied tours; and

(3) reductions in the number of active duty military personnel stationed outside the continental United States.

REDUCTION ON THE NUMBER OF PERSONNEL ASSIGNED TO HEADQUARTERS STAFFS

SEC. 504. The Secretary of Defense shall reduce the total of the strengths authorized by section 501 by a total of 500 personnel to be derived from reductions in positions assigned to headquarters staffs of the military departments, defense agencies, commands, and other components of the Department of Defense.

ALLIED CONTRIBUTIONS TO THE COMMON DEFENSE

SEC. 505. (a) In recognition of the increasing military threat faced by the Western World and in view of the growth, relative to the United States, in the economic strength of Japan, Canada, and a number of Western European countries which has occurred since the signing of the North Atlantic Treaty on April 4, 1949, and the Mutual Cooperation and Security Treaty between Japan and the United States on January 19, 1960, it is the sense of the Congress that—

(1) the burdens of mutual defense now assumed by some of the countries allied with the United States under those agreements are not commensurate with their economic resources;

(2) since May 1978, when each NATO member nation agreed to increase real defense spending annually in the range of 3 per centum, most NATO members except for the United States have failed to meet the 3 per centum real growth commitment consistently and performance toward this goal in 1983 is estimated to be the most deficient, on average, since the goal was established;

(3) since May 1981, when the Government of Japan established its policy to defend the air and sea lines of communication out to 1,000 nautical miles from the coast of Japan, progress to develop the necessary self-defense capabilities to fulfill that pledge has been extremely disappointing;

(4) Japan is the ally of the United States with the greatest potential for improving its self-defense capabilities and should therefore rapidly increase its annual defense spending to the levels required to fulfill that pledge and to enable Japan to field an effective conventional self-defense capability by 1990, including the capability to carry out its 1,000-mile defense policy, a development that would be consonant not only with Japan's current prominent position in the family of nations but also with its unique sensibilities on the issues of war and peace, sensibilities that are recognized and respected by the people of the United States;

(5) the continued unwillingness of such countries to increase their contributions to the common defense to more appropriate levels will endanger the vitality, effectiveness, and cohesiveness of the alliances between those countries and the United States.

(b) It is further the sense of the Congress that the President should seek from each signatory country (other than the United States) of the two treaties referred to in subsection (a) acceptance of international security responsibilities and an agreement to make contributions to the common defense which are commensurate with the economic resources of such country, including, when appropriate, an increase in host nation support.

PROHIBITION ON ASSIGNING TROOPS TO OVERTHROW GOVERNMENT OF NICARAGUA

SEC. 506. No personnel authorized by this title shall be assigned to the mission of overthrowing the government of Nicaragua.

TITLE VI—RESERVE FORCES

AUTHORIZATION OF AVERAGE STRENGTHS FOR SELECTED RESERVE

SEC. 601. (a) For fiscal year 1984 the Selected Reserve of the reserve components of the Armed Forces shall be programed to attain average strengths of not less than the following:

(1) The Army National Guard of the United States, 425,000.

(2) The Army Reserve, 270,700.

(3) The Naval Reserve, 112,600.

(4) The Marine Corps Reserve, 40,300.

(5) The Air National Guard of the United States, 103,400.

(6) The Air Force Reserve, 68,600.

(7) The Coast Guard Reserve, 12,000.

(b) The average strength prescribed by subsection (a) for the Selected Reserve of any reserve component shall be proportionately reduced by (1) the total authorized strength of units organized to serve as units of the Selected Reserve of such component which are on active duty (other than for training) at any time during the fiscal year, and (2) the total number of individual members not in units organized to serve as units of the Selected Reserve of such component who are on active duty (other than for training or for unsatisfactory participation in training) without their consent at any time during the fiscal year. Whenever such units or such individual members are released from active duty during any fiscal year, the average strength prescribed for such fiscal year for the Selected Reserve of such reserve component shall be proportionately increased by the total authorized strength of such units and by the total number of such individual members.

AUTHORIZATION OF END STRENGTHS FOR RESERVES ON ACTIVE DUTY IN SUPPORT OF THE RESERVES

SEC. 602. Within the average strengths prescribed in section 601, the reserve components of the Armed Forces and the National Guard are authorized, as of September 30, 1984, the following number of Reserves to be serving on full-time active duty, and members of the National Guard to be serving in a full-time duty status, for the purpose of organizing, administering, recruiting, instructing, or training the reserve components or the National Guard:

(1) The Army National Guard and the Army National Guard of the United States, 19,494.

(2) The Army Reserve, 10,664.

(3) The Naval Reserve, 13,846.

(4) The Marine Corps Reserve, 801.

(5) The Air National Guard of the United States, 5,915.

(6) The Air Force Reserve, 517.

(b) Upon a determination by the Secretary of Defense that such action is in the national interest, the end strengths prescribed by subsection (a) may be increased by a total of not more than the number equal to 2 per centum of the total end strengths prescribed.

INCREASE IN NUMBER OF CERTAIN PERSONNEL AUTHORIZED TO BE ON ACTIVE DUTY IN SUPPORT OF THE RESERVE COMPONENTS

SEC. 603. (a) The columns under the headings "Army" and "Marine Corps" in the table in section 524(a) of title 10, United States Code, are amended to read as follows:

	"Army	Marine Corps
	1,577	95
	793	48
	291	23".

(b) The amendments made by subsection (a) shall take effect on October 1, 1983.

CLARIFICATION OF FISCAL YEAR 1983 GUARD AND RESERVE STATUS FOR ARMY NATIONAL GUARD AND AIR NATIONAL GUARD

SEC. 604. Section 502 of the Department of Defense Authorization, 1983 (Public Law 97-252; 96 Stat. 726), is amended—

(1) by inserting "and the National Guard" after "the Armed Forces";

(2) by inserting ", and members of the National Guard to be serving in a full-time duty status," after "active duty";

(3) by inserting "or the National Guard" after "reserve components" the second place it appears;

(4) by striking out paragraph (1) and inserting in lieu thereof the following:

"(1) The Army National Guard and the Army National Guard of the United States, 14,419."; and

(5) by striking out paragraph (5) and inserting in lieu thereof the following:

"(5) The Air National Guard and the Air National Guard of the United States, 5,158.".

STATUS OF CERTAIN MEMBERS OF THE NATIONAL GUARD SERVING IN A FULL-TIME DUTY STATUS

SEC. 605. (a)(1) Chapter 3 of title 32, United States Code, is amended by adding at the end thereof the following new section:

"§ 335. Status of certain members performing full-time duty

"Members of the National Guard serving in a full-time duty status for the purpose of organizing, administering, recruiting, instructing, or training the National Guard shall be entitled to all rights, privileges, and benefits of members called to active duty under section 265 of title 10 and shall be considered to be serving on active duty for purposes of sections 524(a) and 976 of such title.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"§ 335. Status of certain members performing full-time duty.".

(b) Not later than November 15, 1983, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and House of Representatives a draft of legislation to provide on a permanent basis that members of the National Guard described in section 335 of title 32, United States Code, as added by subsection (a), are under State control except when explicitly ordered to Federal service in accordance with law.

TITLE VII—CIVILIAN PERSONNEL

AUTHORIZATION OF END STRENGTH

SEC. 701. (a) The Department of Defense is authorized a strength in civilian personnel, as of September 30, 1984, of 1,067,374.

(b) The strength for civilian personnel prescribed in subsection (a) shall be apportioned among the Department of the Army, the Department of the Navy, the Department of the Air Force, and the agencies of the Department of Defense (other than the military departments) in such numbers as the Secretary of Defense shall prescribe. The Secretary of Defense shall report to the Congress within sixty days after the date of enactment of this Act on the manner in which the initial allocation of civilian personnel is made among the military departments and the agencies of the Department of Defense (other than the military departments) and shall include the rationale for each allocation.

(c)(1) In computing the strength for civilian personnel, there shall be included all direct-hire and indirect-hire civilian personnel employed to perform military functions administered by the Department of Defense (other than those performed by the National Security Agency) whether employed on a full-time, part-time, or intermittent basis, but excluding special employment categories for students and disadvantaged youth such as the stay-in-school campaign, the temporary summer aid program and the Federal junior fellowship program and personnel participating in the worker-trainee opportunity program.

(2) Personnel employed under a part-time career employment program established by section 3402 of title 5, United States Code, shall be counted as prescribed by section 3404 of that title. Personnel employed in an overseas area on a part-time basis under a nonpermanent local-hire appointment who are dependents accompanying a Federal civilian employee or a member of a uniformed service on official assignment or tour of duty shall also be counted as prescribed by section 3404 of that title.

(3) Whenever a function, power or duty, or activity is transferred or assigned to a department or agency of the Department of Defense from a department or agency outside of the Department of Defense, or from another department or agency within the Department of Defense, the civilian personnel end-strength authorized for such departments or agencies of the Department of Defense affected shall be adjusted to reflect any increases or decreases in civilian personnel required as a result of such transfer or assignment.

(d) When the Secretary of Defense determines that such action is necessary in the national interest, the Secretary of Defense may authorize the employment of civilian personnel in excess of the number authorized by subsection (a), but such additional number may not exceed 2 per centum of the total number of civilian personnel authorized for the Department of Defense by subsection (a). The Secretary of Defense shall promptly notify the Congress of any authorization to increase civilian personnel strength under this subsection.

PROHIBITION OF CIVILIAN PERSONNEL CEILINGS ON INDUSTRIALLY FUNDED ACTIVITIES DURING FISCAL YEAR 1983

SEC. 702. During fiscal year 1983, the Secretary of Defense may authorize the employment of civilian personnel at industrially-funded activities of the Department of Defense without regard to the number of civilian employees for the Department of Defense authorized by section 601 of the Department of Defense Authorization Act, 1983 (Public Law 97-252; 96 Stat. 728), and such activities shall be operated during such year without regard to any statutory or administrative civilian personnel ceiling.

TITLE VIII—MILITARY TRAINING STUDENT LOADS

AUTHORIZATION OF TRAINING STUDENT LOADS

SEC. 801. (a) For fiscal year 1984, the components of the Armed Forces are authorized average military training student loads as follows:

(1) The Army, 71,817.
(2) The Navy, 66,911.
(3) The Marine Corps, 21,105.
(4) The Air Force, 49,007.
(5) The Army National Guard of the United States, 21,105.
(6) The Army Reserve, 12,724.
(7) The Naval Reserve, 2,886.
(8) The Marine Corps Reserve, 3,223.
(9) The Air National Guard of the United States, 2,845.
(10) The Air Force Reserve, 1,705.

(b) The average military student loads for the Army, the Navy, the Marine Corps, and the Air Force and the reserve components authorized in subsection (a) for fiscal year 1984 shall be adjusted consistent with the manpower strengths authorized in titles V, VI, and VII of this Act. Such adjustment shall be apportioned among the Army, the Navy, the Marine Corps, and the Air Force and the reserve components in such manner as the Secretary of Defense shall prescribe.

EXTENSION OF REDUCTION IN NUMBER OF STUDENTS REQUIRED TO BE IN A UNIT OF THE JUNIOR RESERVE OFFICERS' TRAINING CORPS

SEC. 802. Section 602 of the Department of Defense Authorization Act, 1981 (10 U.S.C. 2031 note), is amended by striking out "August 31, 1983" and inserting in lieu thereof "August 31, 1984".

TITLE IX—CIVIL DEFENSE

AUTHORIZATION OF APPROPRIATIONS

SEC. 901. There is hereby authorized to be appropriated for fiscal year 1984 to carry out the provisions of the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2251 et seq.) the sum of $200,000,000.

AMOUNT AUTHORIZED FOR CONTRIBUTIONS FOR STATE PERSONNEL AND ADMINISTRATIVE EXPENSES

SEC. 902. Notwithstanding the second proviso of section 408 of the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2260), $54,000,000 of the amount authorized to be appropriated by section 901 is available for appropriations for contributions to the States under section 205 of such Act (50 U.S.C. App. 2286) for personnel and administrative expenses.

TITLE X—MILITARY PERSONNEL AND COMPENSATION MATTERS

PART A—COMPENSATION MATTERS

4-PERCENT INCREASE IN BASIC PAY AND ALLOWANCES EFFECTIVE ON JANUARY 1, 1984

SEC. 1001. (a) The adjustment required by section 1009 of title 37, United States Code, in certain elements of the compensation of members of the uniformed services to become effective on October 1, 1983, shall not be made.

(b)(1) Subject to the provisions of paragraphs (2) and (3), the elements of compensation specified in sections 1009(a) of title 37, United States Code, shall be increased for members of the uniformed services by 4 percent effective on January 1, 1984.

(2) Subsections (c) and (d) of section 1009 of title 37, United States Code, shall apply to any pay adjustment made pursuant to this section in the same manner as such subsections apply to an increase described in subsection (b)(3) of such section.

(3) None of the increase provided for in paragraph (1) may be used to adjust the basic pay of members of the uniformed services in pay grades E-1 and E-2.

ADJUSTMENT IN BASIC PAY OF CERTAIN OFFICERS WITH PRIOR ENLISTED AND WARRANT OFFICER SERVICE

SEC. 1002. (a) Section 203(d) of title 37, United States Code, is amended to read as follows:

"(d) The basic pay of a commissioned officer who is in pay grade O-1, O-2, or O-3 and who is credited with a total of over four years' active service as a warrant officer and enlisted member shall be computed in the same manner as the basic pay of a commissioned officer in the same pay grade who has been credited with over four years' active service as an enlisted member.".

(b) The amendment made by subsection (a) shall take effect on October 1, 1983.

HAZARDOUS DUTY PAY FOR CERTAIN TOXIC FUEL HANDLERS

SEC. 1003. (a) Section 301(a)(12) of title 37, United States Code, is amended by inserting "or the testing of aircraft or missile systems (or components of such systems) during which highly toxic fuels or propellants are used" after "propellants".

(b) The amendment made by subsection (a) shall take effect on October 1, 1983.

CLARIFICATION OF ELIGIBILITY FOR SEPARATION PAY

SEC. 1004. (a) Subsection (c) of section 1174 of title 10, United States Code, is amended to read as follows:

"(c)(1) Except as provided in paragraphs (2) and (3), a member of an armed force other than a regular member who after September 14, 1981, is discharged or released from active duty and who has completed five or more, but fewer than twenty, years of active service immediately before that discharge or release is entitled to separation pay computed under subsection (d)(1) or (d)(2), as determined by the Secretary concerned, if—

"(A) the member's discharge or release from active duty is involuntary; or

"(B) the member was not accepted for an additional tour of active duty for which he volunteered.

"(2) If the Secretary concerned determines that the conditions under which a member described in paragraph (1) is discharged or separated do not warrant separation pay under this section, that member is not entitled to that pay.

"(3) A member described in paragraph (1) who was not on the active-duty list when discharged or separated and who had not completed at least five years of continuous active duty immediately before such discharge or release is not entitled to separation pay under this section. For purposes of this paragraph, a period of active duty is continuous if it is not interrupted by a break in service of more than thirty days.".

(b) Subsection (g)(2) of such section is amended by inserting ", other than section 1212 of this title," after "any other provision of law".

(c) The amendments made by this section shall take effect on October 1, 1983.

FREEZE OF VARIABLE HOUSING ALLOWANCE AT FISCAL YEAR 1983 RATES

SEC. 1005. During fiscal year 1984, the rates at which the variable housing allowance under section 403(a)(2) of title 37, United States Code, is paid shall be the same as the rates in effect on September 30, 1983.

VARIABLE HOUSING ALLOWANCE FOR RESERVES ON ACTIVE DUTY FOR A PERIOD OF 140 DAYS OR MORE

SEC. 1006. (a) Section 403(a)(2) of title 37, United States Code, is amended—

(1) by striking out "A member" in the first sentence of subparagraph (A) and inserting in lieu thereof "Except as provided in subparagraph (D) of this paragraph, a member"; and

(2) by adding at the end thereof the following new subparagraph:

"(D) A member of a reserve component is not entitled to a variable housing allowance while on active duty under a call or order to active duty specifying a period of less than one hundred and forty days.".

(b) The amendments made by subsection (a) shall apply only with respect to members called or ordered to active duty after September 30, 1983.

CLARIFICATION OF RULES FOR PAYMENT PER DIEM

SEC. 1007. (a) Section 402(e) of title 37, United States Code, is amended—

(1) by inserting "(1)" after "(e)"; and

(2) by adding at the end thereof the following new paragraph:

"(2) For purposes of subsection (b) of this section, a member shall not be considered to be performing travel under orders away from his designated post of duty if such member—

"(A) is an enlisted member serving his first tour of active duty;

"(B) has not actually reported to a permanent duty station pursuant to orders directing such assignment; and

"(C) is not actually traveling between stations pursuant to orders directing a change of station.".

(b) Section 404(f) of such title is amended by adding at the end thereof the following new paragraph:

"(3) For purposes of entitlement to per diem in place of subsistence under subsection (d)(2) of this section, a member shall not be considered under subsection (a)(1) of this section to be performing travel under orders away from his designated post of duty if such member—

"(A) is an enlisted member serving his first tour of active duty;

"(B) has not actually reported to a permanent duty station pursuant to orders directing such assignment; and

"(C) is not actually traveling between stations pursuant to orders directing a change of station.".

TRAVEL AND TRANSPORTATION ALLOWANCE FOR MEMBERS STATIONED OVERSEAS WITH DEPENDENT CHILDREN ATTENDING SCHOOL IN THE UNITED STATES

SEC. 1008. (a)(1) Chapter 7 of title 37, United States Code, relating to allowances for members of the uniformed services, is amended by inserting after section 429 the following new section:

"§ 430. Travel and transportation: dependent children of members stationed overseas

"(a) Under regulations to be prescribed by the Secretary of Defense, a member of a uniformed service who—

"(1) is assigned a permanent duty station outside the United States,

"(2) is accompanied by his dependents at or near his oversea duty station (unless his only dependents are in the category of dependent described in clause (3) of this subsection), and

"(3) has a dependent child who is under twenty-three years of age attending a school in the United States for the purpose of obtaining a secondary or undergraduate college education,

may be paid the allowance set forth in subsection (b) of this section if he otherwise qualifies for such allowance.

"(b) A member described in subsection (a) of this section may be paid a transportation allowance for each unmarried dependent child, who is under twenty-three years of age and is attending a school in the United States for the purpose of obtaining a secondary or undergraduate college education, of one annual trip between the school being attended and the member's duty station in the oversea area and return. The allowance authorized by this section may be transportation in kind or reimbursement therefor, as prescribed by the Secretaries concerned.

"(c) Whenever possible, the Military Airlift Command or Military Sealift Command shall be used, on a space-required basis, for the travel authorized by this section.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"430. Travel and transportation: dependent children of members stationed overseas.".

(b) Section 430 of title 37, United States Code, as added by subsection (a), shall apply only with respect to travel begun after September 30, 1983.

HOSTILE FIRE PAY FOR MEMBERS SERVING IN AREAS THREATENING IMMINENT DANGER

SEC. 1009. (a) Section 310(a) of title 37, United States Code, is amended—

(1) by striking out "or" at the end of clause (2);

(2) by striking out the period at the end of clause (3) and inserting in lieu thereof "; or"; and

(3) by inserting after clause (3) the following new clause:

"(4) was on duty in a foreign area in which he was subject to the threat of physical harm or imminent danger on the basis of civil insurrection, civil war, terrorism, or wartime conditions.".

(b)(1) The heading of section 310 of such title is amended to read as follows:

"§ 310. Special pay: duty subject to hostile fire or imminent danger".

(2) The item relating to such section in the table of sections at the beginning of chapter 5 of such title is amended to read as follows:

"310. Special pay: duty subject to hostile fire or imminent danger.".

(c) The amendments made by this section shall take effect on October 1, 1983.

PART B—RETIRED PAY MATTERS

PERMANENT SIX-MONTH DELAY IN COST-OF-LIVING ADJUSTMENTS FOR RETIRED PAY

SEC. 1011. An adjustment in any year in retired and retainer pay pursuant to section 1401a of title 10, United States Code, shall be effective on November 1 of that year. This section shall not take effect unless a provision of law is enacted providing for an identical effective date for adjustments in annuities payable under subchapter III of chapter 83 of title 5, United States Code.

LIMITATION ON COST-OF-LIVING ADJUSTMENTS IN RETIRED PAY FOR PERSONS UNDER AGE 62 DURING FISCAL YEAR 1986

SEC. 1012. During fiscal year 1986, any adjustment in retired or retainer pay under section 1401a of title 10, United States Code, shall be made, with respect to any person entitled to such adjustment who on the effective date of such adjustment is under age sixty-two, in one-half of the amount by which such adjustment would otherwise be made. This section shall not take effect unless a provision of law is enacted providing for a similar limitation with respect to annuities payable under subchapter III of chapter 83 of title 5, United States Code.

TERMINATION OF SIX-MONTH ROUNDING RULE FOR COMPUTING RETIRED PAY

SEC. 1013. (a)(1) The text of each of the footnotes listed in paragraph (2) is amended to read as follows: "Before applying percentage factor, credit each full month of service that is in addition to the number of full years of service creditable to the member as one-twelfth of a year and disregard any remaining fractional part of a month.".

(2) The footnotes referred to in paragraph (1) are the following:

(A) Footnote 3 of the table in section 1401 of title 10, United States Code.

(B) Footnote 2 of the table in section 1402(a) of such title.

(C) Footnote 1 of the table in section 1402(d) of such title.

(D) Footnote 1 of the table in section 1402a(a) of such title.

(E) Footnote 1 of the table in section 1402a(d) of such title.

(F) Footnote 4 of the table in section 3991 of such title.

(G) Footnote 2 of the table in section 3992 of such title.

(H) Footnote 4 of the table in section 8991 of such title.

(I) Footnote 2 of the table in section 8992 of such title.

(b) Subsection (f) of section 1174 of title 10, United States Code, is amended to read as follows:

"(f) In determining a member's years of active service for the purpose of computing separation pay under this section, each full month of service that is in addition to the number of full years of service creditable to the member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(c)(1) Paragraph (2) of section 6151(b) of such title is amended to read as follows:

"(2) In determining the number of years to be used as a multiplier under this subsection, each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(2) The text of section 6328 of such title is amended to read as follows:

"In determining the total number of years of service to be used as a multiplier in computing the retired pay of officers retiring under this chapter, each full month of service that is in addition to the number of full years of service creditable to an officer is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(3) The first sentence of section 6330(d) of such title is amended to read as follows: "For the purposes of subsection (c), each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(4) The text of section 6404 of such title is amended to read as follows:

"In determining the total number of years of service to be used as a multiplier in computing retired pay and separation pay on discharge under this chapter, each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(d) The fourth sentence of section 423 of title 14, United States Code, is amended to read as follows: "In computing the number of years of service by which the rate of 2½ percent is multiplied, each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(e) Subsection (b) of section 16 of the Coast and Geodetic Survey Commissioned Officers' Act of 1948 (33 U.S.C. 853o) is amended to read as follows:

"(b) In computing the number of years of service of an officer for the purposes of subsection (a), each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(f) Section 211(e) of the Public Health Service Act (42 U.S.C. 212(e)) is amended by striking out "a part of" and all that follows and inserting in lieu thereof "each full month of service that is in addition to the number of full years of service credited to an officer is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(g) The amendments made by this section shall apply with respect to (1) the computation of retired or retainer pay of any individual who becomes entitled to that pay after September 30, 1983, and (2) the recomputation of retired pay under section 1402, 1402a, 3992, or 8992 of title 10, United States Code, of any individual who after September 30, 1983, becomes entitled to recompute retired pay under any such section.

RETIRED PAY FOR CERTAIN OTHERWISE INELIGIBLE RESERVISTS

SEC. 1014. (a) Section 1331(c) of title 10, United States Code, relating to retired pay for nonregular service, is amended by striking out "unless he" the first place it appears and all that follows in such section and inserting in lieu thereof "unless—

"(1) he performed active duty after April 5, 1917, and before November 12, 1918, or after September 8, 1940, and before January 1, 1947; or

"(2) he performed active duty (other than for training) after June 26, 1950, and before July 28, 1953, after August 13, 1961, and before May 31, 1963, or after August 4, 1964, and before March 28, 1973.".

(b) The amendment made by subsection (a) shall apply with respect to retired pay payable for months beginning after September 30, 1983, or the date of the enactment of this Act, whichever is later.

PART C—PERSONNEL MANAGEMENT MATTERS

MODIFICATIONS TO RESERVE OFFICER TRAINING CORPS' SCHOLARSHIP PROGRAM

SEC. 1021. (a)(1) Section 2101(3) of title 10, United States Code, is amended by striking out the period and inserting in lieu thereof "(except that, in the case of a student enrolled in an academic program which has been approved by the Secretary of the military department concerned and which requires more than four academic years for completion of baccalaureate degree requirements, including elective requirements of the Senior Reserve Officers' Training Corps

course, such term includes a fifth academic year or a combination of a part of a fifth academic year and summer sessions).".

(2) Section 2104(a) of such title is amended by inserting "at least" before "two".

(3) Section 2107(c) of such title is amended by inserting after the first sentence the following new sentence: "In the case of a student enrolled in an academic program which has been approved by the Secretary of the military department concerned and which requires more than four academic years for completion of baccalaureate degree requirements, including elective requirements of the Senior Reserve Officers' Training Corps course, financial assistance under this section may also be provided during a fifth academic year or during a combination of a part of a fifth academic year and summer sessions.".

(4) Section 209(a) of title 37, United States Code, is amended by striking out "20" and inserting in lieu thereof "30".

(b)(1) Section 2005 of title 10, United States Code, is amended by adding at the end thereof the following new subsection:

"(f) The Secretary concerned shall require, as a condition to the Secretary providing financial assistance under section 2107 or 2107a of this title to any person, that such person enter into an agreement described in subsection (a). In addition to the requirements of clauses (1) through (4) of such subsection, any agreement required by this subsection shall provide—

"(1) that if such person fails to complete the education requirements specified in the agreement, the Secretary will have the option to order such person to reimburse the United States in the manner provided for in clause (3) of such subsection without the Secretary first ordering such person to active duty as provided for under clause (2) of such subsection and section 2107(f) and 2107a(f) of this title; and

"(2) that any amount owed by such person to the United States under such agreement shall bear interest at the rate equal to the highest rate being paid by the United States on the day on which the reimbursement is determined to be due for securities having maturities of ninety days or less and shall accrue from the day on which the member is first notified of the amount due to the United States as a reimbursement under this section.".

(2) The amendment made by paragraph (1) shall apply with respect to agreements entered into after September 30, 1983.

(c)(1) Section 2107(b)(5) of title 10, United States Code, is amended—

(A) by striking out "either" in the matter preceding subparagraph (A);

(B) by striking out "or" at the end of subparagraph (A);

(C) by striking out the period at the end and inserting in lieu thereof "; or"; and

(D) by adding at the end the following:

"(C)(i) accept an appointment, if offered, as a commissioned officer in the Army, Navy, Air Force, or Marine Corps, as the case may be; and

"(ii) serve in a reserve component of that armed force until the sixth anniversary of the receipt of such appointment, unless such appointment is otherwise extended by subsection (d) of section 2108 of this title, under such terms and conditions as may be prescribed by the Secretary of the military department concerned.".

(2) The second sentence of section 2107(b) of such title is amended—

(A) by inserting "or (5)(C)" after "(5)(B)"; and

(B) by striking out the period at the end and inserting in lieu thereof ", except that performance of service under clause (5)(C) shall include not less than two years of active duty.".

(3) The amendments made by this subsection shall apply with respect to agreements entered into under section 2107(b)(5) of title 10, United States Code, after September 30, 1983.

TRANSFER OF PUBLIC HEALTH SERVICE OFFICERS TO OTHER UNIFORMED SERVICES

SEC. 1022. (a)(1) Section 716 of title 10, United States Code, is amended to read as follows:

"§ 716. Commissioned officers: transfers among the armed forces, the National Oceanic and Atmospheric Administration, and the Public Health Service

"(a) Notwithstanding any other provision of law, the President, within authorized strengths and with the consent of the officer involved, may transfer any commissioned officer of a uniformed service from his uniformed service to, and appoint him in, another uniformed service. The Secretary of Defense, the Secretary of Transportation, the Secretary of Commerce, and the Secretary of Health and Human Services shall jointly establish, by regulations approved by the President, policies and procedures for such transfers and appointments.

"(b) An officer transferred under this section may not be assigned precedence or relative rank higher than that which he held on the day before the transfer.

"(c) In this section, 'uniformed service' means any of the armed forces, the Commissioned Corps of the National Oceanic and Atmospheric Administration, or the Commissioned Corps of the Public Health Service.".

(2) The item relating to such section in the table of sections at the beginning of chapter 41 of such title is amended to read as follows:

"716. Commissioned officers: transfers among the armed forces, the National Oceanic and Atmospheric Administration, and the Public Health Service.".

(b)(1) Chapter 53 of such title is amended by adding at the end thereof the following new section:

"§ 1043. Service credit: service in the National Oceanic and Atmospheric Administration or the Public Health Service

"Active commissioned service in the the National Oceanic and Atmospheric Administration or the Public Health Service shall be credited as active commissioned service in the armed forces for purposes of determining the retirement eligibility and computing the retired pay of a member of the armed forces.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1043. Service credit: service in the National Oceanic and Atmospheric Administration or the Public Health Service.".

(c)(1) Section 533(a)(1) of such title is amended by inserting ", the National Oceanic and Atmospheric Administration, or the Public Health Service" after "in any armed force".

(2) Section 1174(i) of such title is amended—

(A) by inserting "(1)" after "(i)"; and

(B) by adding at the end thereof the following new paragraph:

"(2) Active commissioned service in the National Oceanic and Atmospheric Administration or the Public Health Service shall be credited as active service in the armed forces for the purposes of this section.".

(3) Section 3353(a)(1) of such title is amended—

(A) by striking out "chapters 337 and 363" and inserting in lieu thereof "this chapter and chapter 363"; and

(B) by inserting ", the National Oceanic and Atmospheric Administration, or the Public Health Service" after "in any armed force".

(4) Section 5600(a)(1) of such title is amended by inserting ", the National Oceanic and Atmospheric Administration, or the Public Health Service" after "in any armed force".

(5) Section 8353(a)(1) of such title is amended—

(A) by striking out "chapters 837 and 863" and inserting in lieu thereof "this chapter and chapter 863"; and

(B) by inserting ", the National Oceanic and Atmospheric Administration, or the Public Health Service" after "in any armed force".

(d) Clause (13) of section 3(a) of the Act of August 10, 1956 (33 U.S.C. 857a(a)), is amended to read as follows:

"(13) Section 716, Commissioned officers: transfers among the Armed Forces, the National Oceanic and Atmospheric Administration, and the Public Health Service.".

NOMINATIONS TO SERVICE ACADEMIES

SEC. 1023. (a)(1) Clause (10) of section 4342(a) of title 10, United States Code, relating to the number of cadets at the United States Military Academy, is amended to read as follows:

"(10) One cadet from American Samoa, nominated by the Delegate in Congress from American Samoa.".

(2) Clause (10) of section 6954(a) of such title, relating to the number of midshipmen at the United States Naval Academy, is amended to read as follows:

"(10) One from American Samoa, nominated by the Delegate in Congress from American Samoa.".

(3) Clause (10) of section 9342(a) of such title, relating to the number of cadets at the United States Air Force Academy, is amended to read as follows:

"(10) One cadet from American Samoa, nominated by the Delegate in Congress from American Samoa.".

(b)(1) Clause (8) of section 4342(a) of title 10, United States Code, is amended to read as follows:

"(8) One cadet nominated by the Administrator of the Panama Canal Commission from the children of civilian personnel of the United States Government residing in the Republic of Panama who are citizens of the United States.".

(2) Clause (8) of section 6954(a) of such title is amended to read as follows:

"(8) One nominated by the Administrator of the Panama Canal Commission from the children of civilian personnel of the United States residing in the Republic of Panama who are citizens of the United States.".

(3) Clause (8) of section 9342(a) of such title is amended to read as follows:

"(8) One cadet nominated by the Administrator of the Panama Canal Commission from the children of civilian personnel of the United States Government residing in the Republic of Panama who are citizens of the United States.".

APPOINTMENT OF CITIZENS OF NORTHERN MARIANA ISLANDS AS COMMISSIONED OFFICERS

SEC. 1024. (a) Notwithstanding any provision of law respecting citizenship and in accordance with the covenant entitled "A Covenant to establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States of America" (approved on March 24, 1976, by Public Law 94-241), a citizen of the Northern Mariana Islands who indicates in writing to a commissioned officer of the Armed Forces of the United States an intent to become a citizen, and not a national, of the United States upon full implementation of such covenant, and who is otherwise qualified for military service under applicable laws and regulations, may be appointed as an officer in the Armed Forces of the United States, may be appointed or enrolled in the Senior Reserve Officers' Training Corps program of any of the Armed Forces under chapter 103 of title 10, United States Code, and may be selected to be a participant in the Armed Forces Health Professions Scholarship program under chapter 105 of such title.

(b) This section shall expire upon the establishment of the Commonwealth of the Northern Mariana Islands.

VARIABLE TERMS FOR ENLISTMENTS AND REENLISTMENTS IN REGULAR COMPONENTS

SEC. 1025. Section 505 of title 10, United States Code, is amended by striking out "two, three, four, five, or six years" in subsections (c) and (d) and inserting in lieu thereof "at least two but not more than six years.".

PART D—HEALTH-CARE MATTERS

CHAMPUS PROVISIONS

SEC. 1031. (a) Section 1079 of title 10, United States Code, is amended—

(1) in subsection (a)—

(A) by striking out the period at the end of clause (5) and inserting in lieu thereof "; and"; and

(B) by inserting after such clause the following new clause:

"(6) inpatient mental health services may not (except as provided in subsection (i)) be provided to a patient in excess of sixty days in any year."; and

(2) by adding at the end thereof the following new subsections:

"(i) The limitation in subsection (a)(6) does not apply in the case of inpatient mental health services—

"(1) provided under the program for the handicapped under subsection (d);

"(2) provided as residential treatment care;

"(3) provided as partial hospital care; or

"(4) provided pursuant to a waiver authorized by the Secretary of Defense because of extraordinary medical or psychological circumstances that are confirmed by review by a non-Federal health professional pursuant to regulations prescribed by the Secretary of Defense.

"(j)(1) A benefit may not be paid under a plan covered by this section in the case of a person enrolled in any other insurance, medical service, or health plan to the extent that the benefit is also a benefit under the other plan, except in the case of a plan administered under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.).

"(2)(A) The amount to be paid to a provider of services for services provided under a plan covered by this section may be determined under joint regulations to be prescribed by the Secretary of Defense and the Secretary of Health and Human Services which provide that the amount of such payments shall be determined to the extent practicable in accordance with the same reimbursement rules as apply to payments to providers of services of the same type under title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.).

"(B) In subparagraph (A), 'provider of services' means a hospital, skilled nursing facility, comprehensive outpatient rehabilitation facility, home health agency, or other institutional facility providing services for which payment may be made under a plan covered by this section.

"(k) A plan covered by this section may include provision of liver transplants (including the cost of acquisition and transportation of the donated liver) in accordance with this subsection. Such a liver transplant may be provided if—

"(1) the transplant is for a dependent considered appropriate for that procedure by the Secretary of Defense in consultation with the Secretary of Health and Human Services and such other entities as the Secretary considers appropriate; and

"(2) the transplant is to be carried out at a health-care facility that has been approved for that purpose by the Secretary of Defense after consultation with the Secretary of Health and Human Services and such other entities as the Secretary considers appropriate.".

(b) Subsection (d) of section 1086 of such title is amended to read as follows:

"(d) The provisions of section 1079(j) of this title shall apply to a plan covered by this section.".

(c) The amendments made by this section shall take effect on October 1, 1983, except that clause (6) of section 1079(a) of title 10, United States Code, as added by subsection (a)(1), shall not apply in the case of inpatient mental health services provided to a patient admitted before January 1, 1983, for so long as that patient remains continuously in inpatient status for medically or psychologically necessary reasons and subsection (k) of section 1079 of such title, as added by subsection (a)(1), shall apply with respect to liver transplant operations performed on or after July 1, 1983.

CONTRACT SURGEONS

SEC. 1032. (a)(1) Chapter 55 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 1091. Contract surgeons

"The Secretary concerned may employ contract surgeons for necessary services (including personal services) when he determines they are required.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1091. Contract surgeons.".

(b) Section 201(b) of title 37, United States Code, is amended by striking out "is entitled to basic pay of a commissioned officer in pay grade O-3 with over four, but not more than six," and inserting in lieu thereof "may be paid not more than the basic pay of a commissioned officer in pay grade O-6 with over twenty-six, but not more than thirty,".

(c) Subsection (a) of section 421 of such title is amended to read as follows:

"(a) A contract surgeon who is serving full time with a uniformed service may be paid not more than the basic allowances, and other allowances authorized by this chapter, of a commissioned officer in pay grade O-6 with over twenty-six, but not more than thirty, years of service computed under section 205 of this title.".

(d)(1) Section 4022 of title 10, United States Code, is repealed.

(2) The table of sections at the beginning of chapter 373 of such title is amended by striking out the item relating to section 4022.

(e)(1) Section 9022 of title 10, United States Code, is repealed.

(2) The table of sections at the beginning of chapter 873 of such title is amended by striking out the item relating to section 9022.

(f) The amendments made by this section shall take effect on October 1, 1983.

STUDIES AND DEMONSTRATION PROJECTS RELATING TO HEALTH AND MEDICAL CARE

SEC. 1033. (a)(1) Chapter 55 of title 10, United States Code, is amended by adding after section 1091 (as added by section 1032) the following new section:

"§ 1092. Studies and demonstration projects relating to delivery of health and medical care

"(a)(1) The Secretary of Defense, in consultation with the Secretary of Health and Human Services, shall conduct studies and demonstration projects on the health care delivery system of the uniformed services with a view to improving the quality, efficiency, convenience, and cost effectiveness of providing health care services under this title to members, former members, and their dependents. Such studies and demonstration projects may include the following:

"(A) Alternative methods of payment for health and medical care services.

"(B) Cost-sharing by eligible beneficiaries.

"(C) Methods of encouraging efficient and economical delivery of health and medical care services.

"(D) Innovative approaches to delivery and financing of health and medical care services.

"(E) Alternative approaches to reimbursement for the administrative charges of health care plans.

"(F) Prepayment for medical care services provided to maintain the health of a defined population.

"(2) The Secretary of Defense shall submit to Congress from time to time written reports on the results of the studies and demonstration projects conducted pursuant to this subsection and shall include in such reports such recommendations for improving the health care delivery system for the uniformed services as he considers appropriate.

"(b) Subject to the availability of appropriations for such purpose, the Secretary of Defense may enter into contract with public or private agencies, institutions, and organizations to develop and conduct studies and demonstration projects under subsection (a).".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1092. Studies and demonstration projects relating to delivery of health and medical care.".

(b) Section 1092 of title 10, United States Code, as added by subsection (a), shall take effect on October 1, 1983.

MEDICAL MALPRACTICE PROTECTION FOR HEALTH-CARE PERSONNEL OF THE SOLDIERS' AND AIRMEN'S HOME

SEC. 1034. (a) Subsection (a) of section 1089 of title 10, United States Code, is amended by inserting "the United States

Soldiers' and Airmen's Home," after "the Department of Defense,".

(b) Subsection (f) of such section is amended by striking out "or his designee may, to the extent that he or his designee deems" and inserting in lieu thereof "may, to the extent that the head of the agency concerned considers".

(c) Subsection (g) of such section is amended—

(1) by striking out "and" at the end of clause (2);

(2) by redesignating clause (3) as clause (4); and

(3) by inserting after clause (2) the following new clause (3):

"(3) the Board of Commissioners of the United States Soldiers' and Airmen's Home, in the case of an employee of the United States Soldiers' and Airmen's Home; and".

(d) The amendments made by this section shall apply only to claims accruing on or after the date of the enactment of this Act.

ADJUSTMENTS IN STIPEND PAID TO RECIPIENTS OF ARMED FORCES HEALTH PROFESSIONS SCHOLARSHIPS

SEC. 1035. (a) Section 2121(d) of title 10, United States Code, is amended to read as follows:

"(d) Except when serving on active duty pursuant to subsection (c), a member of the program shall be entitled to a stipend at the rate of $556 per month. That rate shall be increased annually by the Secretary of Defense effective on July 1 of each year (beginning in 1984) by an amount (rounded to the next highest multiple of $1) equal to—

"(1) the amount of such stipend (as previously adjusted (if at all)), multiplied by

"(2) the overall percentage of the adjustment (if such adjustment is an increase) in the rates of basic pay for members of the uniformed services made effective for the fiscal year in which the school year ends.".

(b) The rate payable for stipends under section 2121(d) of title 10, United States Code, as amended by subsection (a), shall be increased by 4 per centum effective on October 1, 1983.

PART E—SURVIVOR BENEFITS

EXPANSION OF SURVIVOR BENEFITS COVERAGE FOR FORMER SPOUSES

SEC. 1041. (a)(1) The second sentence of subsection (a)(5) of section 1448 of title 10, United States Code, is amended by inserting "except in accordance with subsection (b)(3)" after "may not be revoked".

(2) Subsection (b) of such section is amended to read as follows:

"(b)(1) A person who is not married and does not have a dependent child when he becomes eligible to participate in the Plan may elect to provide an annuity to a natural person with an insurable interest in that person. In the case of a person providing an annuity under this paragraph by virtue of eligibility under subsection (a)(1)(B), such an election shall include a designation under subsection (e).

"(2) A person who has a former spouse when he becomes eligible to participate in the Plan may elect to provide an annuity to that former spouse. In the case of a person with a spouse or a dependent child, such an election prevents payment of an annuity to that spouse or child. If there is more than one former spouse, the person shall designate which former spouse is to be provided the annuity. In the case of a person providing an annuity under this paragraph by virtue of eligibility under subsection (a)(1)(B), such an election shall include a designation under subsection (e).

"(3)(A) A person—

"(i) who is a participant in the Plan and is providing coverage for a spouse or a spouse and child, and

"(ii) who has a former spouse who was not that person's former spouse when he became eligible to participate in the Plan,

may (subject to subparagraph (B)) elect to provide an annuity to that former spouse. Any such election terminates any previous coverage under the Plan and must be written, signed by the person, and received by the Secretary concerned within one year after the date of the decree of divorce, dissolution, or annulment.

"(B) A person may not make an election under subparagraph (A) to provide an annuity to a former spouse who that person married after becoming eligible for retired or retainer pay unless—

"(i) the person was married to that former spouse for at least one year, or

"(ii) that former spouse is the parent of issue by that marriage.

"(C) An election under this paragraph may not be revoked except in accordance with section 1450(f) of this title and is effective as of the first day of the first calendar month following the month in which it is received by the Secretary concerned. This paragraph does not provide the authority to change a designation previously made under subsection (e).

"(D) If a person who is married makes an election to provide an annuity to a former spouse under this paragraph, that person's spouse shall be notified of that election.

"(4) A person who elects to provide an annuity to a former spouse under paragraph (2) or (3) shall, at the time of making the election, provide the Secretary concerned with a written statement (in a form to be prescribed by that Secretary and signed by such person and the former spouse) setting forth whether the election is being made pursuant to a written agreement previously entered into voluntarily by such person as a part of or incident to a proceeding of divorce, dissolution, or annulment and (if so) whether such voluntary written agreement has been incorporated in, or ratified or approved by, a court order.".

(3) Section 1450 of title 10, United States Code, is amended—

(A) by striking out "at the time the person to whom section 1448 applies became entitled to retired or retainer pay" in subsection (a)(4); and

(B) by inserting "(without regard to the eligibility of the person making the change of election to make an election under such section)" before the period at the end of the third sentence of subsection (f)(1).

(b) In the case of a person who on the date of the enactment of this Act is a person described in subparagraph (A) of subsection (b)(3) of section 1448 of title 10, United States Code (as amended by subsection (a)(2)), such subsection shall apply to that person as if the one-year period provided for in subparagraph (A) of such subsection began on the date of the enactment of this Act.

(c) Section 1408 of title 10, United States Code, is amended—

(1) by inserting "in the case of a division of property," in subsection (a)(2)(C) before "specifically provides for"; and

(2) by striking out the first sentence of subsection (d)(1) and inserting in lieu thereof the following: "After effective service on the Secretary concerned of a court order with respect to payments by a member to the spouse or former spouse of the member, the Secretary shall, subject to the limitations of this section, make payments from the disposable retired or retainer pay of the member to the spouse or former spouse in the amount provided for in the court order.".

(d)(1) Section 1447(8) of title 10, United States Code, is amended by striking out "annulment, or legal separation," both places it appears and inserting in lieu thereof "or annulment".

(2) Section 1448(a)(3) is amended—

(A) by inserting "for a former spouse" after "an annuity" the second place it appears in subparagraphs (A) and (B); and

(B) by striking out "of this section" both places it appears.

(3) Section 1450(f) of such title is amended—

(A) by striking out "of this subsection" in paragraph (1); and

(B) by striking out "annulment, or legal separation," in paragraph (2) and inserting in lieu thereof "or annulment,".

(4) Section 1006(e)(3) of the Uniformed Services Former Spouses' Protection Act (title X of Public Law 97-252; 96 Stat. 738) is amended by striking out "section" and all that follows and inserting in lieu thereof "section 1072 of title 10, United States Code.".

EXTENSION OF MINIMUM INCOME PROVISION FOR CERTAIN WIDOWS

SEC. 1042. (a) Section 4(a)(1) of the Act entitled "An Act to amend chapter 73 of title 10, United States Code, to establish a Survivor Benefit Plan, and for other purposes", approved September 21, 1972 (10 U.S.C. 1448 note), is amended by striking out "on the effective date of this Act is, or within one calendar year after that date becomes," and inserting in lieu thereof "on September 21, 1972, was, or during the period beginning on September 22, 1972, and ending on March 20, 1974, became,".

(b) Any annuity payable by reason of subsection (a) shall be payable only for months after September 1983.

BENEFITS FOR WIDOWS OF CERTAIN RETIRED RESERVISTS

SEC. 1043. (a) The Secretary concerned shall pay an annuity to any individual who is the surviving spouse or a dependent child of a member or former member of the uniformed services who—

(1) died during the period beginning on September 21, 1972, and ending on September 30, 1978; and

(2) at the time of his death would have been eligible for retired pay under chapter 67 of title 10, United States Code, but for the fact that he was under 60 years of age.

(b) An annuity under subsection (a) shall be paid under the provisions of subchapter II of chapter 73 of title 10, United States Code, in the same manner as if the member or former member had died after September 30, 1980, and had elected under section 1448(a)(2)(B) of such title to participate in the Survivor Benefit Plan established by such subchapter and had made a designation under section 1448(e) of such title to provide an annuity to become effective on the first day after his death.

(c) If an individual entitled to an annuity under this section is also entitled to an annuity under subchapter II of chapter 73 of title 10, United States Code, based upon a subsequent marriage, the individual may not receive both annuities but must elect which to receive.

(d) As used in this section:

(1) The term "uniformed services" means the Armed Forces and the commissioned corps of the Public Health Service and of the National Oceanic and Atmospheric Administration.

(2) The term "surviving spouse" has the meaning given the terms "widow" and widower" in section 1447 of title 10, United States Code.

(3) The term "dependent child" has the meaning given such term in section 1447 of title 10, United States Code.

(4) The term "Secretary concerned" has the meaning given such term in section 101(8) of title 10, United States Code, and includes the Secretary of Commerce, with respect to matters concerning the National Oceanic and Atmospheric Administration, and the Secretary of Health and Human Services, with respect to matters concerning the Public Health Service.

(e) This section shall apply to annuity payments payable for months after August 1984. No benefit shall accrue to any person by virtue of the enactment of this section for any period before September 1, 1984.

PART F—MISCELLANEOUS

ACCEPTANCE OF VOLUNTARY SERVICES FOR MILITARY MUSEUMS AND FAMILY SUPPORT PROGRAMS

SEC. 1051. (a) Chapter 81 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 1587. Authority to accept certain voluntary services

"(a) Notwithstanding section 1342 of title 31, the Secretary of a military department may accept from any person voluntary services to be provided for a museum or a family support program operated by that military department.

"(b) A person providing voluntary services under subsection (a) shall be considered to be an employee for the purposes of chapter 81 of title 5, relating to compensation for work-related injuries, and to be an employee of the Government for the purposes of chapter 171 of title 28, relating to tort claims. Such a person who is not otherwise employed by the Federal Government shall not be considered to be a Federal employee for any other purpose by reason of the provision of such services.".

(b) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 1586 the following new item:

"1587. Authority to accept certain voluntary services.".

EXTENSION OF PILOT DEPARTMENT OF DEFENSE EDUCATIONAL ASSISTANCE LOAN REPAYMENT PROGRAM

SEC. 1052. Section 902(g) of the Department of Defense Authorization Act, 1981 (10 U.S.C. 2141 note), is amended by striking out "October 1, 1983" and inserting in lieu thereof "October 1, 1984".

ACCRUAL FUNDING FOR MILITARY RETIREMENT SYSTEM

SEC. 1053. (a)(1) Title 10, United States Code, is amended by inserting after chapter 73 the following new chapter:

"CHAPTER 74—DEPARTMENT OF DEFENSE MILITARY RETIREMENT FUND

"Sec.
"1461. Establishment and purpose of Fund; definition.
"1462. Assets of Fund.
"1463. Payments from the Fund.
"1464. Board of Actuaries.
"1465. Determination of contributions to the Fund.
"1466. Payments into the Fund.
"1467. Investment of assets of Fund.

"§ 1461. Establishment and purpose of Fund; definition

"(a) There is established on the books of the Treasury a fund to be known as the Department of Defense Military Retirement Fund (hereinafter in this chapter referred to as the 'Fund'), which shall be administered by the Secretary of the Treasury. The Fund shall be used for the accumulation of funds in order to finance on an actuarially sound basis liabilities of the Department of Defense under military retirement and survivor benefit programs.

"(b) In this chapter, 'military retirement and survivor benefit programs' means—

"(1) the provisions of this title creating entitlement to, or determining the amount of, retired or retainer pay; and

"(2) the programs under the jurisdiction of the Department of Defense providing annuities for survivors of members and former members of the armed forces, including chapter 73 of this title, section 4 of Public Law 92-425, and section 5 of Public Law 96-402.

"§ 1462. Assets of Fund

"There shall be deposited into the Fund the following, which shall constitute the assets of the Fund:

"(1) Amounts paid into the Fund under section 1466 of this title.

"(2) Any amount appropriated to the Fund.

"(3) Any return on investment of the assets of the Fund.

"§ 1463. Payments from the Fund

"(a) There shall be paid from the Fund—

"(1) retired pay payable to persons on the retired lists of the Army, Navy, Air Force, and Marine Corps;

"(2) retainer pay payable to members of the Fleet Reserve and Fleet Marine Corps Reserve; and

"(3) benefits payable under programs under the jurisdiction of the Department of Defense that provide annuities for survivors of members and former members of the armed forces, including chapter 73 of this title, section 4 of Public Law 92-425, and section 5 of Public Law 96-402.

"(b) The assets of the Fund are hereby made available for payments under subsection (a).

"§ 1464. Board of Actuaries

"(a)(1) There is established in the Department of Defense a Department of Defense Retirement Board of Actuaries (hereinafter in this chapter referred to as the 'Board'). The Board shall consist of three members, who shall be appointed by the President from among qualified professional actuaries who are members of the Society of Actuaries.

"(2)(A) Except as provided in subparagraph (B), the members of the Board shall serve for a term of 15 years, except that a member of the Board appointed to fill a vacancy occurring before the end of the term for which his predecessor was appointed shall only serve until the end of such term. A member may serve after the end of his term until his successor has taken office. A member of the Board may be removed by the President for misconduct or failure to perform functions vested in the Board, and for no other reason.

"(B) Of the members of the Board who are first appointed under this subsection, one each shall be appointed for terms ending five, ten, and fifteen years, respectively, after the date of appointment, as designated by the President at the time of appointment.

"(3) A member of the Board who is not otherwise an employee of the United States is entitled to receive pay at the daily equivalent of the annual rate of basic pay of the highest rate of basic pay then currently being paid under the General Schedule of subchapter III of chapter 53 of title 5, for each day the member is engaged in the performance of duties vested in the Board and is entitled to travel expenses, including a per diem allowance, in accordance with section 5703 of title 5.

"(b) The Board shall report to the Secretary of Defense annually on the actuarial status of the Fund and shall furnish its advice and opinion on matters referred to it by the Secretary.

"(c) The Board shall review valuations of the Fund under section 1466 of this title and under chapter 95 of title 31 and shall report periodically, not less than once every four years, to the President and Congress on the status of the Fund. The Board shall include in such reports recommendations for such changes as in the Board's judgment are necessary to protect the public interest and maintain the Fund on a sound actuarial basis.

"§ 1465. Determination of contributions to the Fund

"(a) Not later than six months after the Board of Actuaries is first appointed, the Board shall determine the amount that is the present value (as of October 1, 1984) of future benefits payable from the Fund that are attributable to service in the armed forces performed before October 1, 1984. That amount is the original unfunded liability of the Fund. The Board shall determine the period of time over which the original unfunded liability should be liquidated and shall determine an amortization schedule for the liquidation of such liability over that period. Contributions to the Fund for the liquidation of the original unfunded liability in accordance with such schedule shall be made as provided in section 1466(b) of this title.

"(b)(1) The Secretary of Defense shall determine each year, in sufficient time for inclusion in budget requests for the following fiscal year, the total amount of Department of Defense contributions to be made to the Fund during that fiscal year under section 1466(a) of this title. That amount shall be determined as the product of—

"(A) the current estimate of the value of the single level percentage of basic pay to be determined at the time of the next actuarial valuation under subsection (c); and

"(B) the total amount of basic pay expected to be paid during that fiscal year to members of the armed forces (other than the Coast Guard) on active duty or in the Selected Reserve.

"(2) The amount determined under paragraph (1) for any fiscal year is the amount needed to be appropriated to the Department of Defense for that fiscal year for payments to be made to the Fund during that year under section 1466(a) of this title. The President shall include not less than the full amount so determined in the budget transmitted to Congress for that fiscal year under section 1105 of title 31. The President may comment and make recommendations concerning any such amount.

"(c)(1)(A) Not less often than every four years, the Secretary of Defense shall carry out an actuarial valuation of Department of Defense military retirement and survivor benefit programs. Each actuarial valuation of such programs shall include a determination (using the aggregate entry-age normal cost method) of a single level percentage of basic pay to be used for the purposes of subsection (b) and section 1466(a) of this title.

"(2) If at the time of any such valuation (or any valuation carried out in order to comply with chapter 95 of title 31) there has been a change in benefits under a military retirement or survivor benefit program that has been made since the last such valuation and such change in benefits increases or decreases the present value of amounts payable from the Fund, the Secretary of Defense shall determine an amortization methodology and schedule for the amortization of the cumulative unfunded liability (or actuarial gain to the Fund) created by such change and any previous such changes so that the present value of the sum of the amortization payments (or reductions in payments that would otherwise be made) equals the cumulative increase (or decrease) in the present value of such amounts.

"(3) If at the time of any such valuation (or any valuation carried out in order to comply with chapter 95 of title 31) the Secretary of Defense determines that, based upon changes in actuarial assumptions since the last valuation, there has been an actuarial gain or loss to the Fund, the Secretary shall determine an amortization methodology and schedule for the amortization of the cumulative gain or loss to the Fund created by such change in assumptions and any previous such changes in assumptions through an increase or decrease in the payments that would otherwise be made to the Fund.

"(4) Contributions to the Fund in accordance with amortization schedules under paragraphs (2) and (3) shall be made as provided in section 1466(b) of this title.

"(d) All determinations under this section shall be made using methods and assumptions approved by the Board of Actuaries (including assumptions of interest rates and inflation) and in accordance with generally accepted actuarial principles and practices.

"(e) The Secretary of Defense shall provide for the keeping of such records as are necessary for determining the actuarial status of the Fund.

"§ 1466. Payments into the Fund

"(a) The Secretary of Defense shall pay into the Fund at the end of each month as the Department of Defense contribution to the Fund for that month the amount that is the product of—

"(1) the level percentage of basic pay determined under the most recent (as of the first day of the current fiscal year) actuarial valuation under section 1465(c) of this title; and

"(2) the total amount of basic pay paid that month to members of the armed forces (other than the Coast Guard) on active duty or in the Selected Reserve.

Amounts paid into the Fund under this subsection shall be paid from funds available for the pay of members of the armed forces under the jurisdiction of the Secretary of a military department.

"(b)(1) At the beginning of each fiscal year the Secretary of the Treasury shall promptly pay into the Fund from the General Fund of the Treasury the amount certified to the Secretary by the Secretary of Defense under paragraph (3). Such payment shall be the contribution to the Fund for that fiscal year required by sections 1465(a) and 1465(c) of this title.

"(2) At the beginning of each fiscal year the Secretary of Defense shall determine the sum of the following:

"(A) The amount of the payment for that year under the amortization schedule determined by the Board of Actuaries under section 1465(a) of this title for the amortization of the original unfunded liability of the Fund.

"(B) The amount (including any negative amount) for that year under the most recent amortization schedule determined by the Secretary of Defense under section 1465(c)(2) of this title for the amortization of any cumulative unfunded liability (or any gain) to the Fund resulting from changes in benefits.

"(C) The amount (including any negative amount) for that year under the most recent amortization schedule determined by the Secretary of Defense under section 1465(c)(3) of this title for the amortization of any cumulative actuarial gain or loss to the Fund.

"(3) The Secretary of Defense shall promptly certify the amount determined under paragraph (2) each year to the Secretary of the Treasury.

"§ 1467. Investment of assets of Fund

"The Secretary of the Treasury shall invest such portion of the Fund as is not in the judgment of the Secretary of Defense required to meet current withdrawals. Such investments shall be in public debt securities with maturities suitable to the needs of the Fund, as determined by the Secretary of Defense, and bearing interest at rates determined by the Secretary of the Treasury, taking into consideration current market yields on outstanding marketable obligations of the United States of comparable maturities. The income on such investments shall be credited to and form a part of the Fund.".

(2) The tables of chapters at the beginning of subtitle A, and at the beginning of part II of subtitle A, of title 10, United States Code, are amended by inserting after the item relating to chapter 73 the following new item:

"74. Department of Defense Military Retirement Fund ..... 1461".

(b)(1) Section 1464 (relating to the Board of Actuaries) of title 10, United States Code, as added by subsection (a), shall take effect on October 1, 1983.

(2) Sections 1463 (relating to payments from the Fund) and 1466 (relating to payments to the Fund) of title 10, United States Code, as added by subsection (a), shall take effect on October 1, 1984.

(3) There shall be transferred into the Fund on October 1, 1984, any unobligated balances of appropriations made to the Department of Defense that are currently available for retired pay, and amounts so transferred shall be part of the assets of the Fund.

FEE FOR VETERINARY SERVICES

SEC. 1054. The Secretary of Defense shall require that a member of the Armed Forces pay a fee of $10 for each time that a pet of such member is provided veterinary care service by a member of the Armed Forces.

GRADE FOR DIRECTOR OF INTELLIGENCE COMMUNITY STAFF

SEC. 1055. The President is authorized to appoint, by and with the advice and consent of the Senate, Rear Admiral Edward A. Burkhalter to the grade of vice admiral to serve in such grade while holding the position of Director of the Intelligence Community Staff. When appointed to such grade for service in such position, such officer shall be considered to be an additional number in grade for purposes of section 525(b) of title 10, United States Code, during the period beginning on the date of that appointment and ending on the date on which the first vacancy in the grade of vice admiral in the Navy occurs after the date of that appointment.

TRANSPORTATION OF REMAINS OF MILITARY RETIREES DYING IN MILITARY HOSPITALS

SEC. 1056. (a)(1) Chapter 75 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 1490. Transportation of remains of members entitled to retired or retainer pay who die in a military medical facility

"(a) Subject to subsection (b), when a member entitled to retired or retainer pay or equivalent pay dies while properly admitted under chapter 55 of this title to a medical facility of the armed forces located in the United States, the Secretary concerned may transport the remains, or pay the cost of transporting the remains, of the decedent to the place of burial of the decedent.

"(b)(1) Transportation provided under this section may not be to a place outside the United States or to a place further from the place of death than the decedent's last place of permanent residence, and any amount paid under this section may not exceed the cost of transportation from the place of death to the decedent's last place of permanent residence.

"(2) Transportation of the remains of a decedent may not be provided under this section if such transportation is authorized by sections 1481 and 1482 of this title or by chapter 23 of title 38.

"(c) In this section, 'United States' includes the Commonwealth of Puerto Rico and the territories and possessions of the United States.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1490. Transportation of remains of members entitled to retired or retainer pay who die in a military medical facility.".

(b) Section 1490 of title 10, United States Code, as added by subsection (a), shall apply with respect to the transportation of the remains of persons dying after September 30, 1983.

TITLE XI—GENERAL PROVISIONS

TRANSFER AUTHORITY

SEC. 1101. (a)(1) Upon determination by the Secretary of Defense that such action is necessary in the national interest, the Secretary may transfer amounts of authorizations made available to the Department of Defense in this Act between any such authorizations (or any subdivisions thereof). Amounts of authorizations so transferred shall be merged with and be available for the same purposes as the authorization to which transferred.

(2) The total amount of authorizations that the Secretary of Defense may transfer under the authority of this section may not exceed $1,500,000,000.

(b) The authority provided by this section to transfer authorizations—

(1) may only be used to provide authority for higher priority items than the items from which authority is transferred; and

(2) may not be used to provide authority for an item that has been denied authorization by Congress.

(c) The Secretary of Defense shall promptly notify Congress of transfers made under the authority of this section.

LIMITATION ON AUTHORITY TO ENTER INTO CERTAIN CONTRACTS FOR VESSELS

SEC. 1102. (a) Chapter 141 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2401. Requirement for authorization by law of certain contracts relating to vessels

"(a) Except as provided in subsection (c), the Secretary of a military department may not make a contract for the lease of a vessel or for the provision of a service through use by a contractor of a vessel if—

"(1) the contract will be for a long term; or

"(2) under the contract the United States will have a substantial termination liability.

"(b) Except as provided in subsection (c), the Secretary of a military department may not make a contract that is an agreement to lease or an agreement to provide services and that is (or will be) accompanied by a contract for the actual lease or provision of services if the contract for the actual lease or provision of services is (or will be) a contract described in subsection (a).

"(c)(1) The Secretary may make a contract described in subsection (a) or (b) if—

"(A) the Secretary has been specifically authorized by law to make the contract;

"(B) before a solicitation for proposals for the contract was issued the Secretary notified the Committees on Armed Services and on Appropriations of the Senate and House of Representatives of the Secretary's intention to issue such a solicitation and a period of 30 days of continuous session of Congress expired following the date on which that notice was received by such committees before the solicitation was issued; and

"(C) the Secretary has notified the Committees on Armed Services and on Appropriations of the Senate and House of Representatives of the proposed contract and provided a detailed description of the terms of the proposed contract and a justification for entering into the proposed contract rather than providing for the lease or services involved through purchase of the vessel to be used under the contract, and a period of 30 days of continuous session of Congress have expired following the date on which notice was received by such committees.

"(2) For purposes of paragraphs (1)(B) and (1)(C), the continuity of a session of Congress is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in a computation of such 30-day period.

"(d) For purposes of subsection (a)—

"(1) a contract shall be considered to be for a long term if the term of the contract, including all options under the contract, is for more than five years or is for a period longer than one-half the useful life of the vessel; and

"(2) the United States shall be considered to have a substantial termination liability under a contract if, as determined under regulations prescribed by the Secretary of Defense, the sum of—

"(A) the present value of the amount of the termination liability of the United States under the contract as of the end of the term of the contract (exclusive of any option to extend the contract), and

"(B) the present value of the total of the payments to be made by the United States under the contract (excluding any option to extend the contract) attributable to capital-hire,

is more than one-half the price of the vessel involved.".

(b) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"2401. Requirement for authorization by law of certain contracts relating to vessels.".

LIMITATION ON PROCUREMENT OF BINARY CHEMICAL WEAPONS

SEC. 1103. Notwithstanding any other provision of law, no funds may be obligated or expended after the date of the enactment of this Act for the production of binary chemical weapons unless the President certifies to the Congress that for each one-hundred-and-fifty-five-millimeter binary artillery shell or aircraft-delivered binary aerial bomb produced a serviceable unitary artillery shell from the existing arsenal shall be rendered permanently useless for military purposes.

LIMITATION ON WAIVERS OF COST-RECOVERY REQUIREMENTS UNDER ARMS EXPORT CONTROL ACT

SEC. 1104. The authority of the President under section 21(e)(2) of the Arms Export Control Act may be exercised without regard to the limitation imposed by section 770 of the Department of Defense Appropriation Act, 1983 (as contained in Public Law 97-377; 96 Stat. 1862).

WAIVER OF LIMITATION ON FOREIGN MILITARY SALES PROGRAM

SEC. 1105. The Arms Export Control Act shall be administered as if section 747 of the Department of Defense Appropriation Act, 1983 (as contained in Public Law 97-377; 96 Stat. 1858) had not been enacted into law.

F/A-18 AIRCRAFT PROGRAM

SEC. 1106. The Secretary of the Navy may carry out the F/A-18 aircraft program without regard to the first proviso in the paragraph under the heading "AIRCRAFT PROCUREMENT, NAVY" in title IV (PROCUREMENT) of the Department of Defense Appropriation Act, 1983 (as contained in Public Law 97-377; 96 Stat. 1841).

NAME OF SCHOOL OF MEDICINE AT THE UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

SEC. 1107. The School of Medicine of the Uniformed Services University of the Health Sciences shall after the date of the enactment of this Act be known and designated as the "F. Edward Hébert School of Medicine". Any reference to such school of medicine in any law, regulation, map, document, or other record of the United States shall after such date be deemed to be a reference to such school of medicine as the F. Edward Hébert School of Medicine.

PROHIBITION ON PURCHASE OF CERTAIN TYPEWRITERS

SEC. 1108. None of the funds available to the Department of Defense shall be available for the procurement of manual typewriters which were manufactured by facilities located within states which are signatories to the Warsaw Pact.

REQUIREMENT OF AUTHORIZATION OF APPROPRIATIONS FOR WORKING-CAPITAL FUNDS

SEC. 1109. (a) The second sentence of section 2208(d) of title 10, United States Code, is amended to read as follows: "In addition, such amounts may be appropriated for the purpose of providing capital for working-capital funds as have been specifically authorized by law.".

(b) The amendment made by subsection (a) shall apply only with respect to appropriations for fiscal years beginning after September 30, 1984.

RESTORATION OF BEDFORD AIR FORCE STATION, VIRGINIA

SEC. 1110. The Secretary of the Air Force may remove from the site of the former Bedford Air Force Station, Virginia, the improvements made to that site by the Air Force and may restore the premise as provided in the license from the United States Forest Service of the Department of Agriculture authorizing the use of that site by the Air Force.

ENDORSEMENT OF REPORT ON IMPROVED STRATEGIC COMMUNICATIONS

SEC. 1111. (a) The Congress finds that the report to the Congress by the Secretary of Defense entitled "Direct Communications Links and Other Measures to Enhance Stability", dated April 11, 1983, and submitted to the Congress pursuant to section 1123 of the Department of Defense Authorization Act, 1983 (Public Law 97-252; 96 Stat. 756), contains several significant proposals that if implemented would, taken together, make significant progress toward eliminating the danger of accident or misinterpretation leading to nuclear war. Among the proposals in that report that Congress specifically finds constructive are proposals—

(1) to enhance the speed and quality of communications between the Governments of the United States and the Soviet Union;

(2) to establish a communications link between the senior military commands of the United States and the Soviet Union; and

(3) to develop a system of prior notification between the United States and the Soviet Union of missile launches and military exercises by either nation that could be misinterpreted by the other and therefore be destabilizing.

(b) The Congress—

(1) endorses the findings in the report described in subsection (a) and urges the President and the Secretary of Defense to implement as rapidly as possible the proposals made in that report;

(2) suggests that, when practicable and not harmful to the national security of the United States, the United States should unilaterally implement confidence-building measures (such as prior notification of missile launches and military exercises) on a temporary, voluntary basis and should invite the Soviet Union to join in implementing those measures; and

(3) endorses proposals that the United States, through its arms control negotiators, should seek a separate, limited agreement with the Soviet Union on confidence-building measures, such as those recommended in the report described in subsection (a), designed to reduce the danger of accident or misinterpretation leading to nuclear war.

REPORT ON MANAGEMENT OF SPARE PARTS

SEC. 1112. (a) The Secretary of Defense shall submit to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives, by June 1, 1984, a comprehensive report on the management by the Department of Defense of acquisition of initial and replenishment spare parts and on the status of efforts within the Department of Defense (including particularly the Defense Logistics Agency and the military departments) to

correct problems associated with increased costs of such parts. The Secretary shall include in the report the following:

(1) The status of efforts to ensure that procurement method codes (PMC's) used to denote the method of procurement for spare parts are accurately and appropriately applied.

(2) With respect to technical data required by a contract to be delivered to the Department of Defense, the status of efforts to identify and obtain such data that are missing and to identify and correct such data that are inaccurate or incomplete.

(3) The status of efforts to enhance the Department of Defense High Dollar Spare Parts Breakout Program.

(4) The number of, and the organizational identity of, personnel assigned to the efforts referred to in paragraphs (1), (2), and (3).

(5) The status of efforts to automate the procurement process.

(6) A brief summary of any audit, investigation, or study relating to the acquisition or management of spare or replenishment parts conducted by or for any organization within the Department of Defense during the period beginning on the date of the interim report required in subsection (c) and ending on the date of the submission of the report under this subsection, to be accompanied by a copy of all current regulations or proposed defense regulations relating specifically to the acquisition or management of spare or replenishment parts.

(7) An analysis of the feasibility and desirability of establishing a statutory or contractual time limit on the protection from disclosure outside the Department of Defense given technical data delivered by contractors to the Department of Defense with limited rights (as defined in the Defense Acquisition Regulations).

(8) An analysis of the feasibility and desirability of withholding Department of Defense contracts from contractors who have obtained unreasonable profits on defense contracts or have sold items to the Department of Defense at unjustifiable prices, until any such excess amounts have been repaid.

(b) The report under subsection (a) shall also include information showing the following:

(1) The number and total dollar value of parts acquired by the Department of Defense during each of 1982 and 1983 from mandatory and nonmandatory Federal Supply Schedules, shown according to Federal supply class.

(2) The number and total dollar value of parts acquired by the Department of Defense during each of 1982 and 1983 through the Department of Defense supply system.

(3) The number of parts acquired during each of 1982 and 1983 in a total dollar amount for the year in excess of $10,000, and the total dollar value of those parts, that were acquired through each of the following methods:

(A) By fixed-price contract with firm prices on individual items established before the items were ordered.

(B) By fixed-price contract with prices negotiated for individual items after the parts were ordered.

(C) By competition.

(D) By sole source contract, identifying separately those items which were purchased from a prime contractor not the manufacturer of the item and those which were purchased from the manufacturer.

(4) The number and total dollar value of parts acquired during each of 1982 and 1983 shown by procurement method code.

(5) The number of parts and the total dollar value of those parts broken out from a prime contract during each of 1982 and 1983 under the Department of Defense High-Dollar Spare Parts Breakout Program.

(c) Not later than December 1, 1983, the Secretary shall submit to the committees named in subsection (a) an interim report on the progress being made by the Department of Defense on the acquisition and management of spare parts by the Department. The report shall address at least the following subjects:

(1) With respect to each major system approved for use by a military department after January 1, 1980—

(A) the cost of initial and replenishment spare parts bought for that system for each fiscal year from fiscal year 1980 through 1983;

(B) the portion of those parts (shown by number of items and by cost) bought directly from the prime contractor; and

(C) if unlimited rights to technical data for those parts to which the Government would not otherwise be entitled were acquired by the Government, the cost of acquiring those rights.

(2) A brief summary of any audit, investigation, or other study conducted by or for any organization within the Department of Defense since January 1, 1980, relating to the acquisition or management of initial or replenishment spare parts, including the identity and purpose of any current working group.

(d) The Secretary of Defense shall put into effect at the earliest practicable date policies and procedures to achieve a long-term solution to problems relating to excessive costs of, and long-lead times in the acquisition of, initial and replenishment parts. In formulating such policies and procedures, the Secretary shall consider the following recommendations:

(1) Parts should be acquired competitively whenever feasible and practicable.

(2) Parts should be acquired through Federal Supply Schedules and the Department of Defense supply system.

(3) Parts should be acquired in economic order quantities and on a multiyear basis whenever feasible and practicable.

(4) On all major system acquisitions, contractors should be required to identify in their contract proposals the cost to the Government of acquiring unlimited rights in technical data and the extent to which the contractor uses standard commercial products in order to allow the Government to assess the desirability of acquiring those unlimited rights and to enable the Government to assess properly the total life-cycle cost of the system.

(5) Contractors should be required to identify the manufacturer of a part and the manufacturer's part number.

(6) Consideration should be given early in the acquisition process to determinations of whether acquisition of unlimited rights in technical data is desirable, taking into consideration that the cost of acquiring reprocurement data may in some instances outweigh the benefits to be derived from such purchase.

(7) When unlimited data rights in technical data are acquired from a contractor, the contractor should be required to provide to the Government data necessary to incorporate changes in design or technology.

(8) Before ordering any spare part, the contracting officer should review the acquisition history of that part.

(e) During fiscal year 1984, the Secretary shall continue to compile the information required to prepare the report under subsection (a).

DEPARTMENT OF DEFENSE DIRECTOR OF OPERATIONAL TEST REVIEW AND EVALUATION

SEC. 1113. (a)(1) Chapter 4 of title 10, United States Code, is amended by inserting after section 136 the following new section:

"§ 136a. Director of Operational Test Review and Evaluation: appointment; powers and duties

"(a)(1) There is a Director of Operational Test Review and Evaluation in the Department of Defense, appointed from civilian life by the President, by and with the advice and consent of the Senate. The Director shall be appointed without regard to political affiliation and solely on the basis of fitness to perform the duties of the office of Director. A commissioned officer of the Armed Services may serve in an Acting capacity as Director without prejudice to his commissioned status as an officer. The Director may be removed from office by the President. The President shall communicate the reasons for any such removal to both Houses of Congress.

"(2) In this section—

"(A) 'Operational test and evaluation' means—

"(i) the field test, under realistic combat conditions, of any item of (or key component of) weapons, equipment, or munitions for the purpose of determining the effectiveness and suitability of the weapons, equipment, or munitions for use in combat by typical military users; and

"(ii) the evaluation of the results of such test.

"(B) 'Major defense acquisition program' means a Department of Defense acquisition program that is a major defense acquisition program for purposes of section 139a(a)(1) of this title or that is designated as such a program by the Director for purposes of this section.

"(b) The Director is the principal adviser to the Secretary of Defense on operational test and evaluation in the Department of Defense. The Director shall—

"(1) recommend policies and procedures for the conduct of operational test and evaluation in the Department of Defense;

"(2) upon request, provide guidance to and consult with the Secretary of Defense and the Secretaries of the military departments with respect to operational test and evaluation in the Department of Defense in general and with respect to specific operational test and evaluation to be conducted in connection with a major defense acquisition program;

"(3) coordinate operational test conducted jointly by more than one military department or defense agency;

"(4) analyze the results of the operational test and evaluation conducted for each major defense acquisition program and report concurrently to the Secretary of Defense and the Committees on Armed Services and on Appropriations of the Senate and House of Representatives on—

"(A) whether the test and evaluation performed was adequate; and

"(B) whether the test and evaluation results confirm that the items or components actually tested are effective and suitable for combat; and

"(5) review and make recommendations to the Secretary of Defense on all budgetary and financial matters relating to operational test and evaluation, including operational test facilities and equipment, in the Department of Defense.

"(c) The Director reports directly, without intervening review or approval, to the Secretary of Defense. The Director shall consult closely with, but is independent of, the Under Secretary of Defense for Research and Engineering and all other officers and entities of the Department of Defense responsible for research and development.

"(d)(1) The Secretary of a military department shall report promptly to the Director the results of all operational test and evaluation conducted by the military department and of all studies conducted by the military department in connection with operational test and evaluation in the military department.

"(2) The Director may require that such observers as he designates be present during the preparation for and the conduct of the test part of any operational test and evaluation conducted in the Department of Defense.

"(3) The Director shall have access to all records and data in the Department of Defense (including the records and data of each military department) that the Director considers necessary to review in order to carry out his duties under this section.

"(e)(1) Operational testing of a major defense acquisition program may not be conducted until the Director has approved in writing the adequacy of the plans (including the adequacy of projected levels of funding) for operational test and evaluation to be conducted in connection with that program.

"(2) A final decision within the Department of Defense to proceed with a major defense acquisition program beyond low-rate initial production may not be made until the Director has submitted to the Secretary of Defense and the Committees on Armed Services and on Appropriations of the Senate and House of Representatives the report with respect to that program required by subsection (b)(4).

"(f)(1) The Director shall prepare an annual report summarizing the operational test and evaluation activities of the Department of Defense during the preceding fiscal year. Each such report shall be submitted concurrently to the Secretary of Defense and the Congress not later than January 15 immediately following the end of the fiscal year for which the report is prepared. The report shall include such comments and recommendations as the Director considers appropriate, including comments and recommendations on resources and facilities available for operational test and evaluation and levels of funding made available for operational test and evaluation activities. The Secretary may comment on any report of the Director to Congress under this paragraph.

"(2) The Director shall comply with requests from Congress (or any committee of either House of Congress) for information relating to operational test and evaluation in the Department of Defense.

"(g) The President shall include in the budget transmitted to Congress pursuant to section 1105 of title 31 for each fiscal year a separate statement of estimated expenditures and proposed appropriations for that fiscal year for the activities of the Director of Operational Test Review and Evaluation in carrying out the duties and responsibilities of the Director under this section.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 136 the following new item:

"136a. Director of Operational Test Review and Evaluation: appointment; powers and duties.".

(c) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"Director of Operational Test Review and Evaluation, Department of Defense.".

(d) The amendments made by this section shall take effect on October 1, 1983.

ASSISTANT SECRETARIES IN THE DEPARTMENT OF DEFENSE

SEC. 1114. (a)(1) Subsection (a) of section 136 of title 10, United States Code, is amended by striking out "seven" and inserting in lieu thereof "ten";

(2) Subsection (b) of such section is amended—

(A) by inserting "(1)" after "(b)";

(B) by designating the second sentence of such subsection as paragraph (2);

(C) by designating the fourth sentence of such subsection as paragraph (3) and by striking out "Reserve Affairs" in such sentence and inserting in lieu thereof "Logistics";

(D) by striking out "reserve component" in the fifth sentence of such subsection and inserting in lieu thereof "logistics";

(E) by inserting after paragraph (3) of such subsection (as designated by clause (C)) the following paragraphs:

"(4) One of the Assistant Secretaries shall be the Assistant Secretary of Defense for Reserve Affairs. He shall have as his principal duty the overall supervision of reserve component affairs of the Department of Defense.

"(5) One of the Assistant Secretaries shall be the Assistant Secretary of Defense for Command, Control, Communications, and Intelligence. He shall have as his principal duty the overall supervision of command, control, communications, and intelligence affairs of the Department of Defense.";

(F) by designating the sentence beginning "In addition" as paragraph (6) and in such sentence—

(i) striking out "In addition, one" and inserting in lieu thereof "One";

(ii) redesignating clauses (1) through (5) as clauses (A) through (E), respectively;

(iii) redesignating subclauses (A) through (D) of subclauses (i) through (iv), respectively; and

(iv) striking out "clauses (1)-(4)" and inserting in lieu thereof "clauses (A) through (D)".

(3) Subsection (f) of such section is repealed.

(b) Section 175(c) of title 10, United States Code, is amended by striking out "Manpower and".

(c)(1) The first sentence of section 3013 of title 10, United States Code, is amended by striking out "four" and inserting in lieu thereof "five".

(2) The first sentence of section 5034(a) of such title is amended by striking out "three" and inserting in lieu thereof "four".

(d) Section 5315 of title 5, United States Code, is amended—

(1) by striking out "(7)" after "Assistant Secretaries of Defense" and inserting in lieu thereof "(10)";

(2) by striking out "(4)" after "Assistant Secretaries of the Army" and inserting in lieu thereof "(5)"; and

(3) by striking out "(3)" after "Assistant Secretaries of the Navy" and inserting in lieu thereof "(4)".

(e) The amendments made by this section shall take effect on October 1, 1983.

TWO-YEAR EXTENSION OF PROHIBITION ON CONTRACTS FOR THE PERFORMANCE OF FIREFIGHTING AND SECURITY FUNCTIONS

SEC. 1115. (a) Except as provided in subsection (b), funds appropriated to the Department of Defense may not be obligated or expended before October 1, 1985, for the purpose of entering into a contract for the performance of firefighting or security-guard functions at any military installation or facility.

(b) The prohibition in subsection (a) does not apply—

(1) to a contract to be carried out at a location outside the United States (including its commonwealths, territories, and possessions) at which military personnel would have to be used for the performance of the function described in subsection (a) at the expense of unit readiness;

(2) to a contract to be carried out on a Government-owned but privately operated installation; or

(3) to a contract (or the renewal of a contract) for the performance of a function being performed by contractor personnel on the date of the enactment of this Act.

(c) Not later than March 1, 1984, the Secretary of Defense shall submit to Congress a written report containing an assessment of the special needs of the Department of Defense with respect to firefighting and base security and an assessment of how those needs are met by both Federal employees and contract personnel. The report shall be prepared in consultation with the United States Fire Administrator.

REPEAL OF REQUIREMENT FOR RETIREE SUGGESTION PROGRAM

SEC. 1116. (a) Section 2390 of title 10, United States Code, is repealed.

(b) The table of sections at the beginning of chapter 141 of such title is amended by striking out the item relating to section 2390.

LIMITATION ON AUTHORITY TO CONSOLIDATE CERTAIN FUNCTIONS WITHIN THE DEPARTMENT OF DEFENSE

SEC. 1117. (a) Section 125 of title 10, United States Code, is amended by adding at the end the following new subsection:

"(e) Notwithstanding subsection (a), the Secretary of Defense—

"(1) may not test the transfer, reassignment, or consolidation of a function, power, or duty of a military department to a component of the Department of Defense outside a military department unless the test has been specifically authorized by law; and

"(2) may not carry out the transfer, reassignment, or consolidation of a function, power, or duty of a military department to a component of the Defense Department outside a military department unless the transfer, reassignment, or consolidation has been specifically authorized by law after the completion of the study of such transfer, reassignment, or consolidation.".

(b)(1) Clause (1) of section 125(e) of title 10, United States Code, as added by subsection (a), shall apply to tests begun on or after the date of the enactment of this Act.

(2) Clause (2) of section 125(e) of title 10, United States Code, as added by subsection (a), shall apply to transfers, reassignments, and consolidations after January 1, 1983.

OFFSHORE DRILLING AFFECTING NAVAL OPERATIONS

SEC. 1118. (a) The Secretary of the Navy shall submit a report to the Committees on Armed Services of the Senate and House of Representatives on the potential effect on

naval operations of any proposed lease by the Department of the Interior of offshore lands for oil or gas drilling.

(b) The Secretary of the Navy shall define offshore zones along the United States in which oil or gas drilling would cause appreciable impact on naval operations. The Secretary shall transmit to Congress and to the Secretary of the Interior a report describing the zones so established and the justification for each such zone.

USE OF POLYGRAPHS BY THE DEPARTMENT OF DEFENSE

SEC. 1119. The Secretary of Defense may not, before April 15, 1984, use, enforce, issue, implement, or otherwise rely on any rule, regulation, directive, policy, decision, or order that would permit the use of polygraph examinations in the case of civilian employees of the Department of Defense or members of the Armed Forces in any manner or to any extent greater than was permitted under rules, regulations, directives, policies, decisions, or orders of the Department of Defense in effect on August 5, 1982.

ROUTINE PORT SERVICES

SEC. 1120. (a) Section 7227(b) of title 10, United States Code, is amended—

(1) by inserting "(1)" after "(b)"; and

(2) by adding at the end thereof the following new paragraph:

"(2) When furnishing routine port services under this section to naval vessels operating as part of a multinational naval force of the North Atlantic Treaty Organization, the Secretary may furnish such services without reimbursement if such services are provided under a multinational standardization agreement that provides for the reciprocal furnishing of routine port services to naval vessels of the United States without reimbursement. If routine port services are furnished under this section by a working-capital fund activity of the Navy established under section 2208 of this title and such activity is not reimbursed directly for the costs incurred by the activity in furnishing those services by reason of this paragraph, the working-capital fund activity shall be reimbursed for such costs out of operating funds currently available to the Navy.".

(b) The amendments made by subsection (a) shall take effect on October 1, 1983.

ONE-YEAR POSTPONEMENT FOR CERTAIN DEPOSITS FOR CIVIL SERVICE RETIREMENT BASED ON MILITARY SERVICE

SEC. 1121. Section 8334(j)(2)(A) of title 5, United States Code, is amended by striking out "October 1, 1982;" and inserting in lieu thereof "October 1, 1983;".

REPORT ON COST SAVINGS UNDER CONTRACTING OUT PROCEDURES

SEC. 1122. (a) Not later than April 15, 1984, the Secretary of Defense shall submit a report to Congress describing the experience of the Department of Defense since January 1, 1981, with conversion to contractor operation of commercial or industrial type functions of the Department of Defense which previously had been performed by Department of Defense civilian or military personnel.

(b)(1) The report under subsection (a) shall include with respect to each function of the Department of Defense converted to contractor operation since January 1, 1981—

(A) the estimated cost (as of the date of the award of the contract) of performance of the function by the Government,

(B) the contractor's estimated cost of performance of the function in the bid of the contractor,

(C) the actual cost (as of the end of the contract or the date of the report) of contractor operation of such function, and

(D) the savings (shown in dollars and as a percentage) for the operation of such function since conversion to contractor performance.

(2) The report shall also show—

(A) the average savings (shown in dollars and as a percentage) of all functions converted to contractor performance since January 1, 1981, as projected at the time of contracting and as realized at the end of the contract or the date of the report,

(B) the dollar amount and percentage of such contracts awarded to small businesses, and

(C) the number of Federal employees whose employment by the Government was terminated as a result of conversion of such functions to contractor performance.

PERFORMANCE OF CIVIL FUNCTIONS BY MILITARY OFFICERS

SEC. 1123. (a) Section 973 of title 10, United States Code, relating to performance of civil functions by officers of the Armed Forces, is amended by striking out subsection (b) and inserting in lieu thereof the following:

"(b)(1) This subsection applies—

"(A) to a regular officer of an armed force on the active-duty list (and a regular officer of the Coast Guard on the active duty promotion list);

"(B) to a retired regular officer of an armed force serving on active duty under a call or order to active duty for a period in excess of 180 days; and

"(C) to a reserve officer of an armed force serving on active duty under a call or order to active duty for a period in excess of 180 days.

"(2)(A) Except as otherwise authorized by law, an officer to whom this subsection applies may not hold, or exercise the functions of, a civil office in the Government of the United States—

"(i) that is an elective office;

"(ii) that requires an appointment by the President by and with the advice and consent of the Senate; or

"(iii) that is a position in the Executive Schedule under sections 5312 through 5317 of title 5.

"(B) An officer to whom this subsection applies may hold or exercise the functions of a civil office in the Government of the United States that is not described in subparagraph (A) when assigned or detailed to that office or to perform those functions.

"(3) Except as otherwise authorized by law, an officer to whom this subsection applies may not hold or exercise, by election or appointment, the functions of a civil office in the government of a State, the District of Columbia, or a territory, possession, or commonwealth of the United States (or of any political subdivision of any such government).

"(4) Nothing in this subsection shall be construed to invalidate any action undertaken by an officer in furtherance of assigned official duties.

"(c) The Secretary of Defense, and the Secretary of Transportation with respect to the Coast Guard when it is not operating in the Navy, shall prescribe regulations to implement this section.".

(b) Nothing in section 973(b) of title 10, United States Code, as in effect before the date of the enactment of this Act, shall be construed—

(1) to invalidate any action undertaken by an officer of an armed force in furtherance of assigned official duties; or

(2) to have terminated the military appointment of an officer of an armed force by reason of the acceptance of a civil office, or the exercise of its functions, by that officer in furtherance of assigned official duties.

(c) Nothing in section 973(b)(3) of title 10, United States Code, as added by subsection (a), shall preclude a Reserve officer to whom such section applies from holding or exercising the functions of an office described in such section for the term to which the officer was elected or appointed if, before the date of the enactment of this Act, the officer accepted appointment or election to that office in accordance with the laws and regulations in effect at the time of such appointment or election.

USE OF FUNDS TO RELIEVE ECONOMIC DISLOCATIONS

SEC. 1124. (a) Section 2392 of title 10, United States Code, is amended—

(1) by striking out "No funds" in subsection (b) and inserting in lieu thereof "Except as provided in subsection (c), no funds"; and

(2) by adding at the end thereof the following new subsections:

"(c) The Secretary of Defense shall conduct a program in accordance with this subsection to exempt certain contracts of the Department of Defense from subsection (b) and to pay a price differential under such contracts for the purpose of relieving economic dislocations. Under such program, the Secretary may exempt from the provisions of subsection (b) any contract (other than a contract for the purchase of fuel) made by the Defense Logistics Agency—

"(1) if the contract is to be awarded to an individual or firm located in a labor surplus area (as defined and identified by the Secretary of Labor); and

"(2) if the Secretary of Defense determines—

"(A) that the awarding of the contract will not adversely affect the national security of the United States;

"(B) that there is a reasonable expectation that bids will be received from a sufficient number of responsible bidders so that the award of the contract will be made at reasonable cost to the United States;

"(C) that the price differential to be paid under the contract will not exceed 2.2 percent; and

"(D) that the value of the contract, when added to the cumulative value of all other contracts awarded under the program during the fiscal year in which the contract is to be awarded, will not exceed $7,000,000,000.

"(d) Not later than April 15 of each year, the President shall submit a report to Congress on the implementation and results during the preceding year of the program authorized by subsection (c). Each such report shall include an assessment of the costs and benefits of the program.".

(b)(1) The heading of such section is amended to read as follows:

"§ 2392. Prohibition on use of funds to relieve economic dislocations; exception".

(2) The item relating to such section in the table of sections at the beginning of chapter 141 of title 10, United States Code, is amended to read as follows:

"2392. Prohibition on use of funds to relieve economic dislocations; excep-

tion.".

(c) The amendments made by this section shall take effect on October 1, 1983.

Amend the title so as to read: "An Act to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, and for other purposes.".

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill (H.R. 2969) was laid on the table.

□ 1640

APPOINTMENT OF CONFEREES ON S. 675, DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1984

Mr. PRICE. Mr. Speaker, I ask unanimous consent that the House insist on its amendments to the Senate bill (S. 675) to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois? The Chair hears none, and without objection, appoints the following conferees: Messrs. PRICE, BENNETT, STRATTON, NICHOLS, DANIEL, MONTGOMERY, ASPIN, DELLUMS, DICKINSON, WHITEHURST, and SPENCE, Mrs. HOLT, Messrs. HILLIS and BADHAM, and Messrs. BOLAND, MINETA, MCCURDY, ROBINSON, and STUMP from the Permanent Select Committee on Intelligence, only when differences regarding intelligence-related activities are under consideration.

As additional conferees on sections 1030C and 1030D of the Senate bill and modifications thereof committed to conference: Messrs. PERKINS, HAWKINS, FORD of Michigan, BIAGGI, ERLENBORN, and GOODLING.

There was no objection.

PERSONAL EXPLANATION

Mr. GEJDENSON. Mr. Speaker, on July 21, 1983, I inadvertently voted "no" on rollcall No. 264. I meant to vote "aye."

AUTHORIZING CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF HOUSE AMENDMENT TO S. 675

Mr. PRICE. Mr. Speaker, I ask unanimous consent that in the engrossment of the House amendment to the Senate bill, S. 675, the Clerk be authorized to make necessary technical corrections, including section numbers, punctuation, and cross references as may be necessary to reflect the actions of the House in amending the bill, H.R. 2969.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I have requested this time for the purpose of inquiring of the acting majority leader the program for the balance of the day and for next week.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Speaker, the program for the balance of the day is to elect a Speaker pro tempore, following a vote on the motion for adjournment, which I understand is mandatory.

The program for next week is as follows:

On Monday the House will consider the Suspension Calendar, and the following bills are to be considered:

H.R. 3409, Federal supplemental compensation amendments.

H.R. 3677, Technical hospice amendments.

S. 930, Smithsonian purchase of Arizona land for observatory.

S. Con. Res. 7, bust of Carl Hayden.

H.J. Res. 297, Smithsonian Board of Regents appointment.

H.R. 2727, codify recent laws related to money and finance.

H.R. 3232, authorize payment of travel and transportation expenses of newly appointed special agents of Department of Justice.

S. 272, conference report of improving small business access to Federal procurement information.

S. 1098, NOAA and Coastal Program Authorizations Act.

H.R. 1372, provide for Hovercraft operation in Alaska coastal trade.

S. 46, revise United States Code title 46 (Coast Guard).

H.R. 1256, Coast Guard Academy preappointment bill.

S. 64, Irish Wilderness bill.

H.R. 3564, require Agriculture Secretary to announce crop feed grain programs.

H.R. 2590, amend Agriculture Adjustment Act re Filberts.

H. Con. Res. 40, sense of Congress re continued Federal presence in nutrition programs.

H.R. 3394, Student Loan Consolidation Act of 1983.

H.R. 2717, reauthorization of Administration Office of Government Ethics.

H.R. 3706, Martin Luther King birthday holiday bill.

Following consideration of the bills on the Suspension Calendar, the House will consider H.R. 1646, Railroad Retirement Solvency Act, a modified rule with 2 hours of general debate.

Mr. Speaker, votes on the bills on the Suspension Calendar will be deferred until Tuesday, but votes will be taken on H.R. 1646, the Railroad Retirement Solvency Act, which is expected to occur about 2:30 or 3 o'clock.

The House meets at noon on Tuesday. The House will first take recorded votes on suspension bills debated on the Monday previous, following which the House will consider the conference report on H.R. 3329, Transportation appropriations, fiscal year 1984, and H.R. 2780, State and Local Fiscal Assistance Amendments of 1983, an open rule with 2 hours of general debate.

On Wednesday and Thursday the House will consider H.R. 3021, health insurance for the unemployed; H.R. 2957, International Recovery and Financial Stability Act (IMF); H.R. 2867, Hazardous Waste Control and Enforcement Act of 1983, and H.R. 2350, Health Research Extension Act.

We expect to complete the business for the week on Thursday evening to adjourn for the August recess.

Mr. MICHEL. I thank the gentleman.

Mr. Speaker, I think we would want to underscore that last week, in the colloquy between the majority leader and the minority leader, we alerted Members to the fact that there would be rollcall votes on Monday. And beyond the Railroad Retirement Act, on which there may be some rollcall votes, we do not yet know for sure what the other body will be doing with the supplemental appropriation bill, particularly with the disagreeing amendments. If they insist on an amendment or two and we may have to reconsider that matter on Monday, obviously there would be prospective rollcalls.

While the acting majority leader may not be able to respond, I want to alert the House and the gentleman that I will be talking with the Speaker with respect to also bringing up House

resolution 180 having to do with the contempt citation of Ann Gorsuch Burford, provided there is an agreement between the chairman of the Committee on Public Works, the gentleman from New Jersey (Mr. HOWARD), and the Speaker in bringing that resolution to the floor.

Mr. ALEXANDER. I appreciate the gentleman's notice on his intent to bring up that resolution. I will convey the gentleman's wishes to the Speaker and to the majority leader.

Mr. MICHEL. I thank the gentleman.

ADJOURNMENT TO MONDAY, AUGUST 1, 1983

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 12 o'clock noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that the business in order under the calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

PROVIDING FOR ADJOURNMENT OF THE HOUSE AND SENATE

Mr. ALEXANDER. Mr. Speaker, I send to the desk a privileged concurrent resolution (H. Con Res. 153) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 153

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Thursday, August 4, 1983, or on Friday, August 5, 1983, pursuant to a motion made by the majority leader, or his designee, in accordance with this resolution, and that when the Senate adjourns on Wednesday, August 3, 1983, or Thursday, August 4, 1983, or on Friday, August 5, 1983, pursuant to a motion made by the majority leader in accordance with this resolution, they stand adjourned until 12 o'clock meridian on Monday, September 12, 1983, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution whichever occurs first.

SEC. 2. The Speaker of the House and the majority leader of the Senate shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

The SPEAKER pro tempore. Pursuant to Public Law 91-510, the vote on this House concurrent resolution must be taken by the yeas and nays.

The vote was taken by electronic device, and there were—yeas 291, nays 0, not voting 142, as follows:

□ 1700

So the concurrent resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ELECTION OF HON. BILL ALEXANDER AS SPEAKER PRO TEMPORE DURING THE ABSENCE OF THE SPEAKER

Mr. McHUGH. Mr. Speaker, I send to the desk a privileged resolution (H. Res. 290) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 290

Resolved, That the Honorable Bill Alexander, a Representative from the State of Arkansas be, and he is hereby, elected Speaker pro tempore during the absence of the Speaker.

Resolved, That the President and the Senate be notified by the Clerk of the election of the Honorable Bill Alexander, as Speaker pro tempore during the absence of the Speaker.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SWEARING IN OF HON. BILL ALEXANDER AS SPEAKER PRO TEMPORE DURING THE ABSENCE OF THE SPEAKER

The SPEAKER pro tempore. The gentleman from Arkansas will take the chair and be sworn in by the Dean of the House, the distinguished gentleman from Mississippi (Mr. WHITTEN).

Mr. ALEXANDER assumed the chair and took the oath of office administered to him by the gentleman from Mississippi (Mr. WHITTEN).

PERSONAL EXPLANATION

(Mr. SMITH of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Florida. Mr. Speaker, along with the gentleman from New Jersey, the chairman of the Judiciary Committee, and other Members, I attended yesterday's announcement at the White House of the establishment of the President's Commission on Organized Crime. Consequently, I was not able to vote on roll No. 278, the conference report on the 10-percent withholding repeal and the Caribbean Economic Recovery Act. If I had been present, I would have voted "aye."

PERSONAL EXPLANATION

(Mr. SHAW asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHAW. Mr. Speaker, yesterday, at 11:15, I was called to the White House to attend a meeting with the President on the Organized Crime Commission. During the time I was absent from the floor I missed vote No. 278. Had I been present, I would have voted "yes" on rollcall No. 278 to repeal the withholding of tax from interest and dividends measure.

□ 1710

CUTTING OFF AID TO NICARAGUA

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, Members who voted yesterday to cut off aid to those fighting the regime inside Nicaragua enjoyed a major victory yesterday. Over the Republicans? No; we all went home to the safety and contentment of our homes to make our case another day. They were victorious over those fighting in Nicaragua. The people in the resistance groups—they are the big losers. Make no mistake about it; the blood of our friends, those we have supported, will flow because of yesterday's action.

I urge my colleagues on the Democratic side of the aisle who passed the cutoff to at least recognize the enormous contradiction embodied in legislation. On the one hand, the cutoff legislation (after the Wright amendment) enumerated transgressions of the Nicaraguan Government against their own commitments—freedom of assembly, speech, press, economy, elections, human rights. And on the other hand, the legislation pulls the rug out from under those who are laying their lives on the line to oppose the Sandinista Communists and who are fighting for the fulfillment of those very promises.

After thorough detailing of the failure of Nicaragua's Cuba-style regime, legislation was passed to cut off the regime's opponents. In a push of an electronic voting button, America offered protection to a Soviet-style Marxist regime against the wrath of its betrayed people. The Brezhnev doctrine is alive and well in this hemisphere, and the U.S. House can proudly proclaim its new role as enforcer. However we may feel about the Monroe Doctrine, we should admit that at least at its beginning, it was successful in keeping the big European imperial powers from expanding their empires and crushing newly independent nations in the Western Hemisphere in the 19th century; a situation not unlike the one we face today with the U.S.S.R. Yesterday's vote was a gratuitous victory for Brezhnev over Monroe.

ECONOMIC RECOVERY

(Mr. McCANDLESS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCANDLESS. Mr. Speaker, for 17 months—June 1981 through November 1982—this Nation suffered its most severe economic hangover since the Great Depression. Irresponsible and excessive Government taxation and spending during the Carter-Mondale administration combined to lead the economy into a drunken stupor. We can say today, however, that this Carter-Mondale-induced recession is finally over.

Not only is the economy back on the wagon, it is back on the road to prosperity. Real GNP is rising at an annual rate of 5.6 percent. The housing and auto industries are booming. Retail sales are up. The level of consumer confidence is a full 66 percent higher than in October 1982. Interest rates, despite some recent fluctuations, are down substantially over a 2-year period. Unemployment has moved steadily downward since December. And inflation—judged by the American people in 1980 as public enemy No. 1—has been dealt a knockout blow. The long-awaited and highly touted Reagan economic recovery has arrived with a bang.

One vestige of the recessionary hangover remains—the Federal budget deficits. Projected deficits of $200 billion threaten both higher interest rates and accelerated inflation. They could destroy the recovery. Yet there are those in this House who would apparently be willing to sacrifice the recovery in exchange for still more Government spending funded by still more and higher taxes. Neither the Congress nor the Nation can afford to revert to the same old taxation and spending policies that brought about the recession in the first place. To preserve and enhance the recovery and bring a semblance of sobriety to the budget process, this body must demonstrate the moral and political courage to exercise fiscal restraint.

COMITY AND RESPECT IN APPLYING THE RULES OF THE HOUSE

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, yesterday when we were dealing with the whole question of our Central American policy, unfortunately there seemed to be a type of bipartisanship that developed on this floor. That does occur at times, but when it was manifest in ways that I think embarrassing, I think we ought to be concerned.

It seems to me that we do ourselves a disservice when we take advantage of the rules to try and stifle minority dissent or minority statements or minority ideas.

Yesterday we had the example of people refusing to allow unanimous consent so that we not have to listen to 15 minutes of particular amendments being read when we had an overall time limit on the amount of debate. The reason, of course, for that is so that other Members would be given the opportunity to present their viewpoint to have their ideas expressed, to have them considered and to have them voted upon.

It seems we ought to be worried in this House if the idea of comity is not going to prevail. Comity is a two-way street. It means that we have respect for one another. It means that we do not take advantage of the rules even if we happen to be within the letter of the rules.

We should try and act with the spirit of the rules, and one of the

major ingredients of the spirit of the rules of this House is mutual respect.

Yesterday, unfortunately, I saw mutual respect break down where I saw the majority take advantage of the rules to basically stomp on the minority.

There is an old expression that every dog is going to have his day. I do not know if that is going to be true. I do not know if the Republicans will ever take the majority in this House. But that ought not to be the way that we deal with one another.

We ought to have mutual respect and admiration and at least consider other people's ideas.

If we do not have the guts to consider ideas in this place, the people's House, where should they look for that opportunity?

□ 1720

COMMISSION ON THE ELEANOR ROOSEVELT CENTENNIAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. FISH) is recognized for 15 minutes.

● Mr. FISH. Mr. Speaker, October 11, 1984, marks the 100th anniversary of Eleanor Roosevelt's birth. Today I am introducing a joint resolution to commemorate that occasion, and I am joined by my colleagues: Mr. PEPPER, Mr. SOLOMON, Mrs. SCHROEDER, Mrs. HALL, Mr. MCHUGH, Mrs. KENNELLY, Mrs. BOXER, Ms. KAPTUR, and Mr. GARCIA.

In 1948, Time magazine called Eleanor Roosevelt "perhaps the best-known woman in the world." This resolution will establish a commission to encourage and coordinate commemorations of the centennial of Eleanor Roosevelt's birth. It is the result of the initiative of Hon. Lucille Pattison, County Executive of Dutchess, and a resident of Hyde Park, N.Y. A companion bill has been introduced in the Senate by my colleagues from New York, Senators MOYNIHAN and D'AMATO.

Eleanor Roosevelt was one of the remarkable women of the 20th century. She is remembered as an indefatigable supporter of human rights and as a champion of the underprivileged. Raised in a family of wealth and privilege, Eleanor Roosevelt devoted most of her adult life to enhancing the lot of the poor and the disenfranchised.

Prior to her marriage to Franklin Delano Roosevelt, Eleanor Roosevelt became involved in social efforts as a volunteer in an east side settlement house in New York City. This was only the beginning, however, of a long life of service to others.

As politics became an increasing part of FDR's life, Mrs. Roosevelt's interest in public affairs grew. As America entered World War I, she became involved in the Red Cross and found an outlet for her organizational abilities. She became increasingly involved in politics as FDR began the race for the Vice Presidency.

Through the tragedy of FDR's polio attack, Eleanor Roosevelt came to the forefront of American political life. As FDR's surrogate she became adept at public speaking and active in the League of Women Voters, the Women's Trade Union League, and the Democratic Party.

When FDR became President, Eleanor Roosevelt redefined the role of First Lady, not content with traditional duties, she made several projects her own. Her priorities included subsistence homesteads, the National Youth Administration, and services that involved women.

After President Roosevelt's death, Eleanor Roosevelt continued her interest in public affairs. She pushed hard for women in public jobs, for the continuation of the Fair Employment Practices Committee, and other progressive policies. President Truman appointed her as Delegate to the first U.N. general assembly in London, in 1945. It was here that she became known throughout the world as an advocate for social justice. She was appointed to the U.N. Human Rights Commission and drafted and fought for the adoption of the Declaration of Human Rights. She also worked for and urged the establishment of the State of Israel.

Day-to-day staff assistance to the Commission will be provided by the Eleanor Roosevelt Institute, a nonprofit organization headquartered in New York City. The Eleanor Roosevelt Institute is legal successor to the Eleanor Roosevelt Memorial Foundation, a federally chartered organization under the provisions of Public Law 88-11, approved on April 23, 1963. Except for nominal travel and per diem payments to private members of the Commission when they attend meetings, the resolution will not entail any Federal expenditures over those otherwise authorized in law.

Section 5 of the resolution directs the Interior Department to substantially complete renovation of Val-Kill, the Eleanor Roosevelt National Historic Site, in fiscal year 1984. This renovation has been underway for some time. The purpose of this section is simply to make certain that the National Park Service has Val-Kill fully open to the public in time for the Eleanor Roosevelt centennial year.

I urge the Members of the House to join us in commemorating the life of one of the most outstanding women in our history. The text of the resolution follows:

H.J. RES.—

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds and declares that—

(1) Eleanor Roosevelt, who was First Lady of the United States from 1933 to 1945, was one of the country's great First Ladies;

(2) Born in wealth and privilege herself, Eleanor Roosevelt nevertheless worked tirelessly to secure opportunities for disadvantaged Americans and to improve the lot of the needy elsewhere and particularly in developing countries;

(3) Both during and after her service in the White House, Eleanor Roosevelt campaigned indefatigably for human rights in the United States and throughout the world:

(4) Eleanor Roosevelt devoted her efforts especially to promoting the welfare of children.

(5) For this service, for her articulate and compassionate advocacy of the highest American ideals, and for demonstrating by personal example the capacities of American women to succeed in areas of daily life and work from which they were frequently excluded in her day, Eleanor Roosevelt earned a place of honor and respect in the hearts of the American people;

(6) October 11, 1984, marks the centennial of Eleanor Roosevelt's birth, and it is appropriate for Americans to mark this occasion with appropriate commemorations during 1984.

SEC. 2. (a) There is hereby established a Commission on the Eleanor Roosevelt Centennial.

(b) The membership of the Commission shall consist of the following:

(1) two Members of the House of Representatives, designated by the Speaker of the House;

(2) two Members of the Senate, designated by the President of the Senate;

(3) The Director of the National Park Service, ex officio;

(4) the Archivist of the United States, ex officio;

(5) the Librarian of Congress, ex officio;

(6) the Governor of the State of New York, ex officio;

(7) the County Executive of Dutchess County, New York, ex officio;

(8) the surviving children of Mrs. Eleanor Roosevelt;

(9) the chairman of the Eleanor Roosevelt Institute.

(c) Commission members shall designate one of their number as Chairman.

SEC. 3. The Commission established by section 2 of this act shall—

(1) encourage and recognize appropriate observances and commemorations, throughout the United States, of the one hundredth anniversary of the birth of Eleanor Roosevelt;

(2) provide advice and assistance in establishing such observances and commemorations;

(3) coordinate the activities of Federal agencies in support of such observances and commemorations.

SEC. 4. (a) The Commission shall meet no later than thirty days after enactment of this Act at a place and location determined by the Librarian of Congress, and at such intervals thereafter as the Commission may decide.

(b) The Administrator of General Services and the Director of the National Park Service shall provide the Commission such assistance and facilities as may be necessary to conduct its meetings.

(c) The Commission may accept donations of money and services to carry out its responsibilities.

(d) The Eleanor Roosevelt Institute, a not-for-profit organization incorporated in the State of New York, and successor organization to the Eleanor Roosevelt Memorial Foundation, chartered pursuant to Public Law 88-11, shall provide staff assistance to and coordiante policies and events for the Commission.

(e)(1) The private members of the Commission shall be reimbursed for their travel and compensated for their time engaged on Commission business at the daily rate established for employees at grade 18 of the General Schedule.

(2) The Secretary of the Interior is authorized, out of appropriations otherwise available to him, such sums as may be necessary to carry out the provisions of this paragraph.

SEC. 5. (a) In commemoration of the one hundredth anniversary of the birth of Eleanor Roosevelt, the Secretary of the Interior, acting through the Director of the National Park Service, shall complete the renovation of the Eleanor Roosevelt National Historic Site at Val-Kill in Hyde Park, New York, in fiscal year 1984 sufficiently to open it to full public visitation.

(b) The Secretary of the Interior is authorized, out of funds available to him in any fiscal year, such sums as may be necessary to carry out the purposes of this section.●

EFFECTS OF VOTE ON CENTRAL AMERICAN AID

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BURTON) is recognized for 30 minutes.

Mr. BURTON of Indiana. I thank the Speaker. I certainly will not take 30 minutes. I will take very, very little time.

Yesterday, we had a very important debate take place and the gravity of the situation sunk in last night on me and a number of my colleagues. I could not leave this week without expressing my concern for what took place.

What happened yesterday probably will not become law; nevertheless it sent a message, the wrong message, to our adversaries throughout the world, in particular, the Soviet Union.

They have an expansionist policy which has not changed in my lifetime. Since I was born, there have been 26 countries that I know of that have become Iron Curtain countries. Those countries include Albania, Bulgaria, Yugoslavia, Tibet, North Vietnam, Cuba, Cambodia, South Vietnam, Laos, Afghanistan, and then there are puppet states like Angola, Zimbabwe, Nicaragua, South Yemen, Ethiopia, Mozambique, Algeria, the Congo, Guinea, Iraq, Liberia, Madagascar, Mali, Syria, Tanzania, and Zambia.

And we see their expansionist policy continuing almost unabated.

Last night, we voted to cut off covert aid to those people who are trying to stop the revolutionary movement, the Marxist terrorist movement in Central America.

In place of that, we said we would give, for overt aid to those countries who want it, $30 million this year and $50 million next year.

That simply is a drop in the bucket. It will not do the job and we will continue to see if this bill should become, which I do not think it will, an expansionist policy unparalleled in the history of men. While we were fiddling, yesterday, Rome was burning. Let me give you an illustration.

While we talked about this, 12 Soviet cargo ships were steaming toward Nicaragua and they are probably docked there today and unloading more materials which will not be used to defend Nicaragua but will in large part be used to support the revolutionary movement of the Marxist terrorists in the countries adjacent to Nicaragua.

There were pictures on the news last night. We watched the news here in the cloakroom and saw some of the Soviet ships as they were docking. They said they were not war materials. But you could see under the covering, covering the vehicles on those ships, tank turrets and gun turrets. So, there is no doubt they were war materials and the Communist objective is to still support and export revolution in Central America.

The Soviet Union, Mr. Speaker, has exported to Nicaragua over the past few years $80 million for military aid and, in addition to that, the Eastern European satellites of the Soviet Union have sent $70 million. That is $150 million from those two sources alone. And we talk about $30 million in overt aid, $50 million the next year—how do you combat that? That is like trying to catch water in a sieve; it is impossible.

We talk about 55 military advisers in El Salvador, how bad that is. Let us look at what the Soviet Union and Cuba are doing in Nicaragua: Nicaragua right now has 4,000 to 5,000 civilian advisers from Cuba, plus 2,000 military security advisers—2,000; we have 55. Nicaragua's regime built 36 new military bases and garrisons. The previous regime had 13. Nicaraguan pilots and mechanics are being trained in Bulgaria. The regime has received so far—and this is way behind schedule; I am sure it is more than this because of the supplies delivered last night and today—50 Soviet tanks, 1,000 East German trucks, 100 antiaircraft guns, Soviet 152-millimeter howitzers that have a range of 17 miles.

In addition to that, the Nicaraguans are building the biggest military army in all Central and South America. As a matter of fact, they anticipate having 250,000 people in their armed forces. So, 1 in 10 Nicaraguans will soon be in the military or milita. I think we made a grave mistake yesterday, Mr. Speaker. And I think that we should talk to our colleagues in the Senate and urge them to take this piece of legislation to make sure that it never gets passed into law.

I am confident, however, if the Senate does make the mistake we did, that the President of the United States will veto. I doubt seriously there is the two-thirds majority necessary to override that veto. We, in this country, in my opinion, should be dedicated to the proposition that South America should remain free and that we should do everything in our power to make sure that those people who want to remain free receive the assistance, the support, economically and militarily, which is necessary to retain that freedom, because they are not only fighting for their freedom but ultimately they are fighting for our freedom as well. El Salvador is less than 900 miles from the Texas border. If revolution is successful in El Salvador, Honduras, Guatemala, Belize, and ultimately Mexico, then we are going to see not only military consequences that will involve American boys and spill American blood, we are also going to see economic chaos unparalleled in the history of our country, because 10 million refugees will be coming into this country. We will not be able to turn our back on them. Illegal aliens we can send back but our policy has always been to accept with open arms refugees fleeing oppression.

If we get 10 million refugees, can you imagine the economic impact that is going to have on the United States of America? I submit to you and to the people of this country that not only is freedom at stake, military problems are at stake, but also the economic survivability of America is at stake.

I urge my colleagues in the Senate to think very closely about this legislation as they ponder it in the weeks to come.

I thank the Speaker.

The SPEAKER pro tempore. The gentleman yields back the balance of his time.

□ 1730

FOOD FOR EL SALVADOR

The SPEAKER pro tempore. Under a previous order of the House, the gentlemen from Arizona (Mr. RUDD) is recognized for 5 minutes.

● Mr. RUDD. Mr. Speaker, 2 weeks ago, two of my colleagues and I had the opportunity to visit El Salvador where we saw with our own eyes some of the tragedies that the Communist-backed guerrillas have inflicted upon the people of that tiny but very heavily populated country.

Literally thousands—by some counts as many as 280,000—men, women, and children have been terrorized and driven off their farms and from their homes. Many of them now live in displaced persons camps that have been

set up by the Government in various parts of the country.

I was able to visit two such camps, one in San Vicente Province and the other in San Francisco Gotera.

I will long remember the poverty and pathetic conditions of the campesinos—conditions that they are forced to live under because they have been terrorized off their own land.

Although strong of will, these people are in desperate and urgent need of food, especially corn and dairy products.

It is time for the United States to step forward, much like it has done so many other times and in so many other places, and help feed the victims of this tragic war.

We must, without delay, increase our food assistance to El Salvador with surplus corn and dairy products. And we must do it in a people-to-people manner—perhaps through groups such as the Food for the Hungry, which is based in my own State of Arizona—so that we can be certain that our help actually reaches the people who so desperately need it.

It is clear to me that if these people do not receive food soon, thousands of them will begin heading for the borders of our country. And when that happens, it will cost us much more than any increase in our food assistance to El Salvador.

This kind gesture of friendship not only will help feed the needy, but it also will have the added benefit of helping to bolster El Salvador's troubled economy, which must be righted before the country can begin to stabilize.●

LEGISLATION TO ABOLISH PAGE SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL) is recognized for 5 minutes.

● Mr. FRENZEL. Mr. Speaker, today I am introducing, along with 16 other colleagues a bill which would abolish the page system for the House of Representatives at the end of the 98th Congress.

As I stated during the debate on the Studds-Crane censure votes last week, the problem is still with us. That problem is the page system. During the last few months many improvements have been made in housing and education for the pages, however, we cannot control nor completely supervise these young employees. I feel we have no choice but to abandon this page system and replace the pages with regular House employees before other unfortunate situations occur.

H. RES. 291

Resolution abolishing the page system of the House of Representatives

Resolved, That effective at the end of the ninety-eighth Congress, the page system of the House of Representatives is abolished.

SEC. 2. In sessions of Congress beginning with the first session of the ninety-ninth Congress, messenger services and other functions formerly provided under the page system of the House of Representatives shall be provided in the manner prescribed by the Committee on House Administration.●

FREE ENTERPRISE RADIO CAPTURES WORLD'S ATTENTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Louisiana (Mr. TAUZIN) is recognized for 5 minutes.

Mr. TAUZIN. Mr. Speaker, on February 13, 1982, the FCC awarded to WRNO Worldwide, of Metairie, La., a license to operate the first commercial shortwave broadcast station in America. Mr. Joseph Costello, owner and operator of WRNO Worldwide, wished to provide commercial shortwave broadcast services to the European continent and Canada, introducing those nations to American music and culture, and to our commercial advertisers. His experiment has proven to be an unqualified success.

Recently, Kim Andrew Elliott, of the University of Massachusetts department of communications studies, conducted a study for the Review of International Broadcasting to determine ratings for worldwide broadcasting. WRNO Worldwide scored some dramatic points. In the short time since its initial operation, WRNO Worldwide is now ranked as the seventh most listened to worldwide broadcast station, and has the fourth most popular singular program, "World of Radio," on any international broadcast station, and the second most popular radio personality, Glen Hauser. To further illustrate the dimensions of its success, WRNO Worldwide's seventh ranking was right behind the sixth place ranking achieved by Radio Moscow and the fifth place ranking achieved by the Voice of America.

This example of one man's initiative and innovative forward thinking, operating within the free market as this commercial enterprise does, is a sterling model for us all. Mr. Costello's spirit and drive is now bringing America's message to countless thousands in foreign lands and paves the way for others to follow. We in Louisiana are particularly proud of this man's achievement and of the fact that, with the upcoming Louisiana World Exposition to be held in New Orleans in 1984, the events of that great exposition will be brought nearer to many of our overseas friends who may be encouraged to come and visit our great State and Nation.

On behalf of all of us in America who cherish the entrepreneurial spirit demonstrated by Mr. Joseph Costello and the success of his innovative commercial, shortwave, broadcast station, WRNO Worldwide, I salute this extraordinary achievement and wish him and others like him even greater successes in the future.

THE RUNAWAY INTELLIGENCE AGENCIES

The SPEAKER pro tempore (Mr. TAUZIN). Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, certainly at this late hour it would be my last intention to prolong proceedings unnecessarily, but I feel a very deep obligation to my colleagues in the House, on both sides, to speak out, particularly in view of the actions by the House yesterday and today and with respect to the actions taken today. The fact that I am the ranking member of the Banking, Finance and Urban Affairs Committee, and ostensibly took a position that was in contradiction with the very distinguished leadership of this committee and also the leadership in the House that in obedience to the desire to cooperate with the President, who gave absolute priority to the consideration of the replenishment of the IMF fund as our contribution to that fund.

And I feel that during the debate, all the time that it took, during the consideration of the Boland-Zablocki resolution, in which, for the first time, certainly the House, if not the Senate, because I might say by way of explanation that the Senate under the leadership of Chairman CHURCH, the then Senator from Idaho, was the first, and as far as I know the record shows, the only time that the Congress really discharged a very serious obligation of overseeing and attempting to hold accountability these runaway intelligence agencies that have become rogue elephants and have since the Reorganization Act of 1947 and since the advent and the creation of this type of agency have in effect done what all history shows will happen when societies, whether they are free or closed societies, resort to what is implied in some of the activities that some of the agents of these agencies feel with the greatest of zeal and the greatest patriotic fervor is necessary to save the Republic, but which involves the destiny and the lives of Americans and has indeed and in fact compromised our country in what I consider to be a very harmful and detrimental way in the last two decades.

It has been said, and as a matter of fact, if we walk on the first floor and see the newly decorated halls we will

see one of these beautiful quotations that goes to that effect on the first floor. It says:

> The greatest dangers to liberty lurk in insidious encroachment by men of zeal, well meaning, but without understanding.

And then the thing I referred to the day before yesterday in consideration of the Zablocki-Boland amendment and it was James Madison who said:

> I believe there are more instances of the abridgement of the freedom of the people by gradual and silent encroachment of those in power by violent and sudden usurpation.

So that these two events, the course of action taken by the House in both, I believe, is essentially correct. But it is the first attempt, as reflected in the Boland-Zablocki amendment that we in the House make and only after such a stolid, certainly nobody can ever accuse Chairman BOLAND of being anything but a firm footed, very solid thinking Member of this body. He has chaired the Subcommittee on Appropriations on HUD and other agencies and he is actually the chairman that has literally taken over and rebuilt the so-called Intelligence Committee after the rather shaky start of that committee and has done such a tremendous job.

What would impel a man of the stature and nature of Chairman BOLAND and also, I might say, a man of the stature and nature of Chairman ZABLOCKI, chairman of the Foreign Affairs Committee, to join in asking that the House show its disapproval and tell the executive branch, the President, who ostensibly is the head of this agency, to cease and desist in the so-called covert—which actually has been so overt that it is ludicrous to call the operation covert—in Nicaragua.

And why I am rising at this time is to point out the tremendous importance and significance of that to the House of Representatives acting faithfully in representing this great Nation.

Throughout Latin America it is now the House of Representatives that is looked upon as the last resort of understanding, the last depository of North American understanding or even a glimmer of comprehension of what that world is like now.

□ 1740

They no longer even talk about the Senate, but the House, yes, because it is the House that has had so many illustrious Members getting up and saying: "We wish to render a report, we have just returned from a trip to Nicaragua, to El Salvador, to Guatemala," and, therefore, this is really the place where all this vast realm to the south of us, which now, I must remind my colleagues, is way over greater the number than our Union, the United States of America, by better than 50 million. This is a late development, true, only within the last 15 years, not even the last two decades. And also the misconception that continues to dominate the thinking of our leadership and among us in the Congress, but particularly in the executive branch.

Why, I could not believe it when President Reagan returned from his trip to those four or five countries last October, the first remark he made when he set foot in California was: "Gee, I did not know they were so different." I cannot believe that.

This is the perception of a world long disappeared.

And I have said to many of my colleagues that even if such a popular man in South America, and Central America, and Mexico, where he is idolized to this day, if President John F. Kennedy were President today and he were trying to launch what we call the Alliance for Progress, he would not succeed in today's Latin America. That world is gone. And that was just 23 years ago.

As a matter of fact, if Lyndon Johnson were President today, I daresay that he would realize the change, and he would not have taken the decision that he did in 1965.

But then the reason I am further impelled to speak at this time, because of some of the utterances made this very afternoon, in which obedient to this misperception, a different interpretation is given and the conclusion reached that it was the wrong decision on the part of the House both yesterday as well as today.

Today the action was to not approve a handout of $8.4 billion, at least—actually, it is more—of our Treasury to the so-called IMF, the International Monetary Fund.

My experience has been all through my privilege of serving in varying capacities, which I think is possible only in this country—on the city council, the local legislative body, in the State senate, the State legislative body and, for the past 22 years, here in the House of Representatives—I have always been an admirer and a fervent believer in the people themselves, their wisdom, and, second, the wisdom of this large conglomeration of Representatives, 435 in the House here, 31 over in the State senate, and at that time—and I am speaking now of almost 30 years ago—on the city council, 9.

This has been my avocation, what I call legislative advocacy, because I feel that through attribute, experience, and education this is what I was really meant to be doing. I do not like executive or administrative type of things, but I love the forum. I love the give and take. I do not even like the gavel, but I love the give and take, the processes that are great. And sometimes there is exasperation.

We find many Americans saying: "How could the people have voted this way?" And it does seem, at first blush, that the people did not know what they were doing. But, lo and behold, time passes by, 2 and 3 years, and all of a sudden that wisdom inherent in that people's free choice then becomes apparent and in full view.

And it is the same thing here. We get frustrated when we have some pet projects or something we fervently believe in and we find that we cannot get the vote of the majority of our colleagues, and we say: "Gee whiz, how could they do this?"

But as temporary as that disappointment may be, it is not long after that that experience in the flow of events then prove that there were good reasons. And I think that the House acted wisely, even though I must say that it was not what I felt was the full way that we should have acted.

I have been advocating that we assert our American leadership while we had the leverage. We do not have it. And this was what I was reaching to in saying why at this point we are in such a precarious position.

In the first place, the President unquestionably is acknowledging the failure of our diplomacy in Latin America. It has been said that war is diplomacy by other means. The truth is that until and unless you have failure in the diplomatic range, you do not resort to war. It is only upon the failure of the first that nations have resorted to war. At this time and at this conjunction of world events, and particularly in Latin America, I felt, from the first time I spoke on this subject matter—El Salvador, April 1, 1980—and certainly it was not President Reagan then, it was President Carter—that America had limited leverage left to assert its leadership through collective action; that is, through the OAS, the Organization of American States.

Unfortunately, that President, like this one, was very inaccessible. It was impossible to reach those judgment-making decision levels, as it is now, and there is no question that this President has set the course unerringly and undeviatingly along the lines of war.

We do not need Fidel Castro to tell us this. You do not have a so-called maneuver, with 22,000 combat troops involved, plus a naval squadron, for 6 months, without recognizing that it is a major operation. The policy, obviously, is one that is so bankrupt and has been for even longer than the 20 years—and I must say, by way of parenthesis, that the first President to recognize, evolve the policy, the fundamental policy that no President since then, even President John F. Kennedy, has had the wit or the will, was Franklin D. Roosevelt with his Good Neighbor Policy.

So that while announcing, after he had created the roving ambassador-

ship, the creation of a Commission that he said would become advisory on Latin America, simultaneously and at the same site he announced the so-called maneuvers, but which in effect are deployment, that can be interpreted only one way and have since been interpreted that way in all of Latin America, in all of its press, whether it is the conservative press, or whether it is the so-called independent press, or so-called liberal press.

So that, as the Mexican intellectual told us in his speech at Harvard recently, what we are now about is consolidating and unifying these disparate 21 nations solidly against us.

Now, we read our history very self-contained. The turning processes of the historical developments in the New World, as we have learned them, have been very partial, very fragmentary.

As a matter of fact, we talk about 13 colonies. There really were 37. But the other 24 were what today is Canada, Nova Scotia, and the like, and they do not count. But they were an integral part of that colonial period of development. The same thing with the countries to the south. To hear my colleagues talk, I am very, very distressed because the intellectual community in Latin America would be very grieved, because they reflect the concept of the culture south of us as being not only in the backward disorderliness of a primitive stage, but completely omitting the fact that it was in Mexico in the 16th century that the first printing press, the first college, the first university were set up.

□ 1750

But more insidiously, when the President announced that he was going to seek an advisory committee, he was setting an undeviating course that makes that committee nothing but nonentities to serve the propaganda purposes of either endorsing his policies, or left nothing but that as a choice. In fact, I predict that before it is all over, within a few months, and maybe weeks, we will see many Members jumping up and saying: "We have got to rally 'round the flag. We have got to support the President, and we have got to justify defense, even if it means committing our American boys to the jungles of Central and South America," because it will be the same thing as we had before.

I was here when we had the vote on the Gulf of Tonkin resolution, and I daresay that if we had the same thing happen today we would have the same results, because the President is asking us after an act has been performed or it has been charged that one has been directed against our interests to give him moral support. Well, who, under those circumstances, is not.

What I am saying is that the only thing that might prevent this this time is the kind of action that the House took yesterday, although in approving that amendment to the resolution by our distinguished majority leader, Mr. WRIGHT, the immediate reaction this morning by the leaders of the OAS was: "Hey, wait a while. Do not call on us now. We have been waiting for months."

This is true. I have a letter, as of last year, when I finally gave up trying to bring attention to this President, as I had the prior one, that our leverage was eroding. Of course, once the Falklands came along, it is gone forever.

I heard a gentleman talking about the Monroe Doctrine. They laugh at that today because we, ourselves, through the activity that we engage in, once the Falklands war broke out, abrogated the Rio Pact. In fact, it so infuriated some of the oldest and most loyal friends of this country like the leader in Peru, Belaunde Terry, refused to even talk to our emissaries because of his indignation at our violation of the Rio Pact which we, ourselves, had taken the leadership in bringing through.

I did not hear that in this discussion here. We were talking as if what was involved in our decision on Boland-Zablocki was the freedom of the countries. I tried, in the brief few minutes that I had, to say that, no, this was our domestic issue, our freedom, our freedom from the runaway, rogue elephant such as the CIA, and even the FBI.

Let me tell you that south of us there is no question that this is the biggest fear of all, for we have gone through these so-called covert actions. We have plotted and helped conduct the assassination of leaders down there, in the absolutely fruitless task and baseless idea that we can assassinate, we can bomb out of existence such things as communism, or whatever you want to call it, Marxist-Leninism, or fascism for that matter.

It will never be done. You cannot bomb ideas out of existence, and we never will. As I have said repeatedly, the only way we will defeat is to provide the social justice and the alternative. Instead of that, we are building up, we are giving credit to the Communists, credit they do not deserve, I can assure you. We are the ones who have made a No. 1 leader out of Fidel Castro, who really has been a third-rater.

The proof of the failure of our policies: Last week the Argentinian generals and ambassadors, cheek by jowl, unifying with Fidel Castro. This was a country that Alexander Haig, as Secretary of State, persuaded to send Argentine troops where—where we are sending ours now—to Honduras. And Argentina had every reason to feel that we were going to back them up or that they were right in exerting the claims the way they did—and, of course, that was wrong—on the Falklands.

In the case of IMF, the banking situation as now controlled is hand in glove with our predicament. The CIA, for instance, in El Salvador and all the countries surrounding it, our CIA is involved with the assassination squads conducted by the present leader, D'Aubuisson, who is now the guy who is in charge of the destinies of the Salvadoran Government. We are saying that is the regime we identify with. He is identified as the murderer of Archbishop Romero, the murderer of four American nuns, the murderer of four Scandinavian reporters.

I say that under those circumstances, we cannot end up anyplace but as losers, at great cost in blood and treasury eventually, unless—and this is the importance of the House vote—the House message is interpreted correctly by our leaders.

I want to say further that in rejecting the money before we complete consideration of the authorization of the IMF, the House acted preeminently responsibly. The banks that are asking and pushing, and I have had everybody from the Secretary of Agriculture to the Treasury to all the major banks, to some of the leading interconnecting agencies and organizations, demanding that I vote for the $8.4 billion, which is really a bailout for these banks.

These banks already, beginnng February 1, 1982, when President Reagan ordered the Department of Agriculture to reimburse these banks—City Bank, Chase, Morgan, Bank of America, First Chicago—that day $71 million, and since then a total of almost three-quarters of $1 billion as payment to these banks through the Department of Agriculture for the interest guarantees that Poland had failed to pay. Now this is not Brazil, this is not Mexico, this is not Argentina, which are the three big things you talk about on the IMF bailout. This is Poland. And that is just a fragment of their overhang in the Comecon; that is, the Communist-bloc economy where, incredibly, these same banks and our Government, in credit allocations and in Government guarantees, have invested and given out more between 1970 and 1977 to the Communist bloc than we allowed the Western European countries to have during the entire length of the Marshall plan, and even taking inflation into account.

□ 1800

The same thing is happening today through this concourse of events, and this is unbelievable to me, as happened after World War I when Uncle Sam became known as Uncle Sap and we became the patsies. We paid not only for all the money we had loaned out to these countries to fight World

War I, but we even paid through the speculation of our bankers who gobbled up, because they were getting those big interest rates like they think they are from Chile, from Argentina, and from Mexico, and they are. When they talk about interest rates, the reason these banks are on that overhang is that they are talking about 27 and 30 percent, that greed.

They did the same thing in the twenties. We had these banks taking our depositors' money, then unprotected and everything else, investing in German Government bonds, 20 and 25 year; Japanese Government imperial bonds. Ironically, the greater chunk of those were due and payable in 1941. You know, 1941 was when we got our Pearl Harbor.

The same thing is happening now, except that instead of calling those arrangements then cartels, we call them today multinational.

After World War II and when we were supposed to decartelize and de-Nazify all these interests, we were frustrated in doing that by their American counterparts, those who had helped to finance Hitler.

Today all that is back in place. All those combinations, called cartels then, that financed Hitler are back in place today.

One of the biggest promoters and influencers of President Reagan's Latin American policy is one of those men who today heads a conglomerate that has through the conglomerate its interests in United Fruit and the other heavy, heavy owners, and investors, and whatnot in Latin America.

It was United Fruit in Guatemala in 1954 that paid for the mercenary pilots that the CIA hired that bombed that capital of Guatemala, Guatemala City, and forced the capitulation of Arbenz who was then of course labeled a Communist.

So in the name of anticommunism—remember, after all, that is what Hitler was against—we have sucked in and are embracing murderous regimes.

I want to ask my colleagues that have come up here and said that these freedom fighters that we are giving this money to, I want them to come and go down to Chiapas and visit the bishop of Chiapas, Mexico. This is the bordering Mexican State with Guatemala, and let him tell you about the soldiers of these murderous regimes that we are supporting, that the President says we misunderstand, who rip the bellies of 6-month-old peasant infants. That is fighting Marxist-Leninism?

ARTHUR WIRTZ

● The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 5 minutes.

Mr. ROSTENKOWSKI. Mr. Speaker, I rise to pay tribute to Arthur Wirtz, one of the Nation's most successful and influential economic forces over half a century, who died this week.

Arthur Wirtz' life story is an American classic. He was the son of a Chicago policeman. His optimism, intellect, and vision brought him from salesman to multimillionaire. His career moved in wide sweeps, spanning real estate, sports stadiums and teams, banking, and family entertainment.

Arthur Wirtz, who made the Chicago Blackhawks a family enterprise over the last 30 years, is widely regarded as the guiding force behind the National Hockey League. Back in the mid-1930's he signed Olympic figure-skating champion Sonja Henie and created the "Hollywood Ice Review" which matured into "Holiday on Ice" which has entertained millions around the world.

Beyond the notoriety and fortune he gained in the worlds of business and sports, his true measure was his devotion to Virginia, his wife of 57 years. He never recovered from her recent death.

The memory of Arthur Wirtz will live on well beyond the bounds of the city he made greater. He remains a symbol of what can be in America.

I want to pass along my deepest regrets to his children and grandchildren.●

SERIES OF BILLS WHICH MODIFY DIVERSITY OF JURISDICTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 5 minutes.

● Mr. KASTENMEIER. Mr. Speaker, over two decades ago Chief Justice Earl Warren urged that we "achieve a proper jurisdictional balance between the Federal and State court systems, in the light of the basic principles of Federalism." In the past four Congresses I have endeavored to fulfill that goal through the abolition of diversity of citizenship jurisdiction in the Federal courts. In the 96th Congress, legislation was passed that eliminated the amount-in-controversy requirement in Federal question cases, presumptively providing access to justice in the Federal courts for all Federal questions. See Public Law 96-486. This week I have introduced a series of bills that address the issue of the diversity jurisdiction of the Federal courts.

I continue to believe that matters of State law—such as contract or tort actions—can be properly adjudicated, in most instances, in our State courts. I remain convinced that the best solution to the burgeoning caseload of the Federal courts is the total abolition of diversity jurisdiction. On the other hand, I recognize that such an approach has generated some opposition. Therefore, I have also offered for consideration a series of bills which modify diversity of jurisdiction without totally abolishing it. These proposals—most of which have never been offered in bill form—are intended to generate thought. In addition, it is my hope that by offering a series of alternatives to abolition of diversity a consensus will be generated around one or more of these ideas.

The first diversity bill, H.R. 3689, is the purist approach: diversity, with the exception of statutory interpleader, is abolished. This bill is virtually identical to legislation passed twice by the House during the 95th Congress—on February 20, 1978, by a vote of 266 to 133; and on October 4, 1978, by a vote of 323 to 49. It also is identical to H.R. 6816 from the 97th Congress. This measure, which was introduced by my distinguished former colleague, Caldwell Butler, of Virginia, was reported by the Committee on the Judiciary during the last Congress, House Report 97-308. The approach now embodied in H.R. 3689 has the full support of the administration, the Judicial Conference of the United States, the Conference of State Chief Justices, various public interest groups, and a large number of noted legal scholars. The net savings to the Federal Government of this approach would be $6 million in the next 2 years, and approximately $160 million in cost avoidance over the next 5 years. More importantly, this bill would create an appropriate division of jurisdiction between the State and Federal courts.

The second in this series of diversity related bills, H.R. 3690, would abolish diversity jurisdiction with the exception of multiparty tort cases. For purposes of Federal jurisdiction, a multiparty injury is defined as an injury that involves 25 or more persons, all of whom have suffered a loss of more than $10,000. This approach was first suggested by the Justice Department during the Carter administration and represents a more comprehensive solution to perceived problems with mass disaster tort litigation. See "Diversity of Citizenship Jurisdiction/Magistrates Reform" hearings before the Subcommittee on Courts, Civil Liberties and the Administration of Justice of the House Committee on the Judiciary, 96th Congress, 1st session, 158-162, Serial No. 22 (1979). As relates to present diversity law, H.R. 3690 actually broadens access to a Federal forum by eliminating the rule of complete diversity. See *Strawbridge* v. *Curtis*, 7 U.S. (3 Branch) 267 (1806).

The third bill in this series, H.R. 3693, provides for the temporary abolition of diversity of citizenship with re-

spect to instate plaintiffs. The bill bars the resident of a State from using the Federal courts of that State for diversity claims. If, as some lawyers' groups argue, the reason for diversity jurisdiction is primarily fear of prejudice to an out-of-State plaintiff, there is no real need to secure an extra forum for instate plaintiffs. This approach was first suggested by the American Law Institute in 1968, and was most recently offered as an amendment to H.R. 6816 by my colleague, BARNEY FRANK, during the last Congress. See American Law Institute, "Study of the Division of Jurisdiction Between State and Federal Courts" (1968) at 12, 123-135. This approach has received the endorsement of the American College of Trial Lawyers and the ABA Pound Follow-Up Task Force Report.

The fourth bill, H.R. 3691, follows the basic direction suggested by Senators HEFLIN and THURMOND in the Senate-passed version of the bankruptcy reform bill, S. 1013. See also in the House, H.R. 3257 by Congressmen KINDNESS, KASTENMEIER, et al. This bill, although raising the amount-in-controversy requirement from $10,000 to $100,000, nonetheless preserves diversity jurisdiction; at the same time, the bill authorizes Federal courts to abstain from hearing diversity cases in which damages of more than $100,000 are shown if adequate and timely State court remedies exist. This type of deference toward the fairness and competence of our State courts is fully justified. Because decisions about when and whether to abstain would be made on the local level this approach is sensitive to the potential impact on State courts of a sudden shift in cases from Federal to State courts. See "Diversity of Citizenship Jurisdiction," hearing before the Subcommittee on Courts, Civil Liberties and the Administration of Justice of the House Committee on the Judiciary, 97th Congress, 2d session, at 338-341—statement of Hon. Herbert Evans, Chief Administrative Judge, State of New York, Serial No. 93; 1982; see generally Shapiro, "Federal Diversity Jurisdiction: A Survey and a Proposal", 91 Harvard Law Review 317; 1977, suggests modification of diversity by local rule.

The final alternative, H.R. 3692, provides for a system of mandatory arbitration claims of diversity cases. This approach has been tried experimentally by local rule in the eastern district of Michigan. Under this bill all diversity cases would be referred for arbitration under rules established by the Judicial Conference of the United States. If a party is dissatisfied with the results of the arbitration, a trial de novo at the district court would be available. Under the bill, however, if a party seeks a trial de novo without adequate justification, such a party may be liable for the other side's attorney fees, and the court costs. This type of fee shifting would place an appropriate disincentive on the improper use of scarce Federal court resources.

In sum, this series of bills represents the beginning of a dialog on the fundamental questions of Federal court jurisdiction over claims based on diversity of citizenship jurisdiction. Any persons or organizations wishing to submit comments on these proposals should write to the Subcommittee on Courts, Civil Liberties and the Administration of Justice, 2137 B, Rayburn House Office Building, Washington, D.C. 20515.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. MOLINARI (at the request of Mr. MICHEL), after 8 p.m. on July 28, on account of official business.

Mr. BOEHLERT (at the request of Mr. MICHEL), on July 29, on account of official business.

Mr. ADDABBO (at his own request), for July 28 and 29, on account of official business.

Ms. MIKULSKI (at the request of Mr. WRIGHT), after 10:15 p.m. on July 28, on account of official business.

Mr. LEWIS of Florida (at the request of Mr. MICHEL), after 4:30 p.m. today, on account of official business.

Mr. FOLEY (at the request of Mr. WRIGHT), for July 28 and 29, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BURTON of Indiana) to revise and extend their remarks and include extraneous material:)

Mr. BATEMAN, for 30 minutes, on August 1.

Mr. LIVINGSTON, for 15 minutes, today.

Mr. FISH, for 10 minutes, today.

Mr. BURTON of Indiana, for 30 minutes, today.

Mr. RUDD, for 5 minutes, today.

Mr. FRENZEL, for 5 minutes, today.

(The following Members (at the request of Mr. TAUZIN) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. TAUZIN, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. ROSTENKOWSKI, for 5 minutes, today.

Mr. FEIGHAN, for 5 minutes, today.

Mr. NICHOLS, for 5 minutes, today.

Mr. MAVROULES, for 5 minutes, today.

Mr. WEAVER, for 15 minutes, today.

Mr. EVANS of Illinois, for 5 minutes, today.

Mr. KASTENMEIER, for 5 minutes, today.

Mr. GLICKMAN, for 30 minutes, on August 2.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. FLORIO and Mr. NEAL, to revise and extend immediately prior to consideration of title III of the bill.

(The following Members (at the request of Mr. BURTON of Indiana) and to include extraneous matter:)

Mr. DEWINE.
Mr. PORTER.
Mr. BEREUTER.
Mr. BETHUNE.
Mr. KEMP in two instances.
Mr. LENT.
Mr. HILLIS.
Mr. MARTIN of North Carolina in four instances.

SENATE ENROLLED BILL AND JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to an enrolled bill and joint resolution of the Senate following title:

S. 143. An act to authorize the Twenty-nine Palms Band of Luiseno Mission Indians to lease for 99 years certain lands held in trust for such band;

S.J. Res. 56. Joint resolution to designate the month of August 1983 as "National Child Support Enforcement Month", and

S.J. Res. 67. Joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "National Respiratory Therapy Week."

ENROLLED JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 139. Joint resolution to designate the week beginning June 24, 1984, as "Federal Credit Union Week."

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 5 minutes p.m.) under its previous order, the House adjourned until Monday, August 1, 1983, at 12 o'clock noon.)

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1638. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting the Navy's decision to convert to contractor performance the laundry services function at the Naval Hospital, San Diego, Calif., pursuant to 502(b) of Public Law 96-342; to the Committee on Armed Services.

1639. A letter from the Auditor of the District of Columbia, transmitting a report entitled, "Annual Report on Depository Activities, Fiscal Year 1982," pursuant to section 455(d) of Public Law 93-198; to the Committee on the District of Columbia.

1640. A letter from the Chairman, Federal Trade Commission, transmitting the sixth annual report on the premerger notification provisions of the Clayton Act, pursuant to section 7A(j) of the act, as amended (90 Stat. 1394); to the Committee on the Judiciary.

1641. A letter from the Federal Inspector, Alaska Natural Gas Transportation System, transmitting the 16th quarterly report on the status of the Alaska Natural Gas Transportation System, pursuant to section 7(a)(5)(E) of Public Law 94-586; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 1372. A bill to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska until November 6, 1988; with an amendment (Rept. No. 98-334). Referred to the Committee of the Whole House on the State of the Union.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 2590. A bill to amend the Agricultural Adjustment Act to authorize marketing research and promotion projects, including paid advertising, for filberts; with amendments (Rept. No. 98-335). Referred to the Committee of the Whole House on the State of the Union.

Mr. DE LA GARZA: Committee on Agriculture. House Concurrent Resolution 40. Concurrent resolution expressing the sense of the Congress that the Federal Government should maintain current efforts in Federal nutrition programs to prevent increases in domestic hunger; with amendments (Rept. No. 98-336, Pt. I). Ordered to be printed.

SUBSEQUENT ACTION ON A REPORTED BILL CONCURRENTLY REFERRED

Under clause 5 of rule X, the following action was taken by the Speaker:

Consideration of H.R. 1234 by the Committee on Ways and Means extended not later than September 26, 1983.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mrs. HALL of Indiana (for herself, Mr. UDALL, Mr. FORD of Michigan, Mr. CLAY, Mrs. SCHROEDER, Mr. GARCIA, Mr. LELAND, Ms. OAKAR, Mr. DELLUMS, Mr. MITCHELL, Mr. RANGEL, Mrs. COLLINS, Mr. DIXON, Mr. GRAY, Mr. OWENS, Mr. TOWNS, Mr. FORD of Tennessee, Mr. STOKES, Mr. FAUNTROY, Mr. HOYER, Mr. BONER of Tennessee, Mr. PEPPER, Mr. LANTOS, Mr. WON PAT, Mr. FROST, Mr. BERMAN, Mr. BOSCO, Mr. D'AMOURS, Mr. FOGLIETTA, Mrs. SCHNEIDER, Mr. FRANK, Mrs. KENNELLY, Mr. SOLARZ, Mr. HARRISON, Mr. LEHMAN of California, Mr. MARKEY, Mr. ORTIZ, Mr. MORRISON of Connecticut, Mr. KOGOVSEK, Mrs. JOHNSON, Mr. MCNULTY, Mr. WAXMAN, Mr. SIMON, Mr. RODINO, Mr. MATSUI, Mr. KOSTMAYER, Mr. ACKERMAN, Mr. STRATTON, Mr. KEMP, Mr. MOODY, Mr. SLATTERY, Mr. OBERSTAR, Mr. STUDDS, Mr. TORRICELLI, Mr. FAZIO, Mr. LEVINE of California, Mr. BRYANT, Mr. CARR, Mr. SCHUMER, Mr. LONG of Louisiana, Mr. BIAGGI, Mr. WIRTH, Mr. ASPIN, Mr. MCCURDY, Mr. WHEAT, Mr. SUNIA, Mr. SMITH of Florida, Mr. SAVAGE, Mr. STARK, Mr. SILJANDER, Mr. LUNGREN, Mr. SIKORSKI, Mr. YATES, Mr. VENTO, Mr. RICHARDSON, Mr. GORE, Mr. YOUNG of Missouri, Mr. COLEMAN of Texas, Mr. PENNY, Mr. MINETA, Mr. AKAKA, Mr. TALLON, Mr. JONES of North Carolina, Mr. CLARKE, Mr. TORRES, Mr. SEIBERLING, Ms. KAPTUR, Mr. LEVIN of Michigan, Ms. MIKULSKI, Mr. MCCLOSKEY, Mr. LOWRY of Washington, Mr. HUBBARD, Mrs. BOGGS, Mr. GONZALEZ, Mr. MOAKLEY, Mrs. BOXER, Mr. SABO, Mr. NOWAK, Mr. BARNES, Mr. WISE, Mr. HOWARD, Mr. REID, Mr. WEAVER, Mr. ZABLOCKI, Mr. MAVROULES, Mr. TAUZIN, Mr. HAWKINS, Mr. MURTHA, and Mr. PICKLE):

H.R. 3706. A bill to amend title 5, United States Code, to make the birthday of Martin Luther King, Jr., a legal public holiday; to the Committee on Post Office and Civil Service.

By Mr. FAUNTROY:

H.R. 3707. A bill to convey the District of Columbia Employment Security Building to the District of Columbia and to provide for the payment of a note entered into to finance the construction of such building; to the Committee on the District of Columbia.

H.R. 3708. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to provide autonomy for the District of Columbia Government over expenditure of funds derived from revenues of the District of Columbia Government; to the Committee on the District of Columbia.

By Mr. GUARINI:

H.R. 3709. A bill to extend the existing suspension of duty on natural graphite until

January 1, 1988; to the Committee on Ways and Means.

By Mr. HARKIN:

H.R. 3710. A bill to amend title XVIII of the Social Security Act to provide for a program of health care for elderly individuals who require long-term care; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. HARTNETT:

H.R. 3711. A bill to postpone for 10 years the effective date of provisions terminating mother's and father's benefits under title II of the Social Security Act upon the child's attainment of age 16; to the Committee on Ways and Means.

By Mr. LAFALCE:

H.R. 3712. A bill to amend the Defense Production Act of 1950 to revitalize the defense industrial base of the United States; jointly, to the Committees on Banking, Finance and Urban Affairs and Education and Labor.

By Mr. MARLENEE:

H.R. 3713. A bill to amend title 18, United States Code, to penalize the obstruction of hunts, and for other purposes; to the Committee on the Judiciary.

By Mr. Mr. MARLENEE (for himself and Mr. CRAIG):

H.R. 3714. A bill to provide to any person lawfully possessing a firearm in the place of such person's residence in the United States the right to possess that firearm anywhere in the United States; to the Committee on the Judiciary.

H.R. 3715. A bill to protect the manufacturers of firearms from certain litigation; to the Committee on the Judiciary.

H.R. 3716. A bill to protect owners of firearms from certain litigation; to the Committee on the Judiciary.

By Mr. MARRIOTT (for himself, Mr. YOUNG of Alaska, Mrs. VUCANOVICH, and Mr. EMERSON):

H.R. 3717. A bill to strengthen national minerals and materials policy coordination, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Science and Technology.

By Mr. NICHOLS (for himself, Mr. HOPKINS, Mr. KAZEN, Mr. RAY, Mr. BRITT, Mr. KASICH, Mr. STRATTON, Mr. DANIEL, Mr. MARTIN of New York, and Mr. DANIEL B. CRANE):

H.R. 3718. A bill to amend title 10, United States Code, to strengthen the position of Chairman of the Joint Chiefs of Staff and to provide for more efficient and effective operation of the Joint Chiefs of Staff; to the Committee on Armed Services.

By Mr. RIDGE:

H.R. 3719. A bill to provide a comprehensive reform of Federal laws relating to the pricing and marketing of natural gas; to the Committee on Energy and Commerce.

By Mr. SHUSTER (for himself, Mr. BORSKI, Mr. CLINGER, Mr. COUGHLIN, Mr. COYNE, Mr. EDGAR, Mr. FOGLIETTA, Mr. GAYDOS, Mr. GEKAS, Mr. GOODLING, Mr. GRAY, Mr. HARRISON, Mr. KOLTER, Mr. KOSTMAYER, Mr. MCDADE, Mr. MURPHY, Mr. MURTHA, Mr. RIDGE, Mr. RITTER, Mr. SCHULZE, Mr. WALGREN, Mr. WALKER, and Mr. YATRON):

H.R. 3720. A bill to name the Veterans' Administration Medical Center in Altoona, Pa., as the "James E. Van Zandt Veterans' Administration Medical Center"; to the Committee on Veterans' Affairs.

By Mr. STARK:

H.R. 3721. A bill to amend the Internal Revenue Code of 1954 to permit the tax-free rollover of certain benefits received by law enforcement officers and firefighters on separation from service by increasing the limitation on the deduction for retirement savings; to the Committee on Ways and Means.

By Mr. JEFFORDS:

H.J. Res. 335. Joint resolution designating the week beginning January 29, 1984, as "National Cross Country Ski Week;" to the Committee on Post Office and Civil Service.

By Mr. TAUZIN:

H.J. Res. 336. Joint resolution designating March 23, 1984, as "National Energy Education Day;" to the Committee on Post Office and Civil Service.

By Mr. TOWNS (for himself, Mr. BONIOR of Michigan, Mr. DELLUMS, and Ms. MIKULSKI):

H.J. Res. 337. Joint resolution to designate the month of March 1984 as "National Social Work Month;" to the Committee on Post Office and Civil Service.

By Mr. FRENZEL (for himself, Mr. GINGRICH, Mr. DICKINSON, Mrs. LLOYD, Mr. LUKEN, Mr. LOEFFLER, Mrs. SCHROEDER, Mr. O'BRIEN, Mr. ANNUNZIO, Mr. HYDE, Mr. COATS, Mr. CONABLE, Mr. FUQUA, Mr. SABO, Mr. BOEHLERT, Mr. WINN, and Mr. DUNCAN):

H. Res. 291. Resolution abolishing the page system of the House of Representatives; to the Committee on House Administration.

By Mr. HAMILTON:

H. Res. 292. Resolution to amend the rules of the House of Representatives to restrict the honoraria any Member may receive from persons with legislative interests before committees upon which the Member serves; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LIPINSKI:

H.R. 3722. A bill to permit the vessel *Odyssey* to engage in the coastwise trade and the fisheries; to the Committee on Merchant Marine and Fisheries.

By Mr. SPRATT:

H.R. 3723. A bill for the relief of Henry D. Barnett; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 225: Mr. RINALDO, Mrs. COLLINS, Mr. HOWARD, and Mr. YATRON.

H.R. 493: Mr. WOLF, and Mr. JONES of North Carolina.

H.R. 953: Mr. MATSUI and Mr. O'BRIEN.

H.R. 1087: Mr. DEWINE.

H.R. 1199: Mr. ARCHER, Mr. AUCOIN, Mr. BEDELL, Mr. BLILEY, Mr. BOUCHER, Mr. CARR, Mr. COYNE, Mr. PHILIP M. CRANE, Mr. DANNEMEYER, Mr. DINGELL, Mr. FOGLIETTA, Mr. FOLEY, Mr. FORD of Michigan, Mr. GARCIA, Mr. GIBBONS, Mr. GORE, Mr. HUGHES, Mr. WOLPE, Mr. LEHMAN of Florida, Mr. LONG of Louisiana, Mr. MCKINNEY, Mr. MADIGAN, Mr. MINETA, Mr. MITCHELL, Mr. MOAKLEY, Mr. MOLLOHAN, Mr. NATCHER, Mr. PAUL, Mr. PEASE, Mr. PRICE, Mr. RITTER, Mr. ROTH, Mr. ROYBAL, Mr. SCHULZE, Mr. SEIBERLING, Mr. SMITH of Iowa, Mr. THOMAS of California, Mr. UDALL, Mr. WALKER, Mr. WEISS, Mr. BENNETT, Mr. BONIOR of Michigan, Mr. LUNDINE, Mr. ROSE, and Mr. GONZALEZ.

H.R. 1571: Mr. SMITH of New Jersey and Mrs. KENNELLY.

H.R. 1580: Mr. SCHEUER and Mr. SIKORSKI.

H.R. 1610: Mr. TAUZIN.

H.R. 1676: Mr. DANIEL and Mr. LANTOS.

H.R. 1887: Mr. MYERS, Mr. MOAKLEY, Mr. TORRICELLI, Mr. GEKAS, Mr. SHUSTER, Mr. RITTER, Mr. WHITLEY, Mr. PACKARD, Mr. ANDREWS of Texas, Mr. NIELSON of Utah, Mr. PURSELL, Mrs. JOHNSON, Mr. YOUNG of Florida, and Mr. LUNGREN.

H.R. 1905: Mr. JONES of Tennessee, Mr. GILMAN, Mr. STRATTON, Mr. OTTINGER, and Mr. GLICKMAN.

H.R. 1959: Mr. BONIOR of Michigan, Mr. SUNIA, Mr. ROE, Mr. DELLUMS, Mr. ADDABBO, Mr. LANTOS, Mr. DE LA GARZA, and Mr. HARRISON.

H.R. 2053: Mr. BRYANT.

H.R. 2099: Mr. MINETA, Mr. BRITT, and Mr. WISE.

H.R. 2100: Mr. WHEAT.

H.R. 2105: Mr. FRANK.

H.R. 2362: Mr. ACKERMAN, Mr. ADDABBO, Mr. BEDELL, Mr. BENNETT, Mr. CLAY, Mr. CONYERS, Mr. D'AMOURS, Mr. DELLUMS, Mr. DWYER of New Jersey, Mr. EDWARDS of California, Mr. EVANS of Illinois, Mr. FASCELL, Mr. FAUNTROY, Mr. FAZIO, Mr. FORD of Tennessee, Mr. FROST, Mrs. HALL of Indiana, Mr. HERTEL of Michigan, Mr. KASTENMEIER, Mr. LONG of Maryland, Mr. MATSUI, Mr. MITCHELL, Mr. MORRISON of Connecticut, Mr. MURPHY, Mr. OWENS, Mr. PATTERSON, Mr. RICHARDSON, Mr. RODINO, Mrs. SCHROEDER, Mr. SEIBERLING, Mr. SIKORSKI, Mr. SMITH of Florida, Mr. STOKES, Mr. TOWNS, Mr. VENTO, Mr. WASHINGTON, Mr. WAXMAN, Mr. WEAVER, Mr. WEISS, Mr. WHEAT, Mr. WIRTH, and Mr. WOLPE.

H.R. 2468: Mr. TAUKE, Mr. PACKARD, and Mrs. LLOYD.

H.R. 2490: Mr. RICHARDSON.

H.R. 2790: Mr. STARK, Mr. LAGOMARSINO, and Mr. UDALL.

H.R. 2817: Mr. GAYDOS and Mr. GRAY.

H.R. 2872: Mr. NOWAK and Mr. PORTER.

H.R. 2916: Mr. WYLIE and Mr. GARCIA.

H.R. 2927: Mr. KOLTER.

H.R. 2977: Mr. MOORHEAD.

H.R. 2991: Mr. HUGHES, Mr. TALLON, Mr. BIAGGI, and Mr. TORRES.

Res. 179: Mr. OXLEY, Mr. DANIEL, Mr. KRAMER, Mr. SHARP, Mr. MCCLOSKEY, Mr. LEVIN of Michigan, Mr. LUJAN, Mr. THOMAS of Georgia, Mr. COUGHLIN, Mr. WORTLEY, Mr. LOEFFLER, Mr. HAMMERSCHMIDT, Mr. MOORHEAD, Mr. LEWIS of Florida, Mr. HAMILTON, Mr. ACKERMAN, Mr. CARNEY, Ms. KAPTUR, Mr. SABO, Mr. PATTERSON, Mr. STARK, Mrs. SCHNEIDER, Mr. MACKAY, Mr. CONTE, Mr. OTTINGER, Mr. MORRISON of Connecticut, Mr. TOWNS, Mr. YOUNG of Alaska, Mr. WOLF, Mr. KOGOVSEK, Mr. KEMP, Mr. GONZALEZ, Mr. QUILLEN, Mr. EVANS of Iowa, Mr. BROOMFIELD, Mr. GILMAN, Mr. DANIEL B. CRANE, Mr. WHITEHURST, Mr. RITTER, Mr. ROYBAL, Mr. CARPER, Mr. TALLON, Mr. HARKIN, Mr. SISISKY, Mr. VOLKMER, Mr. ROWLAND, Mr. STENHOLM, Mr. PANETTA, and Mr. STOKES.

H.J. Res. 283: Mr. FLORIO, Mr. KOSTMAYER, Mr. LEVINE of California, Mr. LEWIS of Florida, Mr. LUKEN, Mr. PORTER, Mr. SCHAEFER, Mr. WEBER, and Mr. WHEAT.

H.J. Res. 292: Mr. ADDABBO, Mr. WAXMAN, Mr. MATSUI, Mr. TOWNS, Mr. ANDREWS of Texas, Mrs. BYRON, Mr. SIMON, Mr. JEFFORDS, Mr. EDWARDS of California, Mr. VANDERGRIFF, Mr. ACKERMAN, Mr. SMITH of Florida, Mr. HUGHES, Mr. MARTINEZ, Mr. GEKAS, Mr. WYDEN, Mr. LEVINE of California, Mr. OWENS, Mr. RANGEL, Mr. FEIGHAN, Mr. DASCHLE, Mr. ROE, Mr. SOLARZ, Mr. BIAGGI, Mrs. BOXER, Mr. WORTLEY, Mr. DWYER of New Jersey, Mr. MCGRATH, Ms. MIKULSKI, Mr. HORTON, Mr. SUNIA, Mr. TAUZIN, Mr. LELAND, Mr. DYSON, Mr. FORSYTHE, Mr. WEISS, Mr. WILSON, Mr. BRITT, Mr. SCHUMER, Mr. MORRISON of Connecticut, Mr. RATCHFORD, Mr. TORRICELLI, Mr. BERMAN, Mr. GUARINI, Mr. DE LA GARZA, Mr. GILMAN, Mr. DOWNEY of New York, Mr. BROWN of California, Mr. CARPER, Mr. CLARKE, Mr. DOWDY of Mississippi Mr. DYMALLY, Mr. WALGREN, Mr. SNYDER, Mr. DAUB, Mrs. SCHNEIDER, Mr. GRAY, Ms. KAPTUR, Mr. HEFTEL of Hawaii, Mr. RICHARDSON, Mr. FRENZEL, Mrs. COLLINS, Mr. LAFALCE, Mr. FISH, Mr. CLINGER, Mr. SCHEUER, Mr. ALEXANDER, Mr. CARR, Mr. BENNETT, Mr. CLAY, Mr. WON PAT, Mr. CROCKETT, Mr. BARNES, Mr. FAZIO, Mr. SABO, Mr. PRITCHARD, Mr. PASHAYAN, Mr. HATCHER, Mr. PRICE, Mr. MURPHY, Mr. MOLINARI, Mr. FOLEY, Mr. SAVAGE, Mr. FAUNTROY, Mr. RODINO, Mr. WEBER, Mr. HAMMERSCHMIDT, Mr. BONER of Tennessee, Mr. WHITEHURST, Mr. HANSEN of Idaho, Mr. PATTERSON, Mr. DIXON, Mr. FORD of Tennessee, Mr. VENTO, Mr. FROST, Mr. KEMP, Mr. CORRADA, Mr. BATES, Mr. LOWERY of California, Mr. AKAKA, Mr. HOYER, Mr. BREAUX, Mr. BROWN of Colorado, Mr. DANIEL B. CRANE, Mr. MCNULTY, and Mr. BOUCHER.

H.J. Res. 324: Mr. SUNIA, Mr. WIRTH, Mr. LELAND, Mr. ROE, Ms. OAKAR, Mr. PRITCHARD, Mr. SMITH of Iowa, Mr. MCNULTY, Mr. HUTTO, Mr. WOLF, Mr. KEMP, Mr. DIXON, Mr. DWYER of New Jersey, Mr. KINDNESS, Mr. BEDELL, Mr. FORSYTHE, Mr. PATTERSON, Mr. MILLER of Ohio, Mr. FROST, Mr. SIMON, Mr. TOWNS, Mr. LEHMAN of Florida, Mr. TALLON, Mr. BARNES, Mr. LEVIN of Michigan, Mr. HUGHES, Mr. CORRADA, Mr. DEWINE, Mr. MCCAIN, Mr. WEISS, Mr. ROWLAND, Mr. WHEAT, Mr. PHILIP M. CRANE, Mr. BROYHILL, Mr. SMITH of Florida, Mr. RITTER, Mr. BERMAN, and Mr. MCGRATH.

H. Con. Res. 107: Mr. AKAKA, Mr. BROYHILL, Mr. MCKERNAN, and Mr. O'BRIEN.

H. Con. Res. 122: Mr. HOYER, Mr. HUGHES, Mr. MATSUI, Mr. EVANS of Illinois, Mr. LOWRY of Washington, Mrs. COLLINS, and Mr. RICHARDSON.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

[Omitted from the Record of July 28, 1983]

H.R. 953: Mr. EDWARDS of Oklahoma.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2780

By Mr. JONES of Oklahoma:

—Page 2, line 17, after the word "thereof" strike "$5,297,330,000" and insert "$5,016,700,000".

By Mr. NELSON of Florida:

—Page 2, line 14, strike out the heading and all that follows through the period on line 17 and redesignate the succeeding sections and references thereto accordingly.

H.R. 2957

By Mr. GONZALEZ:

—Page 18, line 21, strike out "4,250 million" and substitute "500 million".

—Page 19, line 2, strike out "4,250" and substitute "500".

—Page 19, line 18, strike out "5,310.8 million" and substitute "500 million".

—Page 21, line 13, strike out "one year" and substitute "six months".

—Page 24, line 14, strike out "one hundred and eighty" and substitute "ninety".

—Page 25, strike out line 5 and all that follows through line 9.

—Page 31, line 13, strike out "one hundred and eighty" and substitute "ninety".

—Page 31, line 16, strike out "ninety" and substitute "sixty".

—Page 41, strike out line 6 and all that follows through line 18.

By Mr. GRAMM:

—On Page 22, line 17, after the word "apartheid" add "and communist dictatorships".

On Page 22, line 21, strike the word "practice" and all that follows through the word "labor" on line 23, and insert in lieu thereof the following: "practices of apartheid and communist dictatorship result in severe constraints on labor and capital mobility and other highly inefficient labor and capital".

On Page 23, line 4, strike the period and insert in lieu thereof "or communist dictatorship."

By Mr. KEMP:

—Page 44, line 18, strike "$380,000,000" and insert "$290,000,000".

Page 45, line 8, strike "$380,000,000" and insert "$290,000,000".

—Page 45, strike out line 11 and all that follows through line 16.

—Page 46, after line 8, insert the following:

"(c) Whereas the Republic of China is a charter member in good standing of the Asian Development Bank;

"Whereas the Republic of China has grown from a borrower to a lender in the Asian Development Bank; and

"Whereas the Republic of China provides, through its economic success, a model for other nations in Asia: Now, therefore, be it

"Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the support provided by the United States to the Asian Development Bank will be terminated if the Republic of China is denied full membership in the Asian Development Bank.".

By Mr. ST GERMAIN:

—Page 29, strike out line 16 and all that follows through line 19.

Page 30, beginning on line 6, strike out "Pursuant to regulations promulgated by the Examination Council, each" and insert in lieu thereof "Each".

Page 30, line 8, insert ", by regulation," after "shall require".

Page 31, beginning on line 12, strike out "The" and all that follows through "enactment of this title." on line 14.

Page 31, beginning on line 16, strike out "ninety days after the promulgation of such Examination Council regulations." and insert in lieu thereof "120 days after the date of the enactment of this title.".

Page 31, line 20, strike out "Examination Council" and insert in lieu thereof "appropriate Federal banking agencies".

Page 32, beginning on line 3, strike out "The" and all that follows through "enactment of this title," on line 5.

Page 32, beginning on line 7, strike out "ninety days" and all that follows through "regulations." on line 9, and insert in lieu thereof "120 days after the date of the enactment of this title.".

Page 32, beginning on line 12, strike out "Pursuant to regulations promulgated by the Examination Council, each" and insert in lieu thereof "Each".

Page 32, line 14, insert ", by regulation," after "shall require".

Page 32, line 17, strike out "the Examination Council" and insert in lieu thereof "such".

Page 32, beginning on line 18, strike out "Pursuant to regulations promulgated by

the Examination Council, each" and insert in lieu thereof "Each".

Page 32, line 20, insert ", by regulation," after "shall require".

Page 32, beginning on line 23, strike out "The" and all that follows through "enactment of this title." on line 25.

Page 33, beginning on line 2, strike out "ninety days" and all that follows through "regulations." on line 4, and insert in lieu thereof "120 days after the date of the enactment of this title.".

Page 33, line 7, strike out "(a) The Examination Council and the" and insert in lieu thereof "The".

Page 33, strike out line 13 and all that follows through page 35, line 7, and insert in lieu thereof the following:

CAPITAL ADEQUACY

SEC. 408. (a)(1) Each appropriate Federal banking agency shall cause banking institutions to achieve and maintain adequate capital by establishing minimum levels of capital for such institutions and by using such other methods as the agency deems appropriate.

(2) Each appropriate Federal banking agency shall have the authority to establish such minimum level of capital for an institution as the agency, in its discretion, deems to be necessary or appropriate in light of the particular circumstances of the institution.

(b)(1) Failure of a banking institution to maintain capital at or above its minimum level as established pursuant to subsection (a) may be deemed by the appropriate Federal banking agency, in its discretion, to constitute an unsafe and unsound practice within the meaning of section 8 of the Federal Deposit Insurance Act.

(2)(A) In addition to, or in lieu of, any other action authorized by law, including subsection (b)(1), the appropriate Federal banking agency may issue a directive to a banking institution that fails to maintain capital at or above its required level as established pursuant to subsection (a).

(B)(i) Such directive may require the institution to submit and adhere to a plan acceptable to the agency describing the means and timing by which the institution shall achieve its required capital level.

(ii) Any such directive issued pursuant to this paragraph, including plans submitted pursuant thereto, shall be enforceable under the provisions of section 8(i) of the Federal Deposit Insurance Act to the same extent as an effective and outstanding order issued pursuant to section 8(b) of such Act which has become final.

(3)(A) Each appropriate Federal Banking agency may consider such institution's progress in adhering to any plan required under this subsection whenever such institution, or an affiliate thereof, or the holding company which controls such institution, seeks the requisite approval of such agency for any proposal which would divert earnings, diminish capital, or otherwise impede such institution's progress in achieving its minimum capital level.

(B) Such agency may deny such approval where it determines that such proposal would adversely affect the ability of the institution to comply with such plan.

(C) The Chairman of the Board of Governors of the Federal Reserve System and the Secretary of the Treasury shall encourage governments, central banks, and regulatory authorities of other major banking countries to work toward maintaining and, where appropriate, strengthening the capital bases of banking institutions involved in international lending.

Page 36, line 16, strike out "The Examination Council is" and insert in lieu thereof "The appropriate Federal banking agencies are".

Page 36, beginning on line 17, strike out "the Examination Council and".

Page 37, strike out line 20 and all that follows through line 24.

Page 38, line 1, strike out "(e)" and insert in lieu thereof "(d)".

Page 38, strike out line 14 and all that follows through page 40, line 14.

Page 40, line 16, strike out "Sec. 412." and insert in lieu thereof "Sec. 411".

Page 40, beginning on line 17, strike out "the Examination Council (as defined in section 402(c) of this Act) and".

Page 40, line 25, strike out "Examination Council and the".

Page 42, line 8, strike out "the Examination Council or".

Page 42, line 13, strike out "the Examination Council or".

Page 42, line 17, strike out "the Examination Council or".

Page 42, beginning on line 24, strike out "the Examination Council or".

Page 43, beginning on line 1, strike out "the Examination Council or an" and insert in lieu thereof "each".

Page 43, beginning on line 5, strike out "The Examination Council or an" and insert in lieu thereof "each".

Page 43, line 15, strike out "the Examination Council or".

Page 43, after line 18, insert the following:

REPORTS TO CONGRESS

SEC. 412. (a) Within 120 days after the date of the enactment of this title, the Secretary of the Treasury shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on the statutes, regulations, and examination and supervisory procedures and practices, governing international banking in each of the Group of Ten Nations and Switzerland with particular attention to such matters bearing on capital requirements, lending limits, reserves, disclosure, examiner access, and lender of last resort resources.

(b) Not later than 120 days after the date of the enactment of this title, the Chairman of the Board of Governors of the Federal Reserve System and the Secretary of the Treasury shall transmit a report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on the progress made in reaching the goal specified in section 408(c).

(c)(1) Within one year after the date of the enactment of this title and for each of the two succeeding years, the appropriate Federal banking agencies shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives on actions taken to implement the provisions of this title.

(2) The report shall include a description of the actions taken in carrying out the objectives of the title, and any actions taken by any appropriate Federal banking agency that are inconsistent with the uniform implementation by the appropriate Federal banking agencies of their respective authorities under this title, and any recommendations for amendments to this or other legislation.

By Mr. WALKER:

—On page 28, after line 8, add the following:

SEC. 308. Consistent with the objective of sustaining worldwide economic growth and recovery set forth in this title, section 3 of Public Law 96-389, the Bretton Woods Agreements Act Amendments of 1980, is amended by striking it in its entirety and inserting in lieu thereof the following: "Beginning in fiscal year 1985, the total budget outlays of the Federal Government shall not exceed its receipts.".

—On page 28, after line 8, add the following:

SEC. 308. Consistent with the objective of sustaining worldwide economic growth and recovery set forth in this title, Congress reaffirms its commitment to the mandates required under section 7 of Public Law 96-435, the Bretton Woods Agreements Act Amendments of 1978.

EXTENSIONS OF REMARKS

CHILD OF HOLOCAUST SURVIVORS EXPLAINS CHOICE OF CAREER

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. LENT. Mr. Speaker, Members of the House will recall that earlier this year, Washington, D.C., was honored by a gathering of survivors of the Holocaust. I attended some of their sessions and it was one of the most moving experiences of my life. The group of survivors becomes smaller with each passing year, but memories of the experience pass from the parents to their children and sometimes influence the child's choice of career.

Such is the case of Diane R. Spielmann, the associate archivist of the Leo Baeck Institute in New York City. Her parents survived the camps at Auschwitz and Riga, and their experience compelled their daughter to devote her life to the preservation of a culture that the Nazis tried to destroy during World War II.

I urge my colleagues to read this account and reflect on the course chosen by this extraordinary woman, Diane Spielmann.

The material follows:

STATEMENT BY DIANE R. SPIELMANN

Yesterday I had the privilege to speak as a professional; today I have the added privilege to speak on the personal level.

I will be speaking briefly on how my personal feeling of responsibility given my identity as a child of Holocaust survivors has lead to my professional responsibilities as the associate archivist of the Leo Baeck Institute in New York.

The institute with additional offices in Jerusalem and London is a membership-supported research center founded in 1955 by the Council of Jews from Germany. The institute in New York City consists of archives and library concerned with the preservation of the history and culture of German-speaking Jewry of Central Europe from the Emancipation to the Nazi persecution. I will shortly describe our resources and functions in greater detail. However, I would first like to get back to the topic of personal identity and responsibilities of the Second Generation.

My mother, German born, is a survivor of Auschwitz and Ravensbrueck. My father, Galician born and former resident of Berlin for thirty years is a survivor of Riga and Stuffhof. Thus as a child whose both parents suffered the ravages of the Holocaust, my own feelings and my need for identification with my parents, with my past and with the Jewish community have always been quite strong. This need for identification was amplified during adolescence and especially while I was in college in the late sixties and early seventies, a time when the emphasis was on "finding oneself." As a result, in college my program was filled with Jewish studies ranging from history to language. However, I also did not neglect German language studies. Having been brought up bilingually, my association with the German language was not negative. Thus I continued my graduate work in German Language and Literature—but interestingly enough—my personal studies always veered toward the Jewish influence in German letters. It seemed that I needed to justify to myself, my studies and later my career for five years as teacher of the German language on the college and graduate levels. While teaching German, I realized I could never be quite comfortable. I must emphasize here that this was not the result of external factors, such as professional or school environment—but the result of an inner tension arising from my own ambivalence of what the German language had come to represent to me. On the one hand it was the language of many Jewish writers and thinkers as well as the language of my parents and my home environment, but, on the other hand I could not deny that it was also the language of those who perpetrated the Holocaust. These mixed feelings and inner tensions finally resulted in my resignation as a German teacher. My identity had become a question of responsibility to myself and to my personal background.

As members of the so-called Second Generation with the awareness of what our parents endured, we question our every step. We are attuned to be more sensitive in relation to ourselves as well as to the community at large. It has been passed along to us by our parents and by the circumstances of our upbringing—to be more understanding—to have a greater consciousness of our environment.

In my case the responsibility to myself as member of the Second Generation was realized into a professional responsibility, almost seven years ago. When I began working as a part-time assistant in the archives of the Leo Baeck Institute, an institute dedicated to perpetuate my legacy—our legacy. Finally, my training in Jewish studies, history and the German language was transformed into a professional responsibility. Now as full-time associate Archivist of the Leo Baeck Institute I have the unique opportunity to utilize my studies in conjunction with my background in order to make known our past.

The archives of the Leo Baeck Institute, consisting of over 2000 linear feet, attests to the history of German-speaking Jewry throughout the centuries with a substantial percentage dealing with the era of the Second World War.

Collections consist of documents and photos of former Jewish organizations, institutions and businesses as well as Nazi documentation. For example such varied materials as deportations lists, or records of Jewish communities in Germany and Central Europe before and after the war are available to researchers. Our files include personal papers of individuals from all levels of society—professionals, academics, businesspeople, housewives, and even children. Among these holdings are over 800 unpublished memoirs, of which approximately 25 percent attest to the atrocities of the Nazi era. These memoirs reflect the lives of those who suffered through the death camps, of those who lived in hiding, and of those fortunate enough to have escaped by emigrating to the four corners of the earth. We also have an extensive art collection with many of the works created by both professional and amateur artists while interned in the camps or while living in emigration.

Our library comprising over 60,000 volumes contains among its published works, Jewish and emigrant diaries, Jewish periodicals and reference books, as well as Nazi publications. All of these supplement the rich archival holdings.

In the archives and library it is our responsibility to catalogue these materials and make them accessible to the general public—to the academic community—to students—to professors—to researchers.

Museums throughout the world use our resources. For example, the "Akademie der Kuenste" (Academy of Arts) of West Berlin, using our material, is planning an exhibit on bookburnings to open shortly. This will eventually travel throughout West Germany. Closer to home, the Leo Baeck Institute has provided the Jewish Museum in New York with much historical material of Frankfurt for their current exhibit, "A Tale of Two Cities." We also provide material for Jewish publications, for documentary films, public and private, here and abroad.

To our membership we extend further privileges. Members receive mailings of biannual Newsletters plus our year book of scholarly writings highly acclaimed in the international academic community. Members also receive invitations to lectures and seminars sponsored by the Leo Baeck Institute held throughout the academic year. Our functions and services are indeed numerous and varied.

Thus I find it most satisfying to be a part of the Leo Baeck Institute where the personal responsibility to myself as member of the Second Generation has been transformed into a professional responsibility to the public—A responsibility to inform and enlighten as was passed on to me by my parents.

For those of you who are interested and have not already done so—I invite you to speak to me and visit our booth here in order to view in greater detail what type of materials are available at the Leo Baeck Institute in New York.●

NATIONAL GROUNDWATER COMMISSION

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. FLORIO. Mr. Speaker, I wish to bring to my colleagues' attention an article published in the New York Times on July 26, 1983, entitled, "U.S. Effort Grows To Protect Water: Rise in Underground Pollution Threatens Drinking Supply." This article, written by Mr. Philip Shabecoff, emphasizes that there is presently no unified national strategy for protecting the Nation's underground water supply from contamination. As a result of this deficiency, the drinking water supply for more than half the country's population is in danger from toxins which are seeping into the Nation's aquifers. These toxins come from a variety of sources, including waste dumps, septic tanks, construction, mining, and industrial activity. Mr. Shabecoff points out that in the past several years 2,830 wells in 20 States have been contaminated and that this number continues to grow on an almost daily basis.

One answer to this deficiency is the creation of a national groundwater commission. Such a commission could investigate, among other things, the adequacy of existing standards for groundwater quality under State and Federal law, the merits of various methods for the abatement and containment of groundwater contamination, and whether methods for aquifer restoration are practical alternatives to abatement and containment. Upon completion of its work, the commission's report could be used by Congress to develop a comprehensive national plan which will insure that everything that can be done, will be done, and that the Nation's drinking water will be safe and pure.

An amendment to create a national groundwater commission will be offered by Mr. EDGAR to the Hazardous Waste Control and Enforcement Act, H.R. 2867, which is scheduled for the floor next week. The need for the commission and a national groundwater policy is clear. If my colleagues will take a few minutes to read the following article, I am confident they will agree with me.

The article follows:

[From the New York Times, July 26, 1983]

U.S. EFFORT GROWS TO PROTECT WATER

(By Philip Shabecoff)

WASHINGTON, July 25.—American governments at all levels are urgently seeking solutions to the increasing contamination of the underground water supply that provides drinking water for more than half of the country's population.

Because there is no nationwide system of monitoring underground water pollution, the full extent of the problem is not known. But environmental experts agree that the problem is serious in virtually every part of the country and is getting worse. They note that once ground water is contaminated, it is extremely difficult and sometimes impossible to reverse the process.

NO UNIFIED NATIONAL STRATEGY

"We are sitting on a time bomb, not only in my district but in every Congressional district and every locality in this country," said Representative Mike Synar, Democrat of Oklahoma, chairman of a House subcommittee that is investigating the problem.

Despite increasing knowledge and growing alarm about the magnitude of the problem and broad legislative authority to address it, there has been no coordinated national strategy to clean up contaminated ground water and protect supplies that are still pristine. In fact, there is no agreement that there should be such a strategy.

William D. Ruckelshaus, the new Administrator of the Environmental Protection Agency, said recently that he has given high priority to protecting ground water and has assigned a special group in his agency to recommend solutions.

"But we must all understand that there is no quick or simple solution," he told a House subcommittee this month. "The problems we face are the result of decades of misunderstanding and neglect of this vast resource."

According to figures assembled by Mr. Synar's Environment and Natural Resources subcommittee of the House Government Operations Committee, ground water use in this country grew from 21 billion gallons a day in 1945 to 82 billion gallons in 1975, and it is projected to reach 100 billion gallons by the year 2000.

Mr. Synar said a survey showed that 2,830 wells in 20 states have been contaminated in the past few years and that "almost daily," dozens of new wells are found unusable because of toxins leaching into the ground water.

The poisons seep into the water from a variety of sources, including waste dumps, septic tanks, mining, industrial and construction activity, the runoff of agricultural chemicals and the injection of industrial chemicals above, below and sometimes directly into the aquifers.

FLURRY OF LEGISLATIVE ACTIVITY

There has been a flurry of legislative activity in recent weeks as Congress has sought to come to grips with the issue. Last week a bipartisan group of Congressmen said they were introducing a bill that would create a national groundwater commission to make recommendations on what needs to be done.

Representative James J. Florio, Democrat of New Jersey, one of the proposal's sponsors, said the Environmental Protection Agency had not come forward with a program for solving the problem. "Millions of people rely on ground water for their drinking water and Congress must protect it from hazardous and other kinds of waste," he said.

A policy drafted by the staff of the environmental agency proposed Federal, state and local cooperation in setting national standards for using equipment that would achieve a certain level of clean underground water. But President Reagan's Cabinet Council on Natural Resources killed the proposal earlier this year after Interior Secretary James G. Watt, acting chairman of the council, criticized it as an infringement of states' rights.

CHANGE IN E.P.A. PERSPECTIVE

Mr. Ruckelshaus "is not committed to a national ground water policy," one of his aides said this week. But "neither is he committed against such a policy," he added.

Some agency officials said, however, that there has been a substantial change in policy perspective on ground water since Mr. Ruckelshaus took office this year. In particular, they said, there is no longer any discussion of legislative amendments to ease standards imposed under the Safe Drinking Water Act, or to weaken protections under the Resource Recovery and Conservation Act, Clean Water Act of 1972 and other statutes that give the agency its mandate to protect water.

The agency's change in attitude on the ground water issue is "like night and day," said one official who asked not to be identified.

An important aspect in the search for solutions to the progressive poisoning of ground water is that to control the quality of the water, it is necessary to control the use of the land above it.

But land use decisions have historically been a jealously guarded prerogative of state and local governments. Although advocates of a national ground water policy have noted that aquifers do not conform to state or local boundaries, this tradition has been a significant stumbling block to dealing with the issue nationally.

Some ground water reservoirs, such as the great Ogallala aquifer that runs under several Western states, are becoming depleted as growing cities withdraw more water than is put in, or where watersheds that absorb surface water and refill the aquifers are developed or drained.

NEW YORK AND CONNECTICUT PLANS

In some areas, including Connecticut, a start has been made in regulating land use decisions to protect ground water.

Connecticut is employing a land use system that classifies areas for levels of protection to be afforded ground water. Areas where aquifers are recharged receive the highest level of protection, with limits on landfilling, use of pesticides and highway de-icing salts and other safeguards. Areas where there is not much underground water receive the least protection and may be used for such activities as dumping wastes.

Several states have adopted such classification plans, according to environmental agency officials, and others have considered or are considering legislation to bar the use of certain toxins that have been found to contaminate underground water reserves.

New York City does not get its drinking water from underground sources, but Long Island does. On Long Island, several major studies have been initiated and prohibitions imposed on the use of such substances as alecarb, a pesticide used for potato bugs, and trichloroethylene, and industrial solvent, both of which are suspected cancer-causing agents. Also under assessment are land use restraints, particularly on the Long Island pine barrens, an important recharging area for the aquifer underlying the island.

LACK OF MONITORING SYSTEMS

Ruth Patrick, chairman of the Environmental Assessment Council of the Philadelphia Academy of Natural Sciences, recently told a House subcommittee that "no national systematic effort has been made to determine the frequency of contamination."

"To date," she said, "one of our greatest problems in assessing ground water contamination is the lack of effective monitoring systems; because of this lack, we do not know how widespread contamination is, nor do we know the health effects and other environmental effects produced by ground water contamination."

She said that once an aquifer is contaminated, it can be cleaned up only at great cost, and that sometimes it is simply not feasible to clean ground water once it has become polluted.

Mr. Synar said the recent hearings on the problem had demonstrated that "we don't have enough people to deal with it and, secondly, we don't have the mechanical expertise on the state and local levels."

He said he was convinced that the states needed Federal help in dealing with the ground water issue and that a national ground water policy was required.

"It will cost some money, but, as the commercial says, you can pay now or later," he said.●

RELEASE OUR MINERAL AND MATERIAL RESOURCES FROM THE "RESOURCE FREEZE" OF THE 1970'S

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. MARRIOTT. Mr. Speaker, today, I am introducing the National Minerals and Materials Policy Coordination Act of 1983.

This bill is designed chiefly to provide a more central focus to minerals and materials policy considerations of the Federal Government and to focus the mineral assessment work of the Government, in coordination with private industry and the academic and scientific community, in such a way as to enable us to make more informed land use decisions, especially in areas currently withdrawn from mineral development.

I have long believed that we should know the true mineral potential of lands which the Federal Government, in one way or another, proposes to withdraw from mineral development before making the decision to withdraw them for extensive periods of time. This was the intent of Congress when it passed the Wilderness Act in 1964.

When the 1964 Wilderness Act was enacted, Congress indicated that it expected the mining industry and the Department of the Interior to explore potential wilderness lands for mineral content so that Congress would have the "benefit of professional technical advice as to the presence or absence of minerals in each area" before making a decision about wilderness designation. (Conf. Rep. No. 1829, 88th Congress, 2d session p. 19).

But the truth is that it is impossible to come to any final conclusions on the presence or absence of minerals.

We can never say that we know all the minerals which are in any particular lands because our knowledge of mineral deposition and use changes over time.

The plain fact is that the process of assessing the true mineral potential of the Nation's lands will never be completed because of the nature of geologic formations and of economic and scientific progress. The identification of potentially recoverable deposits of any mineral is dependent on the continued advancement of geological knowledge and insight—and it is dependent on keeping lands open for exploration.

When a wilderness system was first contemplated, proponents emphasized that only a limited amount of land was to be included and therefore, the impact on mineral resources minimized. The first 14.3 million acres that were designated as wilderness in 1964 were considered an almost miniscule fraction of the Nation's land. But as those acres designated as wilderness have mounted through the years, the land possibilities for competing interests outside of wilderness have declined while the interpretation of what uses are allowable in wilderness has narrowly constricted the actual use of those lands including an effective ban on legally permissible mining activity under the 1964 Wilderness Act.

While Congress has effectively prevented lawful mineral activity from proceeding in wilderness areas, in addition, through various appropriations bills, it has effectively extended the closure of lands from any use to another 40 million acres of land generally under wilderness consideration, thus preempting the land-use decisionmaking process.

These appropriations bills have effectively preempted the decisionmaking process by prohibiting any industry exploration and development of oil (including tar sand), gas, coal, oil shale, gilsonite, phosphate, sulphur, and potassium in National Forest System lands which are potential wilderness. Even though the Department will continue to assess the mineral value of these lands, in the absence of real exploration, the value of these evaluations is limited. In a GAO report (EMD-82-29 Feb. 4, 1982), it was found that the estimates of mineral potential for wilderness study areas have been erroneously made, that is, where nothing was known of the mineral potential of an area, the field personnel reported the area had "no potential" for mineral development.

Some of the advocates of earlier versions of these restrictions were willing to prevent exploration or development of hardrock minerals in some 1.5 million acres of acquired forest lands, including the Irish in Missouri, which has some of this country's highest potential for lead-zinc resources. However, after concern for the Nation's needs for strategic and critical minerals was expressed, an amendment to exclude those hardrock minerals from the bill was agreed to.

I was the author of that amendment and today, through introduction of this bill, I raise once again the question: How can the United States make informed land use decisions without a means to continually and effectively assess the mineral potential of our Nation's lands?

The reach for more land to be placed in wilderness—off-limits and inaccessible to all but a limited sector of a growing population—has met with increasing resistance as it has become evident that proponents are unwilling to consider alternative nonexclusive uses of the land in their eagerness to declare wilderness the highest and best use.

There is a tremendous fallacy in the notion of exclusive use so adamantly applied to wilderness areas in particular.

Many advocates would have us believe that the wilderness designation by Congress effects a permanent withdrawal of those lands from proscribed mineral activity. This is an illusory goal. The pressure on wilderness, both potential and actual, for oil and gas development, for example, stems from the increasing demand for energy as the population expands and the geologic fact that the overthrust belt, which is revealing enormous potential, coincides with the mountainous areas which are also most likely candidates for wilderness. In the same GAO report these advocates cite (EMD 81-40 Feb. 11, 1981) to indicate how much land is available for oil and gas leasing, GAO points out that of the 20 million acres withdrawn from leasing in 5 States, over 11 million acres are considered to be valuable for oil and gas.

The oft-stated view that the minerals in the wilderness lands will always be available whenever an emergency arises is naive at best. It reflects an unaccountable removal from reality which results in irresponsible action. Such an argument gives no recognition to lead times involved in getting a mineral into production—especially when no previous mineral investigation has taken place on the land.

It currently takes 8 to 10 years to bring oil and gas into production where there has been no previous discovery, and with regard to hardrock minerals, a geologist counts himself fortunate if he finds one major ore body in 30 years of searching.

The U.S. import dependence for some critical and strategic minerals from numerous unstable foreign sources of supply is too well known to recount here. It is the duty of the Federal Government to assure that the

United States will not be found wanting in an emergency should supply disruptions occur. Stockpiling currently carries with it a $10 billion price tag. The other most reasonable alternative is for the United States to keep its vast lands open to mineral exploration and development.

The notion that wilderness and mineral exploration are incompatible is outdated and clearly false. Mineral exploration results in minimal, temporary intrusion in the land. Mineral development, outside of strip mining, results in minimal temporary disturbance of the land.

Americans seem to have some misconception about the actual impact of mining activities on the Nation's lands. The Bureau of Mines' (Information Circular 8862 published in 1982) report entitled "Land Utilization and Reclamation in the Mining Industry, 1930-80" points out that land used for mining from 1930 through 1980, a period when domestic mining activities were called upon to fulfill mineral requirements for three wars and an expansive economy, amounted to a cumulative total of 5.7 million acres or just one-quarter of 1 percent of the total U.S. land mass and that figure includes coal mining and sand and gravel operations. Currently, 0.13 percent of the total U.S. land mass is being used for mining or mineral processing activities while 70 percent is used for agriculture, 3.4 percent for national parks, 3 percent for urban areas, and 1.1 percent for Forest Service wilderness areas. Land currently dedicated to mining is equivalent to the area used by railroads or about two-thirds of the area used by airports.

Over the last decade, much of the Nation's prime land for mineral use has been under what might be termed a resource freeze. The Nation's large mineral stockpiles amassed in World War II and the Korean war have been severely depleted over this same period, perhaps giving the Nation a false sense of mineral security due to the temporary abundance of these minerals in the market. However, the Nation must move ahead now to encourage mineral exploration if we expect to maintain domestic mineral capacity in the 1990's.

This Nation had long ago made a decision that a market economy is the most efficient means to meet the Nation's economic, defense, and social requirements. But in the 1970's, we began denying access to the natural resources upon which our market economy is based. We have written procedures into our mineral leasing laws and closed so much land to exploration under the mining laws that the Government is placed in the position of dictating the rate and timing of exploration and development of those resources where once the market presided over those decisions.

Ignoring lag times between exploration on the one hand and production on the other, the Federal Government, as owner of one-third of the Nation's lands, has acted increasingly as a monopolist, by withholding the leasing of rights to explore or access to promising lands, in spite of the increased number of laws and regulations insuring environmental protection in any development that may occur. Thus, the Federal Government has sowed the seed that will reap the crisis of the 1990's and 21st century. The trend toward leasing mineral exploration rights in accordance with Government projected demand instead of leaving land open for exploration under the mineral leasing and mining laws has stood the market on its head, creating a climate for artificial shortages and high prices for the 1990's and beyond.

In order to meet anticipated mineral and material resource needs in the 1990's and later, we must release our mineral and material resources from the "Resource Freeze" of the 1970's. This is the decade in which we must move to do that.

But we must proceed to unlock our resources with intelligence and balance. Perhaps no other resource lends itself so little to advance Government planning than minerals. Mineral exploration leading to discovery of a recoverable deposit is a long, costly, and risky process because of the nature of mineral deposition. No government can dictate where to look, how much money to spend, or how long to look. That is why mineral exploration and development is best borne by the private sector and why lands ought to remain open for exploration activity without time constraints or exclusive use restrictions. Mineral geology is not moved by artificial surface land boundaries.

Yet, we must face the fact that Congress, through the decade of the 1970's, has placed vast amounts of the Federal lands off limits to mineral activity by the private sector. In order to assure that this Nation will have access to vital mineral resources in time of national need, the bill I am introducing today would place emphasis on the assessment of the strategic and critical mineral potential of withdrawn lands through cooperative government-industry-academic and scientific community efforts. In this connection, it provides for an integrated information-generation and decisionmaking process which will enable us to make genuinely informed land-use decisions which will safeguard our future and the future of succeeding generations of Americans.

The bill is based on the premise that mineral information is vital to our national welfare, enabling us to make informed land-use decisions and give us options in the event of a national emergency. The bill I am offering would not alter the environmental protection afforded any of our Nation's lands under existing law.

The advance in mining technology and reclamation techniques, along with the complete network of environmental laws and regulations in place, insures that mineral development can take place today with solid protection of our environment—our air, our water, and our soils.

Mr. Speaker, I am convinced that this bill will go a long way toward resolving in a sound, balanced fashion the important resource availability problems of the future caused by the resource freeze of the last decade. As such, this legislaton is vitally important to our Nation's future.●

AMERICAN GATHERING OF HOLOCAUST SURVIVORS—II

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. McGRATH. Mr. Speaker, during the recent gathering of Holocaust survivors, Aviva Kempner, the child of a Holocaust survivor, delivered a speech on the importance of documenting this terrible event.

Nothing can be more painful than reliving this tragic period, but Aviva Kempner's remarks show why we must be obsessed with documenting this period of history. I commend this speech to my colleagues.

SPEECH DELIVERED BY AVIVA KEMPNER AT THE AMERICAN GATHERING OF HOLOCAUST SURVIVORS ON APRIL 13, 1983

Still the night, and full of starlight,
And the frost-burned on the land;
Do you still remember how I taught you
To hold a revolver in your hand?

(These words were played at the beginning of the speech)

This song, Shtil Ki Nakht or Still the Night, is a song written for the Jewish underground in the Vilna ghetto which is often sung at Jewish cultural events in the United States. Even Pete Seeger has it in his repertory.

In the past two years I have conducted an informal survey about how this song is introduced. Let me give you two very distorted examples:

1. In the Lillith magazine of the spring/summer 1982 edition Aviva Cantor included this song in her egalitarian Hagada. The introduction reads: "Hirsh Glick, a partisan, wrote this poem to honor Vitke Kempner, a woman who was his comrade in the Vilna Ghetto Uprising. Both were killed in the resistance."

2. In the program note for a cultural event in Boston on the theme of Jewish resistance to the Nazis the description reads: "This song was written to commemorate the first uprising of the Vilna ghetto against the Nazi army in 1942. It is dedicated to Vitka

Kempner, a young woman Glick loved. She was a leader of the uprising and died in it."

I thought about entitling my speech "Vitke Kempner" lives. Although she risked her life daily as an active member of the Vilna ghetto underground and later on as a partisan in the Vilna region, she did not die in the Vilna ghetto uprising which was not even in 1942, but in 1943. She is alive and well and living in the kibbutz Ein Haroesh in Israel for over 35 years. And by the way, she is not a relative.

In all fairness to Aviva Cantor when she wrote her Hagada she based her information about Vitke Kempner's death on a New York Times article in 1973 that reported a newly released American Jewish Committee's detailed document describing Jewish resistance. Although the article accurately reported the 1942 action as being an open sabotage of blowing up a German train with a homemade bomb which inspired Hirsh Glick to write this song, the article reports that the American Jewish committee document states that Miss Kempner was later killed while serving the partisan forces.

Hirsh Glick, the traubador of the Vilna ghetto, died in Estonia, not in the Vilna ghetto uprising of 1944. The uprising was in 1943 and not in 1944. He also wrote the famous Partisan Hymn, Zog Nit Keyn Mol or Never Say, which I have read as being mistakenly identified as being written in the Warsaw Ghetto.

But two and a half years ago I could never tell you about these factual distortions. I know them about this song only because of a personal and professional trek I began at that time by working on a documentary film on Jewish resistance against the Nazis. I had been brought up as a child of a survivor knowing very little about the Holocaust because it was too painful for my mother to speak about it and she said she wanted to protect her children. Growing up in Detroit in the 60's did not allow for much education on the Holocaust. My conception of the Holocaust was based on the popular images of the Warsaw Ghetto Uprising, Anne Frank and Auschwitz.

For me, Leon Uris was my teacher. I first learned about the concentration camps devouring Exodus in one weekend and about the Warsaw Ghetto Uprising reading Mila 18. I read both these books at least three times. I did not realize at that time that this popular author was taking almost illegal literary license to make good popular American storytelling. For instance, until I started working on the documentary film I always thought that Mordecai Anilewicz had a shiksa girlfriend who aided in the uprising.

I also learned that the Warsaw Ghetto Uprising was not the only incident of Jewish resistance but that it occurred in many other cities. The first call for it was written in the Vilna Ghetto which is one reason why Vilna was chosen as the subject for the documentary film.

I do not know how many second generation in this audience share the ignorance I possessed about the Holocaust. But it would not surprise me if it were a majority of you. I certainly do not blame my mother for trying to shield me from her painful memories. I think that there was not, until very recently, the support and encouragement to learn about the historical aspects of the Holocaust.

Today we have a special responsibility to both educate ourselves and document the thousands of untold stories. I am not telling everyone to go make a documentary film, although I feel that the film I am working on as well as the other many documentary films and video history projects about the survivors are the most important documentation to be supported today since they will preserve the survivor stories for the future generations. In a hundred years from now I want our descendants to be learning about the Holocaust from the mouths of the survivors not from the Polish accent of Meryl Strepp who could not even think to mention that tragic period while accepting her Academy Award this week.

And we need to lobby American Jewish organizations, not just survivors, to financially support these documentary film projects.

Let me suggest some ways to personally document the Holocaust. When in New York city stop by the YIVO, the Yiddish research institute, and utilize their collection even to only read about your parents' hometowns before the war. Remember that rich heritage of eastern European Jewry. Don't let the Nazis succeed in having completely wiped out the memories of it. Try to take classes in Yiddish and Ladino so they won't become forgotten. There is also the Leo Beck Institute that you have heard about today. While in Israel make sure to go to Yad Vashem and the Ghetto Fighters Kibbutz and study the exhibits and make time to also do some research about the places your survivor parents lived during the war.

Educate yourselves and become familiar with the historical accounts, the survivor testimonies, and the documents. See for yourself the photo albums from the ghettoes where your parents stayed. Soak it in and try to encourage education and documentation in your local communities, schools, and synagogues. Try to get your parents and family to talk about their experiences. Since I started working on my film I have interviewed my relatives in Israel and am slowly trying to encourage my mother to talk. Be patient because their stories are recollections of living through hell. We need to listen to them and record them.

Time is running out for us. We must spend these next years obsessed with documenting our history. It is an especially important responsibility since there are revisionist historians trying to prove it never happened. And we are doubly burdened because distortions even appear in our own Jewish publications and events.

Maybe we should view ourselves as a new kind of soldier—the enemy is the distorted fact, the untold tale, the unpublished account. Instead of guns we are armed with cameras, tape recorders, and pens. Instead of sabotage actions against the enemy we need to look among our families and our communities. Since working on the film I discovered the man whose shop I had been taking my typewriter for repair was a partisan from Vilna. His daughter is here today and she is writing a novel about his experiences.

We should make a commitment by our conference of the International Network of Children of Jewish Holocaust Survivors to establish video projects in all our communities, to support documentary films about survivors and their children and encourage survivors to write out their accounts.

Let us dedicate ourselves to the inspiring ending of Glick's Partisan Hymn:

"As the hour that we have longed for is so near—
Our step beats out the message—we are here."

During these past days we have seen that these witnesses are here. Let us take it upon ourselves as the second generation to say we are also here to hear and document their experiences.●

RAILROADS UNDERBID SLURRY PIPELINE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. FLORIO. Mr. Speaker, much has been said about how coal slurry pipelines would supposedly provide a less expensive competitive alternative for moving coal. However, according to an article in the July 23 Washington Post, a major utility, the Arkansas Power & Light Co., recently signed a 20-year contract with two railroads, the Chicago Northwestern and the Union Pacific, for the movement of coal.

What is significant about this contract is that the two railroads underbid a proposed coal slurry line. Indeed, the senior vice president of Arkansas Power & Light noted that the projected costs of the proposed pipeline have jumped three or four times from the original estimates.

The Post article follows:

[From the Washington Post, July 23, 1983]

TWO RAILROADS OUTBID PIPELINE CONSORTIUM FOR COAL SHIPMENT

(By Cliff Tan)

Two major railroads yesterday won a contract to deliver coal from Wyoming to Arkansas power plants, outbidding a coal slurry pipeline consortium, in an apparent setback for coal slurry promoters.

The Arkansas Power & Light Co. announced a 20-year contract with the Chicago North Western Transportation Co. and the Union Pacific System, which includes the Union Pacific and Missouri Pacific railroads, to move low-sulphur coal from the Powder River Basin in Wyoming to its White Bluff and Independence power plants.

Chicago North Western and Union Pacific had underbid the ETSI (Energy Transportation Systems Inc.) Pipeline Project for the transportation contract. The two railroads and ETSI, along with Burlington Northern Inc., submitted bids to Arkansas Power & Light April 15.

Coal slurry is coal crushed and mixed with water and then transported along a pipeline system. Proponents of slurry pipelines claim that these systems present a low-cost alternative to the railroad's virtual monopoly on transporting coal.

Railroads have opposed the pipeline, saying that they will suffer greatly and that the cost of shipping other commodities will go up if pipeline transport comes into being.

In the intense political debate over the two competing systems, Congress is considering legislation that would give pipeline operators eminent domain, the power to acquire rights of way despite railroad protestations. A spokesman for the Slurry Transport Association said legislation probably will be voted on in September.

Previously, pipelines have been blocked either by states worried about whether their water resources should be used to

make slurry, or, pipeline supporters claim, by railroads, which will not let pipelines acquire the right-of-way beneath the tracks.

A staff member of the House water and power subcommittee said even though ETSI had been underbid, that still does not mean that the slurry-pipeline measures will fail in Congress.

The issue for proponents of the measures, he said, is whether maximum competition will hold in the coal-transportation field. What is important is giving pipeline operators the chance to compete, he said, adding it is less important whether railroads underbid pipeline operators as long as competition exists.

"We personally don't know how they could do it and make money," said Stuart Serkin, of the Slurry Transport Association, about the railroads' bid. "It makes you think if they're doing this to put ETSI out of business," he added.

A spokesman for Union Pacific, however, said his company will fully recover costs and make money from the bid it submitted to Arkansas Power & Light. He also denied a conscious attempt by Union Pacific to put ETSI out of business.

Jerry L. Maulden, president of Arkansas Power & Light, said his company has been a supporter of the slurry pipelines in the past and still believes they are a viable alternative.

Charles Steel, senior vice president of Arkansas Power & Light, said competition has increased for pipeline proponents since passage of the Staggers Act in 1980, the major rail deregulation legislation that permits many railroads to conclude specific-commodity contracts with utilities, at lower rates than before deregulation.

In addition, the projected costs of the slurry pipeline system have jumped three to four times from original estimations, he said.

The White Bluff and Independence power plants in Arkansas will require between 10 and 11 million tons of coal a year at full operation. At currently regulated coal transportation, that would represent a shipping bill of between $230 million and $250 million a year.●

SENATOR GLENN'S OBSERVATIONS ABOUT THE NAACP AND CIVIL RIGHTS IN AMERICA

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. STOKES. Mr. Speaker, I take this opportunity to share the remarks of Ohio Senator JOHN GLENN at the 74th Annual Convention of the National Association for the Advancement of Colored People with my colleagues.

In his remarks to the convention delegates, Senator GLENN made some particularly salient observations about the history of America's oldest civil rights organization. He capsulated many of the major achievements and historic actions of the National Association for the Advancement of Colored People in their efforts to eradicate discrimination and injustice in this Nation.

Additionally, Mr. Speaker, the Senator outlined his personal involvement and views on the civil rights movement today.

Concluding his eloquent remarks, Senator GLENN provided very insightful projections about the challenges before the NAACP and those of us committed to the struggle for civil rights, justice, and equality for all citizens.

At this time, Mr. Speaker, I insert Senator JOHN GLENN's remarks in the RECORD.

REMARKS OF SENATOR JOHN GLENN BEFORE THE 74TH ANNUAL CONVENTION OF THE NAACP

Whenever I'm asked to speak before a Convention such as this, the person introducing me almost always mentions at least two things. One of them is my military career—and the other is my participation in America's space program.

And you know something? Even after all these years, I don't mind it a single bit. I'm proud of the service I've been able to give this country—and I'm deeply honored that many people still consider me a patriot and a hero.

But let me suggest that if anyone is looking for patriots or heroes, they need only look around this room and into the history of this great organization. For 74 years now, the NAACP has served on the front lines in one of the most epic struggles in human history: the struggle for freedom, justice and equality.

The struggle was often lonely—and sometimes the battle seemed lost. But even when the hour was dark, you never gave up and you never gave in. You pursued the dream and you kept the faith, and you bore witness to that prophecy of old: "Persecuted, but not forsaken; cast down, but not destroyed."

So I've come to New Orleans this morning to praise your courage and to salute your conviction—and to say how proud I am to have stood with you in all the battles we have fought together.

I am especially proud of our success in getting your former General Counsel—Nate Jones—appointed Judge of the Sixth Circuit Court of Appeals in my home state of Ohio. I am equally proud to have worked with your former Washington representative—Clarence Mitchell—on issues ranging from school desegregation to civil service reform—and to have joined hands with Eleanor Holmes Norton in reorganizing and strengthening the Equal Opportunity Employment Commission.

I am proud to have voted for every single piece of civil rights legislation that has come through the Senate since I have been a member—and I am proud to stand before you today as a sponsor of the bill to make Martin Luther King's birthday a national holiday.

But above all else, I am proud of the battle we waged and won a year ago this month to save and extend the Voting Rights Act. It has been said that by crushing the right wing filibuster, the Senate reaffirmed the most basic civil right of all: the right to cast a ballot freely and have it counted fairly.

But I say to you that passing the Voting Rights Act was the easy part. The hard part is just beginning—and that is to ensure that the power of the ballot is used, and not refused.

And that is why your voter registration drive is so vitally important. We all know that black votes can make a difference. We saw it in the Congressional elections last fall—and we saw it again in Chicago earlier this year. But today—just 16 months before one of the most critical elections in our Nation's history—more than 7 million potential black voters remain unregistered.

So the task is clear—and the lesson is, too. As Ben Hooks has said, you must "find 'em, sign 'em, and get 'em to the polls." In November of 1984, the voice of black America must be heard. And in January of 1985, the voice of black America will be heeded.

And that day is certainly long overdue. For two and a half long years now, we've watched the doors of opportunity slowly slam shut in this country.

But when you stop to think about it, maybe that's not too surprising.

After all, President Reagan neatly summed up his Administration's attitude toward black America last fall in a speech before the National Black Republican Council. He said that past Federal efforts to help minorities were a failure—and went onto say that if the Great Society had never been inaugurated—and I quote—"black families . . . would be appreciably better off today."

Last September, Atlanta Mayor Andrew Young reflected on those callous words. He reflected on them—and he wept. But those who know Andy Young know that his tears were not tears of surrender. They were tears of frustration—frustration at how pitifully little some people have learned from the civil rights struggles of the past.

And I know I speak for Andy—and for every person in this hall today—when I say that we will not allow our frustration to deter, deflect or detain us. We will not retreat or abandon the cause. We will join hands, link arms, and continue the journey. And we shall overcome someday.

And in the meantime, we will speak out. We will speak out against tax cuts targeted mostly to the rich—and against budget cuts aimed mainly at the poor. We will speak out, against a selective recovery that promises renewed prosperity for some—but only continued misery for others. And above all, we will speak out against an unjust and unfair economic philosophy that takes most from those who have least.

So I don't blame you for lacking faith in Administration policies. Not when black unemployment still officially hovers around 20%—and unofficially soars much higher. Not when the jobless rate among minority youth continues to exceed 50% in many areas. And not when the income gap between whites and blacks grows steadily wider.

Two years ago last month, President Reagan talked about that income gap before the NAACP Convention in Denver. After pledging that his policies would result in "economic emancipation," the President said—and I quote—"I do not intend to let America drift further toward economic segregation."

Well, now it's two summers later—and that drift has become a stampede. When President Reagan took office in 1981, the earnings gap between black and white families averaged 130 dollars per week. By the first quarter of 1983, that gap had widened by 6 percent for families, and by 18% for individuals.

In fact, the income gap between blacks and whites has grown nearly 10 times faster during the first two years of this Adminis-

tration than it did during the last two years of the previous one.

Instead of the economic emancipation you were promised, you've been driven even further into the bondage of inequality. Well, I say this country has come too far to return to the days when there were two Americas. I refuse to accept the proposition that minority-owned businesses deserve less than 3 percent of all Federal contracts. And I reject the idea that a decent job at a decent wage should be a dream deferred.

But simply creating jobs today is not enough. We must also ensure that both our industries and our workers have the tools they need for the future. As leaders in the black community, you know exactly what I'm talking about. You know that new technologies are changing our world as dramatically as the Industrial Revolution did a century ago. You know that many of the jobs held by minorities today could well be eliminated tomorrow. And you know that if our people don't get the kind of training they need, they can't build the kind of future they deserve.

Well, I share those concerns. And that's why I'll soon be introducing legislation to create a job training trust fund for workers in need of help—and it's why I've recently announced a 7 billion dollar education program to restore excellence and opportunity in our schools. At the college level—where cutbacks in student aid have devastated blacks and other minorities—I have also proposed a national voluntary service program that would permit high school graduates to earn tuition grants in exchange for work in their local communities.

You and I know that it will take all this—and more—to restore excellence in our schools and opportunity in our society. But to those who say we cannot afford to make the effort, I reply that we can ill-afford not to. You're doing your part through the NAACP Scholarship Fund and through such outstanding programs as ACT-SO. And now it is time for the Federal Government to do its part as well. In the future, we must ensure that no worker who is willing to learn is ever denied the chance to gain new skills for a better job. And we must see to it that no black student or any other young American finds the door to a decent life barred by a school system that has failed to educate him.

So we will continue to insist on quality education for all Americans—and we will continue to resist any proposal that would grant tax exemptions to segregationist academies. And before the Administration asks us to help any more schools that practice racism as part of their religion, let me say it as bluntly as I can: Mr. President, there is a huge difference between the epistles of the New Testament and the apostles of the New Right.

In the coming decade, we will face other important challenges as well. On the great issues of equality, we must renew the struggle to make the old dream of justice a new American reality. And as a first step, let us demand that the Reagan Administration spend a little more time promoting civil rights—and a little less time stacking the Civil Rights Commission.

We must also continue to stand with the majority of Americans who are women. And we must not rest until the ERA is passed by the Congress, ratified by the states, and written into our Constitution.

And let me say that under a Glenn Administration, there would be no retreat from the goals of Affirmative Action. Finally—and at long last—let us build a society where blacks and other minorities are elevated to the corporate boardroom, instead of relegated to the company dining room.

In the meantime, I believe that those of us in government have a responsibility to take the lead. So I'm proud to have the NAACP's former Deputy Executive Director—Charles Smith—now serving as my Deputy National Political Director—and I can tell you there wasn't a better qualified candidate in the country.

I'm also proud to have lured Reginald Gilliam away from the Interstate Commerce Commission—where President Carter had made him only the second black Commissioner in that agency's 94-year history. As many of you know, Reg worked on my Senate staff for five years as a Senior Legislative Counsel—and he now serves as Chairman of my National Political Advisory Committee. The distinguished President of the Ohio NAACP—Mrs. Dorothy Burch—also serves on that Committee—and so do more than 100 other prominent black Americans.

And let me say that I intend to continue this commitment as President. We all know the Reagan Administration's shameful record on minority appointments—and we've heard all their excuses about not being able to find qualified candidates. Well, I intend to find those candidates—and I assure you that those who I *do* appoint will be more than mere tokens.

And every single one of my appointments—black *and* white—will enforce the laws. My Attorney General will see to it that the agency he heads is truly a Department of Justice. My Assistant Attorney General won't need Aaron Henry or Jesse Jackson to take him on a tour before he understands the difference between civil rights and civil rights violations. And my Budget Director won't spend his first two years merrily slashing away at equal employment opportunity programs or housing discrimination enforcement funds.

Lately, of course, the Administration has been telling us that it's all a misunderstanding—and that they're now deeply concerned about civil rights. So this week they filed their first school desegration suit—and vowed to put "real teeth" into enforcement provisions of the Fair Housing Act.

But it's no accident they announced their desegregation suit on the same day the NAACP opened its Convention. It's no accident they unveiled their fair housing plan the day before the Senate began confirmation hearings on the President's nominees to the Civil Rights Commission. And if this Administration ever enforces the law in a way that actually helps our minority citizens, then I say that will be an accident.

The White House can issue press releases until they run out of paper, but it won't change the facts. Over the past 30 months, they've tried to turn the clock back in almost every area of civil rights—and that record speaks a lot louder than this year's public relations offensive or last year's photograph of the President visiting a black household in the state of Maryland.

Instead of spending all their time dressing windows, let this Administration start redressing wrongs. And since they still don't seem to understand the distinction, let us say it clearly and let us say it frankly: Black Americans don't want photo opportunities—they want equal opportunities.

And that brings me to the final issue I want to address this morning. Because just as we must meet our obligations at home, so must we stand up to our responsibilities abroad. The Reagan Administration likes to describe its foreign policy as one of "quiet diplomacy"—when in reality, it is only an excuse for closing their ears to the cries of poor and oppressed peoples around the world.

But you and I know that when America loses its voice for human rights, it speaks for very little—and stands for even less. In 1984, we need an Administration that treats political refugees fairly—and respects their rights fully. And we need an Administration that will pursue a policy of better relations with the people of black Africa, instead of "constructive engagement" with the apartheid regime of South Africa.

And now let me close my remarks with one final thought. Paul Lawrence Dunbar once observed that "black life in America is a promise, not a fulfillment."

Sadly, those words still ring true today—82 years after they were written. This morning, I have talked about a few of the things we must do to finally fulfill that promise.

But you and I both know that the answer does not lie in law or policy alone. Ultimately, it is in the far more difficult struggle to change the hearts and minds of men and women, so that the blights of bigotry and racism are finally and forever cleansed from the deepest recesses of America's soul.

In that great cause, we are united as brothers. So in the words of the black national anthem, let us "march on 'till victory is won." Together, we shall renew our strength, stay the path, and continue the journey until justice shall roll down like water and righteousness like a mighty stream. And one day—my friends—one day soon, we shall fulfill the dream—the dream that will truly make all Americans free at last.

Thank you very much.●

COAL IS STILL THE BEST RESOURCE FOR ENERGY INDEPENDENCE

HON. RICHARD J. DURBIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. DURBIN. Mr. Speaker, despite the fact that energy independence in the United States is currently taking a back seat to other important and pressing issues, I feel we should not lose sight of the importance energy independence plays in a strong economy.

In the 20th District of Illinois not only is national energy independence important, but also the large part that Illinois coal can play in making the United States independent is of significance. Granted there are questions, both economic and environmental, that need to be answered before coal can play a major role in our Nation's supply of energy. We, as members of the 98th Congress, must meet these questions head on and with enthusiasm.

I would like to share with my colleagues an article written by Hays T. Watkins, from the June 1983 edition of Financier magazine that addresses

the questions that arise when the use of coal is considered:

Despite the effects of a worldwide recession that shortened industry perspective and made some commentators myopic, Mr. Watkins finds that the prospects for coal remain excellent. In this article written for Financier, the chairman of CSX points out that the nation possesses enormous domestic reserves of coal, which make it the best resource for achieving a major goal of national policy: Energy independence.

Furthermore, he notes, at almost any foreseeable price of oil, coal will still be a far cheaper form of energy.

Clearly, as a result of the recession, the coal industry has been experiencing some difficult times. Few segments of the economy have been left untouched. But will the problems of unemployment and reduced production in the coal fields continue past full recovery? I think not.

Three facts stand out above all others:

First: There is less recoverable oil in the ground now than in 1978, the beginning of the last OPEC supply crisis.

Second: The nation's identified coal reserves of some 1.7 trillion net tons, enough to last at least through the next century, remain a vital national resource.

Third: The free world's industrial countries did in fact get the OPEC message and began a massive energy-conservation effort, including a broad movement to convert to coal power.

Some idea of the extent of that effort can be seen in the increasing number of domestic utility power units being built to burn coal or converted from oil to coal.

On CSX rail lines alone in 1982, domestic utilities had completed conversion of 13 units with an annual burn of 4.6 million tons. In addition, domestic utilities have 48 coal-fired units in various stages of planning and development that can use coal originated in CSX territory.

BRIGHT PROMISE OF EXPORT

The bright promise of the overseas export market is readily apparent in the growth of coal-loading facilities under way at CSX ports on the Atlantic and Gulf coasts. Chessie's three piers at Baltimore and Newport News and Seaboard's major facility at Mobile have a combined maximum annual loading rate of more than 58 million tons.

That capability is nearly doubled—to 113 million tons—by construction and expansion projects either completed or under way by private companies at Newport News, Baltimore, Savannah, Mobile and Charleston, all of which will be served by CSX lines. In addition, proposed facilities at Portsmouth, Va., and Wilmington would add another 32 million tons of capacity.

These investments—in new and converted utility units and in new and expanded export facilities—are clear evidence of coal's strong future.

To serve the existing as well as expanding coal markets, the CSX railroads have continued strong capital spending programs as well. Last year, an off year by any measure, CSX invested nearly $293 million in capital improvements, including 25 more locomotives and 685 open-top hopper cars, and has earmarked for 1983 another $340 million for more equipment and improvements, including another 25 locomotives, to maintain our coal-transport capability. We also have our own modern car-building plant in Kentucky that can turn out up to 32 100-ton coal hopper cars a day.

My perspective of the long-term prospects for coal is not entirely unclouded. Some commentators see real problems facing the industry in the near term.

MANY DIFFICULTIES DISAPPEAR

But many of these supposed difficulties, such as the effect of OPEC's current collapse or the impact of rail transportation rates on coal sales, really disappear upon closer analysis.

Another—the proposed solution to the perceived environmental threat of acid rain—could seriously undermine our efforts to convert electricity production from unreliable and costly foreign oil to domestic coal if Congress acted before the facts were in.

Also unclear is what short- and long-term impact Polish and South African Government actions will have on coal once the European economy improves and demand increases. Both countries are now pricing their coal at $10 to $12 a ton under US levels.

What about the recent OPEC price moves?

The National Coal Association sees little impact, except a possible deferral of some plans for conversion to coal fuel;

"The coal option remains strong and viable in terms of new plant construction. What utilities have on the drawing boards now are primarily coal-fired power plants. We don't think utility planners are going to rethink their plans because the price of oil is dropping. Even with some erosion, the cost differential is significant. Oil is more than three times costlier per BTU and would have to drop to about $15 a barrel to equal coal."

Sharing those views is the Edison Electric Institute representing about 200 utilities, or 75% of all US power companies:

"We believe that most of our members, having been burned by OPEC twice in the '70's, are going to continue to move to coal or some other fuel besides oil. Conversions and construction, at least where the permit process is well along, will probably continue."

Some rail-service users, including coal customers, have complained that the railroads are abusing the price freedom conferred by the 1980 Staggers Act.

STAGGERS REDUCES RATES

It is a documented fact, however, that Staggers is being interpreted and implemented as a way to reduce, rather than raise, rates for railroad transportation.

For instance, in the coal area alone, with the new freedom to negotiate long-term contracts, CSX's Chessie System Railroads have concluded 32 transportation contracts covering the annual movement of 33 million tons of coal, and 38 other contracts involving another 29 million tons are being negotiated.

All of these contracts actually reduce Chessie rates. The tradeoff for Chessie is the certainty of the traffic, and the ability to plan and make greater efficiencies because of that certainty. The result is that we are now moving a large volume of coal at rates lower than those in force before Staggers.

As a matter of fact, over the 11 years since 1971, the price of coal has risen more rapidly than rail coal rates, with the result that the rail rate, as a percentage of destination price, has declined from 34.4% to 30.5%.

Coal prices at the mine, on the other hand, have increased from an average of $7.07 per ton in 1971 to $27.30 per ton in 1982, a 286% increase. So the statements being reported that rail coal rates are the main threat to eroding gains made in keeping coal prices stable at the mine just aren't true.

During the same period, 1971-1982, rail coal rates have increased only slightly more than rates for all commodities—an annual average of 10.9% for coal, versus 10.2% for all others.

So deregulation has not produced an explosion in rail rates.

One other point regarding deregulation. The fact that the railroad industry could come through the worst recession since World War II in comparatively good health is eloquent testimony to the benefits of the new regulatory environment.

I think it is safe to say that a decade ago—in a similar economic climate—the railroad industry would have been awash in a sea of red ink with a wave of railroad bankruptcies and a rush for Federal funding.

None of this has happened and the railroad industry has been able to keep its head above water during this severe downturn.

FUNDAMENTALLY NEW COURSE

In short, deregulation is putting the industry on a fundamentally new course—one which we feel means both better and more efficient service to our coal and other customers.

Much also has been written of the treatment of "captive coal shippers," who are supposedly served by only one railroad. The charge is that if no competing railroad is in the vicinity, the railroad serving the mine is likely to set exorbitant rates.

Coal is the number one commodity for our railroads. If a mine operator can't market his production, we won't move it. The railroad would be foolish to set a rate so high that the coal lost its market.

While one mine may not be served by competing railroads, competing mines are served by competing railroads—and a coal user has the option of going overseas for his coal as well as considering alternative fuels.

Besides, some mines are situated in such a way that a short truck run gives the mine operator the option of choosing between railroads or even shipping it on a barge.

Producers of oil and natural gas, and even some currently exotic fuels, are eager to see their products supplant coal. And nuclear energy, despite its recent setbacks, remains a powerful potential competitor. Thousands of coal mines, almost all with excess capacity, are seeking new customers.

VESTED INTEREST IN COMPETITION

Thus the railroads have a vested interest, not only in keeping coal competitive with other fuels, but in retaining the coal business they now have from existing mines on their lines. They cannot afford to do otherwise.

In short, if coal-mine operators don't make money, neither do the coal-hauling railroads.

Environmental issues also remain to be resolved.

There is little quarrel with the conclusion that acid rain is caused, in part, by sulphur oxide emissions. There is, however, considerable debate in the scientific community about the source of these emissions, the mechanism by which acid rain is formed in the atmosphere, and about the best and most cost-efficient means of controlling acid rain and mitigating its effects on the environment.

When Sen. Daniel Moynihan (D-NY) introduced the 10-year acid precipitation research bill, which was included in the 1980 Energy Security Act, he pointed out: "It will be possible to make profoundly gross mis-

takes here if we do not do research first, mistakes that would cost billions."

Yet two years later Congress is considering massive, expensive controls on users of high sulphur coal.

At the same time, with the increased pace of research on acid precipitation, "hardly a month goes by without new findings that could dramatically alter our thinking on the causes and effects of acid precipitation," according to Dr. Harry G. Enoch, Director of Environmental and Technology Assessment for the Kentucky Energy Cabinet.

Questions that now have been raised, he says, include:

"Normal" rainfall may be much more acidic than previously thought;

Acid lakes are not new nor an unnatural phenomenon in the Northeast; and

Local sources in the Northeast and Canada may be much more important contributors to acid precipitation than previously thought.

In short, the steps leading to the formation of acid rain are not understood well enough to justify the imposition of costly control strategies with any reasonable degree of certainty.

What indeed is the long-term outlook for coal?

1983 forecasts by the Department of Energy show total domestic and export consumption by 1985 at 922 million tons, up some 13% from the 812 million tons of 1982. By 1995, however, total consumption is expected to grow to 1.3 billion tons. Of that total, export tonnage is seen at 240 million tons, a 56% increase from 1982.

SLOWER, BUT STILL STRONG

While these estimates show a slower annual rate of growth than many analysts previously predicted, strong growth is clearly evident nonetheless.

Coupled with the strong activity in new coal-fired power plant construction, export-loading facilities and railroad plant and equipment modernization, the outlook should be optimistic—not pessimistic or confused.

All that is needed, really, is a faster pace in the economy here and abroad. And we all know that will come sooner rather than later.

US railroads have been partners with the coal industry ever since the first train ran more than 150 years ago. Despite the short-term difficulties both industries have been experiencing, rail industry leaders remain confident common sense will prevail, and railroads and their coal counterparts can look forward to a sustained and growing partnership, not only through this decade, but far beyond that time as well.●

HAZARDOUS WASTE NOTIFICATION

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. FLORIO. Mr. Speaker, I wish to bring to my colleagues' attention two items concerning the problem posed by those who generate less than 1,000 kilograms (2,200 pounds) of hazardous waste per month. The first item is a news article published in the Lexington Herald-Leader on June 28, 1983. This article reports an incident in Lexington, Ky., where three refuse workers were hospitalized as the result of exposure to hydrochloric acid. From the information available, it appears that someone simply tossed a 5-gallon container of hydrochloric acid into the trash without notifying anyone of the hazard; when the container ruptured at the landfill site, the three workers were overcome by the fumes.

The second item is a list compiled by the National Solid Waste Management Association which details incidents across the country similar to the one in Lexington. This list shows that we are facing a national problem which is endangering human health and the environment, not just isolated incidents. The public is clearly put to risk when those who generate between 25 and 100 kilograms of hazardous waste per month are allowed to dispose of that waste in any manner they wish, without even being required to notify the transporter that the waste is hazardous.

I will offer an amendment to the Hazardous Waste Control and Enforcement Act, H.R. 2867, that will require a generator which produces between 25 and 100 kilograms of hazardous waste per month to provide a simple notification that the waste is hazardous. For quantities below 25 kilograms, my amendment would permit the Administrator of the Environmental Protection Agency to develop regulations for notification for those wastes which are extremely dangerous, based on their reactivity, ignitability, toxicity, or corrosive qualities.

This amendment requires only a notification. It does not impose the more rigid standards established for large generators. It simply states that small generators must let others know that the waste being disposed is hazardous.

I urge my colleagues to take a few minutes to read these two items and hope they will support this amendment.

[From the Lexington Herald-Leader, June 28, 1983]

ACID LEFT IN TRASH PUTS THREE IN HOSPITAL

(By Diane Amann, Staff Writer)

A search begins today for the person who left a container of hydrochloric acid for trash pickup yesterday.

Three refuse workers were hospitalized yesterday with rashes, breathing difficulty and watery eyes after they encountered the chemical at the Urban County Government's garbage transfer station at 1555 Old Frankfort Pike.

In satisfactory condition yesterday at Good Samaritan Hospital were Gary Lee Isaacs, 27, of 131 Rogers Road; David Michael Parkerson, 33 of 488 Whispering Hills Drive; and Orville Shanks of 112 Rice Court, Richmond.

After sorting through the trash for several hours, Lexington firefighters discovered several containers of potassium hydroxide and a 5-gallon plastic container of hydrochloric acid, said Maj. Ron Meadows of the fire department's hazardous-materials unit.

Although both are toxic substances, Meadows said, "people who are exposed to hydrochloric acid will get the kind of reaction that these men had."

Sanitation trucks from all over Lexington dump their loads into a compactor at the transfer station; the compacted trash is transferred to the landfill on larger trucks.

Thus, tracing the source of the container could take time.

"But we're going to try," he said. "There's a regulation against putting any kind of liquids in dumpsters. The landfill does not handle anything that would get into the water table."

The container was already compacted, Meadows said, so firefighters don't know how much acid had been in the container.

The hospitalized refuse workers are employed by Newtown Corp., a trucking company that contracts with the government to transport trash from the transfer station to its landfill in Avon.

Newtown Corp. manager Jack Foster said the incident occurred about 8:15 a.m. while the men were hooking up tractor-trailers in a pit at the station.

"All of a sudden," said Public Works Commissioner Gordon Garner, "their eyes started watering and they had trouble breathing. It put them down pretty quick."

The compacting of pressurized containers occasionally causes explosions or fires at transfer stations, Garner said, but he added, "This is the first I've heard of this kind of thing happening."

EXAMPLES OF EFFECTS OF SMALL QUANTITIES OF HAZARDOUS WASTE IN TRASH REPORTED TO NSWMA IN 1983

Place: Houston, TX.

Quantity: 4 55-gallon drums.

Substance: 90% toluene and ethyl acrylate label on drums.

Circumstance: Roll-off collection vehicle dumped at landfill, drums spilled into landfill. Had to remove all contaminated fill. Substance is toxic and carcinogenic.

Place: Baton Rouge, LA.

Quantity: Under 100 kg.

Substance: Elemental sodium.

Circumstance: Roll-off container emptied at landfill; when sodium came in contact with air and with damp fill, it blew up.

Place: Boston, MA.

Quantity: Unknown.

Substance: Unknown.

Circumstance: A rear-loader mechanized pick-up in downtown Boston. As loading the bin, fumes from the bin overcame the driver, and when two assistants came to help him, they also breathed fumes. They left the bin with generator and told him to get a hazardous waste company to handle it, then went for treatment to the hospital.

Place: Baton Rouge, LA.

Quantity: 8 empty drums.

Substance: Fiberglass resins.

Circumstance: Drums were white with red skull and cross bones but hidden in large roll-off. Discovered when roll-off reached landfill and truck was turned away. Hauler had to pay to have it handled properly, and had to attempt to recover costs from generator.

Place: Auburn, MA.

Quantity: Under 100 kg.

Substance: Paint, solvents, thinners.

Circumstance: Rear loader compacted load which leaked all over road. Driver, attempting to stop the leak situation, emptied the liquid into a storm drain. Obviously wrong solution.

Place: Ashland, MA.
Quantity: Under 100 kg.
Substance: Probably elemental sodium.
Circumstance: Load caught fire as being unloaded at landfill.
Place: Ashland, MA.
Quantity: Unknown.
Substance: Unknown powder.
Circumstance: Landfill operator noticed funny looking powders when truck was being unloaded; sent truck away.
Place: Evansville, IN.
Quantity: Unknown.
Substance: Resins.
Circumstance: A load from a roll-off vehicle caused fire that took four hours to put out.
Place: Evansville, IN.
Quantity: Unknown.
Substance: Resins.
Circumstances: Part of landfill just blew up, with the fill catching fire as far as 100 yds. away.
Place: Evansville, IN.
Quantity: Less than 100 kg. (1 cardboard box).
Substance: Misc. chemicals.
Circumstances: School cleaned out its chemistry lab by dumping everything in the dumpster. When it was unloaded at landfill, caused a fire that took an hour and a half to put out and sent two people to the hospital..
Place: Atlanta, GA.
Quantity: 2 55-gallon barrels.
Substance: Pesticide.
Circumstances: When landfill compactor rolled over trash, pesticide from barrels sprayed in the air, killing a flock of birds flying over head and sending operator to the hospital for fume inhalation.
Place: Roscoe, ILL.
Quantity: One gallon bottle.
Substance: Caustic material,
Circumstances: Plastic bottle of caustic caused severe skin irritation. Same hauler reports many incidents at landfills which sprayed acids and thinners over trucks and operators, causing fires and fume inhalation.
Place: Chaffee, N.Y.
Quantity: A couple of bottles.
Substance: Chlorine.
Circumstance: A plastic container inside a plastic bag contained pool chlorine which could have caused a fire inside the truck if not detected.
Place: Rice, VA.
Quantity: Less than 100 kg.
Substance: A flammable powder or liquid.
Circumstances: While welding the hopper of a compacting truck during repair, hauler found this substance when it started a fire which was extremely hard to extinguish.
Place: Galveston, TX.
Quantity: Six quarts.
Substance: Furfural.
Circumstance: Glass jars in trash broke when truck compacted garbage. Employees sent to company doctor after complained of nausea and burning eyes. Hauler eventually identified type of substance and generator. This is a chemical which is irritating to skin, dangerous to the eyes and can be explosive.
Place: Boyne City, MI.
Quantity: Two gallons.
Substance: Ammonia.
Circumstance: Sealed container burst under pressure, spraying the hauler's eyes and face. he had to seek medical attention.
Place: Hickory, NC.
Quantity: As much as two 20-gallon drums.
Substance: Furniture finishing materials.
Circumstance: Hauler finds these quantities in waste several times a year; so far, no serious consequences from this highly explosive material.
Place: Rochester, NY.
Quantity: 1 55-gallon drum.
Substance: Acids and solvents.
Circumstance: In several incidents each year, company has detected single drums of hazardous waste, none of which have yet caused injuries because they all have been detected.
Place: Lyndhurst, NJ.
Quantity: Several 20-gallon fiber drums.
Substance: Unidentified powder.
Circumstance: When a compactor truck began its packing phase, a fire erupted immediately. The load had to be ejected right there in that parking lot.
Place: Lexington, KY.
Quantity: Several 5-gallon containers.
Substance: Potassium hydroxide and hydrochloric acid.
Circumstance: Three workers hospitalized while hooking up tractor-trailers at a transfer station. Fire department hand sorted trash for several hours before finding cause of the rashes and respiratory problems of the workers.
Place: Waterville, NY.
Quantity: Partly filled pails.
Substance: Generator would not identify.
Circumstance: Worker exposed complained of violent itching and coughing. Because of uncooperativeness of generator, hauler was forced to give up the account.
Place: Canton, OH.
Quantity: 1 cardboard barrel.
Substance: Unknown.
Circumstance: Fire in truck.
Place: Bridgeton, N.J.
Quantity: 10 barrels.
Substance: Generator would not identify.
Circumstances: Wastes when wet burst into flame, setting truck on fire. Generator insists they are not hazardous wastes. Hauler now uses special handling.
Place: Elmhurst, IL.
Quantity: About 10 gallons.
Substance: Battery acid, cleaning fluid.
Circumstance: Wastes, both acids, ate through clothing and burned skin. Hauler was told that if they wanted to keep the account, they would have to continue to take the waste.
Place: Hollywood, FL.
Quantity: Unknown.
Substance: Pool chemicals.
Circumstance: Chemicals in jugs set fire in truck causing serious damage to equipment and caustic fumes. Company tried to recover from customer, could not and decided not to serve that customer any more.
Place: Downers Grove, IL.
Quantity: Small amounts.
Substance: Chlorine tablets.
Circumstance: Small amounts of chlorine caused fire in truck, noxious odor which caused nausea, eye irritation, etc.
Place: Celina, OH.
Quantity: 5-gallon buckets.
Substance: Sulfuric acid.
Circumstance: Bulldozer on landfill ran over buckets which exploded, sending fluid up over driver's entire body. He had to be treated for serious burns, and remains scarred.
Place: Lemon Grove, CA.
Quantity: Small container.
Substances: Pool cleaning acids, paint thinner, pesticides, cleaning solvents,
Circumstances: Liquids spraying out of trash as it is being compacted. Various incidents affected fourteen employees in one year, one employee losing partial sight in one eye and others retain scars from burns.
Place: Pennsylvania.
Quantity: Five to ten 10-gallon containers.
Substance: Flammable ink.
Circumstance: Containers labeled as containing ink with a flashpoint of 180° (not a hazardous waste) actually contained ink with a flashpoint of 114° (fails the ignitable characteristic test for a hazardous waste). Federal marshalls searched and impounded the truck! To date landfill operator has not been charged with any offense but received quite a bit of public scrutiny as a "hazardous waste dump."
Place: Santa Barbara, CA.
Quantity: Several boxes.
Substance: Paint filter elements.
Circumstance: Substance was in a container; when the truck emptied the container into its hopper, the air got to the opening and it started a fire. The driver had to dump the load right there. Hauler had to cancel account when incidents persisted.
Place: Steamboat Springs, CO.
Quantity: 5 1-gallon containers.
Substance: Acids.
Circumstance: Plastic trash bag with these containers inside were placed in hopper of truck; when it was compacted, liquid squirted on his face and eyes. Man was hospitalized with serious eye burns.
Place: St. Louis, MO.
Quantity: Usually 1-gallon containers.
Substances: Thinners, chlorine.
Circumstances: Miscellaneous waste sprays trucks when containers conpacted.
Quantity: Two 55-gallon drums.
Substance: Acid.
Circumstance: One landfill attendant was hospitalized for 2 days with respiratory problems. Equipment also damaged. Hauler says that the company retrieved the drums and now denies any liability for the incident.
Place: Rochester, NY.
Quantity: 36 quarts.
Substance: Acid drain cleaner.
Circumstance: Driver became dizzy, had respiratory problems and was taken to the hospital. Load had to be dumped, acid neutralized by fire department. Investigated by county health department.
Place: Columbus, OH.
Quantity: Cans.
Substance: Various.
Circumstance: Old cans of material have caused burnt eyes, skin burns, etc.
Place: Carroll, OH.
Quantity: 10 bottles.
Substance: Miscellaneous chemicals.
Circumstance: Several years ago, a school cleaned out its lab, contacting the fire department for special handling. The fire department threw it in their dumpster, enveloping the collection truck in gas fumes, overcoming the driver who had to be given CPR. He never returned to this job. Hauler believes a similar incident could happen today.

EXAMPLES REPORTED TO NSWMA IN 1982 AND 1981

Place: Wisconsin.
Substance: Flammable.
Circumstance: Resource recovery plant was severely damaged by fire caused by substance in a small tank.
Place: Pittsburgh, PA.
Quantity: Small bottles.
Substance: Miscellaneous chemicals.
Circumstance: Trash truck caught fire when waste chemicals from a high school laboratory reacted with ordinary garbage inside the truck.

Place: Newburg, OR.
Quantity: 10-15 gallons in plastic carton.
Substance: Highly caustic stripper or degreaser.
Circumstance: When tractor operator pushed load off to compact it at the landfill, the plastic drum acted like a waterfilled balloon and squirted caustic over the driver. Thirteen percent of his body was affected. At the time this was reported, it was unclear when the driver would be able to work again.
Place: Wisconsin.
Quantity: Unknown.
Substance: Unknown.
Circumstance: Hauler reports several fires in his trucks "of unknown origin" and incidents of people being sprayed. Since he must bring trucks partially filled into maintenance area, a fire in one of these trucks could wipe him out.
Place: Newberg, OR.
Quantity: Small containers.
Substance: Ammonia-type wastes.
Circumstance: After three warnings to a company to keep these wastes out of the trash bin, the fourth time a container spilled during compaction and the drivers were injured.
Place: Michigan.
Quantity: 12 cases of one-pint cans.
Substance: Paint with propellant.
Circumstance: The propane in these cans could have caused explosions if compacted at the operator's landfill. Same operator reported detecting a 55-gallon barrel of concentrated hydrochloric acid before it could be compacted.
Place: Indiana.
Quantity: Unknown.
Substance: Acid.
Circumstance: Employee burned by acid put in with refuse while emptying the container.
Place: Michigan.
Quantity: Unknown.
Substance: Flammable.
Circumstance: Serious truck fire causing loss of vehicle from flammable waste in load.
Place: Ingalls, Indiana.
Quantity: Various.
Substance: Acids, chlorides, ammonias.
Circumstance: Hauler reports that hardly a day passes that our trucks do not handle small amounts of hazardous waste, most of which is detected. The problem is when the material is compacted, causing eye injuries and chemical burns. He states "I have lost count of the fires caused by chemical reaction inside of the trucks . . . I could go into detail about specific incidents, ranging from finding live hand grenades to bottles of cyanide . . . It must be understood that I am talking about small amounts compared to tons hauled. However, it takes very little to do a lot of damage."●

THE SECRET WAR

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. HARRISON. Mr. Speaker, I voted for the Boland-Zablocki bill to cut off funds for further covert U.S. activity in Central America.

I voted for this bill for three reasons. First, because the activity is no longer covert. Indeed, the whole world knows what we are doing and this administration, itself, brags that we are doing it.

Second, because it is clear we have not yet decided exactly what the goal of these so-called covert activities is or how far we are willing to commit our resources in support of them.

Third, because for both of these reasons, our policy of covert activity has not worked and will not work.

Of course it would be better, Mr. Speaker, if all foreign forces, all foreign advisers and, indeed, all foreign economic influences were to leave Central America and allow the people of that region to work out their own destiny in their own way. This is the sermon that has been so eloquently preached by the Archbishop of San Salvador and this would be, I hope, the fervent desire of all of us. But if other foreign powers will not withdraw, then no purpose would be served in our withdrawing alone. In fact, our unilateral departure might create a situation full of even greater danger and misery for the people of Central America.

Indeed, if foreign arms and foreign troops are being shipped into Nicaragua or El Salvador by European or Asian powers, or their surrogates, then this is a violation of the Monroe Doctrine and we have an obligation to do something about it. But let us do it as Americans have always done things—out in the open, in the clear sunshine of day, with our heads held high and proud of what we are about. Nothing is to be gained by cloak and dagger operations, by the imitation of second-rate spy novels, by pretending to do in secret what the whole world knows we are doing.

Let us do it as this bill proposes: providing funds to democratic states in the region to protect their own sovereignty by interdicting those arms. If the intensity of hostile foreign involvement renders it impossible for the independent States of Central America to protect themselves, then—and only then—let us get involved. And if we must do so—and, Mr. Speaker, we are, I think, a long, long way from that—then let us interdict arms to Central America just as John F. Kennedy interdicted the Soviet missiles being shipped into Cuba; by a carefully limited, publicly announced, and internationally responsible program; by a program which has the support of the American people because it has been duly deliberated by both elected branches of the U.S. Government.

Such a program would succeed, Mr. Speaker, because it is consistent with our traditions, because it would be limited to a specific, justifiable end, because it would not threaten the overthrow of a foreign government simply because we do not like its politics or approve of its principals, because it would appear to the world as a defense of the Monroe Doctrine and not a return to gunboat diplomacy.

And then, unsupplied by foreign arms, unintimidated by foreign advisers, and foreign troops and uncontrolled by foreign economic influences, the people of Central America can begin—at long, long last—to work out their own destiny in their own way.

That, Mr. Speaker, is the end to which I hope we all aspire.●

AMTRAK'S IMPROVEMENTS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. FLORIO. Mr. Speaker, I think we would all agree that Amtrak, our national rail passenger system, has made tremendous gains in recent years. Amtrak's continually improving performance has helped convince the administration of the value of a national rail passenger system.

Amtrak recently released ridership and on-time performance statistics for May. In both cases, there have been significant improvements since May of last year. These improvements are summarized in the following article from the Newark Star-Ledger:

USE, PUNCTUALITY RISE ON AMTRAK

Amtrak is reporting May figures which indicate a significant improvement in on-time performance and ridership since the same month last year.

Although ridership was down slightly for the full eight-month period preceding May, officials of the national passenger railroad said Amtrak trains carried 1.8 million riders in May, or 13 percent more than they did in May of last year.

At the same time, Amtrak's systemwide on-time performance improved from 76 percent in May of last year to 83 percent in May of this year, they said.

On the Boston-Washington Northeast Corridor, where Amtrak carries more than half its riders, the May ridership was up 7.7 percent over a year before.

On-time performance on the Northeast Corridor, which also includes branches to Harrisburg, Pa., and Springfield, Mass., went from 73 percent in May of last year to 84 percent this May. Amtrak operated 3,269 trains on the Northeast Corridor during the month and 527 of them were late.

By coincidence, the improvement in on-time performance for the 347 Amtrak trains between New York and Philadelphia was identical to the overall Northeast Corridor figure.

Ridership on the New York-Philadelphia trains is also up. According to the officials, ridership in May reached 204,000, or 25 percent more riders than were carried during May of last year.●

FEDERAL CORRECTIONAL EDUCATION ASSISTANCE ACT

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. CONYERS. Mr. Speaker, this week I introduced legislation to improve the educational services and opportunities available to inmates in State and local correctional institutions. I welcome cosponsors.

The Federal Correctional Education Assistance Act (H.R. 3684), introduced on July 27, 1983, if enacted, would establish the first Federal correctional education program administered by the Department of Education. It would authorize a $75 million, 3-year program of grants to State education agencies. The Secretary of Education would distribute funds to all States on the basis of inmate populations. Grants could be used for all types of education and training, including basic, secondary, and postsecondary education; vocational training; job training and placement services; teacher training; and library development.

On any given day this year, some 2.5 million men, women, and children in the United States will be under some type of correctional supervision. Some 614,000 individuals are in jails, prisons, and juvenile correctional facilities. The U.S. ranks third behind South Africa and the Soviet Union in the percentage of its citizens who are behind bars.

Equally scandalous is the inhumane treatment of inmates—the terrible overcrowding, the boredom, and idleness, and the failure to provide inmates with the resources with which to develop knowledge, skills, and self-respect.

Nearly $8 billion annually is spent on Federal, State, and local correctional institutions and the average cost to maintain an inmate is $15,000 a year. Only 5 percent of the total State correctional budgets, on the average, goes toward education or training. Just over one-third of the inmate population is enrolled in education, even though study after study has shown that recidivism among inmates who have received education or training is significantly lower than among inmates who have not.

Under the present system, correctional institutions have to compete with school districts for scarce State education funds. This legislation will put them on a stronger footing to obtain the educational resources that inmates require.

A similar bill, S. 625, has been introduced in the Senate by Senator CLAIBORNE PELL.●

WILLIAM NORRIS OF CONTROL DATA SUPPORTS THE SBIR PROGRAM AT NIH

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. BEDELL. Mr. Speaker, as my colleagues are aware, I plan to offer, along with my friend from the Energy and Commerce Committee, AL GORE, an amendment to H.R. 2350, the National Institutes of Health authorization bill, that would preserve the small business innovation research program at NIH.

Our amendment is supported by all of the small business groups and I have received many letters in support of our effort from individuals like Gov. James Hunt of North Carolina, who chairs the National Governor's Association Task Force on Technological Innovation and Mr. Milt Stewart, who is the president of the Small Business High Technology Institute.

I would like to share with my colleagues a letter from Mr. William Norris, the chairman of Control Data Corp. Mr. Norris and his company are recognized as being active leaders in our Nation's attempt to regain its position of preeminence in the world economy. I welcome his thoughts on the SBIR program at NIH and his support for the Bedell-Gore amendment to H.R. 2350.

CONTROL DATA CORP.,
Minneapolis, Minn., July 27, 1983.

Hon. BERKLEY BEDELL,
Chairman, Small Business Subcommittee on General Oversight and the Economy, Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN BEDELL: I am writing to express my strong support for your efforts to prevent any weakening of the Small Business Innovation Research Act. While I know that the amendments proposed by Congressman Dingell to the National Institute of Health authorization bill are well intentioned, I am convinced that they would seriously weaken the SBIR program.

As you know, Control Data was one of the first proponents of a government-wide SBIR program, and we have consistently supported this essential means of strengthening and encouraging the growth of small business since then. Small business is the major source of innovation and new jobs in this country, and it would be a major mistake for the Federal government not to take advantage of the contribution small businesses can make to our national economy and to our research and development efforts. Experience clearly shows that absent an SBIR program, small firms, no matter how innovative, will not be able to gain sufficient access to Federal R&D funds.

The health field is no exception. Small firms can and do make a tremendous contribution in this area. Unfortunately, there will always be skeptics. When Control Data testified on the SBIR program in the Senate, for example, OMB witnesses contended that there were not enough small firms engaged in health research to allow for a competitive allocation of SBIR funds in this area. I understand, however, that just this year there were some 9,000 requests for information about NIH's SBIR program, and that there were 727 proposals for 100 grants. This ratio is over twice the normal ratio of applicants to grants at NIH.

Mr. Dingell's amendment, would essentially eliminate the special procedures Congress approved by an overwhelming vote for the SBIR program. While these procedures would apply only to NIH, I fear they would soon be extended to other agencies as well. The SBIR program is a sound and valuable one that encourages the creative and productive potential of small business which brings thousands of new and creative ideas to NIH and other agencies of government. I urge you to do all you can to keep the program intact so that it will accomplish its intended purpose of strengthening small business and promoting innovation.

Sincerely,

WILLIAM C. NORRIS.●

CONGRESSIONAL HONORARIUM REFORM ACT

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. HAMILTON. Mr. Speaker, lately I have become increasingly concerned about the growing problem of congressional honoraria. These payments made to Members of Congress for speeches to private audiences have been criticized severely in the media and in Congress itself. One of the major issues in the controversy—the rapidly expanding total amount of honoraria received—seems to have been resolved by the Senate's decision to cap honoraria for Senators at the current House limit of 30 percent of congressional salary. Even with this highly desirable reform, however, two other issues remain unresolved.

The first is the preception that the congressional honorarium has become just one more device that special interests use to try to buy influence with prominent legislators. An especially distrubing pattern is developing in this regard. Large honoraria are being paid to Members by groups with direct interests in legislation before the Members' committees—banking committee leaders receive honoraria from banking interests, transportation committee leaders from transportation interests, and so forth. More than half of all honoraria now come from business interests, and the greatest share goes to powerful Members (committee chairmen, legislators on taxing and spending committees, and congressional party leaders) who are capable of dispensing legislative favors. The idea behind the honorarium generally is a good one: Legislators should be encouraged to meet a wider variety of people than they would meet otherwise. If it continues unchecked, howev-

er, the practice of paying special interest honoraria to prominent Members may push the public to the point that it will look on the practice as something little better than bribery.

To dispel this perception, the House resolution I am introducing would retain the overall limits on honoraria of 30 percent of congressional salary and $2,000 per speech but would reduce the amount a legislator could receive from groups with special interests in his committees. A Member earning the total 30 percent of his congressional salary in honoraria would not be allowed to receive more than half of that sum from such groups. Also, his payment per speech (from these groups only) could not exceed $750 annually. These additional limits basically reduce a legislator's honoraria from groups with direct interests in his committees to the general limits on honoraria passed by the House in 1977, except that the $750 limit would extend over an entire year to prevent a Member from receiving several $750 payments in succession by speaking to a single group evening after evening. The definition of a "direct interest in legislation before a committee" would follow the general line of House Advisory Opinion No. 10, which defines a "direct interest in legislation before Congress." Under my resolution, the additional limits would not apply to the payments of just any group. The group would have to be one formally in the business of trying to influence legislation, as evinced either by its employment of lobbyists or its use of a political action committee. Also, it would have to have an interest in a legislative matter handled by the particular congressional committee in question. For example, the additional limits would not apply if the chairman of the House Education and Labor Committee were paid for a speech to college students and their parents. They would apply if his paid speech were given to the National Education Association.

In short, under my resolution, legislators would face additional limits only on the amounts of honoraria received from groups in the business of trying to influence legislation before the Members' committees. My resolution is designed to allow legislators enough compensation to continue to speak before such groups without "getting rich" from them or becoming financially beholden to them.

Unlike Members, executive branch officials are not permitted to receive honoraria from groups which they regulate. Moreover, several legislators, citing the possibility of abuse, already have decided on their own to reduce the amount of honoraria they receive from groups with special interests in legislation before their committees. The idea behind the practice of the executive branch and the voluntary action of these members is worth adopting as a guide to a general policy for the House.

The second problem that my resolution would address is that of the congressional honorarium received as part of a lavish, all-expense-paid "speaking vacation" at a resort area. The media recently have reported several cases of legislators and their spouses receiving free trips to Honolulu and Las Vegas, with an honorarium to boot, all paid for by groups with a direct interest in legislation before Congress. The Member who takes such a vacation gives the public the impression that he is both "cashing in" on his office and creating an obligation to give legislative favors in return. Again, the idea that a legislator should be reimbursed for a speaking engagement is legitimate. It is the practice that has gotten out of hand. Current House rules and advisory opinions state that only "necessary" expenses will be allowed, but these provisions are not elaborated with any precision and so are largely unenforceable and subject to abuse.

My resolution would require that reimbursement of Members for trips sponsored by special interest groups be limited to moderate, necessary expenses, not to those incurred at the finest restaurants and hotels at the finest resorts and vacation spots. Reimbursement would be tied to the General Services Administration's annual figures on the estimated costs of food and lodging in various cities across the United States. A legislator speaking before a special interest group in New York City, for example, would be allowed $157.40 per day for expenses under the present schedule. In Indianapolis, he would be allowed $76.90 per day. Any payment above those limits would be considered part of the Member's honorarium and would be subject to the limits on honoraria.

Mr. Speaker, I believe that the reforms contained in my resolution are necessary. Recent stories of abuse leave little room for any other conclusion. My resolution recognizes that it should not be a financial hardship for legislators to speak to special interest groups, but it also recognizes that no financial bonanza should be permitted. The provisions of my resolution are reasonable. They will be effective if they are adopted. I urge that my resolution be given prompt consideration.●

THE RETIREMENT OF BILL WINN

HON. WILLIAM F. CLINGER, JR.

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. CLINGER. Mr. Speaker, an institution in the 23d District of Pennsylvania, which I represent, is retiring on September 2. That institution is Mr. Bill Winn of WESB radio in Bradford, who began his career by fiddling around with radios in the attic as a youngster and later landed his first radio job in Williamsport, Pa., for the princely sum of $5 a week during the Depression.

In a sense, Bill Winn is the end of an era. In the earlier part of his career, he often produced live shows for radio and even was known as "Swingtime Charlie" on the show. Since then, the nature of radio has changed as a result of television, and in the future, Bill thinks it will change again with the development of satellite technology.

Still, Mr. Speaker, there will remain something special about the early days of radio and the impact it had on the lives of so many Americans. Bill Winn was certainly no small part of that effort, having served for radio stations stretching from Pennsylvania to Honolulu, Hawaii.

As an example of his abilities and his prominence with his peers, Bill Winn served as president of the Pennsylvania Associated Press Broadcasters Association and won several prestigious awards. I am proud that Bill Winn is from the district I represent, and I will certainly miss his presence.●

GOVERNMENT CONTRIBUTION TO EDUCATION

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. WIRTH. Mr. Speaker, on Thursday, July 28, the Subcommittee on Elementary, Secondary and Vocational Education held a hearing on House Concurrent Resolution 118, a resolution expressing the sense of the Congress that the Federal Government should contribute to the support of education in our country. This resolution was introduced by my colleague, Mr. AUCOIN, who testified before the subcommittee.

In my colleague's testimony, he stressed the importance of having a quality education system, and that cutting the budget as proposed by the administration in recent years is not the way to achieve this goal. He also discussed the growing importance of high technology to education. There is a growing demand for a highly trained work force, and yet our students are far behind other nation's students in math, science, engineering, and other critical fields. If we are to reverse these dangerous trends, as my colleague points out, we must have strong Federal support for education. This is the point of Mr. AUCOIN's resolution, and I urge my colleagues to support it.

Mr. Speaker, I would like to insert my colleague's testimony into the RECORD. His comments provide a good deal of insight into what role the Federal Government should play in the education of our children.

The testimony follows:

TESTIMONY OF CONGRESSMAN LES AUCOIN SUBCOMMITTEE ON ELEMENTARY, SECONDARY AND VOCATIONAL EDUCATION, JULY 28, 1983

Mr. Chairman, I commend you for holding this hearing to consider House Concurrent Resolution 118. It is a privilege for me to appear before you today to urge its adoption.

Mr. Chairman, I come from a state with a tradition of educational excellence. Oregon was one of the first states to institute a program of competency testing at the elementary and high school levels. Oregon students consistently score above the national average on achievement tests. Oregon business, industry and labor work together to improve public education.

Despite these successes, in virtually every meeting I've held in my district over the past year, people have expressed concern about the condition of public education. Oregonians are worried about the future of their schools. They are worried because it is becoming increasingly difficult to hire qualified educators in Oregon. They are worried because a very deep and protracted recession has eroded the state's revenue base—and with it, vital basic school support.

They are worried because they have learned the hard way that the economic future of Oregon depends on access to quality education.

Oregon is just now beginning to recover from a damaging recession which held unemployment above ten percent for over three years. Oregonians realize that for the recovery to be sustained the state must diversify its economic base. And diversification is impossible without an educated workforce.

I readily concede that my views are strongly influenced by the view of society taken by the most enlightened leaders of the high technology industry, which has become a significant economic factor in my district.

The high tech industry is at the cutting edge of this country's ability to innovate and develop the technologies necessary to remain competitive. When asked to name the single most important factor which will allow the high tech industry to sustain this competitive drive, those within the industry uniformly cite the need for a highly educated pool of workers.

This should not be surprising to anyone familiar with the high tech industry. To remain competitive, innovative developments must jump ahead at light speed—state of the art knowledge doubles every 18 months. Only the finest minds and most highly educated workforce can keep this industry out front in a highly competitive world.

It's like the forward point on a wheel in motion; to stay in place is to end up on the reverse side of the wheel. The need is to invest in ever more productive advances of the human mind. Prosperity, even survival, depends on it.

Mr. Chairman, what the high tech industry can teach us in the field of science, mathematics and engineering holds true for American society as a whole—in medicine, in the liberal arts, in the professions and in our basic industries such as steel and automobiles which need technological innovation to survive.

Representatives of Oregon's high technology industries have pushed, and worked with the state, to improve support for public education. Businessmen in the more "traditional" fields have cooperated in improving vocational and basic skills programs to insure that they will continue to have the educated workforce they need.

But the demands being placed on Oregon's public education system—as across the nation—are such that the combined efforts of businesses, local schools and state legislatures are simply inadequate.

And, distressingly, instead of working in cooperation with state and local governments, this Administration has turned its back on support for education.

At a time when education should be one of our top national priorities, the share of the budget allocated for education has been falling. Elementary and secondary programs have been cut 15% in the past two years. The Administration recommended cutting higher education 37% this year.

Public education has traditionally been the engine that drives the industrial machinery of this nation. If we are to continue to keep pace with other nations, we need a national commitment to educational excellence.

Consider: 95 percent of Japanese teenagers graduate from high school, compared with 74 percent in the US. Only 38 percent of US high school students take a one year course in chemistry—while all students in the Soviet Union complete four years of chemistry.

Now consider: Japan now produces automobiles more efficiently than the United States. South Korea just built the world's most efficient steel mill. West Germany is replacing the US as the premier producer of machine tools in the world marketplace.

Recently, there have been some encouraging signs that the federal government is willing to recognize its responsibility to encourage educational excellence. Over the past few months, largely due to a series of reports on the condition of US public education, education has become a hotly-debated national topic.

The reports of the National Commission on Excellence in Education, the Twentieth Century Fund and the Task Force on Education for Economic Growth, outline the serious decline in the educational performance of U.S. students over the past several decades.

The reports show that Scholastic Achievement scores have declined steadily for the past twenty years. The reports show that 23 million adults in this country are considered to be functionally illiterate. The reports show that hours devoted to "core" courses in high school are declining.

And, while the reports differ in their analysis of the steps that must be taken to improve educational performance, they are unanimous on one point—state and local efforts must be backed by a strong federal commitment if they are to be successful.

H.R. 118 is intended as a first step in renewing the federal commitment to education. By approving this resolution, Congress can go on record as emphasizing its concern about, and continued support for, educational opportunity and educational excellence in the United States.

The resolution is in no way intended to preempt the role of state and local governments.

Rather, the resolution says to those school board members, teachers and state officials who are working so hard to meet educational priorities, that they will have the cooperation and commitment they need at the federal level.

The resolution says that the federal government will continue to recognize its historic responsibility for special groups—the handicapped, the disadvantaged.

The resolution says that education is of an importance deserving a place in the President's Cabinet, and reiterates support for the Department of Education.

The resolution recognizes that federal actions may impact local efforts, and calls for the continuation of aid to offset these changes.

The resolution recognizes that the problems facing our public education system will require the best efforts of all sectors of government.

Mr. Chairman, I think that H.R. 118 is an important first step in regaining momentum and working to improve our national system of public education. H.R. 118 can help to build a reservoir of support for ongoing efforts to improve the quality of education in the United States, including plans for implementing the suggestions of the National Commission on Excellence in Education.

While I've emphasized the important economic aspects today, we all realize that support for public education is much more. The U.S. public education system has helped to build a common culture, an understanding of institutions, the kind of cohesion in a social and cultural sense that will prepare this country for the unprecedented challenges that lie ahead.

We must continue to give it our full support.●

MUNICIPAL TREASURERS INDISPENSIBLE TO CITY GOVERNMENT

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. DYMALLY. Mr. Speaker, today I join my fellow Members of Congress as well as city, county, and State governments across the Nation in acknowledging the contributions of municipal treasurers to the smooth running of local government. The Municipal Treasurers Association of the United States and Canada will hold its annual convention in Tulsa, Okla., on the 10th through the 13th of August. It is therefore fitting that all of us in the Congress extend our appreciation to these public servants as they come together for this annual event.

Local government serves the people best when it is operated in an efficient, orderly and trustworthy manner. Without proper procedures and strict financial records, the functioning of government would be severely impaired. And it is the municipal treasurer who administers procedures and keeps the financial records.

More than administering procedures, the municipal treasurer is the custodian of local government funds. These are dedicated funds intended for spe-

cific purposes. The proper management and investment of these funds is the solemn charge of the municipal treasurer. As a result of this charge, there is no other local public servant with a more organized financial knowledge about a community and its government activities. The knowledge is indispensible to the process of government.

Finance, however, is not the only vital aspect of local government. A government which lacks the support of those it purports to govern cannot long exist. The strength of local government, therefore, depends upon the citizens' opinion of it, and such opinion is formed largely by the image set forth by municipal government employees. The treasurer is one of the municipal officials most closely in daily contact with the citizenry and is in a key position to mold sound public opinion.

I am proud, therefore, to join with my colleagues in the Congress in recognizing the holders of an historic municipal office which grew out of the traditions of our democratic heritage.●

NEW YORK TIMES HAILS MRS. BURTON

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. WON PAT. Mr. Speaker, I am pleased to call to the attention of our colleagues an excellent profile of our dear colleague, Mrs. SALA BURTON of California.

The article appeared in today's New York Times and does a fine job of reflecting the charm and dedication of this wonderful woman. Those of us who were overjoyed to see her take the seat of her late husband, Philip Burton, can see that she has obviously taken charge of her life and of her new job and will make a great contribution to this body.

Recently, I was honored to have SALA join me on the House Interior Committee and equally important, on the Subcommittee on Insular Affairs which I chair. Like her husband before, SALA has pledged to do her best to support the U.S. Territories and I welcome her support and friendship in their effort.

I know we all wish SALA the best of success in her position and I commend the New York Times article to the attention of my colleagues here today.

The article follows:

[From the New York Times, July 29, 1983]

"THE POPULAR BURTON" AND HER MISSION

(By Barbara Gamarekian)

WASHINGTON, July 28.—When Sala Burton walked onto the floor of the House of Representatives a little more than four weeks ago to be sworn in as her late husband's successor in Congress, she found it, she said, "a touching, bittersweet experience."

Her husband, Phillip, a driving force among House liberals, had served in that institution for 19 years when he died of an embolism in April. A number of his colleagues, including Senator Alan Cranston of California, stood at Mrs. Burton's side as she took the oath of office.

"All those familiar faces," she said, "they gave me such a warm welcome. It still seems unreal."

Although Mrs. Burton had never worked in her husband's Congressional office, she shared his passion for politics. The Congress had often referred to her as his greatest political asset. "She's the popular Burton," he would say. "I keep Sala busy repairing all the fences I've busted."

"One reason I've always been involved in politics is that I'm European born," said Mrs. Burton, a warm hearty woman of 57 who says with a laugh that she speaks "a little English" as well as French, Russian, Polish, German and Yiddish. She arrived in the United States as a teen-ager from Poland with her Jewish parents as World War II was about to break out.

WE MUST ALL BE VIGILANT

"I saw and felt what happened in Western Europe when the Nazis were moving," she said. "You learn that politics is everybody's business. The air you breath is political—it isn't just a game for certain people. We must all be vigilant in terms of whom we elect to office, vigilant in terms of our civil rights and liberties."

Mrs. Burton was elected to her seat June 21, defeating 10 other candidates with 56.9 percent of the vote. Since then she has been busy traveling between the capital and her home state.

There was a short week in Washington before returning to her home district in San Francisco for the Fourth of July recess and the reorganization of her district office. Now she is back on Capitol Hill getting resettled with her staff of six, all holdovers from her husband's office, in two nondescript rooms in the Longworth House Office Building. With no seniority, she is far down the pecking order when it comes to office space.

The issues that are of special interest to her, she says, are education ("I started talking about teachers before the President. We are losing the good ones.") and the environment. And she has been successful in gaining appointments to both the House Education and Labor Committee and the Interior and Insular Affairs Committee.

NEVER GOT HER DRAMA DEGREE

"And of course," she added, "the issues of peace and disarmament and the passage of the equal rights amendment are both high on my agenda. One of the first things I did was to sign on as a co-sponsor of the E.R.A."

The Burtons met at a Young Democrats' convention in 1950. He headed the organization and she was a delegate. Three years later they married, and she never did collect the drama degree that she was working for at San Francisco State University.

There is a daughter, Joy, and two grandchildren.

In the years her husband served as a member of the California State Assembly, Mrs. Burton helped organize the California Democratic Council and served as its vice president. She also worked for the California Public Affairs Institute, a forum for political candidates; served as a member of San Franscisco's fair housing committee working closely with the National Association for the Advancement of Colored People: served as a member of the state Democratic Party's steering committee and was chairman of the Democratic Women's Forum. She has been a delegate to Democratic Presidential conventions three times.

Mrs. Burton continued her political activities in Washington after her husband's election to Congress, serving on the advisory boards of the National Security Committee and the National Council on Soviet Jewry and as the legislative chairman of the Women's National Democratic Club here.

STEADY AS A BRICK

"She is a very able, tough, clear-headed person," said Fred Dutton, a Washington lawyer who was chief of staff for Gov. Edmund G. Brown in California in the 1950's. "Phil was a real firebrand and would go off in all directions, but Sala was as steady as a brick."

William K. Coblentz, a West Coast lawyer who has long been involved in California politics, said: "She knows the legislative process and she was so intimately involved with Phil she can step into his shoes easily. In personal relationships, she's much better at getting on than Phil who could be pretty abrasive."

"People used to say that Phil ate shredded precinct lists for breakfast," said Mrs. Burton with a smile. "But that is so untrue. He was a man who was 6-foot-3 with a booming voice and a strong personality and he could be tough in the best sense. He would fight for things he believes in until the very end. But when it came to his family and friends, he was very soft."

Mrs. Burton has no game plan, no theories about how to become a political force on the Hill.

"I just want to do my very best to represent the city of San Francisco," she said. "And I want to represent, as my husband did, the dispossesed, the hungry, the poor, the children, people in the trust territories, the aged—those people who don't have a lot of lobbying being done for them."●

NATIONAL SOCIAL WORK MONTH, MARCH 1984

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. TOWNS. Mr. Speaker, it is with great personal pleasure and a sense of mission that I introduce a House joint resolution proclaiming the month of March 1984 as National Social Work Month.

Social work is an important profession which embodies what is best about Americans—the instinct to reach out a hand to those who need help. It is the profession which manifests the generosity of spirit of our Nation.

At a time of reduced Federal funding and mounting societal pressures, social workers meet the challenge every day, with every person they assist.

We must never lose touch with our critical national goal—to mine our Nation's human treasure, to nurture, to

heal, to repair, and rehabilitate in order to create productive workers, effective, satisfied family members, and responsible, contributing citizens.

Social workers are on the frontlines pursuing that goal. They help with the debilitating effects of drug and alcohol abuse, the disorientation of divorce and separation, the devastation of unemployment. They support the families, protect the children, care for the aged.

The National Association of Social Workers is the professional organization with 92,000 members which supports the efforts of individual social workers and maintains the profession's standards. NASW leads us in the effort to remember that social workers are a deeply needed commodity in our society.

NASW suggests that we look at the variety of settings in which social workers practice as a measure of their worth: there were social workers in the disaster relief tents after the Coalinga earthquake; they helped relocate families during last spring's mud and flood in Utah; there are social workers in schools, hospitals, nursing homes, runaway houses, day care centers, mental health clinics, veterans' centers. They work in factories and in corporate offices; social workers work in police stations and courthouses; churches have social workers on their staffs, as well as family service agencies, adoption and foster care agencies, public assistance offices and Traveler's Aid booths in train and bus stations and airports; social workers are in the waiting rooms of dentists, pediatricians, funeral directors; social workers are in mayors' offices planning for the social well being of urban populations; social workers help shape public policies which guard our national well-being.

Today's social workers work to improve the quality of life for people at all income levels. Their methods include both the Jane Addams approach of seeking social reform and the therapeutic method of counseling families and individuals. Their aim in either case is the same—to increase people's control over their own lives and their ability to contribute to society.

The National Association of Social Workers has brought these matters to our attention by asking us to designate 1 month during the year when we recognize social workers and the important role they play.

Designating March 1984 as National Social Work Month will help the public understand and support the tireless efforts of this hard working profession because, after all, social workers help people * * * just like you.

Mr. Speaker, I request unanimous consent that the text of this resolution be printed in the RECORD.●

THERE ARE NO QUICK FIXES FOR CENTRAL AMERICA

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. BENNETT. Mr. Speaker, I would like to include at this point in the RECORD a thoughtful article by my dear friend, Brig. Gen. J. D. Hittle, USMC (Retired) who was formerly Assistant Secretary of the Navy and is intensely interested in all matters of national defense and international affairs, and a good analyst of the problems facing our country. He is certainly on solid ground in his observation that there is no way to work out a quick solution in the struggle against Communist agression in Central America. Good judgment and preseverance are essential. The article reads as it was originally published in Navy Times.

[From the Navy Times, July 25, 1983]

THERE ARE NO QUICK FIXES FOR CENTRAL AMERICA

(By Brig. Gen. J. D. Hittle, USMC (Ret.))

Too many in Congress, the public and the press are demanding quick solutions to the struggle against communist aggression in Central America.

What they overlook is that it look a long time for the communists to create the current crisis there. By the same token, it's going to take a long time to defuse the crisis and rebuff the Russian-backed threat to the region. That threat to El Salvador, Honduras, Guatemala, and Costa Rica is also, in turn, a danger to the Panama Canal, Mexico and the Caribbean sea lanes that are vital to the strategic integrity of the United States.

Is should be recognized by this time that when Russia and the communist client states, like Cuba, embark on a policy of penetration, terror and armed rebellion, it is not done on a short-range basis. Russia is acting in accordance with its doctrinal communist belief that history is on its side.

Thus, Russia takes the long view that the United States does not have the emotional and intellectual stamina nor the stiffness of spine to persevere against the communist expansionism. For the communists, their victory and the U.S. defeat in Vietnam, Cambodia and Loas reaffirmed that belief.

It's worth remembering that it took North Vietman, backed by Russia and communist China, over a quarter of a centry of dogged, unrelenting progaganda, intrigue and overt military action to break the back of U.S. congressional support of our historically important stand in Indochina. That Moscow is following much the same scenario in Central America is obvious.

This alone should jolt some of the wishful thinkers in our Congress, the press, and the universities back to the real world of facts and acts. what these dreamers don't, or won't, see is that the United States didn't start the vicious Red aggression in Central America. Nor will these critics of President Reagan's alert opposition to Russian encroachment on the American mainland recognize the disasters that would flow endlessly out another U.S. retreat.

Whether the critics of U.S. defense of Central America like it or not, the fact is that we, as a nation, are facing a long and burdensome confrontation in that immensely important strategic area. We must gird ourselves for a long, tough effort. There is no quick fix.

But defeat of this close-to-home communist drive will depend on much more than military support. It will require a full range of effort. Military action alone will not do the basic job that has to be done. Quite correctly, President Reagan is placing heavy emphasis on the economic aspects of the situation.

What is needed is a major economic improvement program for El Salvador and the other endangered Central American countries. It requires, in a sense, a Central American version of the enlightened Marshall Plan that raised Europe from the ruble of World War II and put those war-battered people on the road to survival, hope and progress.

Central America is not, of course, Europe, and an economic improvement program will have to be skillfully tailored to the nature and size of the area's problems. Otherwise, money will be wasted and success will be an ever-elusive goal.

But the inescapable necessity for such an economic effort does not lessen the absolute need for continued and adequate U.S. military assistance in countering the Red terror and aggression.

Without sufficient military protection against the Russian-backed guerrillas, the most ably planned economic program wouldn't have a chance. One reason is that a basic goal of communist strategy in El Salvador, as it was in Southeast Asia, is to destroy the economic viability of the country. This is why bridges are blown up, roads mined, and electrical power lines destroyed.

Military power is thus an essential ingredient in the formula for defense against the Red aggression that is now brutalizing El Salvador and threatening to engulf the area.

In short, U.S. economic assistance would make possible the rebuilding of El Salvador's economy with the resulting social improvement and political stability and progress.

The military's ability to fend off the Red terror and destruction gives the economic effort a chance to succeed.

The communist bosses who are calling the shots in Central America have a pretty good idea of what we should do economically and militarily to assure the protection and survival of El Salvador and the rest of Central America. These same communist strategists are betting that, like in Vietnam, we will falter in the test of wills and again lack the moral stamina to persevere.

We can hope that such a communist assessment of U.S. frailty will be proven wrong. It could be so proven if as a nation we face up to one basic strategic truth: This time the Russian-backed penetration and aggression isn't in Vietnam, halfway around the world. Rather it is in mainland America, just "south of the border."

That border, as the world knows, is an undefended one. But if Central America falls to communist aggression, the requirements for sheer survival will mean the military manning of the U.S.-Mexico border and accepting all the dangers and problems that go with such a national emergency.●

DANNY AND ROSE MARIE THOMAS: TWO LIVES DEVOTED TO CHILD HEALTH

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. DYMALLY. Mr. Speaker, in the history of research on cures for diseases that take the lives of children, there is perhaps no institution that has made a greater contribution than St. Jude Children's Research Hospital in Memphis, Tenn. Thanks in significant part to the work that has been carried out at St. Jude's, the cure rate for childhood cancer has increased steadily over the years. The accomplishments of researchers and doctors at St. Jude's is something about which the Nation is both proud and grateful.

At the same time that we acknowledge our gratitude, it is essential to realize that advances in the cure rate for catastrophic childhood diseases are made at enormous cost. Those children who have been saved are alive today in large part because of the love of two people for these children. Those people are Danny and Rose Marie Thomas. They have dedicated their adult life to raising the funds necessary to continue the research and therapy which has literally given to thousands of children for whom there previously had been no hope. Fundraising is not the area of the research enterprise that attracts the greatest recognition. But Danny and Rose Marie have not sought recognition. Their reward has been the knowledge that they have given others the means by which to restore health, vitality, and hope to the grievously ill.

Danny and Rose Marie are all the more remarkable because their selfless devotion to this work came about as a result of a deliberate and voluntary choice. Our natural tendency is to avoid that which is painful, and Danny and Rose Marie have had the means to turn away from the painful reality of childhood suffering and death. Instead, they chose to face the challenge head on. They chose to help end the pain. They chose to create a new reality. Today the medical knowledge made possible by their fund raising efforts has been incorporated into medical practice the world over. Many of the heroes of this world are recognized because they have slain their enemies in war. In acknowledging the gift of Danny and Rose Marie Thomas to humanity, I think we are recognizing a greater heroism. Their enemy is death. And the testament to their conquest is to be found in the smiling faces of those who live because of their loving devotion.●

UNDERSTANDING THE NATURE OF CONFLICT IN CENTRAL AMERICA

HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. MARTINEZ. Mr. Speaker, the present policy in Central America is a failing, shortsighted policy which does not address the real problems of the area. In fact misconception of what is troubling Central America is so dangerously wrong that it will be the stumbling block to any coherent lasting solution for peace. I have voted, along with the majority of my colleagues in Congress, to amend the Intelligence Authorization Act and prohibit covert aid in Nicaragua. I have done so with the firm belief that we as a nation can best serve the interests of that area, and the cause of democracy, by not blindly overwhelming the areas of conflict with military responses.

Yesterday Congress acted to rebuke the administration's policy by a 228–195 vote. Much of the 14 hours of debate was consumed by studying the reality of day-to-day life in Central America. The basic problems of hunger, health, and education are the major causes of societal discontent and conflict. Since this region was first settled there has been a large disparity between the very rich and the very poor. This division has been so complete that it is manifest in all aspects of life. A major example is the lack of an educated population. While the ruling educated class has perpetuated their control through restrictive and dictatorial means, the majority of the people, who have lived for generations in poverty, have never been allowed to participate in the political process. Their concerns were more directed toward daily survival.

Another factor which we must acknowledge as the cornerstone for any plan for a lasting peaceful solution is land reform. Historically, the survival of the peasants and farmers in Central America has relied on the whims of the landed ruling classes and foreign-controlled companies which owned much of the infrastructure on which the progress of a country's economy rely. The peasants have had to work the land they could not own and were not allowed to bear the fruits of their own labors. In Nicaragua, the Somoza regime owned 20 percent of all the arable land in that country; in El Salvador, 14 families controlled the vase majority of the land suitable for farming.

These major problems place obstructions in the path of open democratic governing. The weathly ruling segment of the population wishes to remain in control of events and to increase their power and prestige. They can only do so as long as they maintain a passive, cheap labor force, which in turn necessitates an uneducated population. This is not the only side effect. The governing regime must repress the civil rights of its citizenry to insure that there is no criticism or political opposition to the government's political policies. In other words the status quo is geared toward repression of individual rights and powerful dictatorial regimes.

We as Americans must realize that these socioeconomic problems are the root from which the military conflicts arise. By supporting continued military action we are only exacerbating the problem while ignoring the basic issues. The administration is trying to convince America that the Sandinista government and the rebels in El Salvador are really only Soviet and Cuban insurgents. They assume that we can solve intrinsically economic and social problems with shortsighted military solutions.

The administration has stated that the Government of Nicaragua has been aggressively seeking the overthrow of the democratically elected Government of El Salvador, via the supply of arms to anti-Government forces in that country. What the President does not say is that CIA agents have been doing the same thing. Our Government has been supporting anti-Sandinista forces on the pretense of halting the arms flow from Nicaragua to the rebels in El Salvador. Congress, by cutting off funds for covert aid, has demonstrated its belief that the CIA agents have gone further than their stated goals and have been actively facilitating the overthrow of the Government of Nicaragua. This is in direct violation of the law which prohibits funds for the purpose of overthrowing the Sandinista government, or for efforts to provoke military conflicts between Nicaragua and Honduras.

In the past weeks we have heard the administration make repeated aggressive remarks concerning Nicaragua. President Reagan has asked for increased aid for the anti-Sandinista forces. The CIA has revealed their plan to assemble 12,000–15,000 rebel troops in that country, an increase of 100 percent. The administration has planned a large-scale increase in its military presence in and around Central America for the expressed purpose of intimidating the Sandinista government. All of these actions can only obstruct the path to peace in Central America.

What the United States should encourage are negotiations between the conflicting parties. We must halt the increase of our military presence and seek a cease-fire between warring factions in El Salvador and Nicaragua. And most importantly we must promote social and economic programs

that will bring about a more equitable system of governing. Only by taking these actions will the United States be of any aid to the establishment of an open, peaceful atmosphere, reliant on a democratic means for change.

I congratulate the Members of the House who voted to pass this measure. We have taken a major step toward the formulation of a rational foreign policy for this troubled area. I urge that the Members of the Senate, who next take up this bill, and the President to take heed of the message that this vote symbolizes. The people of this country demand that the Government conduct its activities in compliance with the law, and with good faith attempt to lessen tensions between conflicting groups.●

CONGRESSIONAL FELLOWSHIP PROGRAM

HON. DICK CHENEY

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. CHENEY. Mr. Speaker, I first came to Washington in 1968, as a congressional fellow for Congressman Bill Steiger. As you know, the Congressional Fellowship program is sponsored by the American Political Science Association and includes a 10-month experience working for Members on both sides of the Hill. Since coming to Congress myself, I have been on the board of the APSA and am an enthusiastic supporter of the fellowship program. Not only does the program provide a congressional office with the opportunity to get quality help from highly qualified professionals, but those who participate in the program usually bring an abundance of enthusiasm, commitment, and a fresh outlook that makes a very positive contribution to a congressional office.

Participation in the Congressional Fellowship program is done at no cost to the individual congressional office. The cost of the program is underwritten in part through the generosity of private companies or foundations that recognize the value of such a program; companies such as the Andreas Foundation, AT&T, Exxon Education Foundation, Field Charitable Enterprises Corp., Gannett Foundation, New York Times Foundation, the Poynter Fund, and IBM.

As a result of such broad, nonpartisan support, the program is able to provide Members of Congress with exceptional people that offer a broad range of experience. I can highly recommend participation in this program to my colleagues.●

CONOVER AN IRON CURTAIN JAZZ HERO

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. KEMP. Mr. Speaker, for more than 27 years and 10,000 programs Willis Conover has broadcast American jazz to enthusiastic audiences around the globe for the Voice of America. A native of Buffalo, N.Y., Willis Conover is one of the best known Americans abroad. He is treated virtually as a hero in Eastern Europe, as the following letter from two Bulgarian emigres points out:

We are two lucky escapees from behind the Iron Curtain (we jumped off a Bulgarian ship in Africa) and we have been living for years with you, your voice and your music. There is absolutely no way we can describe what enormous importance you have for somebody living back there, in the darkness of communist propaganda. You are the music, you are the light, you are the voice of America, you ARE America.

Willis Conover views music as a way to increase understanding and communications around the world, as a common ground among peoples and cultures. To him, American jazz is the classical music of the 20th century, and his voice and his music have been instrumental in elevating the democratic spirit of hope and freedom to all the world. I commend the following article to my colleagues on Willis Conover and his music from the Atlanta Journal.

The article follows:

[From the Atlanta Journal, July 8, 1983]

HE'S AN IRON CURTAIN JAZZ HERO

(By Deborah Well)

-WASHINGTON.—His deep voice resonates in the cluttered windowless studio where he works, inside a nondescript government office building.

"This is Willis Conover," he enunciates, leaning toward the mike and spacing each word with a musician's timing, "with the Voice of America Jazz Hour."

Conover, a tall man with heavy-framed glasses and graying hair may be the world's most famous disc jockey, but odds are most Americans have never heard of him.

His oft-rehearsed introduction has crackled over shortwave radio to millions of listeners in Eastern Europe, the Soviet Union, India, and Africa six evenings a week for the past 28 years, since he began his jazz broadcasts in 1954.

He earns something less than $50,000 a year for the hours he spends in his nest of an office, stacked with record albums and tapes, books and articles. And he is generally credited with influencing several generations of jazz musicians in Eastern Europe, where he is treated as a hero.

At a concert in Moscow last year, a crowd of 500 erupted in applause when Conover stepped to the microphone to intone his familiar, "Good Evening."

On his first trip abroad in 1959, to Poland, he was "flabbergasted" when he stepped off the plane to the strains of a 30-piece orchestra playing for him.

But to Conover, jazz is what matters.

"Jazz is not so much a kind of music, as a way," he paused for effect, dragging out the word in his distinctive gravelly voice, "of playing * * * It's the most honest music in the world."

"Many people assume that I'm doing a disc jockey show and I'm not. It's a program of music and I try to make it the best of truly American music, which includes the best of jazz * * * a kind of catch-all word. It includes the enduring popular song, not the top 40."

VOA director Kenneth Tomlinson calls Conover "the greatest resource in the house." His Music USA program is the longest running at the station, Tomlinson said. "He'll spend hour upon hour for a five minute thing," said Tomlinson. "He's a perfectionist."

Last year Conover was honored with a party celebrating his 10,000th jazz broadcast. On a recent morning, he was logging in broadcast number 10,453.

He was smoking, his eyes narrowed and his head bobbing rhythmically as he listened to a tape of a '40s jazz great, Joe Mooney, scheduled for airing in August. Shirtsleeves rolled up, tieless, his government ID card tucked into his breast pocket, he hunkered over his metal desk as if it were a keyboard. His sound technician flashed a toothy smile through the glass partition.

The tape was of an interview Conover made with the jazz accordionist in 1965. He is rebroadcasting it as part of a series on early jazz figures whose work is no longer available on record.

Conover's broadcasts form but a fraction of the weekly menu of 970 hours of direct broadcasting by the VOA. A division of the U.S. Information Agency, the station began operating as the U.S. global radio network in 1942, 79 days after the attack on Pearl Harbor.

The first program included the statement, "Daily at this time, we shall speak to you about America and the war—the news may be good or bad—we shall tell you the truth."

Today it broadcasts from the main Washington, D.C., studio in 42 languages from Albanian to Uzbek. Sixty percent of the programing is news.

Conover broadcasts primarily in English. Sometimes a co-host will translate his remarks for a particular audience.

"Many people have told me they have learned English by listening to my programs," he said, "as well as learning about this 20th century music, the best of which will be regarded as the classical music of the 20th century * * *"

An army brat born in Buffalo, N.Y., Conover ran away from home when he was a teenager, "tired of being told what to do."

"I'm not very good at being harnessed," he said, explaining that he is still an independent contractor rather than a Voice of America employee.

Conover, who hasn't taken a vacation in 13 years, reads a lot to prepare for his broadcasts.●

A TRIBUTE TO MRS. SYLVIA EVERETT MORGAN

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. CLAY. Mr. Speaker, it is with great pride that I pay a special tribute to a native St. Louisan, Mrs. Sylvia Everett Morgan who is retiring from the Federal Government on July 31, 1983.

Mrs. Morgan has devoted 33 years of her life serving the Federal Government. During these years, she has demonstrated devotion, persistence, and an abiding faith and love for her native land.

I am pleased to cite her as an unusual American who cares profoundly about people and human possibilities. All of us in St. Louis and beyond are enriched and inspired by the extraordinary example that Mrs. Morgan has set.

To Mrs. Morgan, I extend my warmest best wishes, Godspeed, good health, and personal fulfillment as she undertakes other interests of her choosing.

I am sure that all Members of the Congress join me in congratulating Mrs. Morgan on her retirement and her remarkable contribution of service. I am submitting for your information a more detailed description of Mrs. Morgan's involvements.

BIOSKETCH OF SYLVIA EVERETT MORGAN

Sylvia E. Morgan, a native of St. Louis, Missouri, has been employed by the Federal Government for 33 years. Twenty-seven of those years have been spent in the training field. She was a Training Coordinator at the Military Personnel Records Center in St. Louis, Missouri. In March 1966, she moved to Washington, D.C., to take a position as an Employee Development Specialist with the Veterans' Administration. In December 1966, she transferred to the Civil Service Commission.

Formerly the Director of the Civil Service Commission's (now the Office of Personnel Management) Communications Training Institute, the Director of the EEO and General Personnel Management Training Branch, the Acting Director of the Communications and Office Skills Training Center, and the Acting Director of the Personnel Management Training Center, she has received numerous awards and commendations for her exemplary service.

She has conducted communications workshops for senior executives at the Federal Executive Institute, and has done extensive training in stress management, listening, reading, writing, speaking, and interpersonal communications.

She has been a guest speaker for many universities, professional organizations, and government agencies. Some of them are American University, Howard University, Lincoln University, American Society for Training and Development, Administrative Management Society, National Communications Association, and the Departments of Agriculture, Commerce, Energy, Interior, Labor, and State.

She is a member of many professional organizations and she is also a former model for Ebony and McCall magazines.

She is the wife of Dick Morgan and she has two children and five grandchildren.

She is retiring from Federal Government service on July 31, 1983.●

CHINESE INFANTICIDE

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. PHILIP M. CRANE. Mr. Speaker, today the House of Representatives considered House Resolution 258, my resolution of disapproval of the extension of most-favored nation (MFN) trade status to the People's Republic of China. I believe that it is foolish for the U.S. Government to force the taxpayer to provide what amounts to a subsidy to a totalitarian country which engages in all the attendant repressions of freedom and basic human rights. In the last 30 years, Communist China has had a dismal human rights record.

When looking at the long list of human rights violations in the People's Republic of China, I am most appalled by the population control measures of the Communist government. Parents are permitted to have only one child. The authorities limit each population unit, such as a rural collective, to a certain number of births per year. Mothers pregnant with over-quota babies are forced to attend study courses until they submit to an abortion. Families that actually have a second child must pay heavy fines and run the risk of demotion or assignment to less desirable work. The Communist government's severe population control policy has caused a wave of infanticide to sweep over the Chinese countryside.

I submit that such barbarous behavior is the rule and not the exception in the People's Republic of China. We are dealing with a government which has murdered 34-66 million of its citizens in the last 30 years. Now, the Chinese have turned to infanticide. The United States must not allow another government to terrorize and murder its own citizens.

Mr. Speaker, can the United States, in good conscience, grant most favored nations status to such a brutal regime? MFN status should be reserved to those nations that share in the belief of personal freedom and human rights. MFN status is a privilege that the People's Republic of China, if it continues to repress its people, can never earn.

In his article, "Why are Baby Girls Being Killed in China," which appeared in the Wall Street Journal on July 25, 1983, Mr. Steven W. Mosher presents a graphic and frightening view of "population control" in China. By extending MFN status to China, the United States would be encouraging this deplorable behavior. After reading Mr. Mosher's telling account, I do not believe that any Member of this Congress could, in good conscience, vote to extend MFN status to the People's Republic of China.

[From the Wall Street Journal, July 25, 1983]

WHY ARE BABY GIRLS BEING KILLED IN CHINA?

(By Steven W. Mosher)

In 1980, when I was living with the 8,000 members of Sandhead Brigade in China's Guangdong Province, I asked village friends whether female infanticide ever occurred locally. The answer, which came with rather more heat than I had expected, was an emphatic no. "Ours is a land of fish and rice," one wrinkled old midwife told me in explanation. "All the people here have always been able to raise their daughters." She and others insisted that even under the old imperial regime girl babies had never been put to death.

Yet less than two years later Chinese friends in Hong Kong who had recently been back to the village began to tell of girl infants dying soon after birth in suspicious circumstances. One young woman was even more candid, admitting to me that when her mainland sister-in-law had recently given birth to a girl, the baby had been murdered immediately. A bucket of water had been prepared beside the bed. When the newborn turned out to be a girl, she was drowned.

Female infanticide isn't just an anomaly of the village I lived in. Premier Zhao Ziyang thought the problem widespread enough to condemn it in his report to the National People's Congress in December 1982. "We must protect in particular infant girls and their mothers," he said. "The whole society must resolutely condemn the criminal activities of female infanticide and maltreatment of mothers. The judicial apparatus should resolutely punish the offenders according to law."

In recent months provincial newspapers throughout China have reported grisly tales of the murder of female infants. On March 3, the People's Daily admitted that "the butchering, drowning and leaving to die of female infants and the maltreating of women who have given birth to girls has become a grave social problem."

Peking claims that these crimes are committed by "backward" villagers in the name of "feudal" attitudes that "boys are precious, girls are worthless." Male villagers, said to desire sons to "carry on the ancestral line and extend the generations," have been especially singled out for censure. "In their keen desire to have sons," the English-language Peking Review said last January, "some men still torment their wives who bear daughters and worse still, they kill the baby girls through neglect or outright murder." If Peking is to be believed, many peasant men are ignorant and misguided monsters who willingly sacrifice their infant daughters on the altar of some feudal belief.

Nothing could be further from the truth. Infanticide does have a long and tragic history in many parts of China. But by the middle decades of this century, it looked as though this barbarism was on its way to extinction. In Chinese villages today, where ancestral land has long since been expropri-

ated by the state and ancestor worship is on the decline, traditional notions of clan and family continuity no longer exert much influence. These attenuated ideas could not possibly account for the sudden reoccurrence of female infanticide.

The wave of infanticide sweeping China is a direct consequence of a population-control policy of unprecedented severity. It restricts families to one child, ignores the realities of old-age economics in the countryside and systematically denigrates the value of human life.

Parents are permitted to have only one child, and then only after a "birth quota" has been issued by the authorities. Each population unit, such as a rural collective, is limited to a certain number of births per year, which it allots to couples who have yet to have children.

Women pregnant with "over-quota" babies are forced to attend round-the-clock "study courses" until they submit to an abortion. Families who actually have a second child must pay heavy fines of up to $2,000—several years wages in mainland China—and run the risk of demotion or assignment to less desirable work as well.

This draconian policy makes no provision for the long-term economic concerns of peasant parents, especially their anxieties about financial security in old age. Sons are the only social-security system known to villagers, for there are no pension programs in the Chinese countryside. Neither can daughters give long-term assistance, for rural custom decrees that they take up residence with their husband's family upon marriage and sever all economic ties with their natal family. Even if they were to keep a daughter at home, peasants say, it would be impossible to find her a husband in a population of only sons.

Those who are without sons must toil in the fields throughout their twilight years. As their strength declines to the point where they cannot keep up, they are assigned lighter work that pays scarcely enough for their rice ration. Old age is a long downward spiral of flagging vigor, worsening diet and weakening health.

While the birth of a son has always been a more important event than the arrival of a daughter, Peking's policy of one child per family has raised the stakes. For the peasantry birth rate has become a kind of Russian roulette: The arrival of a son heralds a relaxed and secure old age; the coming of a daughter portends poverty and slow starvation during one's declining years. It is not "feudal nonsense" but brutal economic reality that moves the parents to hope for a man-child.

If the child isn't male, then the choice is a stark one: Either kill or abandon the newborn female infant, reserving your one-child quota for the birth of a boy, or face a harrowing old age. It is no surprise that many peasants decide in favor of their own security, and trade the infant's life for their own.

It is also an act in which the Chinese state is a silent accomplice. The English-langauge China Daily printed in Peking may publish editorials lamenting the resurgence of infanticide, but the implementation of the birth control policy at the grass roots encourages cadres to overlook the willful murder of female infants.

County, commune and production brigade cadres are told how many births their units is to be allowed each year and are promoted and otherwise rewarded on the basis of whether they succeed in meeting the quota. It isn't in their interest to prevent female infanticide. Each girl who dies at birth or disappears soon after is one less head that they will be held to account for in the annual birth control report.

Front-line cadres take their cues from their superiors, and these have made clear that population growth is to be held down at all costs, even that of the lives of millions of infants.

Not only are forced abortions being performed up to the time of birth, there are even cases of officially sanctioned infanticide. In one incident shortly after I left Guangdong Province, a young woman pregnant for the first time gave birth to twin boys. What should have been an occasion for rejoicing quickly turned tragic as the cadres present asked her which one she wanted. Both of them, she replied, but to no avail. One of the babies—she could not and would not choose which—was taken from her and put to death.

(Mr. Mosher, one of the first American social scientists since 1949 permitted to live in a Chinese village, is author of "Broken Earth: The Rural Chinese," to be published later this summer by the Free Press.)●

WABASH VALLEY COLLEGE COMMENCEMENT ADDRESS GIVEN BY DR. JAMES S. SPENCER

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. SIMON. Mr. Speaker, 3 months ago Dr. James Spencer, the chancellor of the Illinois Eastern Community Colleges, announced his plans to retire at the end of the 1982-83 academic year. Dr. Spencer has been an educator for more than 35 years and served in his present position as chancellor for 15 years. In his final commencement address at Wabash Community College in Olney, Ill., on May 27, 1983, Dr. Spencer reviewed his observations over his career in education and gave his perceptions of what the future of the Illinois eastern colleges should be and what directions the colleges should take. More importantly, he also outlined the vital role of education in our society and the level of commitment that the American public and its elected officials must have to insure that our country prospers.

As the Congress takes on the difficult task of reviewing our system of education and setting new priorities, we would do well to follow the wisdom and experience of leaders like Dr. Spencer in determining how we can best meet the challenges of the future through the education of our young. I commend this excellent commencement address to my colleagues.

WABASH VALLEY COLLEGE COMMENCEMENT ADDRESS GIVEN BY DR. JAMES S. SPENCER, MAY 27, 1983

Thank you, Mr. Benedict. Graduation ceremonies are an important time when faculty and administration honor students who have successfully completed the program studies designed for their benefit. We therefore welcome on this occasion members of the Board of Trustees, faculty, and staff of the college. But most of all, we extend a special welcome to members of families and friends who are here tonight to help us honor the members of the graduating class.

I would like to recall just a few important data. The first graduating class from Wabash Valley College was 1963 with 18 students. Tonight, we graduate 404 students, for a total number of students who have received their degrees over the years, 4,134—for an average of 207 per year.

In announcing my retirement plans some 3 months ago, I had the best interests of Illinois Eastern and Wabash Valley in mind, as well as those of my family. And as a close observer of over 35 years of officials serving in public office, I have concluded that a change of administration within an institution is better made too soon than too late. The goals established 15 years ago when I became the Chancellor have been accomplished, through the cooperation of an outstanding Board of Trustees, competent administrative staff, faculty, and support staff. Therefore, this is an opportune time for new leadership to step in and to begin a new phase of planning for the future. With this in mind, it is appropriate, therefore, that I state at this time that this will not be a traditional commencement address. Very little of what I have to say will have to deal with the fact that the students here before us will charge out the doors of this building into a wonderful new opportunity in the world to work. Rather, I would like first to take the time to speak about the state of the college as I see it after 15 years, and second and perhaps equally important, the state of education and the state of the nation and the state that education finds itself in tonight in the nation. And if my comments are a little more lengthy than is traditionally expected, I hope that will be appreciated and tolerated. If not, I should only remind you that there is not a lot that can be done about it; because as we've already acknowledged, I have already resigned and therefore, the Board can't fire me.

But in regard to my second assignment, I would like to take this opportunity to discuss a major concern of our times and a major concern which the graduates here before us will address. And that is, that education leaders across the United States currently express grave concern over the decreasing financial investment in America in human resources, especially at all levels of education. The nation's dependency on a broadly educated citizenry seems to be all but forgotten. Many of our political leaders in national and state governments treat education more as an obligation than as an opportunity, and indeed the greatest investment in the future of our nation.

In regard to the state of the college, I wish to take a moment to discuss the assessment of where Wabash Valley College is and some of the priorities that I see for it is to realize its potential, as I am sure it will, in the days and years ahead.

In the area of human resources, it is essential that staff and faculty development must become and be maintained as a top priority for the administration of this college, and a strong core in the liberal arts and sciences be maintained at all costs.

In the areas of finance, I would observe as follows: With the cutback in state and federal financial support, the following avenues must be followed and must bear fruit. Number one, an increase in the local tax

rate. Our tax rate of 25 cents was established in 1967 when the District was created. It has not been increased since then. I know of no other item that you can buy in 1983 for the same price for which you could buy it in 1967. Ladies and gentlemen, I submit to you that tax conscious though we have all become, it would be in your best interest to vote to increase the local taxes for the colleges of Illinois Eastern. For example, let me cite the following: Wabash Valley College, since its inception, has received taxes from Wabash County totaling $2,722,750. During that same period of time, the expenditures at Wabash Valley College have totaled $30,973,639—a ratio of 11 to 1. District-wide during the same period of time, the tax bills of our District have supported our four colleges to the tune of $23,800,000 when our expenditures have totaled $90,000,000—a ratio of 4 to 1. To explain it in different terms: the taxes which are paid to support Wabash Valley and the other three colleges of our District comprise seven percent of your total tax bill. If your tax bill is average, and county officials in our counties tell us the average is $500 a year, that means that taxes you pay annually to support our colleges total $35 or nine cents a day. If you double that average tax bill, and assume that your taxes are $1,000 a year, then your taxes in support of our colleges are $70 a year or 18 cents a day, just about the price of a cup of coffee depending on where you purchase it. And yet I am told by many that an attempt to increase taxes for the support of our colleges would not receive a favorable vote. If this be true, I think it is indeed regrettable and I would ask each of us seriously to reflect upon what I have just said.

A second avenue that the college must consider in addition to increased taxes is an increase in student tuition. Illinois Eastern was tuition-free for 14 years, the only tuition-free college in Illinois. For the first seven years, fees and textbooks cost each student $90 a year. That figure was gradually increased to $180 a year in 1981-82, the year the sophomores here tonight started. This past year, the year that has just ended, we initiated for the first time a $288 or $6.00 per quarter hour tuition. In addition, for the first time, we requested that students buy texbooks. Monday night of this week, our Board of Trustees voted to increase tuition for next year to $384 or $8.00 per credit hour. Ladies and gentlemen, this represents an increase of 326 percent in student tuition, plus the cost of textbooks, during the past 15 years with no increase in taxes. Now there may be those who say that this is appropriate and that such increases should continue in the years ahead. I say they should not, for the simple reason that if this trend continues, colleges, even Wabash Valley, will soon become accessible only to the affluent and the well-to-do. Should this be allowed to happen, it will benefit no one.

A third source to which the college must look in the future for additional funding is private giving. This effort must succeed, and it will, but to do so it will require, Mr. Benedict, a more comprehensive college development program than is currently in place. Through the college Foundation and other private funds which result from successful development programs, the college must acquire in the near future from the Foundation physical facilities, money for scholarships which are based on academic merit, money to endow chairs in the basic disciplines in addition to those in music and the performing arts which have already been established, and I would cite, as a minimum, chairs of science, political science and history, mathematics, and English. These are minimum baseline accomplishments which the Wabash Valley College Foundation should soon establish as its role for the future of Wabash Valley College.

With regard to physical facilities, the administration and student personnel services functions need, as soon as possible, to be moved out of the Main Hall into a building or buildings yet to be constructed. The faculty and staff offices and the Study Skills Center need to be moved from the Library to the Main Hall. The Library needs to be enlarged to include space utilized by the Study Skills Center, the hallway and faculty and staff offices. The Study Skills Center needs to be centrally located in the Main Hall in space adequate to function properly. A new building is needed for Telecommunications. Upgrading is needed for Food Services in the Student Center and a student lounge and restroom area in the Applied Arts Building need to be provided. And finally, and perhaps most important of all, state-of-the-art equipment for all of our technical programs needs to be provided.

Moving to the area of educational programs, to accommodate more adults and part-time students a wider variety of evening division course offerings should be considered. And evening division and Saturday courses should be offered to include more college transfer and technical education courses. Second, to address the problem of remedial education, as indicated earlier, more space for the Study Skills Center needs to be provided and in addition, additional staffing is required.

In the area of technical education, course content and equipment must prepare students for employment. Technical programs must be on the cutting edge of industrial development. Closer ties with local businesses and industry need to be developed to assist Mt. Carmel in the area in economic development through job training and retraining and to enable the college to assist the Chamber of Commerce and local businesses in attracting new industries to the city. Programs in Electronics, Data Processing, and Word Processing are three programs, appropriately developed, which would lead to significant new enrollment and meet emerging community needs.

In the area of the liberal arts and sciences, more and better academic advisement on the part of transfer faculty is required. Every student must be totally informed as to what is transferable to what institution and in what curriculum, in order that he or she may transfer without losing one single hour of credit. A commitment to the importance of liberal arts and sciences is an absolute must. And might I say, that, at this juncture, in education we are confronted daily with two sides of the same coin. There are two fundamental aspects of education. First, although not necessarily most important, is learning to make a living. This is where technical programs in community colleges and professional programs in universities come into play. These programs must be ever-changing if they are to succeed. The second aspect is learning to live a life. This is where the liberal arts come into play and to be successful, these programs must remain always the same. As long as there exists truth, goodness, and beauty, three ideas, or three abstractions, by which we are all judged; and as long as there exists three ideas or abstractions such as liberty, equality, and justice, three ideas upon which each of us acts out our lives[1]—the liberal arts will always remain the core of a college education and their mastery the only true criteria of an educated person. In short, the liberal arts and sciences are to higher education what reading, writing, and arithmetic are to the public schools. Public schools are being subjected to a plethora of national criticism, far too much of it for some of it not to be justified. The challenge to the college transfer faculty of Wabash Valley College is to see that the criticism of the public schools of today is not visited on Wabash Valley College tomorrow. Finally, there needs to be an unremitting monitoring of grades to make certain that Wabash Valley College is not guilty of grade inflation as are most colleges and universities in America today.

In the area of support services, student personnel and library a greater emphasis must be placed on appropriate testing for initial placement of all incoming students in the college level courses. Second, Wabash Valley College must assume responsibility for job placement for each individual student enrolled in each of its technical programs. Student financial aid must be more aggressively sought as student tuitions increase and duties assigned to students in work study programs must make certain that they contribute to the student's ability to stay in college, but in addition, that they make a substantial financial contribution to the college.

Student recruitment and retention is an institution-wide problem involving every college employee, but responsibility for leadership for that effort must rest with the Dean of Student Services, and one full-time recruitment counselor would be a wise investment of college funds.

Finally, concerning the library as noted earlier, more space is required for the library in order for it to meet the needs of students, faculty, and members of the community who wish to avail themselves of it. So much for my comments on the state of the college.

And now, with regard to the state of education in general. A major concern for all of us must be the future of education in this nation. For the people in our nation to prosper, for the security of our nation about which we hear so much, for the preservation of freedom as a nation, as a state, and as a community, we must invest adequately in human resources development, primarily in the education of our citizens. For my part, in my retirement I will continue to help build the kind of society for the people of southeastern Illinois in which I so fervently believe—one that is humane, caring, and provident in developing the talents of all people regardless of their station in life. A strong Wabash Valley College will provide this kind of society.

A few weeks ago, the President's Commission on Excellence in Education produced its report entitled, "Our Nation is at Risk." One quote from that report is as follows, "If an unfriendly foreign power had attempted to impose on America the mediocre educational performance that exists today, we might well have viewed it as an act of war. As it stands, we have allowed this to happen to ourselves. We have even squandered the dreams of student achievement we made in the Wake of the Sputnik Challenge."

Now, I do not purport to know all of the reasons for this condition, but this one thing I do know: There can be no economic

[1] Mortimor Adler, *Six Great Ideas.*

development in this nation without human development. Increased investment in education for the poor, as well as for the more affluent, is not only a matter of social justice, but a matter of political and economic survival. Thomas Jefferson stated it best when he said, "If the nation expects to be free and ignorant in the state of civilization; it expects what never was and never will be." Failure to appreciate this fundamental truth, failure to appreciate this fundamental truth, is more dangerous to this nation's future than any missile gap or any shortcoming in armaments which might exist. In this connection two ironies are noteworthy: First, I will speak to three contrasting responses from three Republican presidents. First, Abraham Lincoln: With the nation suffering from the wounds of the most devastating war the country has ever known and with its resources depleted, his response was the Morrill Act of 1862 which created the land grant colleges and universities of our Nation, one of which is the University of Illinois, and vocational education throughout our Nation primarily in agriculture and the mechanic arts. The result of Abraham Lincoln's effort was that he moved America from an agrarian economy to the forefront of an industrial age which we maintained from his day until the industrial age was replaced by the post industrial age. In this new emerging age we are no longer the world leader. Second, Dwight Eisenhower: In 1957 after Sputnik, what was his response? The National Defense Education Act. The result, he moved America into space age preeminence, a spot which we have not yet and are not likely to relinquish. Third, Ronald Reagan: His appropriate response should have been the High Technology Morrill Act of 1983. His actual response was: "Federal funding for education is a part of the problem, money is not a part of the solution, the Federal Government is not responsible, and the Tuition Tax Credit Act of 1983." The Tuition Tax Credit Bill will have two unquestioned consequences. It will destroy the public school system as we know it today. The only children attending public schools will be children of white people too poor to send their kids to private or parochial schools, minorities, or students with mental or physical handicaps. The second result that his Tuition Tax Credit Bill, when fully implemented, would add at least one billion annually to our national debt. And this cost estimate is from his office.

A second contrasting response is that at a time when the United States appears to be turning its back on public education, all the way from kindergarten to the graduate school, turning its back on the greatest system of public education the world has ever known—Japan, West Germany, and Saudi Arabia among others, are copying our system of higher education and spending whatever it takes to fund it. For example, only last month Japan spent two weeks at the University of Illinois in Champaign-Urbana to produce a one-hour production on all aspects of the University of Illinois. It will soon be shown over Japanese national television and viewed by almost every person in Japan. Must we not seriously ask ourselves why the people of Japan will soon know more about the University of Illinois than the residents of the State of Illinois who pay for it? Now, it is quite true that we cannot solve the problems of education or anything else merely by throwing money at it. We've all heard that so often. But I suggest to you that when the problems of tenure, teacher unions, seniority, and merit pay and all of the other things about which we talk so much have been resolved, it will be equally true that while throwing money at a problem will not solve it, the problems faced by public education in America will not be resolved without a significant infusion of additional money from local, State, and the Federal levels.

Unquestionably we as educators are at a crossroads. We, as educators, and America, as a nation, face a challenge. But such challenges have been faced before and the facing of them has made our nation great. Certainly as educators, we must place our house in order. Much of the responsibility and the blame we have brought on ourselves. We must establish priorities with the mastery of the basics at the top of our list and we must insist, most importantly, on doing no more than we have the time and the resources to do. But unlike law and medicine, as educators we are in the public sector and as such, we have responded to political pressure to be all things to all people. Is it any wonder that we have become purveyors of mediocrity? We, therefore, must find ways effectively, as educators, to insist upon our rights as professionals, to limit the scope of our responsibility to the resources available to us and to establish appropriate priorities. And when we do this, the public through their elected representatives at the local, state, and national levels will, I am sure, allocate the necessary resources to enable the schools and colleges to produce the graduates which will enable America, once again, to regain the competitive edge that it has now lost to other countries in selected areas of emerging technology.

In the meantime, many small colleges will not survive the next twenty years. In Illinois alone, from 12-15 small colleges will close in the next 17 years. Wabash Valley College will not be among them. The value of the college and its past, present, and future contributions are far too great for anyone to contemplate any other fate. In addition, its leadership, stable for the first time in 20 years—Jim Benedict, Bonnie Burns, Jerry Bayne—will effectively concentrate their efforts to communicating to you, the public, the value of this college, so that increased financial support from both public and private sources will be forthcoming.

My challenge to you tonight, graduates of 1983, is to urge you to maintain your strong support for Wabash Valley College.

Let me say that is has been my privilege to serve as Chancellor of this District for the past 15 years, which has and has had, and retains an educational mission and purpose of incalculable value to Mt. Carmel, to Wabash Valley, and to all of southeastern Illinois. Graduates, I wish you every success as you pursue your goals in life and I challenge you to join other graduates of the past 21 years in your support of education generally and your support of Wabash Valley College specifically.

Thank you very much.●

WILLIAM WILBERFORCE

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. MARTIN of North Carolina. Mr. Speaker, I rise to commemorate the life and work of William Wilberforce, who died 150 years ago today.

Wilberforce and Abraham Lincoln are the great emancipators of history. For almost half a century, Wilberforce led the fight in the House of Commons to abolish slavery in the British Empire. Taking up the cause in 1787, when he was 28 years old, this great man devoted his life to the freedom of enslaved black people, whose conditions of oppression and misery he could understand only by the application of his moral imagination, never having visited the new world himself.

In 1789, Wilberforce first moved the abolition of British participation in the Atlantic slave trade. Powerful interests were ranged against him, and persuasive arguments had to be overcome. These obstacles always stand in the way of progress and reform. The march of truth and justice is inexorable, but usually very slow indeed. Modest regulation of the slave trade was enacted by Parliament in the 1790's, and finally, in 1807, 18 years after he first proposed the legislation, Parliament approved the abolition of British participation in the Atlantic slave trade.

The debate on this legislation was marked by one of the greatest feats of oratory in history, Sir Samuel Romilly's famous comparison between Wilberforce and Napoleon. Sir Samuel said:

When I look to the man at the head of the French Monarchy, surrounded as he is with all the pomp of power, and all the pride of victory, distributing Kingdoms to his family, and principalities to his followers, seeming, when he sits upon his throne to have reached the summit of human ambition, and the pinnacle of earthly happiness, and when I follow that man into his closet or to his bed, and consider the pangs with his solitude must be tortured, and his repose banished, by the recollection of the blood he has spilt, and the oppressions he has committed; and when I compare with these pangs of remorse, the feelings which must accompany my honorable friend from this house to his home, after the vote of this night should have confirmed the object of his humane and unceasing labors; when he should retire into the bosom of his happy and delighted family, when he should lay himself down on his bed, reflecting on the innumerable voices that will be raised in every quarter of the world to bless him; how much more pure and perfect felicity must he enjoy in the consciousness of having preserved so many millions of his fellow-creatures, than the man with whom I have compared him, on the throne to which he has waded through slaughter and oppression.

The ban was difficult to enforce, despite the creation of a special squadron of the Royal Navy to patrol the West African Coast. Under the most difficult conditions, the heroic seamen of this squadron saved countless human beings from the horror of enslavement. Britain also paid bribes to other countries, including Spain and

Portugal, to encourage them to give up their participation in the trade.

After the slave trade came the ultimate step, abolition of slavery itself. Wilberforce continued his leadership role into old age. Through the 1820's, the policy of amelioration of the conditions of the slaves increasingly gave way to the principle of their emancipation.

Finally, on July 26, 1833, the House of Commons passed the emancipation legislation in its second reading, a key step before final enactment later that year. Upon hearing the news, Wilberforce said, "Thank God that I should have lived to witness a day in which England is willing to give twenty million sterling (the sum with which the West Indies planters were to be compensated) for the Abolition of Slavery." Three days later he died.

Wilberforce's death was marked by memorial services by free blacks in New York and elsewhere in our country.

In noting this day, we also remember the equally great contribution to the cause of Thomas Clarkson, and of great contempories of Wilberforce, including Charles Fox, William Pitt, Edmund Burke, James Stephen and Granville Sharp.

Wilberforce was laid to rest amongst his honored countrymen in Westminster Abbey. About a year later, a statue of him was erected nearby in the Abbey, with an epitaph attributed to Thomas Macaulay. I include it for the RECORD.

TO THE MEMORY OF WILLIAM WILBERFORCE

(Born in Hull August 24th 1759 Died in London July 29th 1833)

For nearly half a century a Member of the House of Commons, and, for six Parliaments during that period, one of the two Representatives for Yorkshire.

In an age and country fertile in great and good men, he was among the foremost of those who fixed the character of their times because to high and various talents to warm benevolence, and to universal candour, he added the abiding eloquence of a Christian life.

Eminent as he was in every department of public labour, and a leader in every work of charity, whether to relieve the temporal or the spiritual wants of his fellow men his name will ever be specially identified with those exertions which, by the blessing of God, removed from England the guilt of the African slave trade, and prepared the way for the abolition of slavery in every colony of the empire: In the prosecution of these objects, he relied, not in vain, on God; but in the progress, he was called to endure great obloquy and great opposition: he outlived, however, all enmity: and, in the evening of his days, withdrew from public life and public observation to the bosom of his family.

Yet he died not unnoticed or forgotten by his country: the peers and commons of England, with the Lord Chancellor, and the Speaker, at their head, carried him to his fitting place among the mighty dead around, here to repose: till, through the merits of Jesus Christ, his only Redeemer and Saviour, (whom, in his life and in his writings he had desired to glorify,) he shall rise in the resurrection of the just.●

THE MEDICARE CRISIS

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. SMITH of Florida. Mr. Speaker, the elderly residents of my district write to me with the same question: What is Congress going to do about medicare and when?

My constituents have enclosed copies of their hospital bills and have said that they are not surprised there is a crisis when the hospital charges them four or five times more for a pill they can buy at their local pharmacy for less. They depend upon medicare for assistance when they are ill, yet they are disgusted that that same system permits abuse and does not reimburse many of their health care costs.

The cost of medicare, which provides hospital and other medical insurance to almost 30 million elderly and disabled people, has been growing at an annual rate of almost 18 percent since 1970. In about 5 years its trust fund, financed by payroll taxes, will be bankrupt. The elderly already spend 20 percent of their incomes on out-of-pocket health care costs. As costs continue to escalate, medicare will be needed by an increasing elderly population. However, as out-of-pocket costs escalate, more and more elderly will be unable to afford needed health care services.

Solving medicare's problems requires deciding how much the Nation wants to spend on medical care and how it wants to pay for it. Americans want to be free to choose their own doctors and places of treatment. The Federal Government as a major purchaser of health care services, has a responsibility to abate explosive inflation in the health sector. Experience, however, has demonstrated that medicare's approach to hospital cost containment leads to cost shifting to private patients and other third-party payers and thus, no reduction in overall hospital costs.

Medicare beneficiaries must not be severely burdened with increases in out-of-pocket costs for health care, in spite of what the administration proposes. Moreover, any changes made in these programs should contribute to the larger goal of achieving health care cost restraint. We must concentrate on efficiency and fairness in the delivery of health care.

The extent of the medicare problem means that few solutions are available. The changes required to solve the medicare problem are more expensive than the changes required by social security. One report estimates that keeping medicare solvent through the next decade would require either a 70-percent hike in revenues or a 40-percent cut in benefits—both drastic and unacceptable solutions.

Medicare is too valuable a program for Congress to let collapse. Our Nation has a large elderly population which is graying even further. Those who are already elderly want an answer so that they do not have to fear becoming ill and penniless. Those who have not reached age 65 need an answer so that they may better plan their retirement. Each and every citizen realizes a quick answer will not be a complete solution. However, Congress must begin the difficult and long search for a fair and equitable solution to medicare's problems.●

JOINT STATEMENT: FRIENDS OF IRELAND AND THE IRISH-UNITED STATES PARLIAMENTARY GROUP

HON. JAMES M. SHANNON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. SHANNON. Mr. Speaker, this past week was a historic one in the relations between the United States and Ireland. The Friends of Ireland were host to the Irish-United States Parliamentary Group, formed earlier this year as a counterpart group to the Friends of Ireland in the Dail, the Parliament of Ireland. The delegation came at the invitation of Speaker O'NEILL, and was led by the Ceann Comhairle (Speaker) of the Dail, Mr. Tom Fitzpatrick. The delegation included Sean Barrett, Minister of State and chief whip for the Fine Gael Party; Brian Lenihan, formerly Minister of Foreign Affairs and currently deputy leader of the Fianna Fail Party; Bertie Aherne, whip for the Fianna Fail Party; Senators Sean O'Leary and Brendan Howlin, and members of the Dail, Bernard Allen and Denis Lyons.

Many Members of the U.S. Congress met with the delegation informally at a reception on Tuesday evening. Many others were able to exchange views with them in the course of their presentations to the Senate Foreign Relations Committee, the House Foreign Affairs Committee, and in private meetings with leading members of the Friends of Ireland, including the Speaker, Senator KENNEDY, Congressman FOLEY, and Senator MOYNIHAN.

It was my great pleasure and honor to chair the first formal meeting between these two bodies, the Friends of Ireland and the Irish-United States Parliamentary Group, on July 27, 1983. Our discussion focused on the problems in Northern Ireland. The

Irish-United States Parliamentary Group welcomed the strong stand of the Friends of Ireland against violence and support for it, and encouraged its continued support for the New Ireland Forum. The Forum was established in March 1983 by the three major political parties in the Republic of Ireland and the Social Democratic and Labor Party in Northern Ireland. It is intended to explore means of achieving peace and stability in a new Ireland through the democratic process.

The central issue at the meeting was the problem of Northern Ireland. That situation is of continuing concern to the Friends of Ireland and to the many millions of Americans who share an Irish heritage. The Irish visitors briefed their American hosts on recent developments of importance in Ireland and in Anglo-Irish relations. They particularly emphasized the initiative by the leaders of their three political parties and by the Social Democratic and Labor Party of Northern Ireland to establish a new Ireland forum. The forum, it was explained, is intended to explore means of achieving peace and stability in a new Ireland through the democratic process. The Friends of Ireland, who were represented at the inaugural session of the forum, reaffirmed their support for this important initiative which they hope will make a substantial contribution to the cause of reconciliation between the two great Irish political traditions.

The Friends of Ireland recalled their strong desire to help bring peace to Northern Ireland and to assist a lasting political settlement. This had been a major motivation in their formation 3 years ago. Along with the great majority of the Irish in Ireland and of those of Irish heritage in the United States, they have supported and would continue to support the goal of Irish unity. They also recognized, as successive Irish governments have done, that unity requires the consent of all the parties concerned, and that violence has served only to inhibit the free political dialog essential to reconciliation in Ireland. They have, therefore, frequently joined with Irish political leaders in condemning violence and injustice in Northern Ireland and in appealing to Americans not to support or assist the advocates of violence in Northern Ireland. They renewed that urgent appeal on the occasion of this important visit.

A parallel concern was the absence of political progress in Northern Ireland where the problem has continued at a serious level for over 14 years. There has been constant and tragic loss of life, erosion of the social and economic fabric of the society, and a growing alienation of a section of the population in Northern Ireland from the constitutional process. The Friends of Ireland, therefore, called on the newly elected British Government to use this opportunity to fulfill its obligation to Northern Ireland with a comprehensive review of its policies directed at correcting the situation and assisting reconciliation throughout Ireland as a whole.

The Friends of Ireland welcomed the resumption of the Anglo-Irish talks, and encourged an open attitude towards the work and conclusions of the new Ireland forum.

The Irish delegation expressed its appreciation and the appreciation of the political parties in the Irish Parliament for the constructive interest which the Friends of Ireland have taken in Irish affairs over the years, and for the good will that so many Americans have demonstrated toward Ireland. It is evident that there is a positive role which Americans can play in assisting progress toward reconciliation and unity in Ireland, in contributing to the economic development of Ireland, and in identifying with the cultural achievements of the Irish people. They wished to make it clear, however, that those who advocate violence in Northern Ireland were in no way serving the interests of the Irish people or of Irish unity. They called on Americans of Irish heritage to reject violence and to be strong in support of peaceful political change. In this connection, the delegation welcomed the resolution introduced in the House and Senate by the Friends of Ireland on March 17, 1983, as a clear and helpful statement of the political principles underlying an informed American role and hoped that this resolution would command even wider support.●

FREEDOM FOR THE BALKAN NATIONS

HON. FLOYD SPENCE

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. SPENCE. Mr. Speaker, on June 7, 1983, our distinguished colleague in the Senate, Senator JESSE HELMS, made a major policy statement on the strategically important Balkan region, The Balkans Today: Yugoslavia and the Prospects for Freeing the Albanian Nation (June 7, 1983, CONGRESSIONAL RECORD—Senate, 14756-14771 The senior Senator from North Carolina expressed his deep concern "about the deteriorating situation in the Balkan region and particularly the threat that the Soviet Union poses for the area." I concur with Senator HELMS' concern for the nations of the Balkan region, and I am pleased to recommend to my colleagues in the House that they examine his thoughtful, detailed analysis of that region.

In the 1860's many of the leaders of the nations of the Balkan region, Albania, Bulgaria, Croatia, Greece, Macedonia, Montenegro, Rumania, and Serbia, joined together to coordinate their activities to free the territories of their nations from centuries-old Turkish occupation. They sought a new era for a Balkan region of free and independent sovereign nations, voluntarily joined together as equals in unity in diversity. Unfortunately, their efforts did not succeed and, in the eyes of many, subsequent events growing out of this unsettled situation played a significant role in bringing on World War I.

In the course of that effort of the 1860's, the great Albanian leader of the time, Xhemal Pasha of Mati, ancestor of H. M. King Leka I of the Albanians, traveled to Russia to seek the aid of the Tsar for the Balkan nations' combined liberation struggle against Turkish oppression. After 6 months in St. Petersburg, the then capital of Russia, as he was returning home to ethnic Albania he observed that he feared that the Russians would become the new Turks in the Balkans. His foresight has been proved correct in our century, with the Communist regimes being more oppressive than the Ottoman Empire had ever been.

We Americans, believing in the right of self-determination of nations, must consistently affirm our belief in that principle and provide our moral support to those who refuse to bow their heads to Communist tyranny. Eight years ago I brought to the attention of my colleagues in the House of Representatives a courageous and deeply moving sermon by Archbishop, now Cardinal, Franjo Kuharic, Roman Catholic Primate of Croatia. Today the spirit of resistance in all Balkan nations remains undiminished, and their proud tradition of fighting for the freedom and independence of their nations within their natural ethnic territories remains the underlying reality in the region.

Among other methods, the Communist regimes try to control this underlying reality by falsifying the history of nations through the use of lies, distortion, and deceit. In the words of a prominent Croatian historian, Gen. Franjo Tudjman:

> In the course of history it has long been known that these methods make it fairly easy to indict the crucified Christ as the Anti-Christ, or alternatively, to prove that Satan's torments are in fact—the Kingdom of Heaven.

General Tudjman was a partisan during World War II, fighting against the Axis occupation forces in Croatia. As with many of his generation in Europe, his opposition to fascist socialism unfortunately led him to the international socialism of communism. But with the by now self-evident fail-

ure of any ideology based on spiritually wrong and scientifically false premises, General Tudjman and many of his former partisan coleagues, and their children, have returned to the deep national patriotism and spiritual values of their Croatian national heritage. On the strategically vital Adriatic coastline, for example, many Croatians, Montenegrins, and Alabanians seek a new, non-Marxist era for their nations, to be achieved without bloodshed, if not without sacrifice. General Tudjman, despite his great prestige as a war hero, has suffered greatly through being incarcerated for his commitment to truth, and we should be pleased to note his release at last from Yugoslavia's Lepoglava prison.

During World War II the late King Zog I of the Albanians recommended to a representative of the British Government, now a distinguished Member of Parliament, the Rt. Hon. Julian Amery, that the Allies should support a Balkan Union of free and equal nations. The Allies did not follow this sage advice, but as a result of the serious interest in the Balkan region evoked by Senator HELMS' speech of June 7, that concept should be included in the formulation of consistent, fundamental policies directed toward the attainment, through peaceful evolution, of the freedom and independence of the Balkan nations.

In closing, Mr. Speaker, it should be remarked that the United States, in keeping with long-established policy, seeks no territorial gain but only to encourage and promote the development of free and independent government. America's interest in the Balkan nations reflects solely the deeply rooted commitment of the American people to the principles which have made the United States a beacon of freedom for all nations.●

PUBLICATION ENTITLED "UNCENSORED DRAFT"

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. GREEN. Mr. Speaker, I would like to bring the attention of my colleagues to a publication which many of us recently received from the American-Arab Anti-Discrimination Committee. The publication, entitled the "Uncensored Draft" of a GAO report on U.S. assistance to the state of Israel, apparently was designed to resemble the official GAO document which was sent to our offices previously.

The ADC openly admits that its publication contains classified information that was deleted from the GAO document and subsequently leaked in outright violation of the espionage statutes or executive order. Furthermore, in its cover letter to Congressmen the ADC states, "It is a subterfuge of the highest order to say that the report should be classified." I do not believe that it is in the jurisdiction of this group to decide what should and should not be considered classified by the U.S. Government.

In addition to the inclusion of GAO deletions, there are several fraudulent distortions in the doctored document. Some sections of the ADC document contain information marked as if they had been censored by the GAO, although the corresponding sections of the original document indicate no deletions. ADC additions of this kind include:

Israeli officials maintain that the Lebanon campaign will not result in any increase in requests for U.S. assistance but U.S. reports speculate otherwise. (p. 25)

Reagan's September, 1982 Middle East initiative "included concerns for certain Israel actions." (p. 8)

In other sections of the ADC document the original text is simply replaced with material that attempts to downgrade Israel's credibility. For example:

Where the GAO states that "the U.S. had succeeded in obtaining a negotiated withdrawal of Israeli and PLO forces from Beirut, Lebanon," the ADC instead prints that "it was the U.S. belief that Israel had broken its assurances to the United States that it would not invade Beirut, Lebanon." (p. 3, 8)

While the GAO notes Israel's $722 million payment to the U.S. for defense loans in FY 1982, ADC cites an $810 million debt for defense loans. (p. 37, 32) With regard to these figures, the ADC also adds that "the impact of a large and unrealistic FMS loan program must be faced." (p. 32)

While the GAO publication states that "many" of the nations other than Israel that receive aid through the U.S. Economic Support Fund have some development projects tied to assistance, the ADC writes that "almost all" recipients do. (p. 31, 26) The GAO continues, "This is changing, as the amounts of cash transfers is being increased." The ADC report, instead, continues, "This is changing, and the degree of cash transfers is increasing but Israel was the first to receive a full cash transfer. Thus the Israeli program set a precedent to move this type of assistance further away from economic development programs."

The ADC version also omits certain GAO information that shows United States-Israel relations in a favorable light. For example, the ADC version of the document omits the information that the foreign military sales program was intended for purchase of goods and services in the United States to support U.S. firms, and that Israel has agreed to use U.S. ships to transport 50 percent of Israeli grain purchases from the United States. (p. 42, 1)

Furthermore, the GAO report states that beginning in fiscal year 1979, the requirement that Israel provide specific evidence of each nonmilitary purchase was dropped. A footnote to this information explains that the GAO recommended suspension of the requirements for Israel in August, 1978, "in consideration of the fact that Israel and the United States were only being burdened with cumbersome procedural requirements that did not add any control over the method with which this program had been implemented." (p. 31) the ADC report filed to print this footnote.

The ADC report also omits pertinent information concerning Israel's economy and U.S. assistance. For example, while Israel has suffered substantial tourism losses, the GAO notes that "these losses began prior to the Lebanon campaign and for the most part can be attributable to the international economic situation." (p. 41) Through its omission of this explanation, the ADC version of the GAO report implies that the Lebanon campaign was the cause of Israeli tourism losses.

ADC also fails to report that "the State Department commented that they do not foresee the development of a severe debt situation." (p. 40) The ADC also deletes the GAO report that the Agency for International Development "noted that there is cause for optimism about Israel's balance of payment prospects." (p. 40)

Most blatant, however, is ADC's deletion of the statement in the GAO report, "it is clear that the ultimate solution to Israel's security depends upon a negotiated settlement with its Arab neighbors." (p. v, 78)

Contrary to the implications of the ADC report and the Evans and Novak column of July 8, the GAO report does not conclude that aid to Israel is, or is about to become a burden to the United States. Rather, the GAO report affirms the strong U.S. commitment to Israel: The report declares that U.S. assistance for Israel's defense is founded on a "staunch friendship and on (Israel's) position as a democratic form of government in the Middle East region." (p. 76) The report goes on to note the support that this relationship has received from American Presidents, Congress, and public, and it explains that the relationship is "predicated upon shared cultural, religious, moral, and political values." (p. 76,i)

The GAO report confirms that U.S. aid benefits this country in myriad ways. The report states that "Israel as a stable democracy and the region's strongest military power, is considered by the United States to be a strategic asset in the Eastern Mediterranean against a Soviet threat." (p. 1)

Assistance to Israel is not only beneficial to the United States from a political and military standpoint, however; the program is a highly cost-effective expenditure as well. Since 1974

more than half of Israel's military assistance from the United States has been in the form of loans which are repaid with interest at a rate equal to the cost of the money to the U.S. Treasury. Furthermore, Israel has never defaulted on its debt servicing obligations for U.S. loans. (p. 27) In fiscal year 1983, Israel will repay the United State about $887 million for interest and principal on outstanding FMS loans. (p. iv) It is also important to realize that all of the U.S. aid to Israel is spent in the United States, thus promoting American industry and its economy.

Finally, the GAO report also confirms that U.S. aid is necessary for Israel to maintain stability in the face of unrelenting Arab hostility and the continual flow of Soviet and American weaponry into Arab arsenals. The GAO notes that "Israel has been virtually operating in a wartime economy since its establishment as a state in 1948." (p. 35) The report recognizes that the need to indicate political support and to insure Israel's security are the two major purposes of foreign military sales to Israel. (p. 6)

The ADC version of the GAO report has tried to cloud these facts. it has already caused irreparable harm by spreading misinformation through the press and among Members of Congress. I believe that ADC's blatant violation of classified material and meddling in official Government reports cannot be ignored, and I have asked the Justice Department to investigate the publication. Thank you, Mr. Speaker, for allowing me to bring this important matter to the attention of the House.●

THE SENIOR CITIZENS INDEPENDENT COMMUNITY CARE ACT

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. HARKIN. Mr. Speaker, today I am pleased to rise to introduce the Senior Citizens Independent Community Care Act. This important piece of legislation is designed to enable our Nation's senior citizens to remain in their homes as long as possible, rather than leaving to turn to hospitals and nursing homes for the care they need—care that they could potentially receive in their own homes. The purpose of this bill, then, is to improve the quality of life for our Nations elderly by providing more inhome health-care services under medicare for those individuals 65 and over.

The rapid growth of the elderly population, combined with the rising cost for long-term health-care services, has stirred interest in developing community-based alternatives for the elderly. Studies have shown that community-based health and social services can be effective in reducing institutionalization and improving longevity and patient satisfaction.

Currently, medicare policy focuses almost exclusively on acute short-term care. The inhome health-care benefits provided for under medicare includes skilled services, at the exclusion of many health-related social support services which would help individuals in their daily lives. Because of the lack of needed services many elderly individuals face institutionalization.

Also, current medicare policy requires individuals receiving home health-aid services to need the services of a skilled nurse, or a physical speech or occupation therapist. This requirement may actually encourage senior citizens to receive services they do not need, in order to receive services they do need.

This is only one example of the problems with the current medicare policy in the area of inhome health services. Clearly, the problem of providing adequate long-term care for our Nation's elderly is complex, and involves a wide array of health, social, and personal care services ranging across many professional disciplines. Our task is to develop an effective strategy for dealing with the rapidly increasing demand for these services, and to make that strategy responsive to varying needs.

Now, one out of every nine persons is over the age of 65, and within 50 years one in every six persons will be in that category. In the next 50 years the aging population will grow from 23 million to 55 million. In the State of Iowa alone, the number of elderly persons is nearly 400,000.

Furthermore, increased life expectancies will make the so-called frail elderly, those 75 and older, the fastest growing segment of the elderly population over the next half century. By the year 2050 it is estimated that 12 percent of the population will be 75 and older, and more than 5 percent of the population will be over age 85. Finally, while individuals 65 and over now represent more than 11 percent of the population, by the year 2025 this age group will comprise 19 percent of the total population.

The problem of accommodation is real. Unless Congress acts promptly to assess and implement programs to expand inhome health care services, many elderly individuals face the prospect of being placed in nursing homes or other institutions. This legislation is one effort to begin to deal with this real and growing problem.

Before introducing this bill, I sought out the advice of senior advocates in Iowa. It is they who encouraged me to introduce this bill on behalf of all of our Nation's elderly.

Mr. Speaker, I ask unanimous consent that a copy of this bill and a summary of the bill be added at the end of my statement.●

PLAIN TALK FROM THE PLAIN DEALER

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. FEIGHAN. Mr. Speaker, the debate on how to best serve our national interest in Central America is by no means over. It will, I suspect, intensify. That is why I urge my colleagues to take a few moments to consider the Plain Dealer's editorial of July 28: "Time To Stop the Shame." It reflects a clear understanding of our national interest—and our national ideals.

TIME TO STOP THE SHAME

Remember, a few months back, when all the publicity first emerged about CIA training, funding and support of counter-revolutionary forces opposed to the Sandinista regime in Nicaragua? The administration eventually justified such covert activity, arguing that the purpose was merely to interdict the supply of arms from Nicaragua to rebels fighting in El Salvador. Congressional critics were appalled, snorting and condemning the activities as a violation of a 1982 law barring the CIA from supporting efforts aimed at the overthrow of the Sandinista government.

Today, the administration still argues that the purpose of the operation is to interdict the supply of arms. But the administration has expanded that theme. It now adds that these covert operations include pressuring the Sandinistas to the negotiating table and returning to the principles of the revolution, including elections.

In his news conference this week, President Reagan sidestepped questions about covert aid to the anti-Sandinista guerrillas, saying to discuss covert aid would no longer be covert. (Someone should have awakened him when such discussions came up in the past.) But he defended such action as "common sense."

"Common sense" to the president seems to mean that if the Nicaraguans are aiding an insurgency movement against the government of El Salvador, then the United States has the right to do likewise against the government of Nicaragua. At best, such an argument is sleazy. Does not the administration hold itself to slightly higher principles than the type of bullying gangster tactics it accuses the Sandinistas, Cubans and Soviets of employing? What about America's belief in the sovereignty of nations?

Of course, the justification is that such tactics are necessary in order to get the Sandinistas to see the error in their ways. When working with pigs, you have to wallow in the mud. And only last week, Managua, for the first time, expressed a willingness to negotiate regional problems, including support for subversive movements and the withdrawal of all foreign military advisers. While the administration may argue its forceful approach was successful in moving the Sandinistas toward the negotiating

table, a more convincing argument can be made that, even if true, the cost has been too great.

There are those who say, not unconvincingly, that the Sandinista government would have collapsed by now had it not been for the administration's covert activities. Such operations polarized the support for the Sandinistas, diverting Nicaraguans' attentions from the government's failures and broken promises, thus saving the regime from political demise.

Covert operations against the Sandinistas have also alarmed several of the democratic nations in the region, including members of the Contadora Group—Mexico, Colombia, Venezuela and Panama—which have been working since January for peaceful solutions to the region's conflicts. Such tactics bring to mind past instances of Yankee intervention in the region: Cuba, El Salvador, Guatemala, and Chile. Has the United States not learned from past mistakes in Central America and Vietnam?

Apparently not, particularly with a president who sees the continuation of covert operations against the Nicaraguans as "common sense."

Debate is currently underway in the House on a bill which would prohibit the CIA from further covert actions against the Nicaraguan government. Critics of the administration rightly argue that if the purpose of covert activity is to interdict arms, then it should be done openly, not by attempts at destabilizing the Sandinistas.

In addition to halting CIA covert activities, the bill would provide funds to Nicaragua's neighbors to strengthen the efforts of those governments in halting gun-running through their territories to Salvadoran guerrillas.

The bill is a far more sensible approach to the problem than the shameful bullying tactics employed by the administration. It also provides Congress with the rare opportunity to show it indeed has a backbone with which to resist the administration and stand responsibly on its own.

With alarm rising over the dangerous and confusing initiatives of the administration in Central America, someone must show a willingness to do so. Congress, in passing the bill, can move convincingly toward filling the void.●

NEED FOR EXCELLENCE IN EDUCATION

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. SKELTON. Mr. Speaker, I have recently spent a great deal of time reviewing the National Commission on Excellence in Education's report, "A Nation at Risk." I think the Commission should be praised for its ability to candidly point out the weaknesses of our school system while maintaining a positive perspective for the future. There are those who would have us believe that the American system of public education is a total failure. I do not agree with that sentiment. This report dispells the thought that our system of education is worthless. Admittedly, the superior American standards of education have taken a sharp decline. The National Commission gives examples, such as:

Nineteen international academic tests where American students were never first or second and, in comparison with other industrialized nations, were last seven times;

The 40-to-50 point drop in the math and verbal scores on the scholastic aptitude tests since 1963; and

The 72-percent increase in remedial mathematics courses taught in public colleges. This list of defiencies is just a part of the Commission's report.

The American public must be made aware of the National Commission's findings. The public should also be brought to realize the urgency of the situation and the fact that there is no easy short-cut to regain quality education. However discouraging these problems may be, they are not insurmountable if we act now.

The administration, however, wants us, in full awarness of the ramifications of "A Nation at Risk" to cut back on Federal funding for the education of American youth. Since the current administration has been in office, elementary and secondary school programs have been slashed from $7.4 billion to $6.6 billion. Vocational education programs were cut 15.9 percent between 1980 and 1982. School lunch programs were cut a whopping 35 percent between 1981 and 1982. And the administration wants to eliminate the Department of Education which has assured local school districts a voice in Washington.

If the administration is allowed to continue its course of financial cutbacks together with the elimination of the Department of Education, the future of the American education system will be in great jeopardy.

For the last 2 years Congress has been able to stop the administration from fully making its proposed cuts in the educational budget. But this is not sufficient. In order to cure the various problems listed by the National Commission's report we must maintain Federal funding for elementary and secondary schools and rededicate ourselves to quality education. A total commitment by this entire Nation is necessary to preserve the American educational system.

Even before the issuance of the Commission's report, I had begun looking at the problems in the American educational system. I initiated a Library of Congress study that looked into the supply and demand of scientists and engineers and the effects shortages in these areas will have on defense research and technology. This study, along with the National Commission's report "A Nation at Risk," has clearly defined the problems at hand. It is now time to take specific action.

I have already taken several strong steps in this direction.

First, I introduced legislation, H.R. 2620, aimed at helping to improve scientific, mathematic, and technical education in the schools.

Second, I had the chance to vote in favor of H.R. 1310, the Emergency Mathematics and Science Education and Jobs Act. This piece of legislation provides funds to increase the quality of instruction at the elementary and secondary levels in the fields of science and mathematics, increases the supply of math and science teachers, and insures an adequate number of skilled individuals to meet our national defense requirements.

Third, I had the opportunity to cosponsor H.R. 881 which authorizes a national program to improve the quality of instruction in the fields of mathematics, science, communication skills, foreign languages, technology, and guidance counseling. I feel all of these measures will help this Nation prepare for the new and exciting challenges of the 21st century.

It is important to note that, as significant as these three steps are, they are just the beginning of the process whereby we restore excellence to our Nation's schools.

There are several recommendations made by the education Commission which I urge the local school boards to follow. First, we must strengthen graduation requirements. This could be done by setting specific guidelines for English, math, and science courses.

Second, the Commission urges the schools, colleges, and universities try to adopt more rigorous and measurable standards for academic performance.

Third, this Nation should take every step necessary to make sure that outstanding people are not discouraged from becoming teachers.

If all of these steps are carried out, in conjunction with current legislation, we can once again feel confident in America's future.

Our world has demonstrated itself to be a place of neverending change and development. We can only hope to keep up with the rigors of progress by maintaining a strong educational system. The position this Nation now holds in the world community was not obtained easily. We owe future generations quality school systems that will enable them to secure our place as world leaders.●

DR. HOMER E. NEWELL, JR., ASSOCIATE ADMINISTRATOR OF NASA—1967-73

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. BOLAND. Mr. Speaker, on July 18 this country lost a pioneer in the

field of space science with the death of Dr. Homer E. Newell, Jr. Dr. Newell served as Associate Administrator of the National Aeronautics and Space Administration from 1967 until 1973 when he retired after 29 years of dedicated public service. During his tenure at NASA, he testified before the HUD-Independent Agencies Appropriations Subcommittee on numerous occasions between 1962 and 1969 concerning space science programs.

Throughout his public career Dr. Newell championed the view that scientific exploration of space should be under civilian rather than military auspices. He was also a staunch supporter of the free exchange between nations of data collected by rockets and satellites. This policy was at the heart of the International Geophysical Year of 1957-58.

At this time let me share with my colleagues a few of Dr. Newell's achievements and honors. Dr. Newell was born in Holyoke, Mass., He earned a bachelors and a masters degree from Harvard University and later received a Ph. D. in mathematics from the University of Wisconsin.

In 1940 he accepted a teaching position at the University of Maryland, which he left in 1944 to join the Civil Aeronautics Administration, one of the precursors of NASA.

Beginning in 1947 Dr. Newell was appointed science program coordinator for Project Vanguard, the Navy's plan to launch scientific satellites in the International Geophysical Year.

Dr. Newell left the Navy's program to join NASA in 1958, almost immediately after its formation. At NASA he was instrumental in designing the Nation's civilian space science program. In 1983 he was appointed Associate Administrator for Space Science and Applications. He left that post in 1967 to accept the No. 3 position at the Agency, from which he retired in 1973.

As an internationally known authority in the field of atmospheric and space sciences, Dr. Newell has authored numerous scientific articles and seven books. The topics of his writings range from highly technical works to popular treatments of rockets and space science in general.

His accomplishments have been many as evidenced by the long list of honors and awards he has received. This list includes the American Institute of Aeronautics and Astronautics' prestigious Pendray Award and the President's Award for Distinguished Federal Civilian Service.

Dr. Newell's contribution to the establishment of this country's space science program will be long remembered.●

WAR IN THE AMERICAS—A SPECIAL REPORT

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. PURSELL. Mr. Speaker, beginning on Sunday, June 26, 1983, the Detroit News ran an eight-part series on conditions in Central America. The series was authored by John Broder and Claudia Capos, both of whom spent 2 months reporting on the elements of conflict found in Central America. This series of articles deserves the attention of my colleagues. It is the product of two capable writers and offers a very unique perspective on a very serious problem.

For the benefit of the House, I attach the final article, in which Mr. Broder and Ms. Capos summarize options which the United States may pursue.

The article follows:

U.S. OPTIONS: WIN, WITHDRAW OR TALK

(By John Broder and Claudia Capos)

SAN SALVADOR.—Americans call the U.S. Embassy in San Salvador "The Bunker." Fourteen-foot-high walls of reinforced concrete and underground vents that spray tear gas at the touch of a button separate the compound from the surrounding neighborhood.

Atop the gray featureless building sit a sandbagged machine-gun nest and a forest of antennas. Some 150 U.S. Marine and Salvadoran guards protect the entrance and grounds from an occasional burst of gunfire and rocket attacks.

In many ways "The Bunker" reflects the image of America's presence in El Salvador. From the outside, it appears powerful, imposing, remote and seemingly unmovable. Inside, U.S. personnel are involved in nearly every aspect of Salvadoran affairs from the conduct of the war to the internal politics of the government bureaucracy.

"Saving the Salvadorans from themselves" is how one embassy staff member described the U.S. mission's role. He was only half kidding.

President Reagan views El Salvador as the front line in the battle against Communist aggression in the Western Hemisphere.

"The national security of all the Americas is at stake in Central America," he told Congress in April. "If we cannot defend ourselves there, we cannot expect to prevail elsewhere. Our credibility would collapse, our alliances would crumble and the safety of our homeland would be put in jeopardy."

The Reagan administration believes that a leftist takeover of El Salvador would threaten the security of the Panama Canal and U.S. shipping lanes in the Caribbean, pose a danger to Mexican oil fields and touch off a stampede of refugees into the United States.

White House policy-makers warn that, if the United States fails to continue pressuring the Salvadoran government to carry out social, economic and political reforms, the progress that has been made in redistributing land to the campesinos, curtailing human rights abuses and setting up free elections and a democratic system of government may be lost.

But there is growing opposition to U.S. policy in Congress and among the public, with many arguing for a different approach to solving El Salvador's considerable problems.

From interviews with Salvadoran politicians and peasants, U.S. policy-makers and their critics four options stand out for the Reagan administration:

The United States could withdraw all military and economic aid and let the events in El Salvador follow their course.

The United States could escalate its involvement militarily, economically and politically in an effort to help the Salvadoran government achieve a decisive victory over the guerrillas.

Congress could continue its carrot-and-stick approach of making the renewal of American military aid contingent upon improvement in the human rights situation, development of democratic institutions and progress in land and judicial reforms.

The United States could initiate negotiations with the leftists aimed at a coalition government or "power-sharing."

Each option has its supporters and opponents. The task facing the Reagan administration is to formulate a policy and persuade the American people that pursuing it will be worth the cost in time, money and—potentially—American lives.

Those who argue that the United States already has invested too much in El Salvador believe the country's deep-seated social problems cannot be solved with bullets or U.S. aid programs.

"The area is inherently unstable," said an aide to a Democratic senator who has been highly critical of the Reagan policy. "You've got the plantation owners and the slaves down there. It's a postmedieval society in the 20th century.

"If five million Salvadorans want to kill each other, I'm sorry," he continued, crushing his cigarette in the botton of a plastic coffee cup, "but I don't think we should be a part of it."

Given President Reagan's public pronouncements, it's unlikely he will adopt this hands off position. On the contrary, the president indicated he wants to raise the level of U.S. commitment despite growing congressional unhappiness over El Salvador policy.

To get around the 55-man limit on U.S. advisers in El Salvador, the administration opened a new military base in Honduras for training Salvadoran troops. About 100 U.S. Army advisers will staff it. The president also said he intends to send up to 25 medical corpsmen to El Salvador in coming months.

However, Mr. Reagan vowed that he has no intention of sending U.S. troops to fight in El Salvador and, at this point, there is virtually no support for such a move in the administration, even among top Pentagon brass.

Without a total U.S. commitment to victory and without strong backing from the American public, such a venture would be doomed to failure, said Gen. John W. Vessey Jr., chairman of the Joint Chiefs of Staff. Several other generals, who have not forgotten Vietnam's heavy blow to American military prestige, seconded his opinion.

A leftist intellectual in San Salvador warned that the United States must suffer the consequences of deeper involvement.

"I don't think the revolution here can be smashed easily," he said. "If you send in the Marines, you will get a lot of bodies coming back in boxes. You may get peace—but at what price, and for how long?"

The third option—continuing U.S. military and economic aid with strings attached—has supporters across the political spectrum in Congress. They differ widely, however, on the mix of aid and the conditions under which it should be continued.

Generally, liberals believe that aid should be suspended until the Salvadoran government improves its dismal human rights record and shows progress toward creating an effective judicial system to punish the lawless.

Conservatives, who see the war going badly for government troops, advocate increasing military aid to the point where some semblance of security can be achieved. Only then, they argue, can social and economic reforms go forward.

But an emerging bipartisan consensus is pushing for a de-emphasis on the military aspects of the conflict and a massive infusion of economic aid to correct the historic economic inequities of Salvadoran society.

This course is supported by such ideological opposites as conservative Rep. Jack Kemp, R-N.Y., and liberal Rep. Michael Barnes, D-Md. They propose a new "Marshall Plan" of significant long-term U.S. economic aid designed to build a productive Salvadoran middle class. Such a plan has been outlined by Mr. Reagan's chief delegate to the United Nations, Jeane Kirkpatrick.

The final option is to negotiate a settlement with the guerrillas, a position favored by the rebels, by many U.S. allies in Europe and Latin America and by some Reagan administration officials.

France and Mexico have urged the United States to pursue this course and have offered to serve as intermediaries. Many Salvadorans, who fear the totalitarianism of both the left and the right, believe talks between the government and the guerrillas are the only way out of a violent situation.

"The only solution is to force the two extremes to negotiate," said a professor at the Jesuit university in San Salvador." Perhaps the outcome would be a nonaligned socialist state on the European model."

But those in power in El Salvador strenuously refuse to yield any additional political ground to the guerrillas, contending that the rebels should not win through negotiation what they cannot win on the battlefield.

Mr. Reagan, too, rejected negotiation aimed at forming a coalition government, insisting that Marxists have never willingly shared power. They will use negotiation as a stalling tactic until they can achieve military victory, he said. Some Washington observers speculate that the administration ousted Thomas O. Enders as assistant secretary of state for inter-American affairs for suggesting negotiation as an alternative to current policy.

Nevertheless, Mr. Reagan is quietly pursuing the possibility of conducting informal talks with the insurgents. He has authorized special Central American envoy Richard Stone to explore ways of encouraging guerrilla participation in the presidential election slated for later this year.

The rebels refuse to put forth candidates, contending they will become targets for assassination by right-wing elements.

As the controversy builds in the United States over the nation's proper role in El Salvador, the killing in the steamy Central American republic goes on.

The stakes are high for Americans. They are higher, of course, for the Salvadorans.

Many Salvadorans are bewildered by the bitter debate in America over U.S. involvement. Nor can the Salvadorans understand what they perceive as hesitation by the United States to commit itself fully to the defense of an ally.

"We are frustrated by the lack of a clearly defined American foreign policy," said Juan Maldonado, director of the conservative Salvadoran National Association of Private Enterprise. "Every four years, the United States changes its attitudes and policies.

"It makes it very difficult to be a friend of the United States," he said. "You never know when you are going to be left twisting in the air, waiting for the vultures to come and eat you."●

PRICE-ANDERSON: A LIABILITY FOR NUCLEAR POWER SAFETY CLAIMS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. OTTINGER. Mr. Speaker, in 1957, the Congress provided the nuclear industry with a financial protection unique among hazardous activities conducted in theoretically "free markets." The Price-Anderson Act, as this protection is called, originally limited for 10 years the total damages recoverable in the event of a nuclear accident to $560 million. The liability limitation is now $570 million. This act was demanded by the nuclear industry as a precondition to its development of commercial nuclear power because Federal studies showed that damages far in excess of this amount could result from a nuclear accident. Although studies continue to project damages ranging in the billions of dollars, this limit has not been significantly raised. Twenty-five years of inflation have eroded even this small protection. The liability limitation was extended for 10 years in 1967 and 1977. It will expire in 1987 unless extended once again.

The New York Times of July 20, 1983, printed an article by Keiki Kehoe of the Environmental Policy Center which eloquently points out the contradiction in the nuclear industry's confidence in its own claims of safety by demanding this extraordinary relief from consequences which only it—and a flawless safety record—can prevent.

The article follows:

[From the New York Times, July 20, 1983]

A-PLANTS: INSURABLE RISKS?

(By Keiki Kehoe)

WASHINGTON.—As New York grapples with the controversy over evacuation plans for nuclear power plants, the fundamental question is: How great is the risk? Should the public believe industry assurances that an accident is so improbable that "perfect" evacuation plans are unnecessary?

Or should we believe the critics, who insist on planning for the worst? The one set of experts rarely consulted are society's professional risk assessors, the private insurance industry. The insurers' response to nuclear risks is both revealing and unsettling.

At first glance, nuclear power appears to be "uninsurable." Every insurance policy—written for everything from homes and businesses to contact lenses—specifically excludes coverage for any damages caused by radioactive contamination. Unlike the risk of earthquakes, floods and other disasters, the public does not have the option of buying nuclear insurance for an additional premium. Not even Lloyds of London will sell it.

The vulnerability of the public is compounded by an obscure federal law, the Price-Anderson Act. Under the Price-Anderson Act, the total compensation available for all off-site damages after a nuclear accident is limited to the money in an insurance pool—currently $570 million. If damages to the public exceed the amount in the pool, no one is allowed to sue the reactor operator, the company that built the plant or any other responsible party—regardless of negligence or fault.

In striking contrast to the $570 million the entire public would divide up after an accident, the utilities carry roughly $1 billion of insurance for each of their power plants. This amount, increased from the $300 million carried before the 1979 accident at Three Mile Island, is expected to climb to $2 billion in the next few years.

Nuclear insurance is sold to utilities by the same companies that exclude nuclear coverage in policies for the public. In fact, hundreds of insurance companies participate in special pools that write nuclear insurance only for the owners of power plants. Meanwhile, the insurers argue that not a penny of coverage can be offered directly to home and business owners who want to protect their property.

The contradiction between the nuclear industry's reassurances about safety and the insurance industry's actions is disturbing. If the odds of a major accident are really as small as we are told, private insurers should be eager to write as much coverage as the public is willing to buy.

Despite significant citizen pressure over the last decade, the insurers steadfastly refuse to disclose how much nuclear insurance would cost if it were available to the public. It is hardly reassuring to watch the utilities who create the nuclear risk ask the public to dismiss the possibility of an accident—while they insure their own property for billions of dollars, just in case.

The public is left with a garble of mixed messages. We are asked to believe the experts who assure us that the risks of nuclear power are infinitesimal. And yet we know if there ever is an accident, the nuclear industry will not be liable for damages to the public. If we try to buy insurance to protect our investments, no one will sell it to us.

How great is the risk of a nuclear accident? Judging by the actions of the insurers and the nuclear industry, the risk appears to be very great.

If the leaders of the nuclear industry want the public to believe that the risks of nuclear power are aceptable, they must be willing to accept full liability for an accident. By refusing to put their money where their mouth is, they are destroying public confidence in the very industry they are trying to preserve.●

STATE DEPARTMENT SUPPORTS CHILEAN DEMOCRACY

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. HARKIN. Mr. Speaker, I invite the attention of my colleagues to the State Department's July 11 press briefing comment concerning the current political crisis in Chile. I am happy to say that the Department has made clear its support for the cause of Chilean democracy. Specifically, the Department's spokesman referred to the need for "the transition to democracy sought by the vast majority of Chileans." He then added: "We firmly support that tradition, as defined by the Chileans themselves."

I welcome this forthright and timely statement. As my colleagues well know, I am a frequent critic of State Department policies and pronouncements, especially in the Latin American area. Therefore, I find this opportunity to applaud the Department's performance all the more gratifying. Unfortunately, this very significant policy statement has received almost no attention in our newspapers, although I am pleased to report that it has been published in full in the Chilean press. I am certain the Department's stand comes as very good news to the great majority of Chilean people in their hour of need.

I insert the following transcript of this important official statement into the RECORD, and I urge my colleagues to read it carefully:

Question. On Chile, do you have any reaction after the arrest of Mr. Gabriel Valdes?

Answer. Yes, I can give you some reaction. Former Foreign Minister Gabriel Valdes, former Senator Jorge Lavendero, and Jose de Gregorio were asked by a judge of the Santiago Court of Appeals to appear before him Saturday, July 9, in connection with his investigation of the earlier arrest of two men and a woman regarding the seizure of a large number of pamphlets calling for a peaceful anti-government protest on July 12. Following the hearing, he ordered them detained and held incommunicado.

The three persons arrested earlier had been turned over to the court on July 6 by the Ministry of Interior, which accused them and unidentified other persons of violating the 1958 law on internal security. Under general provisions of Chilean law, an investigating magistrate can order people detained for up to five days while he decides whether to indict or release them.

Appeals for the release of the political leaders detained on Saturday are expected to be heard today in the Court of Appeals.

In Chile, as elsewhere in the world, we support the right to peaceful dissent. The detention and solitary confinement of prominent democratic leaders such as Mr. Valdes can only be regarded as a regrettable manifestation of the serious tensions and divisions affecting Chile.

In previous comments we supported calls from various sectors of Chilean society in favor of dialogue to overcome those divisions. We viewed authorizations for the return of certain prominent political exiles as a positive development. Whatever the legal basis and eventual disposition of these new arrests, such actions illustrate the need for moderate leaders on all sides to find ways to halt the trend toward confrontation and to establish the basic consensus needed for the transition to democracy sought by the vast majority of Chileans. We firmly support that transition, as defined by the Chileans themselves.

We have communicated our views and our concern about these arrests to senior government officials.●

H.R. 3657

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. GRADISON. Mr. Speaker, Congressman DOWNEY and I recently introduced a bill, H.R. 3657, the purpose of which is to correct an inadvertent error in the Technical Corrections Act of 1982 ("TCA").

Section 338 of the Internal Revenue Code (the "Code"), which was enacted as part of the Tax Equity and Fiscal Responsibility Act of 1982 ("TEFRA"), provides that a corporate purchaser of 80 percent or more of the stock in a target corporation may elect to treat the stock purchase for tax purposes as a purchase of the assets of the target corporation. Section 338 generally applies to stock purchases occurring after August 31, 1982, although a special rule permits a purchasing corporation to elect to have the provision apply to the purchase of stock in a target corporation if the acquisition occurs after August 31, 1980, and before September 1, 1982, provided that the target corporation was not liquidated before September 1, 1982.

After the enactment of TEFRA, it became apparent that inequities could result under the special rule if a purchasing corporation could elect to have the selling group of corporations pay a tax on section 338 income that was not contemplated by the parties at the time that they entered into the transaction. Accordingly, the TCA provides in general that section 338 income realized from a deemed sale of assets will be included in the final return of the target corporation, which, for this purpose, is not considered a part of the selling group of corporations. This provision has the effect of imposing upon the purchasing corporation and its affiliates the burden of paying the tax on any section 338 income realized from the deemed sale of assets.

However, a transition rule contained in the Technical Corrections Act of 1982 allows the tax on any income realized from a stock purchase transaction subject to section 338 to be incurred by the selling group of corporations filing a consolidated return, provided that a binding contract was entered into on or after "the date of enactment of the Tax Equity and Fiscal Responsibility Act of 1982 (September 3, 1982), and on or before the date of enactment of" the TCA (January 12, 1983), if the purchasing corporation establishes by clear and convincing evidence that the contract was negotiated with the expectation that any income realized on the deemed sale of assets under section 338 would be paid for by the selling group of corporations filing a consolidated income tax return.

H.R. 3657 would modify ths transitional rule so that it applies to binding contracts entered into on or after September 1, 1982, rather than the date of enactment of TEFRA (September 3, 1982), and on or before the date of enactment of the TCA (January 12, 1983). Taxpayers affected by H.R. 3657 would be entitled to file a section 338 election within 30 days after enactment of H.R. 3657.

This matter first came to my attention because, on September 1, 1982, a corporate seller and a corporate purchaser entered into a stock purchase agreement whereby all of the stock of a subsidiary of the seller was sold in a transaction subject to section 338. Under the terms of the agreement, the selling group of corporations filing a consolidated income tax return agreed to include in their return any income arising from the deemed purchase of assets under section 338. In so doing, the parties relied upon an understanding (drawn both from conversations with the staff of the Joint Tax Committee and from the House conference report) that TEFRA would impose on the selling corporation and its affiliates the burden of paying tax on income realized from a stock purchase subject to section 338 of the Code. (See, House Conference Report accompanying H.R. 4961, August 19, 1982, page 533 (the "Conference Report").)

Discussions with the staff of the Joint Tax Committee and the Office of Tax Legislative Counsel of the Treasury Department have disclosed that (i) the interpretation of section 338 by the parties to the transaction was consistent with Congress' intent in TEFRA, and (ii) the beginning date for applying the transitional rule in the TCA, i.e., September 3, 1982, was not intended to treat unfairly stock purchase transactions entered into prior to that date. The existence of the transitional rule to the TCA indicates recognition by Congress that transactions already binding in nature before enactment of the TCA could be adversely and inequitably affected if the TCA change were applied retroactively with no exceptions.

H.R. 3657 does not excuse the parties to the transaction from the pay-

ment of any tax arising from the section 338 income generated by the deemed asset sale; it merely shifts the burden of the tax from one taxpayer to another as permitted by the law and as intended by the parties on the date of the transaction, September 1, 1982.●

GHOSTS OF VIETNAM WAR

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. ACKERMAN. Mr. Speaker, the New York Times, July 23, 1983, "Reagan Plans Rise in Military Maneuvers in Latin America; Plan Calls for Preparing a Possible Quarantine of the Nicaraguans."

The New York Times, July 25, 1983, "U.S. Seeks Increase in Covert Activity in Latin America: Anti-Sandinistas To Gain: Expanded Program Would Be Largest CIA Operations of Kind Since Vietnam."

The Washington Post, July 26, 1983, "U.S. Combat Troops To Be Sent to Honduras: Administration: Part of Exercises."

Mr. Speaker, as one who attended college in the 1960's, I get more than an uneasy sense of deja vu from these headlines. I get a sense of dread: a fear that the U.S. Government, far from being a helpless, pitiful giant, is a dull, stumbling behemoth that cannot learn from its mistakes.

Was the Vietnam war really so long ago? Have we all forgotten the lesson of that tragedy, that we cannot win the hearts and minds of a people by bludgeoning them, that a nation's friendship must be earned with compassionate moves, not stolen with hostile acts?

It appears the Reagan administration, with special guest star Henry Kissinger joining Jeane Kirkpatrick in the cast, has forgotten this, if, indeed, it ever learned it.

But, Mr. Speaker, I believe that a majority of the House of Representatives recalls recent history, and that we will remember our lessons when we vote on the Boland-Zablocki bill tonight.●

LISTEN TO WHAT THE STATES ARE SAYING ABOUT THE NEW FEDERALISM

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. WEISS. Mr. Speaker, President Reagan's two-pronged policy of drastically reducing the Federal Government's domestic spending while shifting responsibility for some Federal programs to the states has placed an immense burden on the already weighted shoulders of the State governments.

The best source of information about the impact of Reaganomics and the so-called New Federalism, I believe, is directly from the State governments. I would like to recommend to my colleagues a recent article by Stanley Fink, speaker of the New York State Assembly.

Mr. Fink details the insensitivity and illogic of the New Federalism, and he has some serious comments about the Reagan administration's disregard for the sovereignty of the States. He communicates the alarm of State Governors and legislators across the country who must repair the damage of an ill-conceived and ill-timed idea. It is important that we in Congress listen to what he has to say.

The article, from the Democratic National Committee's publication, Democrats Today, follows:

[From the Democrats Today, May-June 1983]

DEMOCRATIC IDEAS TO ASSIST THE STATES

(By Stanley Fink)

The legislatures in the 50 states now face the unenviable job of "mopping up" in the wake of Hurricane Ronnie. A disproportionate share of the budget cutting at the federal level has come in the area of intergovernmental aid programs, putting the responsibility on state legislatures for either filling in for the federal and reductions or having, in many cases, to pass those cuts along. This situation has been exacerbated by the damage of the Reagan program on the national economy. Even states that have picked up none, or very few, of the federal cuts have been required to enact tax increases simply to balance their budgets. In effect, Reaganomics has moved a greater and greater share of the responsibility for public services from the progressive federal tax base, which itself has been made less progressive, to the primary state and local revenue producers—the real property tax and the sales tax.

It is important for Democrats everywhere to understnad the impact of the Reagan program on the people of this country and the responsibilities that the changes wrought by the Reagan Presidency are placing on the doorstep of the state legislatures. Such an understanding would be important regardless of party considerations, but the Democratic Party, as the result of the 1982 elections, finds itself in a central role in this on-going drama, with both burdens to carry and tremendous opportunities for service to the nation. In November 1982, changes in party control occurred in 13 legislative houses, with the Democrats gaining 11 legislative bodies and losing two. The Democratic Party now controls 72 of the 98 state legislative houses in which political parties are present. (Nebraska's legislature is unicameral and elected on a non-partisan basis.)

It is obvious to most observers why the voters around the country have turned to the Democratic Party to represent them in the state houses. The result is both an honor to those of us called on to serve and to lead. But it is also a very real challenge. We must come up with creative solutions to blunt the devastating effect of the Reagan program on our people—on those who truly are in need and on those working people who have always carried their share of the load but are now enduring the ravages of unemployment and the indignities of dependence.

The Reaganauts promised the nation an economic "fix," supply-side economics. They promised growth and they promised to control inflation without causing greater unemployment. The reality of their program has taught us that certain old truths are still with us. Yes, they reduced inflation, but in the way that all previous Republican administrations have reduced inflation—on the backs of the working people of this country, by increasing unemployment. And, now they tell us that while our economic recovery has started, it will be a "different" type of economic recovery, one with chronically high unemployment. For state legislatures and state taxpayers this is bad news. People who aren't working don't pay income taxes and they can't affort to consume as much, thus reducing sales tax revenues. Such reductions in the tax base only fuel the need for increases in tax rates. The list of states now caught in this vicious cycle is a long one and it includes states, such as Colorado, California, Oregon, and Minnesota, which only a few short years ago were thought to be immune from such concerns.

Ronald Reagan and his administration also talk a lot about a New Federalism, about re-ordering responsibilities among the federal, state and local levels of government. But their proposals have had virtually no underlying logic to them. Moreover, the Administration has shown an unbelievable disregard for the sovereignty of the states in their own realm—a concern that is at the heart of any federal system.

On the first point, the Reagan proposals seem to represent nothing more than a random re-shuffling of responsibilities without any logical foundation. What sense does it make to propose moving the responsibility for Medicaid funding to Washington and have the states pick up the full cost of Aid to Families with Dependent Children and Food Stamps and then engage in seemingly endless negotiations with organizations of state government officials on the minutia of such a trade. Welfare is a national responsibility and whether we are talking about food, clothing, shelter, or medical care, responsibility must gradually but completely be moved to the national government. But even within the overall parameters of this ridiculous game, there were tricks and false starts. State and local officials hungry for any relief from the increasing cost of medical care for the needy were attracted to the bargaining table by the lure of a federal medicaid takeover, only to learn months later what should have been obvious from the first—that optional services would have to remain a state responsibility. For any aid program of this type to be logical, fair and equitable this must be the case. If it wasn't, state choices could drive up the cost to the federal treasury with no participation by state taxpayers.

While this aspect of the New Federalism proposals has held center stage and is most important in a real world, dollars and cents way, even more astounding, given their glorification of the terms, is the Reagan team's absolute lack of respect for the meaning of the concept. While preaching about returning responsibilities and decision-making to the states, the Reagan Administration and its allies in the Congress continually put forward proposals, usually in the name of

New Federalism, which tell the states how to order their internal affairs and establish intricate mazes through which to pass before qualifying for the block grants or other supposedly less cumbersome programs such as the Job Training Partnership Act. A good example of this insensitivity is the requirement under the so-called Education Block Grant that, in order to receive money under that program, a state must create an Advisory Committee to its "state educational agency." The law (the Gramm-Latta Omnibus Budget Reconciliation Act of 1981), establishing this requirement, requires that this committee be appointed by the Governor of the State and that it be determined by the Governor to be broadly representative of the educational interests and the general public in the state, including persons representative of public and private elementary and secondary school children, teachers, parents, local boards of education, school administrators, institutions of higher education, and the state legislature.

In terms of its financial and economic impacts, the New Federalism is a mystery. The Reagan Administration originally talked about "revenue turnbacks" to go along with the responsibilities it had begun and would continue "returning" to the states. It created a Cabinet Council working group on revenue turnbacks and got numerous state, local and private sectors leaders involved in advisory committee meetings. But when the failure of supply-side economics began to sink in and the reality of ever increasing deficits became clear, the Administration cut off discussions and had a now departed, Supply-Side Under Secretary of the Treasury announced that the revenue turnbacks had been accomplished that the federal government had cut its tax rates and that the states were now free to pick up the slack by increasing their tax rates. That wasn't quite what we had in mind, but it's what we got.

A recent survey compiled by the National Conference of State Legislatures reveals that nineteen states will end their current fiscal year in debt. Twelve other states are facing extremely small end-of-year budget balances. During the past two years, over 40 states have enacted various tax increases and budget cuts to balance their budgets or reduce their impending deficits. Even more austere measures may have to be enacted by state legislatures as we approach 1984. Without sufficient revenues coming in, state governments simply will not have the funds to pay for essential state services and to provide local governments with the aid they need to continue providing the numerous basic services which are local responsibilities. Further cuts or further tax increases will be the name of the game in many statehouses.

Finally, it is important to note that the Reagan Administration's policies have had a disproportionate impact on those who can least afford it, the poor and those in need of human services. Although a basic tenet of this country has been the right to equal opportunity, under Reagan's administration the rich have benefited at the expense of the rest of us. Although many, but not all, of the human services cutbacks have saved a few federal dollars in the short run, they are likely to increase state and local costs—now and in the future.

The strength of our nation, and its ability to resist foreign adversaries, is as much determined by the health and education of our citizens as it is by the size of our military arsenal. Our economic stability and hoped-for prosperity is as dependent upon an adequate transportation system as upon tax reductions for the wealthy. Unfortunately, for us all, the Reagan program has tended to feed the fat and starve the lean. ●

THE DANGEROUS TRUTH

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. MARTIN of North Carolina. Mr. Speaker, we know that the people of our country do not want to see us involved in a war in Central America. None of us in the Congress want the United States involved in such a war.

The dangerous truth is: There is a war in Central America and the Communists are using it as a vehicle to capture control of Central America. They have armed and trained and directed a series of rebellions in Central America. If we draw the shades, and pretend to sit in our living rooms listening to music while we ignore our neighbors whose houses are being torched, pretty soon there goes the whole neighborhood.

We do have a responsibility and if we do not meet it the chances of war involving us will grow.

There is a desperate need for our best thinkers, our most creative leaders, to present ideas to resolve the issues that divide us so that, united, we can meet our responsibility. For that reason I was pleased to read the recent article in the New York Times by our colleague, Representative JACK KEMP, and ask that it be printed in the CONGRESSIONAL RECORD. As we search for a responsible consensus, there can be no doubt but that the twofold approach advocated by Mr. KEMP must be a part of that consensus: Long-term economic aid coupled with short-term military aid, as well as humanitarian reforms in both sectors of policy.

Otherwise, we, can draw the shades, but that will not stop the fires from spreading.

[From the New York Times, Friday, July 29, 1983]

REACHING A SYNTHESIS FOR SALVADORAN POLICY

(By Jack Kemp)

WASHINGTON.—Narrowness on both sides—liberal and conservative—has left the American people with a pretty unappetizing choice between one-sided policies in Central America. Political leaders would do the people a favor if they climbed down off the barricades and put together a bold, comprehensive policy that answered both the economic and security problems of Central America. To ignore one or the other is sheer folly.

The average liberal in Congress says that the United States can't support the Government of El Salvador because it doesn't respect human rights and that we should cut off all military aid to Central America because the problems there are basically social and economic. The average conservative emphasizes the military aspects of the crisis and too often minimizes the issues of social injustice and poverty. Both sides need to reconsider the problem.

The stakes are high in Central America—for us and for the people of the region. To act rashly would be a mistake, but to bury our heads in the sands of isolationism would be just as dangerous. The first step is to recognize that the threat is different from past threats to United States security. Defending our security there is not simply a matter of sending armed forces against an undisguised aggressor, as in both world wars and in Korea. The aggressive forces in Central America are clandestine and take advantage of the social and economic problems of the region. They hide behind and within movements for genuine social progress and emerge openly to grab power only after the fighting has stopped. In Nicaragua, a popular revolution to overthrow one dictatorship led to the seizure of power by another, and the new Nicaraguan regime is becoming a Soviet satellite.

Conservatives should not doubt that some Salvadoran rebels really want progressive economic and democratic change. But liberals should not doubt that other factions seek to establish the kind of Leninist totalitarianism that exists today in Nicaragua, Cuba and the Soviet Union. The question is, if the rebellion were to succeed, which faction would take power—those who favor progressive change or the totalitarians? After what happened in Nicaragua and Cuba, is there any reason to believe that a revolution in El Salvador would lead to a better government than currently exists?

Liberals who want to cut off military aid to El Salvador to punish the Government for its imperfections seem unaware of this dilemma. Nevertheless, it would be a mistake to believe that military hardware is the sole solution to the crisis. As long as bleak economic and social conditions plague Central America, it will be ripe for upheaval. This is why I support greater economic aid to the region.

But economic changes don't stop bullets, and economic aid won't end rebellions fed by Soviet and Cuban supply lines. Would the Soviet Union stop supporting the Salvadoran rebels if the Salvadoran Government were suddenly revamped? The Soviet leaders with whom I have talked show little concern for fostering democracy and human rights in Central America—or, for that matter, in their own country. Moscow wants governments it can control, and it gets what it wants by turning genuine struggles for progress into Leninist power grabs.

A United States policy that ignores this threat to the security of our friends in Central America is doomed to failure. The prerequisite for economic growth and greater democracy, after all, is security of life and property. How much capital investment can there be in El Salvador if, for the next 10 years, guerrillas roam freely, destroying bridges and power stations and threatening the lives of the people who work the land?

There are no easy choices in Central America. Our decisions would be simpler if our friends there had perfect governments or if the rebellions were not supported by our adversaries. We could more easily afford to be morally fastidious if our security were not threatened by events in Central America. Alas, none of this is true—and our security is very much threatened.

The Central American problem is not an abstract war of ideas being fought thousands of miles from our homes. Central America is right on our borders, and we

can't just look the other way. If we let Cuba, Nicaragua and the Soviet Union stay on their present path, we will spend the next 20 years struggling to protect an ever-shrinking share of the region from totalitarian control. The effect of our global responsibilities would be disastrous.

To prevent such a dismal future, we need a twofold policy that provides both long-term economic aid and short-term military aid. We must provide a shield behind which economic growth and democratic change can begin to take root. That is the only hope for the future.●

UNEMPLOYMENT TOUCHES AMERICANS

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. MARKEY. Mr. Speaker, for millions of jobless Americans, unemployment means despair, frustration, and oftentimes tragedy. For millions more who are still working, unemployment is an ever-present threat to their livelihood, security and dreams for the future. But this is a problem that deeply concerns more than those who work or wish to work. Unemployment touches even the youngest of Americans.

I would like to call the attention of my colleagues to an essay dealing with unemployment written by a young man from my congressional district. Steven Fierimonte, an eighth grade student from my native city of Malden, Mass., prepared this essay as part of a nationwide contest sponsored by the Italian American War Veterans Organization. I am proud to say that Steven's entry was selected as the national winner in this contest.

I would like to salute Steven for his excellent work and urge my colleagues to reflect on his views and insights. However, one need not agree with Steven on the issue. Instead, I ask that you consider Steven's essay as a reflection of an awareness shared by a great many young Americans. Granted, few can present these feelings as eloquently as Steven has done, but I am certain that young men and women throughout our Nation are equally concerned by the disturbing national problem, unemployment.

For this reason, I take pride in presenting Steven's prize-winning essay for your consideration.

STEVEN FIERIMONTE'S WINNING ESSAY

(By Steven Fierimonte)

In order to determine whether unemployment helps lower inflation or not, we must first understand what is the real meaning of inflation. Inflation is the term used in economics to describe, respectively, general rises and falls in prices from a norm based on a previous year or, more usually, a span of years. For an example, a one dollar bill in 1980 had the purchasing power of 30 cubic inches of food. Today, the dollar bill has the purchasing power of only five cubic inches of food. This fact indicates that the dollar has decreased in value.

Recently, America's inflation rate has decelerated to around five percent, but no one should confuse this characteristic with a cure. There was never any mystery as to how inflation could be stopped. Every previous administration, Republican or Democrat, knew that it could stop inflation if it were willing to recreate the Great Depression.

The real mysteries were: (1) how could inflation be stopped without a recurring depression, and (2) if the depression remedy were used, how could the economy be returned to full employment without restarting inflation?

President Reagan's policy promised a solution to the first mystery. The simultaneous application of supply-side tax cuts designed to speed up the production of goods and services and a slow rate of growth of the nation's money supply designed to slow down inflation would lead to both full employment and price stability. Unfortunately, having been put to the test, this policy proved not to have been the answer to the first mystery.

After reducing inflation by conventional means, a severe recession, or mini-depressions, America is now faced with the second mystery of how to return to full employment, with price stability.

Accordingly, unemployment, in a way, does help to lower inflation, but unemployment doesn't help people.

Rather than seek a solution to this problem, the Reagan administration is proposing to redefine full employment as that rate of unemployment which is consistent with price stability such as about 7 percent. Given the political storm caused when this idea was first suggested by President Reagan's new chairman of the Council of Economic Advisers, Martin Feldstein, the administration does not now want to call 7 percent full employment, but that it is merely a play on words and of no significance. If 7 percent unemployment does not contain inflation, the administration will undoubtedly be back at some later date maintaining that an even higher rate of unemployment is actually full employment.

Full employment may exist when most people without jobs are voluntary job changers who are unemployed for relatively brief periods of time. This condition exists when unemployment is somewhere between 3 and 4 percent. To achieve price stability at this level of unemployment would require some fundamental restructuring of our institutions for setting wages and prices. A wide variety of changes would be needed, but let us view some important ones.

Price stability isn't possible in a system where the prices of materials, wages and industrial components have a direct relationship to the cost of living. With indexing, any adverse price shock such as bad corporations automatically gets converted into a permanent domestic inflation.

Material, wage and industrial component prices rise 6 percent one year because the cost of living rose 6 percent the previous year. Indexing protects the individual or firm from the effects of inflation, but it makes it impossible for the community to stop inflation. If inflation is to be stopped, indexing must be abolished.

If we want price stability, we must also create an economy where incomes can fall if the situation demands it. The 1979 oil price hike took an extra 2.5 percent of America's real gross national product. In the context of zero economic growth, higher oil prices meant a lower American standard of living. There was simply less GNP left to be divided among Americans. There were two ways to deliver the bad news. Prices could go up faster than personal incomes, or prices could remain stable while incomes fell. If we want price stability, we must build a economy where the latter happens, rather than the former.

The answer is to tie all incomes, wages, salaries and dividends to some index, such as value added per hour of work that automatically falls when these circumstances arise.●

EMIGRATION POLICIES OF THE U.S.S.R.

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. MAVROULES. Mr. Speaker, today I wish to express my deep concern over the emigration policies of the Soviet Union regarding prospective Jewish emigrants.

Recently, a new government agency was formed in the Soviet Union, the Anti-Zionist Committee. Both the chairperson, Gen. David A. Dragunsky, and the official spokesperson, Samuil I. Zivs, have made statements concerning the small number of Jewish emigrations from the Soviet Union during the past several years. Jewish emigration has dropped from a high of 51,320 in 1979, to only 2,600 last year.

Both Mr. Zivs and General Dragunsky attribute this reduction to the lack of desire for emigration among the Soviet Union's 1.8 million Jews. The Anti-Zionist Committee maintains this is due to the fact that all Jews who wish to leave the Soviet Union, have already done so. The family reunification which has slowly been taking place since the Second World War is effectively concluded, according to the Soviets.

This is simply not the case. As late as 1979, 300,000 Jews in the Soviet Union applied for emigration to the West and Israel, even though such applications frequently result in harassment and further persecution. The great majority of these hopeful emigrants are still within the Soviet Union. The ostensible reason given by the Soviets for the refusal of these many emigration pleas is the lack of sponsors for the prospective emigrants. Yet there are literally thousands of sponsorship letters sent to the Soviet Union on behalf of hopeful sponsors each year. Consequently, any lack of sponsors for Soviet Jews desirous of emigration, is directly the result of the Soviet Government policy which withholds the mail of Jews who are possible emigrants. Such a catch 22 is what we have come to expect

from the Soviet Union regarding Jewish emigration.

This withholding of mail, particularly invitations to immigrate to the United States and Israel, is one more example of the denial of human rights experienced by Soviet Jews and other minorities within the Soviet Union. This continued violation of human rights cannot be ignored. Every conceivable effort should be made on behalf of the Jews and other Soviet individuals who wish to emigrate. The leadership of the Soviet Union must be brought to realize that there are rights and freedoms which exist for all citizens of this Earth, and that these rights and freedoms may not be denied to any man, woman, or child.

I implore the Soviet Union to allow its citizens to receive all their mail. Further, I hope and pray that the Soviet leadership will permit those who wish to emigrate the basic human right to choose the nation in which they wish to dwell.●

HOGAR CREA

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. RITTER. Mr. Speaker, I rise to recognize and to pay tribute to the founders, administrators, and residents of the Hogar CREA drug rehabilitation program, which is celebrating the 15th anniversary of its founding in San Juan, P.R. One of the Hogar CREA facilities, I am proud to say, is in the city of Bethlehem, in the district I represent. I have personally visited the center and I have been very impressed by what I have seen there. Those of us in the 15th district are honored by its existence in Bethlehem; it is the only Hogar CREA facility in the United States, out of 73 centers in all.

Besides being an acronym for Casa de Re-education de Adictos (Center for the Re-education of Addicts), CREA is a play on two words in Spanish—"creer," to believe, and "crear," to create. Thus it is a reflection of Hogar CREA's noble belief that the program can help addicts recreate themselves as new individuals—contributing, creative and responsible. Hogar CREA is not like other drug rehabilitation programs. It is not sterile, institutionalized or authoritarian; it provides no other drugs in the treatment of its residents. The concepts according to which it operates are therapy, responsibility, self-confrontation, reeducation, and commitment from its residents and from the community. It is totally administered by addicts who have been reeducated in the Hogar CREA program. Hogar CREA's program creates a highly structured environment in which the residents help each other to give up their addictions and are helped to learn skills that are valued in the job market. The program is not a short one. It takes from 2 to 2½ years of residence in the Hogar, together with 5 years to "seguimiento" or followup.

And it does not depend on government funding. The program is maintained by fund-raising activities of the center's residents, steering committee and family committee.

The best thing about the program is that it works. Studies conducted by the University of Puerto Rico have shown that after 5 years away from the residence, 92 percent of those who completed the program were free of drug use. That is a record of almost unbelievable excellence. And so, on the occasion of Hogar CREA's 15th anniversary, I extend my congratulations to Hogar CREA's founder, Juan Jose Garcia Rios, and to Puerto Rico's Governor, Carlos Romero Barcelo, along with my sincere gratitude and my best wishes for the program's continued excellent work in the future.●

PUBLIC SAFETY OFFICERS' IRA LEGISLATION

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. STARK. Mr. Speaker, today I am introducing legislation that will permit law enforcement officers and firefighters to rollover accumulated sick pay and vacation pay into an IRA tax free upon separation from service.

It is fairly common among law enforcement and firefighting officials to leave these highly demanding and tense professions after many years of service for a second career or to transfer to other jurisdictions. When they leave these jobs, these public servants are given a lump-sum payment for vacation or sick days that they earned but did not use. This income, which can sometimes be substantial, is currently taxable.

My bill would allow these sums to be transferred, without payment of income taxes, into the individual retirement accounts—IRA's—of those individuals. This separation benefit would be limited to an additional $10,000, but not more than $1,000, for each full year of service, whichever is less. These payments would, of course, not escape taxation; but, as with all funds in IRA's, taxation would be postponed until retirement.

Mr. Speaker, my bill affects a small percentage of the population, but the importance of these men and women far outweigh their numbers. The roles of police and fire officials in fighting and assuring the safety of America's citizens is of course well known. The small benefit contained in this bill is well deserved by those public servants who are in the profession of protecting life and property in this country.

This legislation is a small, but important, change in the tax code to show this appreciation. I hope that my colleagues will join me in working for swift approval of this legislation.●

DEFENSE AUTHORIZATION BILL

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. YATRON. Mr. Speaker, I want to take this opportunity to say a few words about defense burden-sharing among our allies. I was very encouraged by the adoption of an amendment to the fiscal 1984 Department of Defense authorization bill calling on our Japanese, Canadian, and European allies to assume a greater responsibility for their own, and the common, defense.

The American taxpayer cannot be expected to shoulder a disproportionate share of the allied defense effort, particularly in these times of high deficits. Many of our allies have not lived up to their defense commitments and to the pledges that they have given us. It is particularly distressing that many of these nations, while defending on the American defense umbrella for protection, engage in illegal and unfair trade practices which rob our workers of jobs and hurt our economy.

I think on this issue we must take a stronger stand. All democratic societies must work together, with each nation doing its fair share, to preserve the freedoms and liberties we hold so dear. I urge our President and the Secretary of Defense to stress the importance of defense burden-sharing to our Canadian, Japanese, and European allies. They can make essential contributions to the defense effort, while providing a fair and equitable way to lower American defense costs.●

CONFERENCE REPORT ON H.R. 3069

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. WILLIAMS of Montana. Mr. Speaker, on the matter of the legislation, H.R. 3069, I would like to thank Chairman YATES and my colleague from Colorado, Mr. KOGOVSEK, for their work in clarifying the intent of Congress regarding retaining the methodology of direct allocation of

PILT funds to counties. Since I read the conference report (H. Rept. 98-308) on H.R. 3069, Mr. KOGOVSEK and I have had the opportunity to discuss the intent of the language inserted by Senator JAMES MCCLURE, which was originally proposed by Mr. KOGOVSEK when he introduced H.R. 2071, and the subsequent amendment introduced by Senator DURENBERGER. Senator DURENBERGER'S amendment authorizes States, if their State legislatures enact a law, to distribute PILT payments to smaller units of local government than counties. The conference language clearly prohibits the State from using any of the funds for administrative costs to pay for the necessary data retrieval and ancillary costs to redistribute these funds. Mr. KOGOVSEK agreed that I am correct in understanding that the intent was also to prohibit the Interior Department from using PILT administrative cost dollars to perform the calculations necessary to achieve a further intrastate distribution based on action by a State legislature. Thus, once the State receives its payment from the Bureau of Land Management (BLM), then BLM has no further responsibility. Mr. KOGOVSEK futher agreed that I am correct in understanding that a State's payment would not be reduced in any way by virtue of the cost necessary to implement the action of another State's legislature.●

A NEW LOCK AT BONNEVILLE DAM

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. WYDEN. Mr. Speaker, I rise to commend our colleague Congressman BOB ROE, chairman of the Public Works Subcommittee on Water Resources, for his extraordinary hard work and leadership role in putting together the most comprehensive water resources development legislation this House has seen in many years.

I was pleased to join Chairman ROE as an original cosponsor of the Water Resources, Conservation, Development, and Infrastructure Improvement and Rehabilitation Act (H.R. 3678), the product of a massive 6 months' effort on the part of the Water Resources Subcommittee that was introduced in the House earlier this week.

Congressman ROE shares my view that our ports, harbors, and inland waterway systems have been the unfortunate victims of neglect in recent years and that this neglect cannot be allowed to continue. With the introduction of this landmark omnibus legislation, we now have a real shot at breaking the 7-year logjam during which no major waterway projects have been authorized by Congress.

Equally important, BOB ROE recognizes that our national waterway transportation system is a national treasure and a vital part of this country's ecnomic infrastructure. He has, accordingly, refused to jump on the waterway user fees bandwagon and join the forces that would place an inequitable share of the cost of improving and maintaining the navigable rivers and harbors of this Nation on our ports and on a deeply depressed inland waterways industry.

I am particularly heartened by the fact that my top legislative priority in the 98th Congress, as it was in the 97th Congress—a bill to authorize construction of a new navigation lock at Bonneville Dam on the Columbia River—has been incorporated into H.R. 3678 and included in a priority nationwide list of seven critically important inland waterway projects. Under the provisions of H.R. 3678, a new lock will be built at Bonneville without placing any new financial burdens on the backs of the commercial navigation interests or the ports of the Columbia-Snake River system.

In my view, a new lock at Bonneville Dam will do more to create jobs in Oregon and the Northwest than any other piece of legislation. Put simply, to tap our potential as a major international trading and transportation hub for goods and commodities flowing in and out of the entire Western United States, we simply must break the congestion bottleneck at Bonneville Dam by building a modern new lock.

This cost-effective project will pay huge dividends to Oregon and the Northwest in the years ahead. It is estimated that construction of a new lock at Bonneville will leverage more than $500 million in private investment along the Columbia-Snake River waterway system and will create thousands of new jobs for Oregon residents. This project will literally create jobs all across our State, from the docks of north Portland to the wheat fields of eastern Oregon.

Authorization of funds to build a new lock at Bonneville in this Congress is imperative. The Corps of Engineers estimates that the capacity of the existing lock at Bonneville—through which more than a fourth of all U.S. wheat exports now pass—will reach a point of total saturation by 1990.

A new lock will save shippers an estimated $2.50 for each ton of commodities moving on the Columbia River, costs that can now be attributed to the congestion and the increasingly expensive delays in locking through Bonneville. Such savings will significantly boost the competitive position—in both the domestic marketplace and in the export marketplace—of the Pacific Northwest's inland waterway transportation network.

The critical need for new jobs, Mr. Speaker, is the main reason why a new lock at Bonneville Dam is my top priority in the 98th Congress. It is also the main reason my Northwest colleagues, TOM FOLEY, LES AUCOIN, BOB SMITH, DON BONKER, NORM DICKS, SID MORRISON, LARRY CRAIG, and DENNY SMITH joined me as original cosponsors of the Bonneville Lock bill when I introduced it on the first day of the 98th Congress.

Mr. Speaker, the Columbia-Snake River system is one of the world's great waterways and a true national—not just regional—treasure. Construction of a new lock at Bonneville Dam is critical if this magnificent system is to mature and realize its full potential, and thus help create desperately needed jobs in an area of the country that has been particularly hard hit by recent slumps in the economy.

Again, I extend my sincere congratulations to Chairman ROE for his extraordinary efforts in putting together this landmark waterways bill. I intend to do everything I can to help him in his efforts to enact this legislation. We simply must not continue to ignore the capital improvement and maintenance needs of our ports, rivers, and harbors. Chairman ROE has taken a giant step in the direction of reversing the unwarranted neglect of our waterway transportation infrastructure we have witnessed in recent years. I urge all of my colleagues to assist him in taking the additional steps necessary to see this bill enacted into law.●

OUR POLICY TOWARD NICARAGUA

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. MAVROULES. Mr. Speaker, oftentimes an important issue gets so overwhelmed with rhetoric that we lose prespective of the real picture. I fear that this is exactly what is happening with our policy toward Nicaragua.

I rise today in support of the Boland amendment. I speak not to add to that jargled rhetoric that has confused so many of us, but rather to address the real issues that we must all now face.

Nicaragua is a country with a long-standing history of oppression and revolution. The citizens of this battered nation have been left homeless, jobless, and helpless. There are few families in Nicaragua today that have not been affected by the violence. Many of these individuals have not lived a single day of their lives in peace. Violence has become a way of life.

I sometimes get the feeling that the Reagan administration's policymakers are locked in a room with two doors. As they view it, behind one of those doors lies peace, prosperity, justice, and freedom in Central America. Behind the other door lies hostility and hatred, sacrifice, suffering, and sorrow. Although these policymakers claim to be slowly moving through the first door, it is an awful paradox that their key seems only to fit the second. I have come to realize that there must be a third alternative.

A more realistic alternative that strives for peace, but realizes sacrifice, that wants freedom, but is patient, and that wants supportive southern neighbors, but will not tolerate more violence.

We cannot succumb to the delusion that our action against a government will not affect its people. Just as we offered our assistance to the Samoza regime, blindly believing that it would be funneled down to the people; so too are we opposing the Sandinistas, again disregarding the peoples reaction.

We must realize that any action, whether covert or overt * * * whether economic or military * * * will be judged not only by the Sandinista Government, but also by the people that Government represents. If we consider for a moment the opinion that the Nicaraguan people must have of our country, I think we all will realize the necessity to stop covert operations.

In addition to the military advisers that our President plans to send to the region * * * In addition to the fleet of warships that are now on their way to both coasts of Nicaragua * * * and in addition to the amount of money being taken from our economy to aid guerrillas trying to overthrow a government * * * we still have neglected to address the primary economic and social concerns of the Nicaraguan people.

We cannot continue a policy of alienation. Covert military operations offer only more violence, human suffering, and at best a perverse reputation of our country throughout the world. I urge you all to support my distinguished colleagues from Massachusetts and Wisconsin so we can pass this amendment which will send a long awaited message to the administration. This covert aid must now be stopped, so we can better face the more crucial economic problems of this whole region.●

THE AMERICAN DEFENSE EDUCATION ACT

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. DYMALLY. Mr. Speaker, it is my custom to hold town meetings periodically in different parts of my district in order to be in touch with the issues which are uppermost in the minds of my constituents. At such a meeting held on July 23, Mrs. Jean Curtis, president of the Compton Education Association (CTA, NEA), made an eloquent statement in support of the American Defense Education Act, introduced by Mr. PERKINS in the House and by Mr. HART in the Senate. Those present at the townhall meeting joined Mrs. Curtis in support of the bill. For the benefit of my fellow Members of Congress, I would like to share the remarks of Mrs. Jean Curtis in support of the American Defense Education Act:

A Gallup Poll last September asked the American people what they believe will be the most important factors "determining America's strength in the future?" Eighty-four percent named "developing the best educational system in the world" the most important factor.

A strong and sound Public Education underlies all the needs of our society. Without strong public schools, we have no way to maintain our industrial strength. Without strong public schools, we have no way to maintain our national defense. Without strong public schools, we have no way to maintain a system that seeks to provide justice and equity for all Americans.

The challenges that confront us today are great. Yet, our situation bears a striking resemblance to a situation that existed in the 1950's. We had allowed our support of public schools to lapse. We had fallen behind in many key areas of instruction. We lacked the mathematicians, technicians and scientists our nation needed to keep up in a world of rapidly advancing technological achievement.

It took the launching of Sputnik by the Soviet Union to awaken our leaders. Congress responded with—among other things—the National Defense Education Act. It worked. It helped improve our educational system. On July 20, 1969, Neil Armstrong walked on the moon.

Unfortunately, since that time, we—as a nation—have become complacent. We stopped emphasizing support for public schools. We allowed ourselves, as a nation, to fall backward again!

Economic success today is based on high technology and efficiency in industry. We are being challenged—and challenged effectively—in these areas. A clear-eyed view of our national circumstances shows that our difficulties in harnessing new technologies are directly connected with our failure to adequately support our public schools. Education makes America work. We have repeated our past mistakes. What must be done now to correct them—not for a brief period, but for the long haul?

Education makes America work. But in order to do so, there must be a commitment to public education on a national level. The American Defense Education Act, introduced by Senator Gary Hart and Representative Carl Perkins, provides incentives and resources for local schools to improve their own education programs in critical areas that relate to the nation's two top priorities: stimulating economic growth and providing for a strong defense. ADEA recognizes a nation-wide program and provides national funding to insure a local solution under local control.

A strong America needs strong public schools. ADEA will be a great help! ADEA authorizes a national program to improve the quality of instruction in the fields of mathematics, the sciences, the communication skills, foreign languages, technology, and guidance and counseling in addition to reaffirming equality of access to education for all. ADEA establishes participation requirements for the local school districts—which participate voluntarily in the program. ADEA provides for an evaluation of the progress of programs developed with ADEA assistance. ADEA provides for incentive payments for school districts working with the ADEA program of a basic payment of 2 percent of the average per-pupil expenditure in that state. ADEA provides that administration of the ADEA will be under the Department of Education with assistance from the Secretary of Defense. ADEA provides for grant programs at institutions of higher learning to facilitate the improvement of teacher training in mathematics and science education. ADEA provides for evaluation of grant program proposals by practitioners from the elementary, secondary and post-secondary communities. ADEA provides for establishment of educational research programs on teaching and learning in mathematics, science, foreign language, the instructional uses of information technologies and the appropriate application of such research.

A strong America needs strong public schools! What can we do? We can write or speak to our congressman, our U.S. senator, our president. Enlist others to do the same thing.

A strong America needs strong public schools! Only the commitment of all of us to excellence can insure strong public schools and a strong America!●

JACK BRICKHOUSE: IN THE BASEBALL HALL OF FAME

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. ROSTENKOWSKI. Mr. Speaker, an outstanding member of the Chicago community, Jack Brickhouse, has been elected to receive the Ford C. Frick award for baseball broadcasting. Jack will receive this award Sunday at the Baseball Hall of Fame.

This marks only the seventh time that such an award has been given, and Jack certainly deserves it. From 1948 to 1980, Jack was the voice of our beloved Chicago Cubs on channel 9. He provided me and thousands of other baseball fans with an honest and enthusiastic description of Cub games. His "Hey, Hey" cheer for infrequent

Chicago Cub home runs was a Chicago tradition. His skills were also on display for the 25 years he announced games for the Chicago Bears.

This lengthy career was probably the furthest thing from Jack's mind when he began broadcasting at the age of 18 in Peoria.

By 1979, he had announced a record 5,000 baseball games. In addition, Jack was called upon to announce several World Series, many All Star games, and many football events.

He has been recognized by his peers in Illinois, and in 1981 was awarded the Outstanding Broadcaster Award.

On Sunday, he will receive the Ford C. Frick Award. I, together with so many fans, can only conclude that it is well deserved.

Congratulations, Jack, on a job well done.●

H.R. 2760

HON. BOB LIVINGSTON

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. LIVINGSTON. Mr. Speaker, I rise in response to a comment made by one of our Members following my speech on H.R. 2760 yesterday.

I had pointed out the declared intention of the Nicaraguan Sandinista government to foment revolution and instill Communist governments throughout Central America, and ultimately, North America, as well.

I had gone through a litany of offenses that the Sandinistas had committed against their own people, and, indeed, against humanity, in the name of their misbegotten cause.

I pleaded with the membership of this body not to become beguiled with the efforts of those who would compromise away President Reagan's efforts to assist those forlorn Nicaraguan Nationals who are fighting for their own freedom, and, yes, in the process, assisting us in the "interdiction of arms to El Salvador."

I called H.R. 2760 an abomination for that is what it truly is.

But the gentleman who followed me said that I should have been giving my speech in support of an effort to repeal the Boland amendment—since that is the vehicle that seems to be tying our hands in Nicaragua.

I agree with him. I do not believe that through covert operations in Nicaragua, we are in violation of the Boland amendment, because I firmly believe that by assisting the Nicuaraguan contras, we are definitely deterring the ability of the Sandinistas to assist the flow of arms to the Salvadoran guerrillas. And as the gentleman from Illinois (Mr. HYDE), pointed out yesterday, deterrence is not an easily definable commodity.

But, I believe that House passage of the Boland amendment, in an effort to sidetrack the far more onerous Harkin amendment, was never intended by the Members to gain the notoriety it has attained. Yes, 411 Members voted for it, I among them, but we were persuaded at the time that it was meaningless verbiage which would not interfere in the ability of the President to conduct foreign policy.

In that, we were wrong. And its impact has been devastating, regardless whether we are in violation of it today, which I insist we are not.

Accordingly, I am today introducing a bill to repeal the Boland amendment—and I encourage my colleagues to join me in cosponsoring it. And I will also enlist the support of my colleagues in my efforts within the Appropriations Committee to see that the Boland prohibition is not again included in the 1984 defense appropriations bill or continuing resolution. We must repeal this very harmful piece of legislation—the future of Central America—and the security of our own people depend on it. ●

RON PACKARD'S QUESTIONNAIRE

HON. RON PACKARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. PACKARD. Mr. Speaker, during April of this year, I sent a questionnaire to my constitutents in California's 43d District. Ten questions, addressing various issues of national concern, were presented for their consideration. I would like to take this opportunity to inform my colleagues of the results of this poll.

First, let me explain the method by which I arrived at these results. All registered voters in my district were mailed a copy of the questionnaire. From the 11,000 opinion ballots returned, 1,000 were randomly selected, and from those random samples the percentage figures listed below were derived. As anyone versed in the science of statistics can explain, such a large random sample more than adequately estimates the actual percentage results of all the respondents.

Here are the results:

1. Do you favor removing Federal controls on the price of natural gas? Yes, 48.1%; no, 51.9%.

2. Do you think the Equal Rights Amendment (ERA) should be made part of the United States Constitution? Yes, 46.4%; no, 53.6%.

3. Do you support President Reagan's efforts to rebuild America's defenses? Yes, 52.6%; no 47.4%.

4. Do you favor banning the sale of land for future offshore oil leasing? Yes, 53.6%; no, 46.4%.

5. Should able-bodied welfare recipients be required to work for their benefits? Yes, 75.3%; no, 24.7%.

6. Should there be less Federal involvement in the education of our children? Yes, 75.7%; no, 24.3%.

7. Would you support imposing sanctions against employers who knowingly hire illegal aliens? Yes, 62.3%; no, 37.7%.

8. Would you support the bullet train proposal as a means of alleviating traffic congestion problems? Yes, 58.4%; no, 41.6%.

9. Do you support continued United States aid to El Salvador and Central America? Yes, 49.4%; no, 50.6%.

10. Should Congress repeal the "indexing" provision which would annually adjust income tax brackets to offset inflation? Yes, 29.9%; no, 70.1%.

This high level of response demonstrates the level of interest that my constituents have continued to demonstrate throughout the 98th Congress. These ever-watchful citizens have never hesitated to call to my attention those matters which they find to be of both local and national importance. I am deeply honored to be their voice in Congress.●

SOUTH CAROLINA HAS BEST REHABILITATION RATE

HON. CARROLL A. CAMPBELL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. CAMPBELL. Mr. Speaker, I would like to bring to the attention of my colleagues the outstanding work and achievement of the South Carolina Department of Vocational Rehabilitation. Once again, South Carolina has the best rehabilitation rate in the entire Nation. In fiscal year 1982, South Carolina had a rehabilitation rate of 265 per 100,000 population, the highest in the Nation. This is much better than the national rehabilitation rate of 97.

I believe much of the credit for the successful vocational rehabilitation program in South Carolina belongs to Mr. Joe Dusenbury, commissioner of the vocational rehabilitation department, and his staff. Joe Dusenbury has instituted a vocational rehabilitation program that has been used as a model for other States due to its rehabilitation rate, efficiency, and innovation.

Vocational rehabilitation is a cost-effective program that I believe deserves the support of all Members of this body. Last year, 226,924 people were rehabilitated and are now working in productive jobs. I am hopeful that this number can be increased in the future, which would result in more handicapped people being integrated into the work force as productive employees and employers.●

THE UNITED STATES DOES NEED MORE SOVIET EXPERTS

HON. TIMOTHY E. WIRTH
OF COLORADO
IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. WIRTH. Mr. Speaker, earlier this month I was privileged to be a member of the House delegation headed by the distinguished majority whip, Mr. Foley, in the first U.S. Congress-Supreme Soviet parliamentary exchange since 1979. During 4 days of talks in Moscow, many of us renewed old acquaintances with our counterparts in the Soviet Union and through intensive discussion learned an enormous amount about the evolution of their views of our Nation over the past 4 years of troubled relations between our two countries.

I returned more than ever convinced that continuing broad contacts with Soviet leaders, on all levels, is absolutely essential to both protecting world peace and beginning to make progress on the issues that divide us as peoples. Today, however, the United States is poorly prepared to engage in such broad contacts—poorly prepared to truly understand the cultural and political pressures which largely define the actions of the Soviets. In our universities and our diplomatic structure, we have lost much of the expertise that made us effective in dealing with the Soviet Union. I commend to my colleagues the following article by Jack Perry, former U.S. Ambassador to Bulgaria, which clearly outlines one of the most serious weaknesses our Nation faces in its relationship with the Soviet Union.

The article follows:

THE U.S. DOES NEED MORE SOVIET EXPERTS

(By Jack Perry)

Charles Bohlen, the dean of US Foreign Service specialists in Soviet affairs, used to say that there were "no experts on the Soviet Union, only varying degrees of ignorance." But Chip Bohlen would have been the first to argue: the less ignorance, the better.

Today some voices suggest that the United States has enough Soviet experts, in government and out. But we need to take a broader view of the utility of Soviet training.

True, jobs strictly for "Soviet types" are now limited in number. But the need is very great for Americans with firsthand knowledge of Soviet affairs who do not necessarily make "Sovietology" their sole or even principal endeavor. In an era when peace, even survival, depends upon relations between the two superpower rivals, it is essential that we have more Americans who can see the USSR through Soviet eyes.

Frankly, it is not of major concern whether the Soviet Union has surpassed the US in the number of "experts" employed full-time *as* experts. The Soviet system is so different from ours that comparisons of such numbers mean little. What is important, and vitally so, is how much each country knows about the other, *and* how that knowledge is folded into the policymaking and decisionmaking system of each country. In that respect, the Soviets have indeed overtaken and surpassed the US, creating not an "export gap" but rather a gap in *utilized knowledge.*

When I began studying Soviet affairs in 1951, the Soviets' knowledge of the US system, mired as they were in Stalinist fears and superstitions, was abysmally poor. Their governmental decisionmaking was based in large part on preconceptions and mistaken assumptions when it came to American policy. But they soon became aware of their ignorance. They moved to correct it. They built up an embassy in Washington that learned the intimate inside lessons of how U.S. society and government operates. They created academic institutions dedicated to learning American affairs inside out. And—what is remarkable—they elevated men with knowledge of American affairs to positions of responsibility, while their policymaking increasingly reflected real knowledge, not false assumptions, about our system. The effect of their efforts is written in the record.

What were we Americans doing in the meantime? To a considerable extent, going backward.

After World War II we had a strong cadre of Soviet specialists in the foreign service, men like Bohlen and George Kennan and Llewellyn Thompson. We had academics like Geroid Robinson and Phillip Mosely launching the Russian Institute at Columbia University, and others like them elsewhere. When I studied Soviet affairs at the Russian Institute in the '50s, American academia had a strong grasp of Soviet affairs; and when I entered the foreign service in 1959, I found the "Moscow Club" of Soviet specialists strong and influential.

That changed. Our system gradually ceased to incorporate those with practical and academic knowledge of the USSR into our policymaking structure. (Those who had preconceptions became more acceptable.) Inside the foreign service, the "Moscow Club" was largely disbanded as an influential group, owing in good part to appointments of outsiders without Soviet experience in place of career Soviet specialists who spoke Russian and had lived in Moscow. Increasingly, U.S. political leaders came to rely on those with an acceptable ideological view of the Soviet Union, rather than with practical experience of that country. Again, the record will show the result.

Meanwhile many American organizations and industries took the position that rather than employ those with Soviet experience they would take their own people and give them a crash course in Russian and in Soviet affairs—a triumph of the narrow over the broad view of what kind of Soviet knowledge is needed. Good students began to turn away from the Soviet field because the rewards did not seem commensurate with the hard work involved. We seemed to enter an era when those who knew the Soviet Union as a real country with real problems and ambitions were shunted aside, while those involved in Soviet affairs were those who looked on the USSR in abstract, preconceived ways. Yet wise policy is usually based on real things, not abstractions.

It was this situation which Averell Harriman sought to help turn around with his important gift to the Russian Institute, now the Harriman Institute, while Harvard and other centers of Soviet studies are also making major efforts to increase their reach and effectiveness. Marshall Shulman, the widely respected head of all Harriman Institute, has made clear his dedication to the ideal of broadening Soviet studies, so that more Americans in many fields will have the kind of knowledge of Soviet reality that can equip them to deal with a world dominated by this rivalry. The aim, which all men of goodwill ought to share, is to create a large, influential group of men and women who know the soviets well, from experience, and who will incorporate that knowledge into their regular activities in whatever area—in journalism, in academia, in business, and certainly in government.

Basing ourselves on Bohlen's saying, we should not worry too much about job limitations for Soviet "experts" do not exist anyway—and we can certainly hope that job opportunities will widen. What concerns us most is the great need for more people with knowledge of Soviet affairs in positions of authority, so that decisions taken throughout our society and government are based not on ignorance but on real knowledge of this all-too-real country.

The challenge from the Soviet Union will endure for a long time. We are obliged to know our rival. In this light, we need not fewer people with Soviet training, but many more.●

IN TRIBUTE TO JOHN DALY, RETIRING MANAGER OF THE HOLYOKE SOCIAL SECURITY OFFICE

HON. SILVIO O. CONTE
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. CONTE. Mr. Speaker, next Friday night, August 5, the manager of the Holyoke, Mass., Social Security District Office, John Daly, will be honored at a retirement dinner. I want to call to the attention of my colleagues the work of this dedicated Government employee.

John first joined Government service by working in the Meriden, Conn., Post Office during Christmas vacations. In June of 1939, he received his B.A. degree from Wesleyan University in Middletown, Conn. On October 20 of that year, he was appointed field assistant in the Waterbury, Conn., Social Security Office. In June of 1940, John received his M.A. in economics from Wesleyan.

On July 29, 1942, Mr. Daly left his work at the Social Security Administration to join the Army. He was discharged in April of 1945 with the rank of sergeant, and was awarded the Good Conduct Medal and the European-African Middle Eastern Theater Medal. After leaving the Army, he returned to his former position in the Waterbury social security office. Throughout the remainder of the 1940's, 1950's and early 1960's, John worked in Connecticut Social Security Offices, and in 1965 became district manager in the Holyoke, Mass., Social Security Office.

Mr. Speaker, John's record is very clear: 44 years as an employee of the Social Security Administration, and 49 years of working for the Government in some way. As a district manager for this Nation's most important social welfare/income maintenance program, John has direct contact with those elderly Americans who we try to help through the legislative process. But while we in the Congress deal with generalizations to a certain degree, people like John have more direct contact with the public every day. It takes a remarkable person to be able to do this day after day—but to do it for 44 years is nothing short of amazing.

John has been of tremendous assistance to my office more times than I can count. A good deal of a Congressman's work is casework—constituent service—and a large part of my casework deals with social security in general and social security disability particularly. Those persons on disability or applying for disability in John's service area know that they will be treated with compassion and concern. As well, I know—as does my office—that John's office will be of the most assistance they can in answering constituent questions and concerns.

Mr. Speaker, the remarkable, distinguished and dedicated career of John Daly, the district manager of the Holyoke, Mass., Social Security Office deserves recognition. This is why I have called this man's service to the attention of my colleagues—and why I say thank you to John for a job well done.●

CUT IN DISABILITY BENEFITS CAUSING ANGUISH

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. FORD of Michigan. Mr. Speaker, the matter of social security disability benefits becomes more serious by the day. The General Accounting Office has said that the Social Security Administration is arbitrarily terminating about 44 percent of all those whose paperwork they review. Hardly a day goes by when I do not receive a call or letter from one of my constituents complaining about the cold and aloof manner in which his or her disability entitlement was summarily terminated.

Now comes this article from the July 26 edition of the Ann Arbor News describing some of the actions being taken by State workers in Michigan who assist the Social Security Administration with this overload of disability cases. It is a sad state of affairs, Mr. Speaker, when workers are forced to hide or sit behind bulletproof glass and it is a sad state of affairs when the disability recipient feels so frustrated that he or she threatens a State employee.

This article causes me great concern and I call it to your attention at this time.

[From the Ann Arbor News, July 26, 1983]

INCREASED THREATS FORCE BENEFITS WORKERS INTO HIDING

(By Michael Lewis)

LANSING.—Besieged by threats from persons whose disability benefits have been cut off, some state workers are going into hiding for protection.

Plans for opening a state office building in downtown Kalamazoo include measures to keep its location secret from the public, even though 145 employees will be working there. The planning also involves—at the advice of state police—bulletproof glass, electronic doors, security guards and an absence of identifying signs.

"We've had a steady increase in complaints and threats. We had a dud bomb mailed to our Southfield office. It's uniform in all the offices," said Ivan Cotman, associate superintendent of Michigan Department of Education.

The Social Security Administration pays the state education department to handle disability cases in Michigan. New laws which went into effect last year require more frequent case reviews, often resulting in loss of benefits. That has increased the number of threats to workers dealing with disabled clients.

Security measures do not disrupt work because the regional offices conduct most of their duties by phone and mail, rather than walk-in service, officials said.

Stress among employees became so great that an expert from Michigan State University was brought in to help them cope with the problem, said Cotman.

Cotman said 158 threats were made at the state's three offices—Lansing, Southfield and Traverse City—between May 1982 and last month. The threats are almost evenly divided between suicide and violence against others.

One man who was denied disability benefits two years ago took a gun to a Social Security office in Lansing. The man, who had reportedly threatened workers at the office, committeed suicide outside of the building.

"It's an anxiety producer," Cotman said of the benefits reviews. "Some of them go bananas. I was threatened myself a few years ago by a guy with a cane."

Protective glass and security doors for the offices have cost the state $9,000, Cotman said. That figure does not include the cost of hiring security guards, which he estimated at $35,000 annually for two guards.

Disability payments are awarded through the Social Security Administration when it is determined that a physical or mental impairment prevents a person from working for at least a year. Cotman said the average payment to an individual with spouse and children is about $700 a month.

Security is also a problem for the Department of Social Services, which pays more than $1.6 million a year for unarmed secutiry guards at offices in several large counties, including Wayne, Washtenaw, Saginaw, Muskegon, Kent, Kalamazoo, Jackson and Genesee.

"We have had some clients get disruptive. There have been threats and there have been knifings," said John Smith, director of administrative services.

Tom Farrell, spokesman for the education department, said disability offices around the country are taking similar security precautions. Officials at the Social Security Administration headquarters in Baltimore were unavailable for comment.

"You can't be too careful," Farrell explained. "Security is big business these days. It's a growth industry."●

RCRA FUNDING FOR SOLID WASTE MANAGEMENT

HON. GUY V. MOLINARI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. MOLINARI. Mr. Speaker, our colleague from Michigan, DAVID BONIOR, will offer an amendment this week to H.R. 2867, the Hazardous Waste and Control Act of 1983, to restore the initial authorization levels in the Resource Conservation and Recovery Act (RCRA) for solid waste management. I urge my colleagues to support that amendment.

As Congress considers the reauthorization of RCRA, it must not overlook that one of the fundamental objectives of RCRA is just what it says, "resource conservation and recovery". Over the past few years, "cradle-to-grave" management of hazardous wastes has dominated national attention. As a result, funds initially intended for conventional solid waste management have been diverted to regulating hazardous material. While this is indeed an essential function of RCRA, effective regulation and management of nonhazardous wastes is equally important. The act, as passed in 1976, clearly stated its intent to provide a comprehensive approach toward waste disposal—for both hazardous and nonhazardous wastes. Federal responsibility to provide financial and technical assistance to the States for improving their solid waste management programs is expressly outlined under section 4008 of RCRA. Yet today there are no Federal funds authorized for that purpose.

RCRA, as passed in 1976, provided funding for fiscal years 1978-82. However, over the past 3 years Federal assistance for the solid waste program has been phased out completely. Moreover, States have diverted their limited resources into their hazardous waste activities which, unlike nonhazardous waste programs, receive Federal matching funds.

The Environmental Protection Agency has estimated that the United States generates enough solid waste every day to fill New Orlean's Superdome from floor to ceiling—twice—and the amounts will continue to grow as American urbanization accelerates. The magnitude of the solid waste problem is painfully clear when we consider that land for its disposal is a

fixed, limited resource. With approximately 90 percent of American waste disposed of on land, new dumping sites are becoming increasingly diffucult to find. Some estimates predict that as early as 1990, America will run out of space for all the garbage it generates.

The city of New York, for example, is on the brink of a crisis as all its landfills have reached their capacity. The city plans to close all its landfills except one, the Fresh Kills landfill on Staten Island. Yet, this remaining landfill, which already receives 50 percent of the city's waste, has already grown to uncontrollable proportions—3,000 acres in area or five times the size of Central Park. If New York City executes its plan, residents of Staten Island will be forced to live with mountains of garbage up to 500 feet in height.

Bold new initiatives to recover reusable material are key to solving our current and projected solid waste management problems. Resource recovery, that is, recovery of material or energy from solid wastes, can achieve significant volume reduction. In addition, rising disposal costs, dwindling domestic energy resources, and rising energy and materials costs make resource recovery increasingly attractive. In fact, the energy recovery potential from municipal solid waste equals 400,000 barrels of oil per day or one third of the Alaskan pipeline flow.

Congress mandated that the States come up with effective solid waste management and resource recovery plans when it passed RCRA in 1976. Yet, the States have not met that challenge.

Following the enactment of RCRA, States set in motion new ideas and improved methods for disposing of their wastes and upgrading their existing facilities to insure that they met health and safety standards. This required skilled personnel and adequate resources. Once those resources were dried up, the rising momentum came to a screeching halt. New York, for example, was able to survey only one-third of its landfill facilities before all its funds were expended. There is no guarantee that the remaining two-thirds are in compliance. Our past experience with illegal dumping of hazardous material at nonhazardous waste sites raises no question of the need for effective oversight. What we neglect to control today could turn up on the Superfund priority list tomorrow.

In closing, Congress has given the States their mandate to implement effective solid waste management programs. RCRA expressly recognized the Federal Government's role in providing financial and technical assistance to help them fulfill that responsibility.●

DRUG CONTROL EFFORT MUST BE COORDINATED

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 29, 1983

● Mr. FASCELL. Mr. Speaker, I can think of almost no other effort by the Federal Government, with the exception of conducting a war, that requires coordination and direction at the very highest level in order to succeed than that of illegal narcotics interdiction. In fact, this right can truly be considered a war because the enemy is highly organized, highly financed, and highly armed with the actual weapons of war.

For many years I have been pleading with several administrations to apply the task force approach to the problem. It was attempted by the Carter administration but was short lived and did not commit the resources necessary to do the job. To its credit, the Reagan administration, under the able leadership of Vice President BUSH, has undertaken this effort and we, in south Florida, have been the fortunate beneficiaries. The south Florida task force has been extremely successful in letting those who reap enormous profits from illegal narcotics know that we mean to put them out of business. Perhaps even more important, it has restored the confidence of the community that Government does care and can act to prevent it from being run over by those who have no respect for law or order.

The result of the south Florida effort has been to force narcotics traffickers to move elsewhere, to other parts of the country. This has led, in turn, to the establishment of 12 additional task forces around the Nation. At the time this decision was made, it was also announced that the leadership of the entire task force operation would be transferred from the Vice President's Office to the Attorney General.

Along with many of my colleagues from Florida, I strongly protested this move. The entire success of the South Florida task force can be laid directly, in my opinion, to the fact that it was headed by someone of the Vice President's authority and level of office. Only an official with the ability to direct all agencies of the Federal Government involved in the task force—and this includes the FBI, DEA, Customs, Coast Guard, Justice Department, the State Department and the military—can be successful. I firmly believe that to transfer this authority to one agency, such as the Justice Department—no matter how competent and able those leading that Department may be—can only result in a resumption of the bureaucratic squabbling and ineffectiveness that we have all seen before.

All of what I have said so far relates to the coordination or the interdiction of narcotics traffickers who are physically transporting the contraband. Related to this is the tracking of the money which is made by the top levels of those involved in the trade. It is fine to go after the mules and we should continue to do so. But we must also have a strong and committed program to go after those who make the enormous profits from this business. If we can find and convict them, we will have made a major step toward eliminating this problem from our society. This requires the coordination and cooperation of the IRS and the Department of Justice, along with State and local authorities. It is my belief that this aspect of the problem also requires high level direction and authority and should be included under the same overall director of the interdiction effort as well.

What this all boils down to is that the director of the task force effort must be someone with a direct line of authority to the President. Let us face it. The task force approach is extremely expensive. We, as a society, have made the commitment that the expense is worth it. But if we are going to maintain this commitment, then let us do it right.●

CONFERENCE REPORT ON H.R. 2973, INTEREST AND DIVIDENDS TAX WITHHOLDING REPEAL

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 28, 1983

● Mr. KOLTER. Mr. Speaker, I would like to take this opportunity to clarify my vote on the conference report on H.R. 2973, Repeal of Income Tax Withholding on Interest and Dividends and the Caribbean Basin Economic Recovery Act.

I am disturbed and disappointed that this conference report contains both of the above mentioned bills. I feel that these two issues should have been taken up separately so that Members could have cast their vote on the true merits of each. I have been a very strong supporter of the repeal of tax withholding on interest and dividends. I feel that repeal was a result of the people of this country making their voices heard in Washington. It was a great victory for the American taxpayer. I am glad to have played a part in defeating the uncalled for and unnecessary income tax.

However, while I strongly supported repeal of the withholding tax, I just as strongly opposed the Carribean Basin Initiative bill. So the fact that these

two issues were combined in the conference report posed a dilemma for me and many other Members who voted against the CBI bill. Obviously, had I been able to, and in order to be consistent with my previous votes on these issues I would have voted "aye" on the repeal of withholding and "nay" on the Caribbean Basin Initiative. I regret not having the opportunity to do so.

I oppose the CBI legislation because it is a one way trade bill that will export thousands of American jobs in industries that have already been devastated by foreign imports.

This bill will permit unlimited quantities of import-sensitive products such as steel to be shipped duty free into the United States through the Caribbean. We already and obviously have had tremendous job losses in this country in key industries due to this kind of foreign trade abuse. I fail to understand why we are willing to deliver another blow to these import sensitive industries. I cannot support a bill that will allow multinational corporations to partake of a bonanza of cheap wages, nonexistent health and safety conditions and duty free access to the United States.

Finally, Mr. Speaker, since the repeal of the Withholding Tax and the Caribbean Recovery Act are two very distinct and separate issues I believe we should have had the opportunity to vote on them separately.●

SENATE—*Monday, August 1, 1983*

The Senate met at 11 a.m., and was called to order by Hon. SLADE GORTON, a Senator from the State of Washington.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Blessed be the name of God for ever and ever: for widsom and might are His. He changeth the times and the seasons. He removeth kings, and setteth up kings. He giveth wisdom unto the wise, and knowledge to them that know understanding.—Daniel 2:20, 21.

Lord of history, we thank Thee for the belief which our forebears considered self-evident: That the people are sovereign—that government receives its just powers from the consent of the governed—that government is instituted to secure human rights which are inalienable, because they were endowed by God, who created all men equal.

Grant O God, in these critical days which challenge our political system, that we remember this foundation upon which our founders built—that if we remove faith in the God who gives us life and liberty, we jeopardize the whole structure. In Jesus' name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 1, 1983.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable SLADE GORTON, a Senator from the State of Washington, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. GORTON thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

Mr. BAKER. I thank the Chair.

SENATE SCHEDULE

Mr. BAKER. Mr. President, the Senate has reconvened just now pursuant to a unanimous-consent order which provides that notwithstanding our adjournment the reading of the Journal will be dispensed with, no resolution will come over under the rule, the call of the calendar has been dispensed with, and the morning hour has been deemed to have expired.

Mr. President, it might be at this time, appropriate for me to outline the schedule, as I see it, for this week, the final week before our scheduled and statutory recess period beginning on August 5, and extending until September 12. It will be a full week. I anticipate that today a motion will be made once more to proceed to the consideration of the agriculture target price bill and I expect opposition to that.

In addition to the agriculture target price bill, I wish to take up one of several things today that may become available. For instance, there is a possibility, I understand, that a time agreement might be reached on the revenue sharing reauthorization bill. That is an important bill, and I wish to do that this week and certainly to do it today if it can be cleared.

We also have a Department of Transportation appropriation conference report which I am advised will probably reach us from the House of Representatives tomorrow by midafternoon. I propose to take up that privileged matter as soon as we receive it and to try to complete action on it as promptly as possible.

On Wednesday at 2 p.m. in the afternoon a live quorum under the provisions of rule XXII will commence and, after the quorum is established, a vote on cloture will occur filed against further debate on the motion to proceed to the consideration of the Radio Marti bill, which I believe is S. 602.

If cloture is invoked at that time, the Senate, pursuant to the rule, will continue to debate and deal with the Radio Marti bill until its final disposition.

It is possible that another cloture motion will be filed if cloture is not invoked on the first try. I do not rule out the possibility, however, that cloture will be invoked.

The Department of Defense authorization conference report almost surely will reach us during this week. I spoke with the chairman of the Armed Services Committee today and he expressed the hope that they might finish on Wednesday but more likely on Thursday. That measure must be dealt with before we leave, in my judgment, and that probably means then that the Senate will be in session on Friday of this week.

I expect to ask the Senate to turn to the consideration of the Department of Defense authorization bill when we receive it this week. So I anticipate that that will be either late on Thursday or during the day on Friday.

I have announced earlier that we will go out on August 5, which is Friday, absent a national emergency or grave legislative matter that I do not now foresee. Plans have been made and I do intend to ask the Senate to adjourn pursuant to the resolution at the close of business of Friday, August 5, and no later.

There are a number of other matters that can be brought up and I wish to see dealt with. I may have mentioned a railroad retirement bill. When it reaches us, we will take that up if we can.

I will confer from time to time with the minority leader on these measures during the week, and we will try to arrange the remaining schedule of the Senate for this week to suit the convenience of as many Senators as possible.

But Senators should know as indeed they do know that as we come down the home stretch, so to speak, in this final week before the August recess, convenience sometimes will have to give way to necessity and we will do what we must do. So Members who intend to contest the particular measures should check daily with their respective Cloakrooms, certainly with my cloakroom on this side for Members on this side of the aisle, to make sure that they keep apprised of the agenda for this week, since there are a large number of items that may be taken up and a fairly indefinite schedule on when they will be taken up or how long they will be before the Senate and how long they will take to dispose of.

That rather rambling report is as good as I can do, I am afraid, for Monday morning. So I believe that is all I have to say at this moment.

Mr. President, if I have any time remaining, I ask unanimous consent that I may reserve 1 minute of my time under the standing order.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I yield the floor.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the minority leader is recognized.

WHAT THE NATIONAL ACADEMY OF SCIENCES REPORT SAID ABOUT ACID RAIN

Mr. BYRD. Mr. President, a few weeks ago the National Academy of Sciences issued their long-awaited report on acid rain. The report was hailed as a major event in the debate over acid rain. However, the meaning of that report with respect to the various legislative proposals to control acid deposition has been the subject of some dispute. For example, one group, which supports the imposition of stringent emissions controls on Midwest and Appalachian coal-fired powerplants, claimed that the NAS report concludes the scientific debate over what to do about acid rain.

Recently I made a statement on the floor of the Senate which raised questions about that interpretation of the NAS report's findings. I pointed out that legislative proposals to control acid deposition in the Northeast by requiring coal-fired powerplants in the Midwest and Appalachia to significantly reduce their emissions of SO_2 are not based upon the conclusions of the National Academy of Sciences.

I find that my reading of the report is consistent with the views of Dr. Volker Mohnen, one of the members of the scientific committee that prepared the NAS report, and an internationally renowned atmospheric scientist. In the July 29 edition of the New York Times, there is a letter to the editor by Dr. Mohnen which expresses his concern that the findings of the NAS report not be misinterpreted as being supportive of acid rain legislation pending in Congress, such as the bill reported by the Senate Environment Committee.

The NAS report said that there is a link between acidic deposition and emissions of sulfur dioxide. It also said that if there was a uniform reduction in emissions over the entire Eastern United States, there would be a similar reduction in deposition over the entire area. However, Dr. Mohnen points out, the report also said that such a reduction would occur "only if emissions are reduced by an equal percentage throughout eastern North America and only if all other pollutants and factors are unchanged."

The Environmental Committee's bill does not call for such uniform reductions. For example, the bill places the heaviest burden on the Midwest and Appalachian States and very little burden on the Northeast. Indeed, Dr. Mohnen points out that the "Academy's report specifically warns that the effect of such a control strategy on the sensitive areas of the Northeast cannot now be predicted since the contribution of Midwestern sources to acid rain in those areas remains basically unknown."

As Dr. Mohnen's letter clearly indicates, those who claim that the NAS report concludes the scientific debate about how to address the acid rain problem simply go beyond the actual findings of the report. In fact, Dr. Mohnen points out that "it is important not to confuse the Academy's findings. It has concluded that sulfur dioxide emissions are related to acid deposition; it has not concluded that the control strategy adopted in the pending legislation will solve the problem, and it has specifically cautioned against assuming that the strategy will be effective."

Mr. President, I ask that a copy of Dr. Mohnen's letter be inserted in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEFECTS IN LEGISLATION ON ACID RAIN

TO THE EDITOR: Recent news stories on the National Academy of Sciences' report on acid rain (June 30 and July 5) suggest that it supports the bills pending in Congress to control acid rain by requiring major reductions in sulfur dioxide emissions from coal-burning power plants and factories. As a member of the Academy's committee that prepared the report, I am concerned that it not be misinterpreted.

The report does conclude that there is a link between sulfur dioxide emissions and acidic deposition ("acid rain"). It also concludes that a uniform reduction in such emissions over the eastern U.S. could be expected to result in a similar reduction in acid rain averaged over the same region, but only if emissions are reduced by an equal percentage throughout eastern North America and only if all other pollutants and factors are unchanged.

The bills do not provide for that. They impose the largest percentage share of the emission reductions on sources in the Midwest, and relatively little on those in the Northeast, which contains most of the areas where acidic deposition has effects; and they make no serious effort to address other pollutants, such as oxides of nitrogen.

The Academy's report specifically warns that the effect of such a control strategy on the sensitive areas of the Northeast cannot now be predicted since the contribution of Midwestern sources to acid rain in those areas remains basically unknown.

In considering the best legislative response to the acid rain problem, it is important not to confuse the Academy's findings. It has concluded that sulfur dioxide emissions are related to acidic deposition; it has *not* concluded that the control strategy adopted in the pending legislation will solve the problem, and it has specifically cautioned against assuming that that strategy will be effective.

The report states: "Because we cannot rely on current models or analyses of airmass trajectories, we cannot objectively predict the consequences for deposition in ecologically sensitive areas of changing the spatial pattern of emissions in eastern North America, such as by reducing emissions in one area by a larger percentage than in other areas."

VOLKER A. MOHNEN.

Mr. President, I ask unanimous consent that I may reserve my time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BYRD. I thank the Chair.

Mr. BAKER. Mr. President, there is an order for a period for the transaction of routine morning business of 1 hour in length in which Senators may speak for not more than 10 minutes each.

Mr. President, I yield back the remainder of my time, if any, and I ask the Chair to comply with the provisions of that order.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 1 hour with statements therein limited to 10 minutes each.

Mr. BAKER. Mr. President, I see no Senator at this moment seeking recognition, and I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXTENSION OF TIME FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, from time to time over a period now of 3 years, actually more than 3 years, the minority leader, formerly in his role as majority leader, has given us the benefit of his extensive and scholarly research on the history of the Senate in speeches delivered from time to time.

The minority leader has indicated to me he is prepared to make one of those speeches today, perhaps.

Therefore, I ask unanimous consent that the time for the transaction of routine morning business be extended to not past the hour of 1 p.m. and that the limitation on the length of speeches not apply to the distinguished minority leader.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

Mr. BYRD. Mr. President, I thank the distinguished majority leader. I have assured him that I will not today, as I have never before, trespass on the time of any Senator who wishes to speak. I am always happy to yield.

Any time the majority leader has any business to transact, of course, I

will abdicate my time, with that understanding.

Mr. BAKER. I thank the minority leader.

Mr. President, I once again suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

WHO FEARS ARMS CONTROL AND WHY

Mr. PROXMIRE. Mr. President, for anyone truly concerned with what this country is up against in achieving arms control, a recent paper by Robert Foelber, a policy analyst for the Heritage Foundation, makes chilling reading. Mr. Foelber writes as a friend and supporter of the Reagan administration's arms control posture. More than anything I have read lately, it explains why we have reason to be pessimistic about any genuine arms control agreement developing from negotiations conducted by this administration. To the extent the Foelber analysis reflects the administration's position, we are in trouble, deep trouble.

Mr. Foelber starts from the position that the Reagan administration is right—all right—100 percent right in its negotiating posture. And the Russians are wrong—all wrong—100 percent wrong. Anyone who has ever negotiated anything with anybody will tell you that anyone who enters negotiations with this attitude is simply wasting his time. Anyone who views negotiations this way is looking for confrontation, not agreement, and confrontation he will get.

From this point on, we are absolutely right and the other side absolutely wrong. The going for arms control goes steadily downhill in the Foelber analysis. Mr. Foelber devotes most of his paper to denunciation of SALT, selecting SALT as the arms control prototype and contending that it constituted the basis for a Soviet buildup in nuclear numbers, in warhead expansion, in modernization, in surprise-attack advantage, in leaving the United States undefended, in curtailing U.S. weapons development, in permitting Soviet violations, in obstructing verification, and in increasing superpower tensions. All of this, according to Mr. Foelber, is the fault of SALT.

Now, Orwell would have found much to agree with Foelber. To Foelber arms control leads to arms buildup. Forget about any other of the myriad of factors that fed the Soviet nuclear buildup. It is all SALT's fault.

Foelber argues that the reason for this is that the Soviets have no interest in superpower balance—they want superiority, not balance. Foelber sees all our arms control efforts to date as helping the Soviets move to that superiority.

He then concludes with his formulation of the shape our arms control efforts should take in the future. And he offers a formula that is an absolute 18-carat guarantee for arms control failure. Here is what he asks:

First, he wants verification. Now, that is fair enough. We all want verification. But Foelber attaches a special definition of verification. Adequate verification is not enough. He wants strict verification. We must be able to detect Soviet cheating fully and at once. It is not enough for us to be able to know the Soviets are cheating in time for us to take remedial action before the strategic balance is altered.

Then Foelber argues that limits should be equal for both sides. Mr. Foelber does not define equality. Certainly, the Soviet and U.S. nuclear arsenals sharply differ, with far more Russian land-based missiles and far more U.S. sea- and air-based missiles, with greater megatonnage for the Soviets and greater survivability for our more mobile and less vulnerable deterrent. Could negotiators work out a balance of deterrent force on both sides, given these sharp differences? Certainly, but not if they insist, as does Mr. Foelber, on a precise—and not a simply adequate—balance. The Foelber attitude will always be that the Soviet power is superior. A Soviet equivalent of Foelber will always see it precisely the other way.

But now comes the Foelber ace in the hole. Even if verification is more than adequate and is precise and complete, even if the limits on both sides are accepted as equal, Foelber would toss this ace of a veto on the table. On top of all this, Foelber would insist that the agreement "should not prevent the United States from deploying those forces necessary to support its military strategy."

To see how outrageous this last demand really is, just turn it around. Suppose, after we worked out an agreement with the Soviet Union that provided full verification to everyone's satisfaction and equal nuclear arms limitations that both sides accepted, the Soviet should say to this country: "We agree; but, on top of all of this, the agreement will not prevent us from deploying those additional nuclear forces we consider necessary to support our military strategy." Can you imagine the howls that would go up right here on the floor of the Senate? And I can tell you that the senior Senator from Wisconsin would be right out there howling with the rest of them.

There is no way we in this country could accept such a Soviet formulation. And there is no way they would accept such a proposition from us. We would be saying, in effect, that we will cap the arms race except where we consider it necessary to uncap it.

Mr. President, this analysis for the Heritage Foundation convinces me that, even among the most thoughtful, intelligent, and best-informed supporters of the administration—and Mr. Foelber is all of those things—there is a determined desire to stop arms control, a desire to continue an untrammeled arms race.

On Saturday night, I released a statement based on hearings I conducted a few weeks ago that pointed out that the Soviet Union seems to be getting into serious economic trouble. Its economy is certainly slowing down. It may now be necessary for the Soviets to put not the 6 or 7 percent of their gross national product into their military effort that we invest in our military security, but as much as 15 or even 20 percent to continue the race with us.

But can anyone really doubt that they will do it? Why not? For 65 years they have had an iron grip on their people. They can continue to squeeze down on the Russian standard of living—and they will, if they have to do so. But they are under real pressure now to reach an arms control agreement that would permit them to ease up a little. Let us take advantage of this opportunity. Yes, indeed, let us be firm and careful in our negotiations. We should insist on adequate verifiability and overall equality, but we should take advantage of the overwhelming interest of both countries in stopping the arms race.

POLAND AND HUMAN RIGHTS

Mr. PROXMIRE. Mr. President, I once again rise to speak on the Genocide Convention. As you may know, it designates the premeditated destruction of a national, racial, ethnic or religious group as a crime against humanity.

It disheartens me to realize that in so many nations across the world that although genocide is not occurring, there is a genuine lack of regard for human rights that makes genocide only too possible. Poland is one such nation.

It has been over a month now since the Pope visited Poland. Reflecting on this, we are once again reminded of the tenuous situation there. We feel deeply for the people of Poland and their plight. We commend the Polish Government for the lifting of martial law, although we must never forget the treatment the Polish people suffered under martial law and to an extent still suffer.

Daily we would learn of the Polish martial law Government's continuous effort to clamp down violently on dissent. The special police continued to interrogate and incarcerate members of the outlawed union, Solidarity. They continued to harass the church, which steadfastly stood up for human rights. The Pope again and again in his speeches harked back to the theme that man-made governments have no prerogative to deny citizens their natural rights.

Lech Walesa, leader of Solidarity, in a speech delivered for him at the Harvard commencement, lauded the great concern and help that was manifested in the United States toward Poland. He related how difficult the situation still is in Poland and the need for continual action to achieve fundamental rights.

We must respond to his acclaim of us and to his plea for unfailing help. Poland is just one gross example of many places in the world where human rights violations are commonplace. These human rights violations in Poland, although far short of genocide, reflect man's inhumanity to man which makes possible genocidal exterminations.

Other oppressed countries look to us for relief and leadership in this matter. These people need moral as well as physical support. The least we can do to help courageous people such as these is to give them the moral support necessary for them to continue their valiant struggle for human rights. We, the United States, must continue to be a stalwart of democracy and freedom against those violations.

By ratifying the Genocide Convention, the United States can once again reaffirm its support for these people and the quest for human rights. I strongly urge that we ratify.

WASHINGTON PUBLIC POWER SUPPLY SYSTEM BAILOUT

Mr. PROXMIRE. Mr. President, there is a provision in H.R. 3363, the Interior appropriations bill, that I am seriously concerned about and would like to call to the attention of my colleagues. In subcommittee markup, a far-reaching amendment was made to this bill which makes major changes in the financial structure of the Washington Public Power Supply System (WPPSS) and grants broad new powers to the Bonneville Power Administration to finance the completion of WPPSS nuclear powerplants 1, 2, and 3.

This is the same WPPSS that last week defaulted on $2.25 billion in obligations to finance two other nuclear powerplants, units 4 and 5. WPPSS is a system in chaos that has plunged the security markets into disarray and is involved in massive litigation between bondholders, investor-owned utilities, publicly owned utilities, and ratepayers.

Yet, in the midst of an extremely volatile and complicated situation, we have been handed a complex, last-minute WPPSS bailout plan by the Interior Appropriations Subcommittee. It is a piece of legislation drafted by its major beneficiary, the Bonneville Power Administration (BPA) and it is designed to protect and expand BPA's interest in WPPSS.

This provision, we are told, is needed in order to complete construction on WPPSS units 2 and 3. Because of the defaults on the bonds for plants 4 and 5, we are told that it will be impossible for WPPSS to raise the more than $1 billion needed to complete units 2 and 3 on the publicly traded bond market. The cure, we are told, is to create some new entity that supposedly will be able to raise the money to finish units 2 and 3, in spite of all the financial chaos and litigation surrounding the entire WPPSS project.

The Interior Appropriations Subcommittee bailout plan gives the Bonneville Power Administration—a Federal agency that is the primary WPPSS customer—authority to make direct payments to the new financial entity this amendment would establish. This new entity would have responsibility for WPPSS units 1, 2, and 3. Creation of this new entitity, of course, is a clear effort to legally separate the nearly finished units from the defaulted units 4 and 5 for the purposes of litigation. That is the kind of jockeying that itself is almost certain to become an issue in the courts and simply add to the current deluge of WPPSS litigation.

What has been lost in this rush for a quick fix to the WPPSS crisis is a careful examination of the new risks involved in giving Bonneville Power sweeping new powers and responsibilities for the WPPSS plants. Plants 1, 2, and 3 will no longer be financed by the WPPSS consortium of 23 Northwestern utilities.

They will survive or go bankrupt based solely on the ability of Bonneville ratepayers, who have already suffered fivefold, and in some cases, twelvefold, rate increases since 1979, to pay the rates needed to cover the entire costs of operation and debt service for WPPSS 1, 2, and 3. The bonds to be issued by the new entity that replaces WPPSS would be secured by a contract with Bonneville Power that commits BPA to pay the principal, interest, and related costs on the new borrowings to the new entity or its debtholders.

In other words, this bailout plan depends on Bonneville's ability to carry the full weight and respond to any future financial crisis at the WPPSS plants. That would be a heavy burden even for a healthy agency, but recent examinations of BPA and its financing by committees of the Congress reveal that Bonneville is itself in trouble and is increasingly unable to pay back its own debts to the Treasury.

BPA now represents a $7 billion Federal investment that is supposed to be paid back to the Treasury. Since its creation in 1939, Bonneville has paid back a total of $638 million to the Treasury. But in the last 10 years, it has managed to pay back only $43 million. As a percentage of Federal investment, Bonneville's paybacks have steadily dropped from 15 percent in 1975, to 10 percent in 1980, and to just 8 percent in 1983. Because BPA now estimates that its fiscal year 1983 revenues from power sales will lag behind its forecasts by as much as $350 million, Bonneville will fall even further behind in its repayment schedule this year, adding another $120 million to its unpaid bill.

The General Accounting Office has condemned BPA for this practice and called it an unsanctioned burden on Federal taxpayers. The Federal Energy Regulatory Commission now says that BPA's pattern of increasingly delayed repayments to the Treasury has cost the taxpayers between $780 million and $1.4 billion.

What about BPA's financial condition after such a WPPSS or Super-WPPSS bailout? Let me quote from a recent statement by Congressman JAMES WEAVER, who chairs the House Interior Subcommittee responsible for oversight on Bonneville. He states:

> Despite skyrocketing rates, BPA has been unable to keep up with the required debt service payments to WPPSS bondholders without shorting the U.S. Treasury during each of the past 7 consecutive years, even under a repayment method that pushes large costs continually into the future. More cost to BPA for paying debt service on Super-WPPSS bonds or on high-interest bank loans secured by Super-WPPSS would simply mean that BPA will pay the Treasury less and shift a larger "un-sanctioned burden" onto Federal taxpayers. Make no mistake. This is a federal bail-out for WPPSS funded by all Federal taxpayers.

Mr. President, the question here is how in the world can we reasonably assign the responsibility of saving, of bailing out the WPPSS system to an agency like Bonneville that is already financially ailing itself, and one that depends on the Federal Treasury and hidden costs to the taxpayers to keep its own head above water?

The Interior Appropriations Subcommittee insists that this bailout plan requires no Federal expenditures. If all goes perfectly, that may turn out to be true. But this plan is like a blank check for Bonneville Power. If it needs more money for WPPSS, it can first raise rates to consumers until they will pay no more. Then, it can simply decline to repay the Treasury and reschedule its debts until BPA itself goes completely out of control.

The Interior Subcommittee's plan is no more than a gamble that BPA will suddenly learn how to keep WPPSS's house in order when it cannot even control its own finances. And if this plan is adopted, and BPA fails, all this will come falling down on—guess whom—the Federal Treasury and the taxpayers. Then we will be asked to bail out Bonneville Power, WPPSS, and the entire house of cards that the Interior Appropriations Subcommittee has constructed.

Mr. President, I ask that a letter I have received on this subject from a number of concerned groups, including the National Taxpayers' Union, Environmental Act, and the Natural Resources Defense Fund, be printed in the RECORD at this point. I also request that an article on Bonneville's role in the WPPSS crisis from the Wall Street Journal of February 16, 1983 be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEAR SENATOR: H.R. 3363, the "Department of the Interior and Related Agencies Appropriation Bill, 1984", is scheduled for floor consideration this week. We are deeply concerned that just last week a provision was added to this bill in Interior Appropriations Subcommittee which proposes fundamental changes in the financial structure of the Washington Public Power Supply System (WPPSS) and which obligates Bonneville Power Administration (BPA) revenues to secure financing for WPPSS 1, 2 and 3. No hearings have been held to examine this bail-out proposal.

Given the complexity of the financial arrangements surrounding these nuclear units and the potentially large impacts on bondholders, ratepayers, and taxpayers, we think it is extremely important that the implications of this proposal be thoroughly examined in hearings, before the proposal is brought to the floor for a vote. This is especially important because BPA's current debt obligations to the federal government are not being met. The potential cost to taxpayers and the U.S. Treasury should be thoroughly understood in advance.

As we understand it, the WPPSS provision makes the following changes:

1. Financing of WPPSS 1-3 is separated from WPPSS 4 and 5. Bonneville is given the authority to make direct payments to a new financial entity to be established under state law. The 23 utilities in the Northwest which constitute the WPPSS consortium will no longer be directly involved in financing WPPSS 1-3.

What are the implications of this change for ratepayers in the Northwest? Who will benefit and who will lose? Since 1979, Bonneville rates have increased 5-fold for utility customers and 12-fold for industrial customers. A substantial portion of BPA's current rates reflect the cost of debt service on WPPSS 1, 2 and 3. The impact of further increases in BPA rates on the economy of the Northwest should be carefully examined.

2. BPA is given authority to contract directly with the new financing entity. The new financing entity would issue bonds to complete WPPSS 2 and 3 and possibly WPPSS 1. These bonds would be secured by a contract between the new entity and BPA, which would "commit BPA to pay the principal, interest, and related costs on the new borrowings directly to the new entity, its obligees or their trustees" (Senate Report No. 98-184, p. 115).

What is the extent of the risk which is being assumed by BPA? How great are the potential financial obligations? In answering these questions, the financial condition of BPA must be considered. Bonneville has projected a revenue shortfall of $350 million for fiscal year 1983, and has been unable to meet its obligations to the U.S. Treasury for the last seven years. Further, when BPA issued its May report which justified mothballing WPPSS 3, it stated:

"Given these circumstances, BPA must husband its fiscal resources and critically review any increase in financial exposure. BPA's only choice is to reduce financial risk and not further encumber the revenue-generating capability of the Federal System in the current circumstances." ("Analysis of Resource Alternatives: Summary and Conclusions," Bonneville Power Administration, May 26, 1983, page 6.)

What changes have occurred in BPA's financial status since May to justify their incurring this new financial obligation?

What impact will this contract have on the Federal Treasury? In its report of May 26, 1983, Bonneville admitted that it was $180 million behind in its repayment to the U.S. Treasury for investment in the Northwest hydropower generation and transmission system. The Federal Energy Regulatory Commission has concluded that the Federal Treasury has already lost between $780 million and $1.4 billion because BPA has delayed its repayment of federal loans. The General Accounting Office has called this an "unsanctioned burden on Federal taxpayers." What is the potential for additional federal tax burdens arising from the WPPSS bail-out proposal?

3. Further remedy may be required to protect Federal investment in WPPSS. The report mentions that "this directive should not be interpreted to be the only clarification of authority or remedy needed to protect the Federal investment in the Federal base system resources" (Ibid. p. 116).

What other remedies are being referred to and why?

4. BPA is to consider "the need for and the marketability of the power."

How will future electricity sales affect the contract and the risk which BPA would assume in guaranteeing the bonds? In considering this question, it should be noted that the region currently has a substantial power surplus. Further, the Northwest Power Planning Council, in implementing the Northwest Power Act, has identified an additional 32 billion kwh's which can be made available annually at an average cost of less than 2.2 cents per kwh. We understand that EPA has recently cut back on its conservation programs because of the surplus power in the region. Energy conservation does not produce revenues which can be used to pay for expensive investments in nuclear plants. The financial obligation which EPA would incur under the Interior Appropriation provision may be incompatible with the requirements of the Northwest Power Act. This needs to be examined thoroughly.

The Interior Appropriations provision has not been subject to hearings where these potential problems can be aired. The implications of these financial arrangements for ratepayers in the Northwest and for federal taxpayers needs to be thoroughly understood and found to be acceptable before this provision is included as part of the Interior Appropriations bill.

Sincerely,

Ruth Caplan, Environmental Action; Alan Miller, Natural Resources Defense Fund; Brooks Yeager, Sierra Club; Jill Lancelot, National Taxpayers' Union; Michael Totten, Public Citizen's Critical Mass Energy Project; Fred Smith, Council for a Competitive Economy; Robert Percival, Environmental Defense Fund; Michael Faden, Union of Concerned Scientists; Elizabeth Raisbeck, Friends of the Earth; Keike Kehoe, Environmental Policy Center.

BONNEVILLE POWER IS CRITICIZED FOR ITS ROLE IN PLANNING NUCLEAR PLANTS FOR NORTHWEST

(By Norman Thorpe)

PORTLAND, ORE.—Bonneville Power Administration's efforts to promote five nuclear power plants have left the federal agency with rising electric rates and falling popularity.

In 1937, Bonneville was created to market electricity from federal dams being built on the Columbia River. For four decades it did so, selling cheap hydroelectric power at wholesale prices to public and private utilities and industry in the region.

In 1969, however, it plunged into much bigger stuff. Anticipating rapid growth in its Northwest market, Bonneville began promoting the construction of first three, and then five, nuclear power plants at a projected cost of $4.1 billion. The projects were to be financed and managed by Washington Public Power Supply System (WPPSS), a municipal corporation.

The first three plants were approved in 1969 by more than 100 of Bonneville's utility clients, and the final two in 1974 by 88 participating utilities. But as construction progressed in the 1970s, so did the difficulties: regulatory delays, construction snags, management problems, soaring inflation. Soon the projects were years behind schedule and costs had increased five-fold to about $23 billion.

BLAMING BONNEVILLE

Now critics say Bonneville created much of the snarl. They say the agency unwisely pushed the region's utilities into building the plants. They charge that Bonneville failed to oversee construction properly, causing costs to rise, and that it developed faulty energy-use forecasts by which construction of the plants was justified.

Construction of the last two plants, already under way, has been canceled, leaving thousands of construction workers laid off and participating utilities with nothing to show for $2.25 billion in bonds outstanding (some of the utilities say they can't pay on the bonds; others say they won't pay, spurring fears of default). Construction of a third plant, which was two-thirds completed, has been deferred. A fourth plant, also two-thirds completed, may also be suspended.

Over the last three years, Bonneville has raised its wholesale electric rates three times for a compounded 478 percent increase. Although retail rates locally are still below national averages, the sudden increase has spawned angry consumer groups and stunned local industries, particularly aluminum producers that have relied on the region's cheap hydroelectric power in the past. Alumax Inc., a joint venture of Amax Inc. and two Japanese companies, cited Bon-

neville's rate hikes last month when it shelved plans for a $660 million aluminum reduction plant it had hoped to build in Oregon.

Recently, 13 utilities filed two suits in the U.S. Court of Claims, charging that Bonneville coerced them into investing in the plants. The lawsuits, seeking hundreds of millions of dollars in damages, charge that Bonneville repeatedly threatened the utilities with a power shortfall if they didn't participate in the projects.

Bonneville officials "weren't satisfied with just being a marketing agency," contends Marc Sullivan, state coordinator for "Don't Bankrupt Washington," a group demanding voter approval for future public utility investment. They began "naked empire-building to control an ever-increasing amount of power," he says.

Rep. James Weaver, (D., Ore.), recently-named chairman of a House interior subcommittee overseeing Bonneville, says he believes the Columbia River region's utilities were "bamboozled—conned into going along" with Bonneville's grand plans.

It was in 1968 that Bonneville first warned of a future shortfall of hydroelectric capacity, and began promoting the first three nuclear plants. "We were out trying to convince each utility to sign up," recalls Raymond Foleen, former Bonneville deputy administrator, and since 1981 a consultant to some of the utilities.

MAKING CONSTRUCTION ATTRACTIVE

Bonneville made constructing the first three plants as attractive as possible. Although prohibited from building or owning plants itself, it arranged to own most of the electricity generated by the nuclear plants. The reason for doing so was clear: By mixing the expensive nuclear power with cheap hydroelectric power, Bonneville could pass a blended rate on to all its customers, much to the benefit of utilities participating in the nuclear project.

In addition, the agency pledged revenue from its electric power sales for repayment of the plants' construction debts, regardless of whether those plants ever were completed. The pledge made bond financing of the project more creditworthy, and it reduced interest rates. Although the arrangement went beyond Bonneville's original mandate, Congress approved it.

Still, construction of the three plants lagged. Costs increased to $12.5 billion from $3.1 billion. Bonneville blames most of the recent rate hikes on the projects, and critics blame the cost overruns on poor oversight by Bonneville. Even an outside study commissioned by Bonneville in 1978 concluded that the agency needed a stronger presence on the construction site.

GAO CONCLUSIONS

After the first three plants were begun, two more were proposed. Bonneville couldn't underwrite the construction of these (because of internal revenue code changes) but 88 local utilities did.

Last year, after construction on the last two plants was suspended, leaving $2.25 billion in debts, the General Accounting Office began looking into charges that Bonneville coerced the 88 utilities into participating in the debacle. The GAO concluded that Bonneville "supported" its customers' participation in the last two plants and "endorsed the need for additional generating units." The report noted that in 1974 Bonneville's administrator at the time, Donald Paul Hodel, wrote the regional utilities that "any utility which needs additional power resources in the mid-1980s will need to enter the participants' agreements with WPPSS at this time."

A spokesman for Mr. Hodel, who is now energy secretary, says he declines to comment on the Bonneville matter. Mr. Hodel previously has denied that Bonneville acted improperly or overstepped its authority.

FORECASTS QUESTIONED

Bonneville's current administrator, Peter T. Johnson, rejects charges of coercion, saying, "Bonneville was a player, but not the player that is being alleged." An indication that there wasn't coercion, he says, is that the projects were 30% oversubscribed.

A major question is whether the forecasts of energy demand that prompted the construction were grossly inaccurate. Bonneville says it isn't to blame for the estimates, noting it simply used forecasts of a utility association, which in turn collected forecasts from individual utilities.

However, the GAO notes that Bonneville helped many utilities prepare their individuals forecasts, and adds that Bonneville's input represented "about 40% of the demand projections." The GAO also states that Bonneville endorsed the forecast, reprinted it in Bonneville publications, and "publicly defended it against critics" who questioned the building spree.

Bonneville, says the GAO, even expressed concern that the forecast of future demand might be too low.

(During the following remarks by Mr. BYRD, Mr. SIMPSON assumed the chair.)

THE U.S. SENATE

SENATE COMMITTEES, 1845-1900

Mr. BYRD. Mr. President, those who love this magnificent Capitol Building and who are fascinated by its history—architectural and artistic as well as political—would find great pleasure and edification in reading Glenn Brown's two-volume *History of the United States Capitol.*[1] Published in 1900 and 1902 as Senate documents, these handsome portfolio volumes present the creation and evolution of the Capitol, with lavish use of architectural drawings and photographs. Volume 2 contains four remarkable photographs of the interiors of Senate committee rooms at the turn of the century. Although taken over eighty years ago, these pictures will be instantly familiar to those of us who frequent the same rooms today. Yet while the Brumidi frescoes and Minton tiles remain the same, a second look at these committee room photographs reveals many differences.

Take, for example, the photograph of the Naval and Philippine Committees room.[2] The very titles of these committees, which shared the same room, date the picture. Philippine affairs became a subject worthy of a standing committee's attention after the War of 1898, the Spanish-American War, when the United States acquired the Philippine Islands. In 1945 the Philippines received their independence, and shortly after that, the Naval Affairs Committee also ceased to exist as a separate entity, being merged into what is now the Armed Services Committee. In 1900, at the time this photograph was made, the Naval and Philippine Committees occupied what is now numbered room S-127 on the ground floor of the Capitol. Countless visitors to the Capitol in recent years have stopped to marvel at this beautiful room, which is made visible to the public via a glass paneled doorway.

In S-127 we find Constantino Brumidi's earliest ceiling and wall designs on the Senate side of the Capitol. Brumidi was hired in 1855 by General Montgomery C. Meigs, superintendent of construction for the Capitol extensions, who encouraged him to produce classical themes appropriate for a naval affairs committee room. When the room was opened in 1858, a sign informed visitors that: "The decorative paintings of this room are a specimen of the manner in which ancient Greeks and Romans ornamented their splendid buildings, some of which are still extant in the precious monuments of Pompeii." Indeed, looking around this room, which has been beautifully restored by the State Appropriations Committee, its most recent occupant, we can find Neptune, Lord and Ruler of the Sea; Nereus, known as the Old Man of the Sea whose fifty beautiful daughters became sea nymphs, and assorted other gods and goddesses identified with the sea.[3] These frescoes are even more visible today than they were eighty years ago, since in those days the committee room was crowded with bookcases, screens, and other room dividers. The old gas chandeliers pictured in the turn-of-the-century photograph were replaced during the early twentieth century by the large crystal chandeliers, modeled after those which hung in the White House. The Minton tiles have been carpeted over, to reduce the noise level. The committee table, which seated about nine, has been replaced with one large enough to seat the twenty-nine members of the Appropriations Committee.

Wandering about a nineteenth century committee room one would also find a roll-top, pigeon-hole desk, overstuffed leather chairs, a chaise lounge, and carved sideboards. The walls would be covered with bookcases, and the tables crowded with papers. These rooms had the appearance of a men's club, and looking at these photographs one can almost smell the cigar smoke that must have hung in the air. Writing in 1898, in his study of congressional committees, Lauros McConachie imagined how one of the Founding Fathers might have reacted to a committee room of that era: "He

[1] Footnotes at end of article.

would wonder at the silk gloves, the cork-screws, the quinine pills; he would shake his head over the Turkish rockers, the Smyrna and Axminister rugs, the antique oak French bevel mirrors. But the American of twentieth century aspirations, though to-day his pockets be empty as he treads Washington's beautiful halls, though he sees reflected in their golden domes the stintings of his coffee and sugar, rather condones and forgives it all in the proud sense that anything less were not worthy of a nation so rich and so grand—his own nation."

The committee rooms were the domain of their chairmen. Indeed, they were little fiefdoms. Committees functioned differently in the late nineteenth century than they do today. There were few formal meetings or hearings. The chairman would often informally poll members of the committee rather than call them together. That is done to a considerable extent today by some committees. The committee staff consisted of one clerk, and the committee room served as the office, the only office, of the chairman. It was well known among the Senators at the turn of the century that Senator Nelson Aldrich, chairman of the Finance Committee, would use the Finance Committee room for his afternoon nap, and woe be to the person who disturbed this powerful senator during his repose. Indeed, some committees apparently existed solely to give their chairmen a room in the Capitol and the use of space. For many years the Senate kept alive the Committee on Revolutionary Claims—long after there were any Revolutionary War claims to process—only to provide meeting space for the Senate minority (and for the most part this meant the Democratic senators). This was a relatively large and conveniently located room next to the first floor entrance in the Senate wing, a room currently known as the Family Dining Room.[4]

A great proliferation of Senate committees occurred during the late nineteenth century. In 1845 there were twenty-three committees of the Senate; by 1900 there were 55 standing committees, 8 select committees, and three joint committees. Among those committees established between 1845 and 1900 are such familiar names as Appropriations, Education and Labor (now Labor and Human Resources), and Rules, and many others that have faded into history, such as Cuban Relations, Epidemic Diseases, Expenditures of Public Money, Geological Survey, Pacific Railroad, Philippines, Transportation Routes to the Seaboard, and University of the United States.[5]

Because the work of the Senate committees became so integral to the legislative process and so important to the functioning of the federal government during the period, I am interrupting my chronological narrative of the history of the United States Senate to once again focus on the development of the committees. In a previous address, I spoke about the early history of Senate committees,[6] taking them from the first ad hoc committees through the creating of standing committees in 1816, and finally to the system adopted in 1845 by which the party caucuses would name their party members to the standing committees.

The preeminence of the party organizations in deciding committee assignments—a practice which continues today—ended years of debate over the subject. At first the Senate as a whole had voted for the members of each committee, then the vice president appointed senators to committees. Senator John Sevier, a Democrat from Arkansas, was floor leader for the difficult birth of this new system in December 1845. Senator Sidney Breese of Illinois had first moved that the president of the Senate make committee assignments, but this motion lost by one vote on December 4. Beginning on September 9, the Senate began voting on the membership of each committee. This was a tedious, troublesome process that continued through December 17. In some cases positions on committees went to minority members by a plurality rather than a majority vote. Motions were made to change these positions, and the names of committee members were listed in "a special arrangement," that is, distinguishing majority from minority members, which was adopted without dissent. It was at this point that leaders of the two parties agreed to present a common list, arranged in an acceptable manner to both the majority and minority.[7]

This system worked well so long as there were just two parties, the Whigs and the Democrats. But as I discussed in my addresses concerning the aftermath of the Mexican War, the two-party system had been placed in jeopardy due to growing dissatisfaction over the slavery issue. In 1847, Senator John P. Hale, a Free Soiler from New Hampshire, refused to associate himself with either party caucus and would not accept the insignificant committee assignments they offered him. A disgruntled lone member is hard to ignore in the Senate, and Hale made his protest known by objecting to the unanimous consent requests to suspend the rules and elect committee members in a group. Hale argued that he and Ohio Senator Salmon P. Chase had met in caucus and now constituted a third party, which should be consulted in making committee assignments. As a result of Hale's protest, Democratic and Whig leaders had to return to the tedious process of electing committee members individually by ballot. By December 1853, however, the parties had made a temporary peace with the independents, finding places for them on several committees.

By the mid-1850s, the Whig party was crumbling, and the ranks of the New Republican and American ("Know Nothing") parties were swelling. *The New York Times* reported that "the committee appointed by the Democratic caucus of the Senate to report a list of Senate committees to be voted for by the body have concluded that the Republicans and Know Nothings are "healthy organizations," sufficient at least to justify their sharing in the labors of the committee room."[8]

When the Republican party superseded the Whig party, its sectional nature posed some new problems for committee selection. Unlike the Democrats and Whigs, which spanned both North and South, the Republicans at first represented only Northern states. Thus, with committee assignments favoring the majority party, a disproportionate number of appointments and chairmanships went to southern senators.

At the opening of the 35th Congress, in December 1857, Senator Hannibal Hamlin objected to this arrangement. Hamlin, a Maine Democrat turned Republican, had studied the resolution assigning committee seats for that Congress and found it "unequal, unjust, and sectional." At that time, there were 62 members of the Senate, 30 from slave-holding states, and 32 from non-slave-holding states. There were 126 committee seats available for distribution on 22 committees. Senator Hamlin argued that "as representatives of equal states, we are entitled to an equal representation in the organization of this body." In fact, the slave-holding states had been assigned 67 seats to 59 for the free states. Sixteen of the 22 committee chairmen came from slave-holding states. The South held a majority on 13 of the committees. The nine committees on which free-state senators constituted the majority included such relatively unimportant committees as Enrolled Bills, Audit and Control, and Contingent Expenses of the Senate.

"Here we have the Committee on Foreign Relations, that shapes and directs the foreign policy of the Government," said Hamlin. "We have the Committee on Military Affairs, that looks to the Army; we have the Committee on Naval Affairs, that has charge of the Navy; we have a Committee on the Judiciary, which gives constructions to laws and shapes the policy (so far as the legislature may) of the Government; we find them all constituted of a majority of men who represent the slave-holding states." The Committee on Commerce, Hamlin pointed out, had a majority of southern members and no representation at

all from the Northwest, from the Great Lakes region. The industrial Northeast was in the minority on the Patents Committee, even though that section produced by far the greater number of patent applications.

"The majority of the Senate," Hamlin contended, "are entitled to a control in the organization of the committees. But it is this sectional manner of which we have the right to complain."

Other Republicans, in 1857, protested that the *Congressional Globe* had inaccurately claimed that "the caucus of all parties in the Senate" had agreed to the list of committee memberships. In fact, there had been no Republican caucus. The Democratic caucus had met, chosen its own members, and left blanks on the list for the Republicans to fill in.

Democratic Senator James Bayard of Delaware rose to respond to Hamlin's accusations. "What is the first principle that enters into the organization of committees, and always must, in every political body?" Bayard asked. He then provided the answer to his own question: "The political party having the majority will necessarily control all the committees of the body, because they are responsible, as a party, for the business of the body."

There was no deliberate discrimination against any section, Bayard insisted. The disproportions emerged only because the Republicans were a sectional party and because two-thirds of the Democratic senators came from the South. The Democratic majority had continued the practice of not displacing incumbent members of committees, to ensure experience and continuity. The Democrats had sought the best qualified members of the majority to fill new vacancies. Other than that, Bayard saw no way for the majority party to proceed.

Other Democrats pointed out that the Republicans followed the same practices when they controlled the House of Representatives during the 34th Congress. Thus, Hamlin's objections were overruled when the Senate voted 30 to 19 to accept the committee memberships as presented by the Democratic caucus.[9]

Within four years, the political situation had reversed itself completely. Following Lincoln's election, the southern states had seceded, taking with them the greater part of the Democratic majority in the Senate. For the first time, the Republicans controlled this body. As I discussed in my statements on the Civil War Senate, Republicans selected committee members who were just as disproportionately sectional, although now the Northeast and Northwest dominated the committees. We can be sure that Hannibal Hamlin watched these developments with pleasure from his new vantage point as vice president under Lincoln and president of the Senate.

Now it was time for the Democrats to complain. This place will always be the same, in many ways. Democratic Senator Willard Saulsbury of Delaware insisted that it was "nothing but justice that the minority should be consulted and have the privilege of selecting their members upon the committee."[10] Senator Lazarus Powell, a Democrat from Kentucky, recalled that the custom had been for the majority caucus to make a list assigning their members to committees and to leave blanks for the minority to fill in their own members. In the face of these protests, Senator John P. Hale, now a member of the Republican majority and chairman of the Committee on Naval Affairs, rose to respond.

"I think if there be a member here who has a right to speak of the experience of being in a minority on this floor, I am that man."

Hale recalled how he had been omitted altogether from the committee lists at first, and how he was at last placed "at the tail end" of the Committee on Private Land Claims. "I could not render much service" on that committee, Hale reported. "A good many of those claims were found to rest in old Spanish grants; and, not being entirely conversant with the language, I had to trust to other agencies to find out what was intended. But I want to say, sir, that a claim to anything of this sort comes with an ill grace from a party who thus ruled the Senate when they had the power."[11] In a sense, Hale was reminding senators to beware what precedents they set while in the majority, for they surely would reap them when they became the minority. How reminiscent of current events!

Thus, at the war's end, as the southern senators returned and the Democratic ranks grew, the Republicans saw the wisdom of reestablishing the old practice of allowing each party to choose its own committee members.

The late nineteenth century was also a period when party discipline became an issue that involved the Senate committees. Once a member was assigned to a committee, he remained on the committee unless he voluntarily withdrew, rising through its ranks according to seniority.

By the way, it has taken me 25 years to become the second in rank in the minority on the Appropriations Committee. So it takes time. Others have risen more quickly on other committees.

But, as the parties developed and attempted to enforce their collective will on individual members, there were some dramatic exceptions to the seniority rule. In a previous address, I mentioned that Senator Stephen A. Douglas of Illinois was removed as chairman of the Senate Committee on Territories in 1859. Douglas had broken with President James Buchanan over the organization of the Kansas territory. As the break between the senator and the president widened, Douglas found himself losing control of his committee. Although he was reelected chairman in December of 1857, the majority of the committee was stacked with Buchanan supporters. After Douglas' reelection in 1858, following his much publicized debates with Abraham Lincoln, he was seen as an even greater threat to the administration, and a concerted effort was begun to remove him from the chairmanship, his power base in the Senate.

When the Democratic caucus met on December 9, 1858, it was an open secret in Washington that Douglas would be dumped. As a result, many Democratic members boycotted the caucus rather than engage in the controversy. Thirty-one of the 44 Democratic senators attended the caucus. Only seven of those who attended supported Douglas. After the caucus voted to remove the Territories chairman, Senator Robert Toombs of Georgia stormed out of the meeting calling the action vindictive and unworthy of the caucus. But the demotion of Douglas did not have its desired effect. Instead, it made him a political martyr. When Douglas returned to the Senate chamber on January 10, 1859, he was greeted by applause from the gallery and studied coolness from his colleagues on the floor. And in 1860, Douglas received the Democratic nomination for president (although the decision of Southern Democrats to nominate their own candidate, John C. Breckenridge, split the party and ensured Lincoln's election).[12]

Douglas was one of only two senators ever to be removed against their will as committee chairmen. The other was Charles Sumner, who in 1871 lost his chairmanship of the Foreign Relations Committee. Like Douglas, Sumner has been a prominent subject of my speeches on Senate history. Entering the Senate as a Free Soil Democrat, he switched allegiance to the new Republican party and became perhaps the best known Senate advocate of emancipation and civil rights for the freedman. When the Republicans became the majority party in the Senate in 1861, Sumner assumed the chairmanship of the Foreign Relations Committee, a post he held for the next decade, exerting tremendous influence over the nation's foreign affairs. Sumner's relations with the Grant administration were poor from the start, perhaps because the imperious senator felt that he, rather than Ulysses Grant, should have been his party's candidate for president, and most certainly because Sumner believed he understood foreign affairs

better than did the president, as do some Senators today.

The president and the Foreign Relations Committee chairman struggled over many issues, but none so passionately as Grant's proposal to annex Santo Domingo. Sumner succeeded in defeating the president's plans, but Grant retaliated by marshalling his forces in the Senate against Sumner. At the start of the 42nd Congress in March 1871, the Republican Committee on Committees met to make committee appointments. According to Sumner's biographer, Professor David Donald, "The five-man Republican group consisted of two friends of Sumner's, Sherman of Ohio and Morrill of Vermont, and of two enemies, Pool of North Carolina, a scalawag who was under Grant's thumb, and Nye of Nevada, for whose vulgarity and coarse anecdotes Sumner had showed marked distaste. Howe of Wisconsin, once an admirer of Summer but more recently an intimate of /Secretary of State Hamilton/ Fish, had the casting vote." The committee voted 3 to 2 to remove Sumner altogether from the Foreign Relations Committee and place him instead as chairman of the new Committee on Privileges and Elections. Twice the Republican caucus voted on the recommendation; and each time Sumner was defeated. On the Senate floor, the anti-Sumner forces held firm. "For the first time in ten years," wrote Professor Donald, "Sumner had no control over foreign policy." [13]

The removal of Douglas and Sumner did not shake the seniority system, which grew even stronger over the following decades. But while there were no other cases of chairmen being deposed, the party caucus occasionally exercised its prerogatives in making committee assignments. For example, let me cite the rather bizarre story of the Appropriations Committee chairmanship in the post-Civil War era. In 1867 the appropriations functions of the Senate Finance Committee were split off to form a separate standing committee. Senator Lot Morrill of Maine became the first chairman of the Appropriations Committee. When Morrill left the Senate in 1869, Senator William Fessenden, also of Maine, succeeded to the chairmanship, but Fessenden died suddenly a few months later. Next in line among the majority members of the committee was Senator Henry Wilson of Massachusetts. The Republican caucus, however, skipped over Wilson and other ranking Republicans and awarded the chairmanship back to Senator Morrill, who had been appointed to fill Fessenden's seat. Apparently the caucus felt that the state of Maine had been unfairly deprived of the chairmanship, and that Morrill, although then technically a freshman, deserved to head the committee again.

When illness forced Senator Morrill to relinquish the chairmanship of the Appropriations Committee, the next in seniority, Cornelius—what a name. It was my name. That is a separate story, however. I would have never made it to the Senate with that name. Of course, they would have nicknamed me "Corny." And secondly, my name being Sale, they would have said I was a "Senator for sale," so I do not think I would have made it. That is a whole separate story. I will talk about that some other day—Cole of California, moved up. Two years later, Cole was defeated for reelection. At that point Senator William Sprague of Rhode Island stood next in line according to seniority. Senator Sprague was a man with a seemingly unlimited political future. A handsome and wealthy textile manufacturer, he was married to one of the most beautiful women in Washington, Kate Chase Sprague, the daughter of Chief Justice Salmon P. Chase. Unfortunately, Sprague's private life was crashing down upon him. His mills teetered on the brink of bankruptcy. And his wife was—now, get this—making little effort to hide her affair with Senator Roscoe Conkling. During March and April 1869 these pressures apparently became too much for Sprague and he lost control of himself, baring his soul to the world in a strange series of speeches on the Senate floor. They began mildly enough but grew increasingly frenzied. Sprague attacked other senators, banker—echoes of yesterday—lawyers, judges, women in the gallery, and the social elite in his home state. His shocked party considered him a traitor in the ranks, perhaps deranged, and certainly unfit to head the important Appropriations Committee. Thus, once again, Senator Lot Morrill was selected to head the committee, which he did from 1873 to 1876, when he resigned from the Senate to become Secretary of the Treasury.[14]

In the 1870s, Senate Republicans had to contend with a splinter group of "Liberal Republicans" who broke with the administration of President Ulysses S. Grant. In December 1870 the "regular" Republicans denied the Liberal Republican Senator Carl Schurz of Missouri the chairmanship of the Committee on Retrenchment, which he was due by seniority. Then came the presidential election of 1872, when Liberal Republicans deserted Grant's candidacy in favor of the fusion ticket headed by Horace Greeley.

I am trying to remember an interesting quotation by Greeley. He said:

> Fame is a vapor, popularity an accident, Riches take wings. Those who cheer today may curse tomorrow. Only one thing endures—character.

Clark Clifford taught me that quotation several years ago.

Following the election, the Republican caucus refused to give any committee assignments to eight Liberal Republican senators.

Can you imagine that? I say to the Senator from Wyoming (Mr. Simpson).

Carl Schurz, Charles Sumner, Lyman Trumbull, Thomas Tipton, Reuben Fenton, Joseph West, and Morgan Hamilton. "The Democrats," wrote Prof. Clarence Berdahl, "did the unusually generous thing of offering most of these men committee places from their own meager allotment as the minority party, even at the cost of sacrificing some regular Democrats." Thus, Schurz received the only Democratic place on the Foreign Relations Committee, Trumbull on the Privileges and Elections Committee, and so on. "This was done," Professor Berdahl noted, "in spite of emphatic declarations by these Liberal Republican senators that they would not consider themselves Democrats and would not be bound by the caucus of either party, but would act independently and in accordance with their own best judgment on every question."[15]

Mr. President, I have been speaking about the organizational problems of the committees during this era, but I do not wish to minimize the work of these committees. Indeed, it was during the late nineteenth century that the truism developed that the real work of the Senate was done in committee. In my speeches on the Civil War, I talked of the burst of significant domestic legislation enacted by those wartime Congresses. With the Lincoln administration preoccupied by military matters, this legislation was the product of the hard-working committees of the Senate and House. Similarly, Reconstruction legislation first emerged from committee.

Although any senator could introduce legislation, and the Senate could debate such legislation without referring it to committee, committee referrals had in fact become a matter of course. Professor Michael Les Benedict has noted that twenty-three of the twenty-four major Reconstruction bills and resolutions that the Senate enacted between 1863 and 1869 were first reported from Senate or Joint Committees. In fact, Professor Benedict was able to trace the decline in influence of Radical senators by examining the shift in committee jurisdiction over Reconstruction matters. During the 38th Congress, Senator Ben Wade's Committee on Territories held jurisdiction over Reconstruction, and it was from this committee that the Wade-Davis Bill was reported. At the same time, Senator Charles Sumner chaired the Select Committee on Slavery and Freedmen, which reported out the Freedman's Bureau legislation. After 1865, however, the conservative

Judiciary Committee took over Reconstruction matters, sharing jurisdiction not with the Committee on Territories but with a new Joint Committee on Reconstruction. Members of the Committee on Territories and the Select Committee on Slavery and Freedmen were passed over by the Republican caucus when appointments to the new Joint Committee were made. Conservative Republicans were now firmly in control of Reconstruction matters, by dint of their majority on the committees to which such legislation was referred.[16]

Jurisdiction remained critical to determining power in the Senate, particularly when it related to money matters. Without question, the two most powerful committees of the late nineteenth century were the committees on Finance and Appropriations. The former handled all tariff legislation, at a time when most government revenues were raised from tariff duties, and when tariff rates influenced the entire American economy. The latter decided the level of funding of all legislation. The chairmen of these two committees were generally their party's leaders in caucus and on the Senate floor.

Power is rarely acquired or held without struggle. From time to time, members of the other committees sought to curtail the powers of the Appropriations Committee. In 1884 there was a major effort to remove from Appropriations' jurisdiction all appropriations for rivers and harbors, post-roads, and the District of Columbia, and to refer them instead to the Committees on Internal Improvements, Post-Offices and Post-Roads, and District of Columbia, respectively. Other motions were made to refer agricultural appropriations to the Agriculture Committee, and military and naval appropriations to the Committee on Military Affairs and Naval Affairs.

"This is the beginning of a raid on the Appropriations Committee that if allowed to proceed cannot be resisted," warned Senator James Beck of Kentucky, an Appropriations Committee member, "because each committee will claim that it has special knowledge and special information that the Committee on Appropriations does not have and cannot have, because of the intimate relations of the various committees with the different Departments; and it will end in abolishing the Committee on Appropriations substantially. Perhaps that may be a good thing to do. It is a good way to get money out of the Treasury; there is no doubt about that." [17]

Such arguments appealed to the frugality of the late nineteenth century senators, and the raid on the Appropriations Committee was defeated. The House, in 1885, followed a different course, stripping its Appropriations Committee of jurisdiction over all but six of the fourteen general bills, referring the others to the appropriate legislative committees. Proponents argued that the new arrangement would further efforts to economize the government and would reduce the practice of grafting legislation onto appropriations bills. They were also responding to complaints from the executive departments, who objected to the detailed itemization of appropriations, restrictions on their power to transfer funds, requirements for returning unexpended funds to the Treasury, forbidding of contract obligations in excess of appropriations, and other requirements set by the congressional appropriations committees. Although this movement was derailed in 1884, the Senate eventually followed the House's action. In 1899, the Senate removed rivers and harbors, military, Indian affairs, and Post Office appropriations from the Senate Appropriations Committee, which continued to handle appropriations on Deficiency, Diplomatic, and Consular, District of Columbia, Fortifications, Legislative, and Sundry Civil, as its six subcommittees were named. This time, the Senate adopted the changes by unanimous consent, without debate.[18] Not until 1922 was the Appropriations Committee's full jurisdiction restored.

Mr. President, I have concentrated on the Appropriations Committee in part because it is impossible to cover the activities of every Senate committee during this long period, and also because the debate in 1884 provides us with some revealing insights into how the Senate committee system operated in the late nineteenth century. Take, for example, the remarks of Senator George Vest of Missouri. Senator Vest talked of the special relationships that developed between members of committees and the departments whose areas they oversaw and for which they considered legislation, "I assert," said Senator Vest, "what the experience of every Senator will confirm to be the truth, that just so soon as a committee is appointed, for instance in regard to the Navy, in regard to military affairs, or upon fiscal questions, that very instant the most intimate and, I must admit, proper relations begin between that particular department and the senators on that committee . . . If one of my brother Senators today wanted a favor from the Navy Department of the Government, to whom would he naturally apply? It would be the head of the Committee on Naval Affairs." The result, Vest argued, was a rivalry between the committees to secure the biggest appropriations for their own areas of specialization. Things here do not change very much.
